Dear Ms. Lyle:

In response to your qualifications request for the professional Architectural and Engineering Design services, the E.T. Boggess, Architect, Inc. team is pleased to submit information regarding our experience and specialized expertise. Our team is comprised of highly qualified firms versed in:

- Design Services with the WV National Guard
- Public Safety and Emergency Management facility planning and design
- Public Safety and Emergency Management operations
- Public Safety communications systems, technology and design
- Design of Data Centers, Law Enforcement, and similar Mission-Critical facilities, inclusive of IT Infrastructure
- Experience in secure, hardened essential & mission-critical facilities
- Experience with the planning and design of Essential Facilities in Coastal Regions

The new Joint Emergency Operations Center (EOC) will be the central point of control and operations for emergency communications, and emergency management/response for the State and other agencies as may be required by the incident. The new center will support an intensity of use by dedicated staff unlike almost any other type of facility. With staff performing often difficult, stressful tasks over extended shifts, issues including the quality and functionality of the work environment, security, integration of technology, and facility resiliency to external stress shall be critical to ultimate effectiveness.

The ETB Team stresses a focus on client issues and mutually defined project objectives. Through this focus, we can assure the WV National Guard that needs and project issues will be clearly identified and addressed through an engaged, interactive programming, design, and construction process. Our design process will be conducted with an attention to detail, creative problem solving and passion towards project success. We value this opportunity to serve you and look forward to personally presenting our credentials.

Sincerely,

A handwritten signature in black ink, appearing to read 'Todd Boggess', is written over the typed name.

Todd Boggess, AIA, NCARB, Architect  
President
