Kidron provides its ACMT easily reconfigurable refrigerated units. Remote electronic controls provide in-product protection.

How Kidron innovation can improve distribution efficiency

For more than a half century, Kidron has focused on designing and building the very best refrigerated distribution trailers and truck bodies. Industry-focused designs and advantages in step with the needs of demanding multi-stop, multi-temp routes.

Engineered to help control operating and labor costs, and to hold desired temperatures longer, Emperor trailers are built to provide years and years of valuable service.

Emperor refrigerated distribution trailers continue that tradition of quality while reflecting Kidron's knowledge of timely industry needs. Available in popular lengths from 28 to 53 feet, each trailer is light in weight, yet strong.

Emperor trailers are also equipped with a host of standard advantages to make operation and maintenance easy. And, they can be equipped with the industry's widest and most innovative collection of options to meet unique and specific needs on demanding multi-temp, multi-stop routes.

Build the right Emperor trailer for your distribution requirements

Select the features, sizes and advantages you need to optimize your distribution profitability. Start with the right length - up to 53 feet. The right insulation package - either 2, 3, 4 or 5 inches of non-CFC insulation, foamed in place using Kidron's proprietary process. Pick any of the popular mechanical refrigerated units and, if needed, add an evaporator with recessed refrigeration lines.

Ultra-thermal walls

Choose 2, 3, 4 or 5 inches of foamed in place, non-CFC insulation. Using Kidron's proprietary process, the insulation is carefully installed between glassboard inner walls and aluminum outer walls. Units are scanned with an infrared camera to eliminate voids. This process sets the standard for the industry and assures optimum product protection.

Air and electrical box

Electrical components are easy to access for routine maintenance. The design also easily accommodates future electrical accessories.

Suspension/running gear

Top quality suspensions are designed for either single or tandem axle trailers. Specify either spring suspension or air ride.

Front corner casting built to last

Designed to resist trailer damage from common obstructions, the Emperor's aluminum front corner casting features high-visibility lighting. The casting also protects the corner marker light from damage. Tree branch deflectors on the front corner post are an option.

Bottom rail adds strength

The Emperor's unique exterior bottom rail complements and even enhances the trailer's strength. A full 12 inches wide, the rail provides for extra rivets to attach posts and understructure.

Strong upper coupler assembly

A new concept in steel upper coupler design is strong enough to handle the rigors of rough roads or frequent yard movements. The one-piece, high-strength steel, full-width approach plate and pickup plate maintain fifth-wheel lubrication and build strength.

Pressure-Pillow Seal™ Doors
