DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

Addendum # 1

Item 1: The contractor will have 90 days from the date of the Notice to Proceed to complete construction activities on the project. The \$250 per day liquidated damage clause will be in effect after the 90 days. However, the total performance period will be 365 days from the date of the Notice to Proceed for invoicing purposes.

Item 2: For ditches receiving grout, the riprap stone required shall have a D50 of 12 inches, minimum diameter of 6 inches, and a maximum diameter of 18 inches. Pieces smaller than the above minimum sizes shall not exceed 15% by weight. Any stone considered for use must first be visually approved by the Engineer. Riprap stone shall be as nearly rectangular in section as is practicable. All stone shall be well-graded and obtained from an Engineer approved source.

Item 3: Grouting, where required to be placed on riprap, shall be applied as soon as possible after placement of riprap. The stone shall be thoroughly wet immediately before grout is applied. As soon as grout is deposited on the surface, it shall be thoroughly worked into the joints to achieve 100 percent penetration. The stones shall then be brushed so that their top surfaces are exposed. The grout shall be protected from running water to prevent damage until sufficiently cured. The riprap shall be free of dirt, sticks, limbs, leaves, and all other organic material or trash.

Item 4: Q) If the ditches have been excavated to bedrock, do we still have to place riprap?

A) Please refer to Section 7.3.1 of the Specifications. The channels and ditches shall be constructed to the approximate line, grade, and templates as shown on the plans or as directed by the Engineer. Sections of ditches that are cut to rock shall not require riprap but shall be paid under the appropriate sized riprap or grouted riprap ditch.

Item 5: Q) Can we use limestone or sandstone riprap lining for the ditches?

A) Hard, durable stone meeting the requirements outlined in Section 7 of the Specifications may be used.

Item 6: Q) Can we drill and shoot?

A) All associated blasting operations shall be conducted in strict accordance with applicable State and Federal laws relating to rock blasting and the storage and use of explosives. The Contractor shall maintain and keep in full force and effect blasting insurance to protect and indemnify the Owner and/or its agents or representative from claims for damages and shall defend all suits at law. The Contractor shall submit to the Owner a request for permission to blast rock, a reclamation plan for the area to

be disturbed and proof of blasting insurance coverage prior to initiating blasting operations. Failure to obtain approval for blasting prior to initiating the work will result in no payment for items utilizing this rock.

Item 7: In reference to Note No. 6 on Plan Sheet 3 – The minimum required capacity for the sediment trap is 11,160 cubic feet. Specific dimensions can vary. The trap will be backfilled after the refuse has been re-graded, soil covered, and seeded.

Item 8: There is not a specific bid item for filling/re-grading the small cracks near the top of the refuse pile. This work will be incidental to Bid Item 8.1, Unclassified Excavation.
