PARALLEL ARM ROTARY CUTTERS

Hydraulic Driven Parallel Arm Rotary Cutter.

Designed to "reach out" and cut along roadsides, over guard rails, down ditchbanks and along side ponds, the Parallel Arm Rotary Cutter has features not found on your typical boom cutter.

First of all, it has a constant attitude! When the two cylinders that operate the two arm sections are activated, the attitude of the deck does not change; thanks to the parallel arm design. Lift the cutter head up, in or out to negotiate an obstacle, and your cutter deck position does not change; set the cutter head down at the same attitude as it was prior to the obstacle. This makes your work efficient!

The hydraulic breakaway feature of the Parallel Arm Rotary Cutter is also not found on your standard boom cutter. The cutter deck is restored to its original position with the help of a hydraulic cylinder. The cutter deck can also swing rearward enabling you to mow into a tight corner, again putting it back to its original setting with the hydraulic cylinder.

The cutter deck is operated by a hydraulic motor, which is run by a pump powered by the PTO of the tractor utilizing the tractor hydraulics, or an optional self contained system. A flow control valve is standard equipment to protect the hydraulic system of the cutter from the high GPM many of the newer tractors now utilize. The 35 gallon oil reservoir keeps the unit running cool, and the in-line filter continually cleans the oil each time it is returned to the reservoir.

The optional electronic package enables each of the arm and deck hydraulic cylinders to be activated by a toggle switch. You get instant response from the cylinder, which can be very difficult with the tractor's hydraulic controls.

Moving this cutter up and around obstacles, in and out next to water or roadsides is what this cutter is all about. Save time and work efficiently with the boom mower that does more!

Optional gauge wheel deck allows the cutter to float over undulations without having to constantly monitor terrain conditions.
