3.4 Sampling and Testing:

Sampling and testing for quality of all items furnished in this contract will be the responsibility of the WVDOH. Minimum frequency of sampling and testing for quality on all materials (other than those sources already covered by the WVDOH’s “commercial source” approval) will be at least one sample every six days of shipment (or if tested during production, at least one sample every six days of production).

Other minimum frequencies shall be in accordance with the following:

<u>Property</u>	<u>Frequency</u>
Gradation - Delivered Material	One sample per each day of shipment or if tested during production, one sample per each day of production. See Note 1 below.
Gradation -	(A-1 Source) One sample per each week of

contained therein shall have its degree of nonconformance determined as set forth below.

When a sub-lot of material is to have its price adjusted, the percentage point difference between the nonconforming test value and the specification limit shall be determined for each sieve size determined to be nonconforming, and this value shall be multiplied by its appropriate multiplication factor as set forth in Table 1.

TABLE 1

<u>NONCONFORMING SIEVE SIZE</u>	<u>MULTIPLICATION FACTOR</u>

The total measure of nonconformance of an individual sub lot is the sum of all non-conformances on the various sieve sizes of that sub-lot. In no case, however, shall a sub-lot of material have its price adjusted more than once, and the first adjustment which is determined shall apply.

When the total degree of nonconformance has been established and it is 12 or less, the material will be paid for at an adjusted contract price as specified in Table 2.

TABLE 2

*The WVDOH will make a special evaluation of the material and determine the appropriate action.

In the event a Vendor delivers a specific quantity of material from a stockpile, and said quantity is less than the total quantity contained in the stockpile and it has been determined from his certified test data that a nonconforming sub-lot(s) is contained in said stockpile, the price reduction shall be calculated for the specific quantity as follows:

shipment per MP 700.00.52; or if tested during production, one sample per each day of production. See Note 1 below.
(A-2 Source) One sample per 250 tons shipped and a minimum of one per week shipment.

Moisture Content

See Note 2 below.

All samples taken by the Vendor shall be by a Certified Aggregate Sampler or Certified Aggregate Inspector. Tests shall be performed by a Certified Aggregate Inspector.

NOTE 1: The Vendor will be responsible for providing test results attesting to the gradation of materials delivered. Gradation results from the production source will be acceptable.

NOTE 2: In the event visual inspection of the aggregate indicates excess or unusual moisture beyond that normally expected in the aggregate, the WVDOH reserves the right to determine the moisture content by standard methods. If this becomes necessary, the net weight of the portion represented will be adjusted utilizing the test results obtained by the WVDOH in accordance with MP 700.00.22. Items OA, OB, PA and PB (Abrasives) will be considered fine aggregate outlined in MP 700.00.22.

3.5 Acceptance Plan:

Material failing to comply with the quality requirements will not be accepted. Acceptance for gradation shall be on the basis of test results, provided and certified by the Vendor to be true test results and representative of the material supplied to the WVDOH, on consecutive random samples from a lot. A lot shall consist of a quantity of material represented by an average value (not to exceed 5 sub-lots). A sub-lot shall consist of the quantity of material represented by a single gradation test. In the case where only one sample is taken to represent the total quantity, the sub-lot and lot will be considered the same. Frequency of sampling and testing shall be in accordance with the Vendor's quality control plan outlined in MP 700.00.51. The Vendor shall provide the gradation test results to the WVDOH within 72 hours.

Gradation test results shall be averaged in accordance with MP 300.00.51. When the average falls outside the applicable limits, the lot of material represented thereby will be considered nonconforming to the extent that the last of its sub-lots is nonconforming. When a lot of material is nonconforming, then the last sub-lot

REQUEST FOR QUOTATION
6613C001 Stone, Aggregate and Cinders

The percent price reduction shall be determined as set forth above for the nonconforming sub-lot. The quantity represented by the nonconforming sub-lot shall then be calculated as a percent of the total (total material contained in the stockpile). To determine the price reduction on the specific quantity delivered, multiply the percent of nonconforming material contained in the stockpile by the quantity delivered, and reduce this quantity by the percent price reduction as determined.

Example: If it has been determined that a stockpile of 100 tons contains 10 percent failing material, and said material is to have its price reduced by 4 percent, then the actual quantity delivered, say 15 tons, will be multiplied by 0.10 (10 percent failing material) which equals 1.5 tons. These 1.5 tons will thus have its price reduced by 4 percent. The remaining 13.5 tons will be paid for at full contract price.

$$TD \left[1 - \frac{PQn}{100Qt} \right] = AP \text{ (price to be paid after adjustment)}$$

WHERE

- T = tonnage delivered
- P = percent price reduction
- D = cost per ton
- Qn = quantity of nonconforming sub-lot(s)
- Qt = quantity of total stockpile

If two (2) sub-lots are nonconforming within the stockpile, calculate each separately for the adjusted payment on the quantity delivered (as above). Add these two adjusted payments together and subtract from the total the price to be paid before adjustment for tonnage delivered (TD). If three (3) sub-lots are nonconforming, calculate each separately and subtract twice the price to be paid before adjustment for tonnage delivered, and so on. Example:

$$(AP1 + AP2) - TD = \text{Final price to be paid after adjustments}$$

OR

$$(AP1 + AP2 + AP3) - 2 TD = \text{Final price to be paid after adjustments}$$

WHERE:

- AP = price to be paid after initial adjustment for one nonconforming sub-lot determined by the above equation.
- T = tonnage delivered
- D = cost per ton

6613C001 Stone, Aggregate and Cinders

In the event material is delivered from a continuous stockpile, that is, a stockpile which is continuously being replenished while also having material removed for these applications, certification shall be based on the shipment samples.

3.6 Hauling Aggregate to State Projects by Contractor:

The most direct suitable route from the Vendor's aggregate storage site to the midpoint of the project site will be determined by the WVDOH and used to compute haul distance for the purpose of determining low bid, and also for the purpose of determining payment.

In-state delivery route mileage will be calculated by the WVDOH from the Vendor's storage site to the midpoint of the WVDOH project job site by utilizing the WVDOH Straight Line Diagrams. These Diagrams for WV Primary Routes and WV Secondary Routes are available in each WVDOH office and the WVDOH Central Office. The WVDOH will determine the route to be taken due to bridge and/or road restrictions.

Out-of-state delivery route mileage will be calculated by the WVDOH utilizing "MapQuest" or a similar source for routing from the Vendor's storage site to the WV State line at which time, the Straight Line Diagrams will be sourced to the WVDOH project job site.

The Contractor shall deposit aggregates at the project site at the locations and in the manner directed by the WVDOH. This may include tailgating the aggregate into an aggregate spreader or onto a roadway, or dumping the aggregate into a stockpile.

**3.7 Weighing Materials Delivered by Modes
Of Transportation Other than Trucks:**

Materials delivered to the designated site by barge, or other non-truck modes shall have their weight determined by a means acceptable to the WVDOH, and the weights of materials so shipped shall be certified, by the Vendor or his authorized agent, to be correct.

The minimum barge delivery requested will be approximately 6,500 tons per the order. When barge delivery is required contract item will be ordered in 1500 ton increments.

3.8 Bid Instructions:

Exhibit A, Pricing Schedule is comprised of two (2) schedules. Vendors may bid any or all items on the Pricing Pages.

REQUEST FOR QUOTATION
6613C001 Stone, Aggregate and Cinders

Exhibit A.1 Pricing Schedule is F.O.B. Vendor's Storage Site, Contract Items A-W and AA. The Vendor shall supply pickup pricing on Exhibit A.1 Pricing Schedule for WVDOH pickup which shall include the loading of WVDOH trucks by Vendor.

Exhibit A.2 Pricing Schedule is F.O.B. Division's Storage Site. Contract Item X and Y from Exhibit A.2 shall provide the vendor's haul costs for the first ton-mile and each additional ton mile. The vendor shall have the capacity to deliver a minimum quantity of 300 tons per day to any designated site when directed by the WVDOH District Engineer/Manager.

Exhibit A.1 Pricing Schedule: the vendor shall provide the information requested as item a) Source of Material and item b) Exact Location of Vendor's Storage Site(s) for Limestone, Sandstone, Gravel, Sand, Blast Furnace Slag and Steel Slag. Vendor shall provide the information requested as item c) Source of Material and item d) Exact Location of Vendor's Storage Site(s) for Cinders. Failure to provide the required information may be sufficient grounds to invalidate the bid.

4. CONTRACT AWARD:

4.1 Contract Award: The Contract is intended to provide Agencies with a purchase price on all Desired Items. A Contract shall be awarded to all Vendors that provide the Desired Items meeting the required specifications on Exhibit A.1 Pricing Pages. Qualified vendors will be awarded a Contract on Exhibit A.2 Pricing Pages to establish a unit price for those locations and items for which their bid is low based on cost, per cubic yard.

Bids will be evaluated by the WVDOH on the basis of cost per cubic yard F.O.B. at the designated site. Cost per cubic yard will be determined by multiplying the Vendor's per ton bid price in dollars by a "Tons per cubic yard factor" which is listed in the following table:

Aggregate – Tons per Cubic Yard Factors

PURCHASING AFFIDAVIT

West Virginia Code §5A-3-10a states: No contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and the debt owed is an amount greater than one thousand dollars in the aggregate.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. "Political subdivision" means any county commission; municipality; county board of education; any instrumentality established by a county or municipality; any separate corporation or instrumentality established by one or more counties or municipalities, as permitted by law; or any public body charged by law with the performance of a government function or whose jurisdiction is coextensive with one or more counties or municipalities. "Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

EXCEPTION: The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.
