**P. M. MAINTENANCE SCHEDULE
GENERATOR AND FIRE PUMP ENGINES**

ANNUALLY:

1. FUEL SYSTEM

- A. Change fuel filter elements (element included).
- B. Check fuel tanks for water.
- C. General inspection of all components.
- D. Check fuel pressure at cylinder head (if applicable).
- E. Check fuel level in main fuel tank.
- F. Check operation of day tank.
- G. Fuel sample analysis available on diesel units (at additional charge).

2. LUBRICATING SYSTEM

- A. Change oil in engine (oil included).
- B. Change oil filter (filter element(s) included).
- C. Check and record engine oil pressure.
- D. Check engine for oil leaks.
- E. Take oil sample for analysis.

3. COOLING SYSTEM

- A. Check engine water pump.
- B. Check all cooling system hoses.
- C. Check and clean all louvers.
- D. Check coolant level.
- E. Check and record freeze protection and add if needed (makeup antifreeze furnished).
- F. Check condition of belts.
- G. Check for adequate fresh air to engine.
- H. Check condition of fan hub.
- I. Check operation of water jacket heater.
- J. Check and record operating temperature. Verify that operating temperature is in the correct range.
- K. Coolant sample analysis available (at additional charge).

4. EXHAUST SYSTEM

- A. Check condition of mufflers, exhaust lines, supports and connections.
- B. Check condition of turbocharger (if applicable).
- C. Check for exhaust leaks.

ANNUALLY:

5. AIR INTAKE SYSTEM

- A. Check air inlet restriction.
- B. Check exhaust restriction.
- C. Clean crankcase breather pads (if applicable).
- D. Check all air system piping.
- E. Check condition of dry type air cleaner element(s) or service oil bath air cleaner (oil is included).

6. CONTROL SYSTEM

- A. Check operation of all gauges and meters.
- B. Clean control cabinet.
- C. Check operation of all controls.
- D. Check shut down system for correct operation.

7. ENGINE ELECTRICAL STARTING SYSTEM

- A. Check condition of batteries.
- B. Clean batteries and cables.
- C. Add distilled water to maintain proper electrolyte level (included).
- D. Check operation of float charger.
- E. Check battery voltage.
- F. Lubricate starter motor (if accessible).

8. GENERATOR

- A. Check condition of bearing.
- B. Check main breaker for operation (if applicable).
- C. Check cables from generator to transfer switch (if accessible).
- D. Visually check transfer switch for proper condition and operation.
- E. Clean interior of transfer switch enclosure as necessary.

9. GENERAL

- A. Check for any unusual condition of vibration, deterioration, leakage, high surface temperature or noise.
- B. Run generator under emergency conditions if possible. If not possible, run generator under test conditions.
- C. Record all readings and present to customer.
- D. Leave control panel in automatic mode.
- E. Notify customer if additional service work is required.

**P. M. MAINTENANCE SCHEDULE
GENERATOR AND FIRE PUMP ENGINES**

QUARTERLY & SEMI-ANNUALLY:

1. **FUEL SYSTEM**
 - A. Drain water and sediment from fuel filters.
 - B. Check fuel level in day tank.
 - C. General inspection of all components.

2. **LUBRICATING SYSTEM**
 - A. Check oil level (fill to proper level).
 - B. Check and record engine oil pressure.
 - C. Check engine for oil leaks.

3. **COOLING SYSTEM**
 - A. Check all cooling system hoses.
 - B. Check coolant level.
 - C. Check freeze protection and add if needed (included).
 - D. Check condition of belts.
 - E. Check operation of water jacket heater.

4. **EXHAUST SYSTEM**
 - A. Check for exhaust leaks.
 - B. Check for operation of rain cap.
 - C. Check for tightness of bolts.

5. **AIR INTAKE SYSTEM**
 - A. Check air inlet piping.
 - B. Check condition of air filter element (or oil bath).

6. **CONTROL SYSTEM**
 - A. Check operation of all gauges and meters.
 - B. Check operation of all controls.
 - C. Check shutdown systems.

7. **ENGINE ELECTRICAL STARTING SYSTEM**
 - A. Clean batteries and cables.
 - B. Add distilled water to maintain proper electrolyte level.
 - C. Check operation of float charger.
 - D. Check and record battery voltage.

QUARTERLY & SEMI-ANNUALLY:

8. GENERATOR

- A. Check main circuit breaker for operation (if applicable).
- B. Visually check transfer switch for proper condition and operation.

9. GENERAL

- A. Check for any unusual condition of vibration, deterioration, leakage, high surface temperature or noise.
- B. Run generator under emergency conditions if possible; if not possible, run generator under test conditions.
- C. Record all readings and present to customer.
- D. Leave control panel in automatic mode.
- E. Notify customer if additional service work is required.

QUARTERLY & SEMI-ANNUALLY:

8. GENERATOR

- A. Check main circuit breaker for operation (if applicable).
- B. Visually check transfer switch for proper condition and operation.

9. GENERAL

- A. Check for any unusual condition of vibration, deterioration, leakage, high surface temperature or noise.
- B. Run generator under emergency conditions if possible; if not possible, run generator under test conditions.
- C. Record all readings and present to customer.
- D. Leave control panel in automatic mode.
- E. Notify customer if additional service work is required.

RFQ No. DPS1417

STATE OF WEST VIRGINIA
Purchasing Division
PURCHASING AFFIDAVIT

COPY

MANDATE: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceed five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

VENDOR PREFERENCE CERTIFICATE

Certification and application* is hereby made for Preference in accordance with West Virginia Code, §5A-3-37. (Does not apply to construction contracts). West Virginia Code, §5A-3-37, provides an opportunity for qualifying vendors to request (at the time of bid) preference for their residency status. Such preference is an evaluation method only and will be applied only to the cost bid in accordance with the West Virginia Code. This certificate for application is to be used to request such preference. The Purchasing Division will make the determination of the Resident Vendor Preference, if applicable.

- 1. Application is made for 2.5% resident vendor preference for the reason checked: Bidder is an individual resident vendor and has resided continuously in West Virginia for four (4) years immediately preceding the date of this certification; or, Bidder is a partnership, association or corporation resident vendor and has maintained its headquarters or principal place of business continuously in West Virginia for four (4) years immediately preceding the date of this certification; or 80% of the ownership interest of Bidder is held by another individual, partnership, association or corporation resident vendor who has maintained its headquarters or principal place of business continuously in West Virginia for four (4) years immediately preceding the date of this certification; or, Bidder is a nonresident vendor which has an affiliate or subsidiary which employs a minimum of one hundred state residents and which has maintained its headquarters or principal place of business within West Virginia continuously for the four (4) years immediately preceding the date of this certification; or,
2. Application is made for 2.5% resident vendor preference for the reason checked: Bidder is a resident vendor who certifies that, during the life of the contract, on average at least 75% of the employees working on the project being bid are residents of West Virginia who have resided in the state continuously for the two years immediately preceding submission of this bid; or,
3. Application is made for 2.5% resident vendor preference for the reason checked: Bidder is a nonresident vendor employing a minimum of one hundred state residents or is a nonresident vendor with an affiliate or subsidiary which maintains its headquarters or principal place of business within West Virginia employing a minimum of one hundred state residents who certifies that, during the life of the contract, on average at least 75% of the employees or Bidder's affiliate's or subsidiary's employees are residents of West Virginia who have resided in the state continuously for the two years immediately preceding submission of this bid; or,
4. Application is made for 5% resident vendor preference for the reason checked: Bidder meets either the requirement of both subdivisions (1) and (2) or subdivision (1) and (3) as stated above; or,
5. Application is made for 3.5% resident vendor preference who is a veteran for the reason checked: Bidder is an individual resident vendor who is a veteran of the United States armed forces, the reserves or the National Guard and has resided in West Virginia continuously for the four years immediately preceding the date on which the bid is submitted; or,
6. Application is made for 3.5% resident vendor preference who is a veteran for the reason checked: Bidder is a resident vendor who is a veteran of the United States armed forces, the reserves or the National Guard, if, for purposes of producing or distributing the commodities or completing the project which is the subject of the vendor's bid and continuously over the entire term of the project, on average at least seventy-five percent of the vendor's employees are residents of West Virginia who have resided in the state continuously for the two immediately preceding years.
7. Application is made for preference as a non-resident small, women- and minority-owned business, in accordance with West Virginia Code §5A-3-59 and West Virginia Code of State Rules. Bidder has been or expects to be approved prior to contract award by the Purchasing Division as a certified small, women- and minority-owned business.

Bidder understands if the Secretary of Revenue determines that a Bidder receiving preference has failed to continue to meet the requirements for such preference, the Secretary may order the Director of Purchasing to: (a) reject the bid; or (b) assess a penalty against such Bidder in an amount not to exceed 5% of the bid amount and that such penalty will be paid to the contracting agency or deducted from any unpaid balance on the contract or purchase order.

By submission of this certificate, Bidder agrees to disclose any reasonably requested information to the Purchasing Division and authorizes the Department of Revenue to disclose to the Director of Purchasing appropriate information verifying that Bidder has paid the required business taxes, provided that such information does not contain the amounts of taxes paid nor any other information deemed by the Tax Commissioner to be confidential.

Under penalty of law for false swearing (West Virginia Code, §61-5-3), Bidder hereby certifies that this certificate is true and accurate in all respects; and that if a contract is issued to Bidder and if anything contained within this certificate changes during the term of the contract, Bidder will notify the Purchasing Division in writing immediately.

SERVICE CAPABILITIES

Clarke Power Generation, Inc. has fourteen full-time factory trained service technicians who are capable of working on generators and automatic transfer switches. These service technicians are available 24 hours a day, 365 days a year, to handle emergency situations. The generator department operates a parts depot with parts available 24/7. Please call us toll-free at 866-334-4367.

While we have 29 and growing brick and mortar locations; in general, our Service Technicians work remotely from their own base location. Our Technicians are equipped with fully stocked service trucks with tools, equipment, and parts that are prepared to handle the most common generator issues; with easy access to more complex equipment and parts should the need arise.

Our generator service manager always takes the initial service call -- even in after-hours situations. He assesses the customer's problem and then dispatches the service technician he feels is most qualified to handle the problem. When our service manager is on vacation, our lead technician normally takes the first call and then handles the situation the same as the service manager would, dispatching the closest qualified technician to the site. In an emergency situation, Clarke Power Generation should have a technician at the site within a two-hour timeframe. This would apply whether the call comes in during normal business hours or after-hours. In all of Clarke's branches we have technicians trained to work on all makes and models of generators, and are authorized John Deere and Clarke (under warranty) Technicians.

SERVICE TECHNICIAN LOCATIONS INCLUDE:

- Greensboro, NC
- Wilmington, NC
- Charlotte, NC
- Marion, NC
- Raleigh, NC
- Nashville, TN
- Memphis, TN
- St. Louis, MO
- Rock Island, IL
- Indianapolis, IN
- Cincinnati, OH
- Dallas, TX

Company History

CLARKE POWER GENERATION, INC. builds a complete line of quality standby and prime powered generator sets. Throughout the years, we have enhanced our knowledge of the emergency power industry through market leadership, experience, and training. Clarke has gained an understanding of both distribution and OEM business over the past 47 years and positioned itself to become a leader in the generator market.

We built and sold our first diesel generator set in 1964 as Clarke GM Diesel, a distributor of Detroit Diesel engines operating out of 4 branches. From that humble beginning, covering portions of Indiana, Kentucky, and Ohio, we have both produced and distributed a full line of generators and products from basic open generator sets to fully enclosed, walk around, and sound attenuated units. Expansions from our original footprint have added territories in Arkansas, Illinois, Mississippi, Missouri, North Carolina, and Tennessee along with the development of a full line of emergency standby diesel fire pump drivers.

It is through the diesel fire pump line that we evolved into a full line generator set manufacturer. Clarke Fire Protection Products, Inc. began manufacturing fire pump drivers in 1964 and is now the worldwide leader in the industry. This same engineering and manufacturing knowledge is what we bring to our generator set customers. We deliver every order with a quality built, fully engineered, competitive product that will give you, the customer, the comfort when emergencies arise. And when an interruption in operation occurs, our existing service network is ready to serve your needs.

Our parent company, Clarke Power Services, Inc. has strategically placed service facilities throughout our region which are staffed for emergency repair work 24 hours a day, 7 days a week. This coverage will keep your unit running for a long life with our Preventative Maintenance services or the emergency repair that is occasionally required.

Our goal is to provide the customer with a quality power solution that provides for their needs within budget and service support to keep each unit operational for years to come.
