**Vendor Submitted Questions and Agency Responses**  
**03/09/2015**

Q.1. In reviewing the specs, we notice that there are 6 servers being requested but only 2 processors. Are you asking for two processors per server?

**A.1. We are asking for 2 servers with 2 processors each. Specification 4.1.1 should read a quantity of 2 instead of 6.**

Q.2. Then being requested is 32 memory modules. There are only 24 slots per server, therefore what is being requested here as well?

**A.2. We are requesting 16 of the 16 GB memory modules for each server, for a total of 32 memory modules (total of 512 GB in the 2 servers)**

HP will not allow these as is as they are NOT valid configuration. Please clarify what it is that the agency wants. HP would not be able to deliver this as it is requested.

Q.3. My engineers have asked for validation for the quantities for the components for the servers. They that they may be in error. The HP Servers are listed with their components below them. The engineers (two different individuals) would just ask if the respective components quantities are correct

**A.3. Hopefully the quantity corrections above will resolve this question.**
