Neither the Vendor, nor any employees or subcontractors of the Vendor, shall be deemed to be employees of the State for any purpose whatsoever. Vendor shall be exclusively responsible for payment of employees and contractors for all wages and salaries, taxes, withholding payments, penalties, fees, fringe benefits, professional liability insurance premiums, contributions to insurance and pension, or other deferred compensation plans, including but

not limited to, Workers' Compensation and Social Security obligations, licensing fees, etc. and the filing of all necessary documents, forms, and returns pertinent to all of the foregoing. The service provider is responsible for any costs associated with the fingerprint-based state and federal background inquiry.

After the contract for such services has been approved, but before any such employees are permitted to be on the grounds or in the buildings of the Capitol complex or have access to sensitive or critical information, the service provider shall submit a list of all persons who will be physically present and working at the Capitol complex to the Director of the Division of Protective Services for purposes of verifying compliance with this provision.

The State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

42. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
- c. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater.

For the purposes of this section, the cost is the value of the steel product as delivered to the project; or

- d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

43. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products.

This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

**Holly River State Park
Buried Primary Replacement**

ADDENDUM #01- 12/23/2014

The following items and answers are to clarify the drawings and specifications related to the project and are part of the project documents. Note the following prior to bidding:

1. (Clarification) The contract period is 180 Days.

Project Timing: It is anticipated that the issuance of a PO will occur on or around 10Feb 2015. Based on this, the Owner intends that the contractor will have from award of PO and notice to proceed, until May 15, 2014 to complete the BASE BID WORK of the project. The contractor will man the project according and may need more than one "crew" working on portions of the system concurrently. Ultimately, the Owner and contractor will work together to work out a schedule that allows the work to be performed in a reasonable time with the minimum disruption to the park.

The Park will hold from booking, enough of the campground area to allow the contractor to have one campground area at a time; to perform the ALTERNATES WORK (as many as are accepted) after May 15 2015. The contractor must have all accepted alternates substantially completed in 150 days. Project Final completion will be in 180 days.

2. (Clarification) The Following will be provided on both the line and load side of each phase of the medium voltage switch located at the start of the primary service: "Chirp-Alert High Voltage Alert Device" Mfr= Becker SMC PO Box 880, Barboursville WV 25504 SMCElectrical.com . The devices must be installed by Eaton Engineering Services Group to maintain the switch warranty.
3. (Clarification) Testing of all HV cables, with splices installed, will be performed prior to cables being energized. The bidder needs to plan for testing according to the phase plan for implementing the project. It is highly unlikely that the cabling and devices can be tested in one single test, at a minimum the cabling will have to be tested as each campground is brought onto the new cabling. As each campground has its transformers replaced, it will be placed in service on the new feeder cable. The existing feeder cable MUST remain in service until the end of the project to service the "upper" park facilities. Testing will be by a 3rd party certified testing organization.
4. (Clarification) There is no "rock clause" in this project. The previous project found that, except for around 12 large rocks that were some 4' x 10' x 3', the soil was trenchable with an excavator, and the rock was rippable in the approximately 8,800 feet of trenching that was performed in the previous emergency repair mentioned at the pre-bid meeting. The large rocks were removed with an excavator and spoiled on site.
5. (Clarification) This confirms that the existing ("can or vault") transformers are suspected to be PCB. The contractor will test them for PCBs and if they test positive above the threshold level of detection, will be disposed of by incineration with full manifests and death documentation provided to the Owner prior to release of final payment. BioChem Testing in Hurricane, WV

has performed testing previously and is one possible testing agency; thought others may certainly be used if a certified lab.

6. (Clarification) This confirms that the pad mounted transformers installed in the summer of 2013 in the campground will be removed and transported to a storage site, near the maintenance building, designated by the Owner.
7. (Clarification) Contractor will provide portable toilets for workers. Lay down space is available within the campground as designated by the Park staff.
8. Contractor will provide and install 200 AMP NON load break caps, parking bushings, and proper terminations for all instances where the work removes a transformer from the existing feeder; to permit the existing feeder to safely remain in service. The caps, bushings, and termination will be protected from damage by plywood boxes or other means suitable to the Engineer.
9. (Clarification Section 25 0613) All terminations will be performed by a WV licensed Journeyman or Master Electrician who has performed HV cable installation and termination within the last 5 years. The contractor will, as part of the contract, provide a class for all personnel performing high voltage terminations. The class will be given by the specified termination manufacturers (either 3M or Elastimold) at a location TBD. The class will be witnessed by the Engineer. Each person attending the class will perform one termination, with each termination type performed at least once, in a "hands on" environment using the precise terminations to be used on the project to ensure the personnel are current in their skill set. If any terminations are performed by personnel not attending the witnessed class, the terminations and cabling in question will be replaced at no cost to the Owner.

The following questions have been asked:

Question1: Please refer to "General Electrical Notes #5" - Trees are very dense in several locations and it would not be possible to install underground without disturbing tree roots - even if locating the underground at the center of the road. Will exceptions be permitted in these cases?

Answer 1: First and foremost, Holly River is a state park and the trees are an integral part of the park experience. As such; the removal of trees will be very limited. It is a requirement of this project to adjust the routing of the conduits around trees, holding to drip lines or the common line between trees to the extent possible. While the Owner realizes some trees and root systems will likely be damaged or have to be removed to accomplish the project, the contractor is NOT free to cut or significantly damage trees without advance approval from the Engineer and Owner. All routes will be staked out by the contractor, and approved by the Engineer and Owner, prior to the start of excavation. The bidders are encouraged to visit the site to verify the routings and bid in accordance with this requirement.

A chain trencher is an acceptable method of excavation for the alternates on the low voltage campground work; however, the conduit depth must be maintained at all times. The use of a chain trencher is solely at the contractors risk and discretion.

The scale of the drawings is approximate, diagrammatic in nature, and based on available data; not a formal survey. The Bidder is solely responsible for verifying all the distances of conduit and cable/wire runs for the project, prior to bidding.

Question 2: Rather than using a cast-in-place concrete pad foundation, would a "ground sleeve" be permitted to allow for additional conduit space? The allowed conduit area will be very congested if the loop feed is installed. Also, this would also make the installation quicker due to not having to pour the concrete pad on site. (Information about ground sleeves can be found at <http://www.hubbellpowersystems.com/enclosures/ground-sleeve/gel-coated-fiberglass/default.asp>).

Answer 2: No, The conduits will be stubbed up as indicated in the project documents.

Question 3: Would the ditch excavation process permit a 12" or 16" bucket rather than a 28" width? This would create less disturbance to the ditch area and result in less cost for reclamation.

Answer 3: The basis was that a 24" bucket will produce a 28" ditch. A 24" bucket is acceptable. Also, conduit will be bent using bent fittings or other approved industry standard method, and may not be bent using a torch. All portions of excavation subject to mowing will be initially cleared of rock and a final rock removal will be performed one week prior to final completion. The Park staff will indicate a spoil site for the contractor's use. Work includes final seeding and straw, unless otherwise indicated Penn State Mix will be used for re-seeding.

Question 4: Does the park have lodging accommodations available on site for our line crews to stay during the construction period?

Answer 4: The park system providing accommodations is not part of the terms and conditions of this project. There may be accommodations available though the details of any such financial arrangement are solely between the bidders and the park superintendent; who is under NO obligation to provide accommodations. The decision lies solely with the superintendent. Bidders are encouraged to have this discussion prior to bidding as the cabins in question may not have water for some of the contract period. The superintendent can speak to that more precisely than can be included in the addendum.

All herein becomes part of the scope project documents and the scope of project work. Contractor is to acknowledge this as Addendum #1 on the Bid Form.

Respectfully submitted this 23rd day of December 2014.
