WALK-O₂-BOUT®

Portable Oxygen, Air And Heliox Dispensing Systems

Fast, easy and always ready when you are.

Walk-O₂-Bout® all-in-one lightweight cylinder,
handle and regulator — in six different models.
You'll find it with Airgas.

The Airgas Walk-O₂-Bout® family of products is an innovative solution to issues that first responders and healthcare practitioners face when providing respiratory care to patients. Walk-O₂-Bout lightweight cylinders with built-in regulator, 50 psi DISS outlet and wide permanent handles make it easy to lift and carry anywhere. The optional swivel oxygen port with 90 degrees of range provides increased movement. A streamlined design that incorporates everything you need into one integrated easy-to-carry unit... you'll find it with us.

The Walk-O₂-Bout® family of products:

FOUR OXYGEN MODELS TO MEET YOUR NEEDS

- Walk-O₂-Bout Oxygen®
- Walk-O₂-Bout for First Responders has the gauge, flow setting and oxygen outlet port all on the same side for easy administration allows for easier monitoring. A short handle allows for easier use on most stretchers, inside ambulances and other tight quarters.
- Walk-O₂-Bout Pediatric with flow settings of 0-4 lpm
- Walk-O₂-Bout MRI Compatible with non-magnetic handle, screws and springs, an aluminum cylinder, and regulator head that meets MRI compatibility tests.

CONVENIENCE YOU CAN COUNT ON

When your patients need oxygen, air or heliox, they need it now. The Walk-O₂-Bout system from Airgas helps you get oxygen, air or heliox faster than any other dispensing equipment. It's always ready when you are.

QUALITY YOU CAN FEEL

Rugged construction allows the regulator to take some bumps and the heavy-duty handle provides extra protection. An easy-to-read gauge allows for convenient monitoring of oxygen, air, and heliox contents. The complete Walk-O₂-Bout family offers expanded flow control range from 0 to 25 lpm (pediatric oxygen model 0-4 lpm) for maximum versatility.

A COST SAVINGS THAT ADDS UP

Because the regulator is built into the cylinder in all the Walk-O₂-Bout products, there's no need to inventory, repair or replace regulators. This reduces maintenance and administrative costs, and ensures that every cylinder you buy is usable and profitable.

THE RIGHT DELIVERY SYSTEM FOR YOU

Whether you're buying oxygen, air or heliox for a hospital or for emergency medical care, the Walk-O₂-Bout family of products was designed with you and your patients in mind. Walk-O₂-Bout products are the ultimate portable system, offering heavy-duty durability in a lightweight package. The unique streamlined design is safe, convenient, and allows for easy cleaning to remove blood borne pathogens.

SAFETY THAT'S BUILT IN

The same integrated design features that make the Walk-O₂-Bout products so simple to use also creates the safest oxygen and heliox dispensing systems on the market. Within the regulator, Airgas employs NASA-recommended material designed to perform safely in a pure oxygen environment and a built-in relief valve that increases safety for storing and daily operation. A sturdy stainless steel (non magnetic for the MRI model) handle and no removable parts help users to transport the cylinder safely. **Every Airgas Walk-O-Bout has the built in patented ESSEX Flame Arrestor** (Designed to stop, limit or protect potentially combustible mixtures from igniting.)

Convenient gauge with heavy-duty protector
Reliable operation and at-a-glance verification of contents.

50 psi DISS connection
Can be used to power a portable pressure-type ventilator.

Sturdy brass construction
Stands up to heavy-duty service in hospitals and in the field.

Precise flow with expanded range
Set and maintain precise flow rates quickly and easily.

Low-profile stainless steel handle
Permanently attached, with a large grasping space for easier lifting and safer transporting.

The built-in regulator means you never have to search for a missing regulator. An optional oxygen outlet port swivels a full 90 degrees for increased range of movement and comfort. The second port connection (DISS) can be used to power a portable pressure type ventilator and on the heliox model drive a nebulizer at a flow rate of 11 lpm.

Optional port swivels for increased movement.

Built-in relief valve
The Walk-O2-Bout regulator incorporates a rupture disk relief valve for added safety.

Walk-O₂-Bout for First Responders has the gauge, flow setting, and oxygen outlet port all on the same side which allows for easier monitoring of administration of oxygen.

Walk-O ₂ -Bout Pediatric flow setting increments:					
0.03 lpm	0.06 lpm	0.12 lpm	0.25 lpm	0.50 lpm	0.75 lpm
1.00 lpm	1.50 lpm	2.00 lpm	3.00 lpm	4.00 lpm	

Walk-O₂-Bout MRI Compatible –
Non magnetic handle, screws and springs with an aluminum cylinder. The unit has met MRI compatibility requirements.

ALSO AVAILABLE IN HELIOX AND AIR

- Walk-O₂-Bout Heliox system delivers 80/20 and 70/30 helium and oxygen mixtures.
- Walk-O₂-Bout MRI Compatible Air with non-magnetic handle, screws and springs, an aluminum cylinder, and regulator head that meets MRI compatibility tests.
