Engagement Structure

PROJECT DESCRIPTION

The services described herein detail the Professional Services to be performed by AdvizeX Technologies for the West Virginia Office of Technology (hereafter, “WVOT” or “Customer”). AdvizeX Technologies has proposed a new storage solution for encrypted data in response to WVOT CRFQ ISC1600000009. The solution consists of an EMC VNX5200 (Unified) to provide both block and file storage. AdvizeX will install and configure one EMC VNX5200 as specified in the “VNX Installation Services” section below. AdvizeX will provision new block and file storage as scoped in the “VNX Block and File Deployment Services” section.

At the conclusion of the project, AdvizeX will deliver “**As-Built**” **documentation** for all devices installed and configuration performed as part of this Statement of Work.

SCOPE

AdvizeX will perform the project activities defined below:

VNX5200 Installation Services:

- **Site preparation and installation prerequisites** – AdvizeX will provide equipment installation prerequisites to Customer. Included are the amount of rack space, power, network interfaces, and environmental requirements to support one EMC VNX5200 array. The storage array will be installed at Customer’s data center in “Building 6” the Charleston, WV (25305-0135) campus.
- **Storage array installation and initialization** – The array will be installed into an EMC supported cabinet, labeled, and initialized. Management software will be configured and any remediation work will be completed to ensure each array is in compliance with the EMC support matrix. The EMC Encryption Suite software will be licensed and configured by AdvizeX on the VNX5200 controllers.
- **Storage pool and Automated Tiering configuration** – Storage pools will be configured on the array for block and file access and EMC FAST rules will be set based on Customer requirements and EMC best practices.
- **Support configuration** – EMC call home support and email notifications will be configured as directed by Customer.

VNX5200 Block and File Deployment Services:

- **Host compatibility review** – AdvizeX will produce a report analyzing compatibility for up to three hosts for block access using EMC’s reporting tools to ensure host compatibility with the EMC support matrix. Customer is responsible for executing the EMCGrab utility on each host to collect the data required to produce the report. All host remediation required to correct issues listed in reports provided is the responsibility of the Customer.

- **Block storage deployment** – Following successful confirmation of host compatibility above, AdvizeX will configure the new VNX5200 array for Fibre Channel block access. AdvizeX will attach the storage array to Customer's existing Brocade 5100 series SAN switches. AdvizeX will add zoning configuration as required. Up to three hosts will be provisioned with up to three new LUNs by AdvizeX and device availability will be validated with Customer. Customer is responsible for installation of multi-pathing software for block hosts. Customer is responsible for all other host configuration required to access the new storage devices.
- **File storage deployment** – To demonstrate the process to Customer; one new shared folder server will be configured for file sharing protocols by AdvizeX. AdvizeX will configure one new CIFS share and availability will be validated with Customer. Customer will be responsible for mapping personal computers and other devices to the CIFS share. Creation of additional file servers and shares will be the responsibility of Customer.

Documentation and Knowledge Transfer Services:

- **Documentation delivery and informal knowledge transfer** – Handover of all “As-Built” documentation as well as execution of an informal training session (up to four hours) with Customer's IT group on the new configurations which were constructed and delivered as part of this statement of work. Please note that this knowledge transfer does not replace formal vendor education. AdvizeX recommends formal EMC education.

DELIVERABLES

The deliverables associated with this engagement are:

- **“As-Built” documentation** for the solution listed in the “Project Description” section

EXCLUSIONS

The following elements are excluded from the services proposed in this Statement of Work:

- Remediation of host Operating Systems, server hardware, server cabling, connectivity, configuration, or performance issues.
- Code updates to existing Storage Area Network switch fabric(s).
- Any storage or data migration for existing Customer hosts, volumes, file servers, or shares.
- Any host, database, or application analysis, testing, or data validation associated with data migration.
- Configuration of backup recovery solutions.
- Replication array or device seeding, re-configuration after implementation, or relocation.
- Any replication automation, application aware/consistent replication management, or configuration of replication with any management product (excluding the on-array replication management tools).
- Troubleshooting or correction of DNS, Active Directory, or LDAP configuration or performance issues.

- Development of custom solutions, including scripting, without limitation, including any modification of Customer's application software.
- Any additional hardware/software or configuration thereof not listed in this document.
- Development or architectural design beyond what is required to perform the work detailed in the Project Details for this project.
- Construction or delivery of any education curriculum.
- Any responsibility for the ongoing configuration, management, or maintenance of any hardware, software, or systems involved in this Statement of Work.

If any of the above elements must later be brought into the scope of this project, the Change Management Process will be invoked to address the required changes.

Governance

TERMS AND CONDITIONS

AdvizeX and WVOT acknowledge and agree to the following terms and conditions:

- If a Master Services Agreement already exists between WVOT and AdvizeX, the terms of the MSA supersede and enhance the terms below.
- This proposal contains proprietary information of WVOT and AdvizeX and may not be reproduced or shared without the advance written consent of both parties.
- This proposal has been prepared based on information supplied by WVOT and on our observations, and contains our entire proposal. No representations, undertakings, agreements, terms, or conditions exist other than those contained in this proposal.
- Any errors or omissions in this document should be deemed mechanical and will be corrected upon discovery.
- This proposal and associated price quotation are valid for a period of 30 days from the date on listed on this document's cover page.
- Resources utilized in the delivery of this engagement are restricted to standard business hours (8am-5pm EST, 40 hours per week) unless agreed to in advance by both parties.
- AdvizeX personnel are entitled to time off in compliance with AdvizeX company policies. All such leave will be communicated to WVOT in advance whenever possible and will be coordinated to minimize any potential impact on this engagement.
- A signed Statement of Work and validated method of payment are required prior to project commencement.
- AdvizeX requires a minimum of ten business days from the signature of this Statement of Work to staff the project.

RESPONSIBILITIES

AdvizeX and WVOT agree to the following definition of responsibilities:

- AdvizeX will provide a project manager to act as the single point-of-contact for coordination of any activities required to successfully complete this engagement.
- WVOT will provide a single point-of-contact to facilitate this engagement that is responsible for providing timely feedback to requests made during the project.
- WVOT acknowledges that timely provision of and access to staff, facilities, data, documentation, and infrastructure is required to complete this engagement within the specified timeframe.
- WVOT is responsible for the accuracy and completeness of data provided to AdvizeX to deliver this engagement. AdvizeX may review or validate said information, but is not responsible for gathering it unless defined in the Project Scope.
- WVOT is responsible for the coordination of any outages required to complete the services detailed in this Statement of Work, including change management approval.
- WVOT is responsible for the full and complete backups of their data, and AdvizeX shall not be held liable for any data loss that may occur.

COMPLETION CRITERIA

Unless specifically stated otherwise, acceptance of the services and any materials provided hereunder will occur upon the completion of the applicable portion of the services. AdvizeX uses a standard Milestone Completion Form (MCF) as the basis for all services revenue recognition. When AdvizeX has fulfilled the criteria associated with a milestone or timeframe as defined in the Investment of this document, AdvizeX shall send WVOT a MCF indicating project phase completion and requesting acceptance and signoff.

If WVOT is satisfied with the performance for that phase, signoff will indicate acceptance. If WVOT responds in writing that AdvizeX has not satisfactorily completed the phase, the parties will meet and use good faith to resolve difficulties.

The receipt of WVOT signoff or the lack of written notice to AdvizeX of any issues with work performed within five business days of receipt of a MCF will be deemed as acceptance of the services performed. AdvizeX will recognize revenue upon delivery of a signed MCF or five business days after customer has received the MCF.

CHANGE MANAGEMENT PROCESS

AdvizeX and WVOT agree to use industry standard change management processes to provide documentation and control for any changes to this Statement of Work.

Investment

The total fixed-fee investment for the services defined in this Statement of Work is **\$9,700**. This cost **includes** any associated travel costs that may be incurred in the delivery of these services.

AdvizeX shall recognize project completion based on the schedule defined below. The fees for this project are based upon the scope of work and efforts detailed in this document. AdvizeX will bill Customer based on the investment schedule defined below.

WVOT understands and agrees that the services proposed in this Statement of Work are provided on a fixed price basis for the scope of work outlined in this document.

INVESTMENT SCHEDULE:

#	Milestone/Event	Amount
1	Project Kick-off	\$ 2,700.00
2	Installation of storage array	\$ 5,000.00
3	Delivery of “ As-Built ” documentation	\$ 2,000.00
	Total:	\$9,700.00

Statement of Work Acceptance

All parties hereby acknowledge that they have read and understand this Statement of Work and all attachments thereof, and agree to all terms and conditions stated herein.
