FLAIL MOWERS

LOOK YOUR BEST.

STYLE AND SUBSTANCE.

At Diamond Mowers, we know that nothing looks better than a job done right. Our Flail Mowers are built right here, in the USA. They're the toughest, safest, and most reliable in the market, and you won't find a more precise piece of heavy-duty equipment, anywhere. Demand the Best. DEMAND DIAMOND.

LOOKING GOOD.

Some jobs call for a little something special. The Diamond Flail Mower will give you a cut that's manicured and clean. The Flail's ground roller maintains a consistent cutting height, and protects the flail by keeping it out of the ground. The balanced cutter shaft makes for extra smooth operation. You'll also have the ability to flip between clockwise and counterclockwise rotation to match the unique cutting conditions of just about any job, while maintaining the precision that the Diamond Flail is known for.

FLAIL MOWERS

VERSATILE. RUGGED. SAFE.

Every Diamond Flail Mower features all purpose, self-cleaning, reversible knives; replaceable skid shoes; adjustable roller height; and will cut grass and brush up to 2". Diamond's flail mowers are less likely to propel objects than rotary mowers - a discharge flap protects equipment, operator and bystanders, and the protective bonnet provides yet another layer of safety.

Diamond Flail Mowers also feature Double V belt power transfer, a self-adjusting tensioner, and a skid shoe that protects the ground roller bearing. The easily replaceable Grip-Tite bearings on the cutter shaft extend product life.

All Flail Mowers come with a 1-year warranty on all parts and labor.

Our new Massey Ferguson® 4600 Series makes loader and hay work easier than ever.

Our 4600 Series provides exactly what livestock farmers have been asking for: an affordable utility tractor that's powerful, versatile and comfortable. At its core is a new hydraulic power shuttle transmission. During loader work, it lets you go from forward to reverse and back again without clutching – saving constant stress and strain so you can be more productive. Each model is also Tier 4i compliant: Using electronic engine management, our 3-cylinder engine is both powerful and fuel efficient, without the need for regenerating particulate filters.

An all new 3-cylinder AGCO POWER™ engine, designed and built for the 4600 Series, offers more power with greater efficiency.

The power shuttle control lever is conveniently located to the left of the steering wheel for easy reach and operation.
