Re: CEOI 0310 DNR1600000003
Architectural and Engineering Services
Chief Logan Cabins and System-wide Picnic Shelters

Dear Sir/Madam,

MSES Architects is pleased to submit our expression of interest in providing professional services to the Division of Natural Resources for the Chief Logan Lodge Cabin Project and the System-wide Picnic Shelter Project. Our team's extensive experience in designing construction projects would prove to be of great value to you in the successful completion of your project.

MSES Architects, located in Fairmont, is a division of MSES Consultants, Inc. in Clarksburg. MSES is a multi-disciplinary firm with a staff of over 100 professionals, and has served both private and public clients throughout West Virginia since 1976. Over the years, we have opened offices in Fairmont, Huntington, and Beckley, WV, as well as Indiana PA. Together, MSES Architects' experienced team of design professionals, including registered architects, interns, interior designers and technicians, combine with our well-established engineering and environmental group to create a full-service team capable of producing a successful project to meet your design and budgetary needs.

As you will see on the following pages, MSES has provided professional design services for many successful construction projects in West Virginia. Our reputation is unsurpassed for carefully designing each detail in order to achieve the best product possible while staying within our clients' budgets. We also strictly maintain design schedules and manage construction so that project deadlines are successfully achieved. Our experienced design team will provide the same professional services for you for the cabins and picnic shelters, while maintaining your budget and schedule constraints. In addition, because MSES has offices in four separate cities in West Virginia, we are from 30 minutes to two-hour travel distance to all of the proposed project locations. This means that we can ensure a quick response to the construction sites to address urgent issues that may arise before, during and following construction.

MSES' stellar reputation for successful projects is due to the diverse talents of the full service project team. Construction projects require a vast knowledge of all phases of design, from project programming, preliminary design and schematic design through contract documents, bidding and construction period services. Our clients are especially pleased with our attention to detail, our skills in estimating and budgeting, and our follow-up assistance during and after construction. Our specific approach to the design process for the cabins and picnic shelters is outlined in this Expression of Interest.

We encourage you to discuss our past experience with the clients listed in our reference section of this EOI. Our current project load enables us to start working on your project immediately. We would appreciate the opportunity to meet you and discuss how we can provide you with professional services needed for a successful project. Thank you for your consideration.

Sincerely,

Pamela J. Wean, AIA
Senior Project Architect
MSES Architects

BACKGROUND AND INTRODUCTIONS

MSES Architects, located in Fairmont, WV, is a division of MSES Consultants, Inc. in Clarksburg, WV. We are a multi-disciplinary firm which was founded in 1976. Since that time our firm has been providing quality services to private and public clients all over West Virginia and surrounding states. We are a full-service organization providing architectural, engineering, design, and environmental services with a current professional staff of over 100, making us one of the largest West Virginia-owned and diversified A/E consulting firms in the state of West Virginia.

The MSES Architects' professional staff is exceptionally knowledgeable of local, state and federal Life Safety and Building Codes, Energy Codes and Accessibility compliance. In addition, we are keenly aware of the many challenges and problems that may be inherent to the design process. The benefits of our experience and diligence are perhaps most effectively demonstrated by our large number of long term clients. For many, we have provided continuing services for multiple projects for over 25 years.

We have vast experience in designing and project management of building renovations, additions, and new construction. Our knowledge of local, state and federal regulations is beneficial to the client because our team can ensure that their facility not only meets but also exceeds these standards.

Rather than work from a predetermined approach, we strive to create environments that are a thoughtful response to their program mission, physical setting and functional purpose. A guiding principle of MSES Architects is that each project reflects the spirit and personality of its owner. Our mission is to plan, design and manage the new construction and renovation of buildings and their interiors in order to promote productivity, enhance the quality of life of users and visitors and contribute value to the environment. We believe good design is the physical expression of sound ideas, imagination and creativity.

OUR STANDARDS FOR SUCCESSFUL PROJECTS

MSES Architects has a stellar reputation among owners, regulators, and contractors for producing and managing successful projects. This reputation is the culmination of over 80 combined years of experience, founded upon our extensive architectural, engineering, life safety, and code compliance, our knowledge of applicable regulations, and our ability to develop corrective solutions which satisfy regulatory requirements in a cost effective manner. We are proud of our accomplishments and our ever-growing roster of satisfied repeat clients attests to our continued commitment to quality, dedication, and service.

MSES has completed more than 15,000 assignments to date with our focus on building construction, renovation, auditing, and project management since our founding in 1976. Our projects have involved site selection studies, funding assistance, building repairs/renovations, inspections, geotechnical investigations, assessments and reviews, environmental sampling and analysis, property evaluations and appraisals throughout West Virginia, Ohio, and Pennsylvania. MSES is sought after by many public and private clients for construction and renovation projects due to the breadth of our technical and professional services, the efficiency of our operations, and our unique status as a single source consultant for all the services required to successfully complete our clients' projects.

MSES ARCHITECTS AND BUILDING CONSTRUCTION AND RENOVATIONS

Since 1978, MSES's architectural and engineering services have been distributed nearly equally between the construction of new facilities and the renovation of existing structures. Our expertise has gained MSES a distinguished reputation with commercial, industrial, and manufacturing firms, municipalities, State Agencies, the School Building Authority, county boards of education, the state's colleges and universities, and other entities as a noted leader in this field. Our extensive experience has yielded a specialized, efficient project approach, in which we incorporate the most up-to-date technologies for all aspects of the project. This promotes the development of modern facilities within existing structures, while preserving the character of the existing buildings and providing an enhanced environment in which to work, all accomplished within a cost effective, affordable budget. With the combination of our diversity and our 37 years of professional experience, MSES truly lives up to its reputation as a full service provider of architectural, engineering, auditing, design and environmental services.

INDEFINITE DELIVERY CONTRACTS

As a reward for MSES' knowledge, responsiveness, and diligence, a great deal of trust has been established between MSES and our clientele. This has resulted in the maintenance of numerous master service/indefinite delivery agreements and contracts for many of our long term clients, some of which are identified below:

Marion County Schools—MSES currently holds a Five-year Architectural, Engineering, Environmental Service Agreement.

Randolph County Schools – MSES currently holds a Five-year Architectural, Engineering, Environmental Service Agreement.

City of Clarksburg, City Engineer – MSES was selected in January 1999 as the Engineer for the City of Clarksburg, West Virginia, with MSES staff member John Keeling, PE, CIH, CSP, serving as the City's Engineer/Public Works Director. MSES provides the City with all its engineering, planning, code inspectors, environmental, infrastructure, and funding/budget planning needs. MSES's contract was recently renewed for three (3) years.

UCAR Carbon Company (formerly Union Carbide Corporation), Anmoore, WV. MSES has maintained a long-standing relationship with this company and has assisted this facility on an ongoing basis with the plant's air emission permits, water discharge permits, solid waste compliance, and a variety of engineering projects with the Huntington and Pittsburgh USACE Districts for Phase I and Phase II environmental screenings and real estate and mineral appraisals since 1982 and 1992, respectively.

Dominion Transmission, Inc. (formerly CNG Transmission Corporation) MSES has maintained a master service agreement with this firm since 1990, for the provision of engineering, surveying, mapping, and corrosion surveys.

Dominion-Hope (formerly Hope Gas, Inc.) - Since 1992, MSES has retained a master service agreement with Hope Gas which includes engineering, surveying, mapping, environmental sampling, reviews, environmental assessments, and right-of-way acquisitions.

Dominion-Peoples (formerly Peoples Natural Gas) - MSES currently holds a master service agreement with this company for corrosion engineering and surveys, and internal corrosion sampling and analysis.

USDA Natural Resources Conservation Service – In 2005, MSES completed the fifth year of a five (5) year indefinite delivery contract to conduct county-wide water resources studies throughout the State of WV. These involve compilation and analysis of extensive physical, chemical, geographic, and socio-economic data in order to develop feasible planning documents for the provision of safe, reliable, drinking water supplies and wastewater treatment and collection systems for designated counties throughout the state.

United States Department of the Army, Huntington and Pittsburgh Districts, Corps of Engineers - MSES has maintained annual indefinite delivery contracts with the Huntington and Pittsburgh USACE Districts for Phase I and Phase II environmental screenings and real estate and mineral appraisals since 1982 and 1992, respectively.

United States Postal Service - MSES recently completed a three-year indefinite delivery services contract for environmental and engineering services of existing/newly-acquired post office sites throughout Virginia, West Virginia, and Kentucky. These services include site selection, surveys, site development planning, permitting, architectural, and Phase I/II environmental site reviews. The project services were based upon audits of existing Postal Service-owned and leased facilities, in which the buildings were evaluated to determine their compliance with energy, architectural, engineering, and safety requirements. The audit results were used to determine recommendations for the continuing use, renovation, or construction of new facilities. MSES continues to work with USPS on a project by project basis.

Government Services Administration (GSA) - In 1999 MSES was awarded a five (5) year indefinite delivery contract to provide architectural, building audits, engineering, environmental, safety, indoor air quality, and project management services for buildings under GSA control within the states of Pennsylvania, West Virginia, Maryland, and Virginia. Typical services provided include building interior and exterior renovations, life safety system upgrades, fire sprinkler systems, security systems, HVAC, electrical, lighting, indoor air quality, and energy audits, to list a few.

PERSONNEL

The MSES Team maintains a staff of highly trained and experienced personnel, including all the technical disciplines necessary to fully staff projects of all sizes and types. Our personnel demonstrate the education and experience required to accommodate any land planning, site development, program management, planning, renovation, repairs, modifications, upgrades, additions, or new construction project.

In addition to employee experience, another factor for MSES' continued success is the unusual degree of longevity and company loyalty among our personnel. Our many long-term and repeat clients are appreciative of the continuity that this affords, and are refreshed with the degree of familiarity and prior knowledge with which each subsequent project is met. It is this unique combination of knowledgeable, experienced, talented, and devoted principals and employees that has brought MSES to the forefront as a provider of total land planning, property inventorying, auditing, hazards surveys, adapted reuses, historic preservation, engineering, architectural, environmental, LEED AP, and project management services.

Our staff's stable employment record also enables the firm to assemble project teams that have worked together before, and that possess a good knowledge of how individual strengths fit together to form an effective team. The firm is able to assemble teams composed of individuals whose capabilities are tested and well known to our establishment. We assign senior staff to management roles on all our projects.

In accordance with MSES' belief in the integration of engineering and architecture, in 2004 MSES established an architectural group within MSES which is known today as MSES Architects. This group within MSES was founded on the strengths and capabilities offered by each individual, which has allowed for the forming and continuation of strong, diverse, well-established MSES Project Teams. Today, MSES and MSES Architects are now one organization.

The Fairmont, West Virginia office staff, with support from MSES Consultants' corporate office staff, will be responsible for the activities associated with this project. Jeff Wise, Executive Director, will be the Program Manager and Pam Wean will be the Senior Project Architect. Jeff and Pam will be the direct contacts for the project.

TECHNICAL EXPERTISE

A strong team of complementary professionals is essential for success in today's complex planning, auditing, design, repairs, modifications, and building process. For this reason, the MSES Team is committed to the principle of multi-disciplinary teamwork. By assembling all disciplines within our organization, our clients benefit from a single point of responsibility, fixed accountability, efficient coordination, and effective communications. Together, our qualified staff has combined to provide the services listed below.

PLANNING

- Feasibility Studies
- Site Analysis, Evaluation, and Selection
- Master Planning
- Strategic Planning
- Land Use Planning
- Sustainable/Green Designs

FUNDING ASSISTANCE

- School Building Authority
- NEEDS, MIP, Emergency

WEST VIRGINIA
BOARD OF PROFESSIONAL SURVEYORS
Certificate of Authorization

2015

ISSUED TO:

MSES CONSULTANTS, INC.
Clarksburg, West Virginia

CERTIFICATE OF AUTHORIZATION No. **15-5552**

This certificate is issued by the West Virginia Board of Professional Surveyors in accordance with *West Virginia Code § 30-13A-20*
The person or organization identified on this certificate is licensed to conduct professional surveying and mapping services
in the State of West Virginia for the period

January 1, 2015 through December 31, 2015

This certificate is not transferrable and must be displayed at the office location for which issued.

In witness whereof I have put my hand, this 31st day of December, 2014

ROY E. SHREWSBURY, II, Chairman

MARK H. HORNISH

R. MICHAEL SHEPP

NELSON B. DOUGLASS, Secretary

ANTHONY J. SPARACINO

CERTIFICATE OF *Authorization*

STATE BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS

*The West Virginia State Board of Registration for Professional Engineers
having verified the person in responsible charge is registered in
West Virginia as a professional engineer for the noted firm, hereby certifies*

MSES CONSULTANTS, INC.
C01012-00

Engineer in Responsible Charge: JOHN KEELING - WV PE 009003

*has complied with section §30-13-17 of the West Virginia Code governing
the issuance of a Certificate of Authorization. The Board hereby notifies you of its
certification with issuance of this Certification of Authorization for the period of:*

July 1, 2015 - December 31, 2015

providing for the practice of engineering services in the State of West Virginia.

IF YOU ARE REQUIRED TO REGISTER WITH THE SECRETARY OF STATE'S OFFICE,
PLEASE SUBMIT THIS CERTIFICATE WITH YOUR APPLICATION.

IN TESTIMONY WHEREOF, THE WEST VIRGINIA STATE BOARD OF
REGISTRATION FOR PROFESSIONAL ENGINEERS HAS ISSUED THIS COA
UNDER ITS SEAL, AND SIGNED BY THE PRESIDENT OF SAID BOARD.

A stylized, handwritten signature in black ink, consisting of several sweeping strokes.

BOARD PRESIDENT

The West Virginia Board of Architects

certifies that

PAMELA JO WEAN

is registered and authorized to practice
Architecture in the State of West Virginia.

In testimony whereof this certificate has been issued
by the authority of this board.

Certificate Number [REDACTED]

The registration is in good standing until June 30, 2016.

Lepa C. Lewis

Board Administrator

The West Virginia Board of Architects

certifies that

PROJECT APPROACH

At MSES Architects, our Number One objective is to provide our clients with a finished product that meets their functional needs, is provided on time and within budget, and is something they can be proud of for years to come. We take pride in our attention to detail and our ability to listen to the client so we fully understand their needs. MSES believes in the "Expanded Team" approach. We think that quality projects result from well-planned designs and continuous coordination between our staff and the client from beginning to end.

If selected for the Cabin and Picnic Shelter projects, our team of professionals will meet with representatives from the DNR, Chief Logan Lodge, and others from the various State Parks scheduled to receive new shelters. Our first meeting will entail discussions about the scope-of-work, budget, schedule, goals and objectives for each of the various projects. We will then visit all parks and sites to examine existing conditions and determine the best approach for construction of the cabins and shelters. A benefit to hiring MSES Architects is that we retain full time surveyors on staff, so if the sites have not yet been surveyed, we can offer this service as part of our single Architect/Owner agreement. We can schedule the survey as soon as we are awarded the contract, which could then expedite site design time by several weeks.

Our design approach is as follows: although each park will have specific site features that require individual attention, we will strive to design the structures to be as prototypical as possible, which could potentially reduce construction costs if a common general contractor is used to build multiple units. We will design the structures to take the best advantage of scenic views, as well as direct proximity to the existing infrastructure. We will adhere to all applicable building and fire codes, as well as the DNR laws, codes and design aesthetic. As we move through the design process, we will continue to correspond with you via email and meetings to provide drawings, specifications and cost estimates for your review at various stages of development.

When all parties are satisfied with the design and budget, we will submit Construction Documents for final review before bidding. We will assist throughout the bidding process and with selection of the contractor. When the project has been awarded, our team members will continue providing Construction Administration Services as we review submittals, attend all construction progress meetings and observe construction throughout the project. Because MSES has offices in four separate cities in West Virginia, we have between 30 minutes to two-hour travel time to all of the proposed project locations. This means that we can ensure a quick response to construction sites to address urgent issues that may arise before, during and following construction.

As all phases of design and construction are completed, we will include you in correspondence and updates so that you are fully aware of the status and are involved in decisions related to the project. A one-year walk through with our client and contractor is also part of our standard procedure, so that any issues that may have occurred during the construction warranty period can be addressed and resolved.

Senior Project Architect Pam Wean will manage the project from start to finish out of our Fairmont office. Support from our staff from the Clarksburg, Beckley and Huntington offices will also be essential so that all design professionals can visit each site and become familiar with the conditions in each location. Ms. Wean's 30+ years' experience and familiarity with construction projects of various types and sizes, will prove to be beneficial during all phases of the project. She has also managed several projects for public clients and is familiar with the funding and bidding requirements set forth by the WV State Purchasing Division.

Our method of maintaining the owner's construction schedule and project budget is simple: we stress the need for regular communication and coordination between our in-house staff of superior engineers, architects and environmentalists so that any issues that arise are resolved and accounted for in the schedule and budget. With all design professionals housed within the same company, you can be assured that cabins and shelters will be designed and constructed to meet your functional and aesthetic needs while remaining within budget and schedule. As you will see in this EOI, examples of our work include several school projects. Bids for one in particular, the new East Fairmont High School in Marion County, were 15% lower than the owner's budget. This surplus allowed additional features to be added to the school, including upgrades to the building security, windows and flooring as well as the construction of four additional classrooms. Construction time was managed and maintained as well, allowing the Board to open the school on time. We have many other successful projects such as this, and we would be happy to discuss them with you.

We have been told that our commitment to our clients is second to none. We are confident that the DNR and the various State Parks will be extremely pleased with the outcome of your projects. We encourage you to contact the references listed in our Expression of Interest to learn more about our team of professionals and how we can help create a successful project for you.

RELEVANT EXPERIENCE

PROJECT HIGHLIGHTS

- 175,000 SF
- 198 Guest Rooms
- Conference Facilities for 1,600 people
- 250- seat restaurant and 90- seat lounge
- 2,300 SF indoor/outdoor pool
- \$20 million construction cost

MSES professionals provided planning, design and construction period services for this project in the following roles:

- David Skeen, Mechanical Engineer
- Jeff Pauley, Electrical Engineer
- Rod Kidd, Civil Engineer

STONEWALL RESORT AND CONFERENCE CENTER
Lewis County, WV

The Stonewall Resort and Conference Center is a 175,000 SF structure located in Roanoke, WV. MSES Engineers, in conjunction with other consultants, designed this \$20,000,000.00 facility on the grounds of the 18-hole Arnold Palmer golf course.

Amenities in the arts-and-crafts style lodge include dining accommodations for over 300 guest in the restaurant and lounge; 198 guest rooms; a 2,300 SF indoor/outdoor pool; onsite spa with steam baths, saunas, massage rooms and a salon; a large workout room; and conference facilities for over 1,600 people. Outdoor recreation spaces include a large fire pit, boat dock and patios.

PROJECT HIGHLIGHTS

- *First Design-Build new-construction project funded by the WVSBA.*
- *First school in the United States to be constructed of Cross-Laminated Timbers (CLT); engineered solid structural wood panels comprising the floor, walls and roof.*
- *Completed January, 2015*

CLIENT

*Pendleton County Schools
Douglas S. Lambert, Superintendent
Franklin, WV
(304) 358.2207*

MSES professionals provided planning, design and construction period services for this project in the following roles:

- *Pam Wean, Architect-of-Record, Senior Project Architect*
- *Stacey Bowers, Project Architect*
- *Casey Smith, Intern Architect*
- *David Skeen, Mechanical Engineer*
- *David Kirby, Electrical Engineer*
- *Rod Kidd, Civil Engineer*

FRANKLIN ELEMENTARY SCHOOL
Franklin, WV

Located in the historic town of Franklin, WV, the new Franklin Elementary School is a two-story, 46,200 square foot structure designed for 290 students in grades Pre-K through Sixth. The Colonial design of the school reflects the historic character of the surrounding buildings, with red brick walls accented with beige brick soldier courses and quoins, white columns at the gabled main canopy, and white windows with divided panes, stone sills and keystones.

The new school is designed and placed on the site to allow for future expansion of up to eight classrooms.

Not only is Franklin Elementary the first new school funded by the West Virginia School Building Authority under the Design-Build method of construction, but it is also the first school in the United States to be constructed of Cross-Laminated Timber (CLT). Fabricated using wood planks stacked at right angles and bonded with structural adhesives, the solid wood CLT panels incorporate the floors, walls and roof of the new school. The benefits of CLT include exceptional strength, excellent fire resistance, enhanced speed of construction, and energy savings due to its mass and precise factory production, preventing air infiltration. Current SBA security features are present throughout the school including access control at exterior doors, bullet resistant glass at the entrance, and a secure entry vestibule for visitors entering the building.

**INDUCTION CENTER FOR NORTHERN APPALACHIAN
TEEN CHALLENGE**
Clarksburg, WV

MSES Architects provided design services for the new Induction Center located on Rt. 19 South in Clarksburg. This wood framed structure is currently under construction and sits on a wooded lot overlooking a small creek. It will become the home of young men being counseled for substance abuse and other issues.

In addition to a 20-bed dormitory, the building offers a kitchen and dining area, offices, classrooms, chapel, living and recreational areas, and apartments for counselors.

This Christian-based counseling and residential facility is operated by Appalachian Teen Challenge, and is scheduled to open in late 2015.

PROJECT HIGHLIGHTS

- *New 11,600 SF two-story residential facility for teens and young adults.*
- *Program includes 20-bed dormitory, kitchen and dining, administrative offices, chapel, and classrooms for counseling and training*

CLIENT

Northern Appalachian Teen Challenge

MSES professionals provided design and construction period services for this project in the following roles:

- *Jeff Wise, Planning, Funding, Budgeting, and Management*
- *Pam Wean, Architect -of-Record, Sr. Project Architect*
- *Casey Smith, Intern Architect*
- *Jeremy Hobson, Architectural Designer/CAD Technician*
- *David Skeen, Mechanical Engineer*
- *David Kirby, Electrical Engineer*
- *Rod Kidd, Civil Engineer*
- *MSES Survey Team*

MVB BANK WHITE HALL BRANCH
Fairmont, WV

MSES Architects and Engineers designed the White Hall Branch of MVB in Fairmont. This branch is the first MVB of its kind in North Central West Virginia that features the latest in automated self-service technology. This technology allows the customer to handle their own transactions.

MSES worked with the client to include these unique digital features while incorporating other more traditional exterior and interior styles of MVB to create a state-of-the-art banking experience.

PROJECT HIGHLIGHTS

- 3,500 SF Branch Bank
- Traditional MVB Appearance
- Self-Service Technology and Equipment

CLIENT

MVB Bank, Inc.

1000 Johnson Avenue
Bridgeport, WV 26330

Current MSES professionals provided design services for this project in the following roles:

- Jeff Wise, Planning, Budgeting and Management
- Pam Wean, Architect-of-Record, Sr. Project Architect
- Nate Zirkle, Intern Architect
- Dave Skeen, Mechanical Engineer
- Dave Kirby, Electrical Engineer
- Rod Kidd, Civil Engineer

EAST FAIRMONT MIDDLE SCHOOL
Fairmont, WV

The new East Fairmont Middle School is a multi-level, 93,000 square foot structure designed for 735 students in grades 5-8. The new school is fully equipped with the latest data and internet technology, energy-efficient mechanical and electrical systems and premium finishes to last virtually the life of the building.

The contemporary design of the building reflects the school colors of blue and gold, and features the school mascot, the hornet, both inside and out. Fifth and Sixth grade classrooms are located in a separate wing from Seventh and Eighth graders; each wing featuring either yellow or blue lockers to help orient the students to their classrooms. The hornet is present in custom wall clocks in every room, in the custom ceramic tile floor at the main entry, and on a projection clock that shines onto the corridor floor near the cafeteria. The new gym seats 750 spectators and also reflects the school colors

Current SBA security regulations are employed throughout the school to provide safety for the students and staff. Doors are locked at all times during school hours and provided with access control, requiring visitors to be approved before doors are unlocked to allow entry to the secure vestibule. Glass at the entrance is bullet resistant, and concrete-filled bollards are present at exterior doors to prevent vehicle impact. Security cameras are present inside and outside for visual observation. Interior doors are equipped with security locksets to allow teachers to lock their doors from inside the classroom in the event of an intruder.

PROJECT HIGHLIGHTS

- 93,000 sq. ft. school for students from fifth through eighth grades.
- State-of-the-art facility equipped with security features throughout.
- Funded by WVSBA and Local Bond funding.
- Completed May, 2014

CLIENT

Marion County Schools
Gary Price, Superintendent
Fairmont, WV
(304) 367-2100 x111

MSES professionals provided planning, design and construction period services for this project in the following roles:

- Jeff Wise, Planning, Funding, Budgeting and Management
- Pam Wean, Architect-of-Record, Senior Project Architect
- Stacey Bowers, Project Architect
- Nate Zirkle, Intern Architect
- David Skeen, Mechanical Engineer
- David Kirby, Electrical Engineer
- Rod Kidd, Civil Engineer

TURNING POINTE AT JACKIE WITHROW HOSPITAL
Beckley, WV

Turning Pointe is an 8,300 SF treatment facility for mothers who are battling substance-abuse issues, and their children. This wood-framed brick structure contains classrooms, group therapy rooms, offices, kitchen, dining and bedrooms for up to 16 residents. The wooded site on the campus of Jackie Withrow Hospital provides a grassy fenced-in recreational area, and parking with porous pavement to allow for proper site drainage.

PROJECT HIGHLIGHTS: TURNING POINTE

- *Design of New Residential and Treatment Facility for 16 Residents*
- *Porous paving for stormwater drainage.*
- *8,300 SF*
- *Completed: 2012*

PROJECT HIGHLIGHTS: TB UNIT

- *Design of Five-Bed TB Unit*
- *State-of-the-art medical unit specifically for the treatment of patients with tuberculosis*
- *Renovation of existing wing of Jackie Withrow Hospital*

CLIENT

Jackie Withrow Hospital
Ms. Angela Booker, Administrator/CEO

MSES professionals provided planning, design and construction period services for both projects in the following roles:

- *Jeff Wise, Planning, Funding, Budgeting and Management*
- *Pam Wean, Senior Project Architect*
- *Nate Zirkle, Intern Architect*
- *David Skeen, Mechanical Engineer*
- *Jeff Pauley, Electrical Engineer*
- *Rod Kidd, Civil Engineer*

FAIRMONT SENIOR HIGH SCHOOL
Fairmont, WV

Fairmont Senior High School was constructed in 1928, and although the building was structurally sound it was in need of interior and exterior upgrades. Because the school is listed on the National Register of Historic Places, our team worked closely with WV SHPO as well as local historic agencies to plan and design building improvements.

The first phase of the project, funded by the American Recovery and Reinvestment Act, included HVAC and Energy Upgrades. The following phases of construction were funded by the School Building Authority and local bond funding.

Virtually every area and surface of the building was upgraded, including all new electrical, plumbing, HVAC, fire alarms, sprinklers, access control and security, and technology systems. Interior cosmetic improvements included plaster repair, new paint, ceilings, doors, new and refinished wood floors. New classrooms were created in the former cafeteria and in the former library. Exterior improvements included brick and stone cleaning and repointing, window and door replacement, and new sidewalks.

The most significant improvement was the addition of a new Media Center that was created by installing a skylight over the existing two-story courtyard. Supported by decorative columns, a balcony with an iron and wood railing was installed to house the book collection. The existing brick walls were cleaned and left exposed, and new windows were replicated to match the historical windows allow light into the surrounding rooms.

PROJECT HIGHLIGHTS

- Restoration of Building Exterior
- Window Replacement
- Masonry Cleaning and Restoration
- Creation of 2-Story Media Center
- Interior Renovations
- Plaster Repair and Painting
- Restoration of Wood Flooring
- Security and Access Control
- Plumbing, Mechanical and Electrical Replacement
- \$15,000,000.00
- 92,000 SF
- Completed: 2013

LINCOLN MIDDLE SCHOOL
Shinnston, WV

MSES Consultants provided the mechanical, electrical, and civil engineering design services for the Lincoln Middle School design-build project funded by the WV School Building Authority.

Located in the town of Shinnston, WV, the Lincoln Middle School is a two-story, 60,000 square foot structure designed for 400 students in grades sixth through eighth.

MSES was heavily involved in the planning, proposals, applications, budgeting and contract documents for this pilot project.

PROJECT HIGHLIGHTS

- Middle School addition constructed under a design-build contract
- Square Footage: 60,000
- Completed December 2014
- Classrooms, gymnasium, specialty rooms and administrative offices

To Whom It May Concern,

I would like to endorse the selection of MSES for any construction or renovation project you may be considering. Their knowledge of the requirements of the School Building Authority, the fire marshal's office and other regulatory agencies is invaluable in saving planning time and managing scarce resources.

Please feel free to contact me for additional comments or to tour our newly constructed East Fairmont Middle School, totally renovated Fairmont Senior High School or our soon to open Central Offices - all MSES projects.

With Kindest Regards,

Gary L. Price
Superintendent

To Whom It May Concern:

I am providing this letter of reference on behalf of MSES Architects and Consultants who have informed me that they are interested in providing services for some upcoming projects your organization will be undertaking. I have worked with both Jeff Wise and Pam Wean since 1998 on numerous school projects in Pocahontas, Marion and Randolph Counties. I recommend their services without hesitation or reservation.

I have found their organization to be highly competent in providing support to school systems in the areas of building renovations and new construction. First and foremost it is important to note that their organization has always brought projects in under budget and always within the timelines set forth in the project timelines. They do so because of careful planning and attention to detail. They have a vast background in school construction and are very familiar with the nuances and dynamics of working with the public and those organizations that deal with school construction funding. Their client services exceed what one might expect of similar engineering and architectural firms. They provide intricate communications that keep their clients informed of any issues that may arise during planning, construction, and post construction phases because they utilize a very high level of a "hands on" approach of engaging with project contractors. They understand the principle of the owner relationship and go beyond all levels of normal expectations once they are engaged in a project.

If you select them to provide services for your organization, you will immediately gain an asset for project. Their level of professionalism and courteousness is unmatched in these trying times of limited resources and unique dynamics of school construction. If you need further information about what MSES can do for you and your school system, I will be glad to discuss their attributes in further detail. Good luck in your endeavors to select your representative. Thank you for your consideration and attention in this matter.

Sincerely,

Jim Phares

Former County Superintendent (Pocahontas, Marion, and Randolph)

To Whom It May Concern:

I am writing this letter in support of MSES Architectural Firm, Pam Wean, Senior Project Architect, acknowledging their work in design and construction of Franklin Elementary School. Pam, Stacy and associates were a great partner to the many questions, concerns and issues that were raised as we began and finished our new school. I can honestly say they were eager to listen and always took into account our concerns when challenges arose. MSES Architects have been a friend to Pendleton County and I feel confidently they will do the same in future projects in which they may participate.

Please feel free to contact me if I can be of any assistance.

Sincerely,

A handwritten signature in blue ink that reads 'Douglas S. Lambert'. The signature is fluid and cursive.

Douglas S. Lambert, Superintendent
Pendleton County Schools

July 21, 2015

To whom it may concern:

It is my pleasure to recommend MSES Architects for professional architectural services. Marion County Schools (MCS) has maintained a strong relationship with MSES Architects/Consultants (MSES) over the past several years. Projects have included a wide variety including renovations, additions and a new construction. The MSES team is led by Senior Project Architect, Pamela Wean. I have had the pleasure of working with Ms. Wean on several occasions.

As the Clerk-of-the-Works for MCS on these projects, my responsibilities have demanded that I work closely with the project Architect and Engineers. My duties include observing and monitoring the progress of construction, reviewing the contract documents, communicating both with the Contractor and the Architect/Engineer, attending project meetings as the Owner's representative, maintaining records and assisting with closeout procedures.

It is my opinion that MSES is a hard-working architectural firm possessing incredible talents and skills. The agencies that govern the design and construction of schools in West Virginia have many requirements, and MSES has knowledge of these requirements that is unmatched. They also possess experience and understanding in dealing with consultants and contractors. Everyone involved knows that the environment of public school design and construction is very difficult and there are many financial challenges. However, MSES has consistently brought in projects on time and within budget. It is clear that they have an excellent understanding of the importance of deadlines, schedules, plans and specifications, as well as Local, State and Federal Codes that govern school construction. That understanding leads to a project with fewer change orders.

My unique perspective allows me to see the strength and weaknesses of an architectural firm. I can attest that the MSES staff is highly professional, enthusiastic and committed to successful projects. Their enthusiasm does not end when the design is complete, but continues throughout the entire process.

The Marion County Schools facilities designed by MSES have generated an enormous amount of pride in this community. These projects include:

- Marion County Technical Center Repair and Renovations
- Renovations to East Fairmont Middle School Gymnasium
- Additions and Renovations to White Hall Elementary School
- Jayenne Elementary School Additions and Renovations
- Classroom Addition at Blackshere Elementary School
- New East Fairmont Middle School
- Fairmont Senior High School Renovations
- Additions and Renovations to Pleasant Valley Elementary School
- Barrackville School Additions and Walkways

I do strongly and confidently endorse MSES to any prospective party interested in their services.

Sincerely,

Gary Santy
Clerk of the Works, Marion County Schools

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

MANDATE: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
