STATE OF WEST VIRGINIA
Purchasing Division**PURCHASING AFFIDAVIT**

MANDATE: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

CORPORATE OVERVIEW

TERRADON Corporation offers a multi-faceted approach to design engineering and consulting services. For more than 25 years TERRADON staff has provided a wealth of engineering solutions blanketing the Ohio Valley and the Appalachian Region with successful projects. The company built its reputation on expert personnel and quality, time-sensitive service. Those same founding principles hold true today.

Staff includes engineers, landscape architects, surveyors, planners, environmental scientists, designers, technicians and LEED Accredited Professionals.

The company maintains approximately 50 leading-edge staff in five locations: Nitro/Poca, WV; Lewisburg, WV; Clarksburg, WV; Charlton Heights, WV; and Ripley OH. TERRADON'S departments work cohesively to provide turn-key solutions that strive to exceed client expectations.

ABOUT TERRADON

The family-owned business has built a strong reputation by providing flexible, cost effective design solutions and maintaining the highest level of customer service. TERRADON is particularly suited to design engineering within the mountainous areas of the Ohio Valley and Appalachian Regions. The firm has been recognized through numerous awards from professional organizations and agencies including the several State Divisions of Highways, Departments of Environmental Protection and the American Institute of Architects state chapters.

TERRADON's corporate culture promotes innovation and progressive thinking. Project leaders strive to sustain customers through a wide-range of engineering offerings. TERRADON employees understand the purpose behind their services and work to cultivate lasting relationships with clients through honest, hard work.

SERVICE OFFERINGS

- Civil Engineering
- Environmental
- Geotechnical Engineering
- Surveying and Mapping
- Water/Wastewater
- Land Planning and Site Design
- Transportation Engineering
- Structural Engineering

LANDFILL DESIGN PROJECTS

Tucker County Landfill, Cell 7 Design

Pine Creek Landfill

Tucker County Landfill, Cell 6 Design

- Ham Landfill Expansion Project**
 TERRADON Corporation provided site characterization, surveying, mapping, subsurface investigation, groundwater study, monitoring, cell design, major modification to permit, and Certificate of Need application for the Ham Sanitary Landfill Expansion Project in Peterstown, WV.
- Jackson County Sanitary Landfill**
 As part of the WVDEP's Landfill Closure Assistance Program, TERRADON Corporation prepared interim closure plan including stormwater management, leachate management, sediment pond and leachate pond repairs, regarding and re-vegetation of disturbed areas for the Jackson County Sanitary Landfill in Jackson County, WV.
- Pine Creek Landfill**
 For the WVDEP LCAP, TERRADON Corporation designed the permanent closure plan including an additional landfill cell, stormwater management, capping, leachate management and storage tank, construction QC and certification for the abandoned landfill in Logan County, WV.
- Tucker County Landfill, Cell 5 Design and Certification**
 For the Tucker County Solid Waste Authority, TERRADON Corporation performed surveying, mapping, subsurface investigation, groundwater study, monitoring, cell design, and construction observation and certification for the extension of Cell 5 at the Tucker County Landfill in Davis, WV.
- Tucker County Landfill, Cell 6 Design**
 For the Tucker County Solid Waste Authority, TERRADON Corporation performed surveying, mapping, subsurface investigation, groundwater study, construction monitoring and certification, cell design, major modification to permit, and Certificate of Need application for six acre cell at the Tucker County Landfill in Davis, WV.
- Tucker County Landfill, Cell 7 Design**
 For the Tucker County Solid Waste Authority, TERRADON Corporation performed major modification of permit, geotechnical investigation, new 50-year cell design, and leachate pond closure plan, groundwater statistical report, leachate management, QA/QC services, stormwater ponds, subsurface investigation, and Certificate of Need (CON) application for 20 acre cell (Cell 7) at the Tucker County Landfill in Davis, WV.
- Copper Ridge Landfill**
 TERRADON provided services to Enviro Solutions for the Cooper Ridge Landfill in Capels, WV. The project had a \$5.6 Million construction cost.
- Wyoming County Sanitary Landfill**
 TERRADON Corporation provided site characterization; stormwater management; leachate management including storage tank, pump station and force main to POTW; slope stability regarding; and Subtitle D cap for the WVDEP for the Wyoming County Sanitary Landfill.

GEOTECHNICAL ENGINEERING

TERRADON offers some of the most experienced staff in the region for local geotechnical expertise. This team of experts brings a distinctive, specialized understanding of the difficult soil and groundwater conditions found in the Ohio Valley and Appalachian Regions of the United States.

The Geotechnical group has provided investigations associated with earthen dams, mining, waste disposal, new building construction, landslides analysis and remedial design, cell and high mast towers, landfill permitting and cap design, flexible/rigid pavement design, and environmental remediation.

SERVICES INCLUDE

- Municipal and Industrial Landfills
- Test Borings
- Test Pit Excavations
- Monitoring Well and Piezometer Installation
- Soil and Rock Logging, Sampling and Testing
- Landslide Analysis and Remedial Design
- Stability Analysis
- Retaining Structure Design
- Earthen Dams
- Foundation Design
- Flexible and Rigid Pavement Design

GEOTECHNICAL DESIGNS INCLUDE

- Complete Removal for Landslide Repair
- Removal, Stabilization, Replacement
- Buttressing and Regrading
- Subsurface Drainage
- Structural Corrections
- Retaining Walls
- MSE Walls and Other Gravity Walls
- H-Piles and Lagging
- Anchors (Rock or Soil Nailing) In Combination with Above if Applicable

ENVIRONMENTAL SERVICES

Constantly changing federal and state environmental requirements are difficult to track and can have a serious impact on businesses and other organizations. TERRADON offers a strong environmental services team to manage issues in a complex environment. Staff is well-versed on environmental permitting processes and regulations as well as site assessment and reporting.

TERRADON closely follows environmental activities on the local, state and federal levels. TERRADON has a thorough understanding of state and federal environmental permitting processes and regulations. This expertise applies to both the initial permit preparations, as well as subsequent negotiations affecting the permit. The firm's strength in addressing environmental issues is built on the diversity of its staff with credentials in chemistry, civil engineering, geotechnical engineering and geology.

SERVICES INCLUDE

- Environmental Site Assessments
 - Phase I ESA
 - Phase II ESA
- Hazardous Waste
- Process Water
- Wastewater
- Storm Water
- Groundwater
- Air Permitting
- Risk Management Plans
- Wetland Delineation
- Tier II Reporting
- Emergency Response Plans
- Environmental Audits
- Environmental Remediation
- NEPA Compliance
- Asbestos and Lead Inspection
- Underground Storage Tanks
- Impoundment Stabilization and Closure
- SPCC Planning
- BMP Planning

TESTING & INSPECTION

TERRADON offers materials testing and construction monitoring services to document compliance with project design specifications and regulatory requirements. The firm provides construction monitoring for utility, highway, and commercial construction projects. TERRADON also provides laboratory and field testing of construction materials. Engineers and technicians at TERRADON are West Virginia Department of Highways certified in Portland Cement Concrete, Hot-mixed Asphalt, Compaction and Aggregates.

SERVICES INCLUDE

Materials Testing & Inspection

- Slump of Portland Cement Concrete (AASHTO-T119)
- Air Content of Freshly Mixed Concrete (AASHTO-T196 and T152)
- Unit Weight and Yield (AASHTO-T121)
- Making and Curing of Concrete Test Specimens (AASHTO-T23)
- Compressive Strength of Concrete Specimens (AASHTO-T22)
- Fine and Course Aggregate Gradations (AASHTO-T11 and T27)
- Specific Gravity of Aggregates (AASHTO-T84 and T85)
- Atterberg Limits (ASSHTO-T89 and T90)
- Moisture Content of Soil (ASTM-D2216)
- Nuclear Compaction Testing of Soil, Stone, and Hot Mixed Asphalt
- Preparation of Certification Forms and Construction Reports
- Welder Certification

Specialty Testing and Inspection

- Floor Flatness Testing
- Fireproofing
- Masonary Testing
- Structural Steel Inspection
 - Certified Welding Inspection
 - Dye Penetrant Testing
 - Bolt Testing
- Project Safety Monitoring
- FAA Eastern Regional Laboratories List

Construction Monitoring

- Document compliance with project design specifications
- Ensures compliance with regulatory requirements
- OSHA 10-Hour and 30-Hour Construction Safety & Health Certified

SURVEYING & MAPPING

TERRADON is well-versed in completing successful transportation survey projects, having provided design and construction survey services for numerous projects during the company's 24-year history. An expert staff of professional surveyors provides mapping, construction layout, ALTA survey, topographic survey, GPS network control surveys for aerial and LiDAR mapping projects, and boundary survey services. Efficient and accurate results are ensured by prioritizing the use of modern technology, including state of the art GPS and robotic total stations, with the latest design software.

TERRADON maintains five full-time Professional Surveyors on staff. The firm services projects through the use of seven in-house field survey crews who are backed by 60 corporate staff members, including an experienced team of CAD designers. TERRADON's transportation survey group is experienced in preparing highway right of way plans, including courthouse research and right of way questionnaires, and writing legal descriptions for right of way take parcels, temporary construction easements and permanent drainage easements.

TERRADON surveyors are currently providing design survey services for several Ohio Department of Transportation (ODOT) projects. Additionally, TERRADON maintains an on-call survey contract with the West Virginia Department of Transportation (WVDOT), where it has provided design and construction surveys for numerous bridges and highway projects. TERRADON has also provided design and/or construction surveys for Virginia Department of Transportation (VDOT) projects.

TERRADON's Professional Surveyors are licensed in Ohio, West Virginia, Kentucky, Virginia, Pennsylvania and Tennessee.

MANAGEMENT/STAFFING PLAN

TERRADON Corporation maintains sufficient full-time staff in order to complete quality projects in an efficient and timely manner. The company maintains staffing protocols in order to supplement staff should project demands increase. At present time, TERRADON has adequate staff in-house to manage and complete project tasks in relation to this contract.

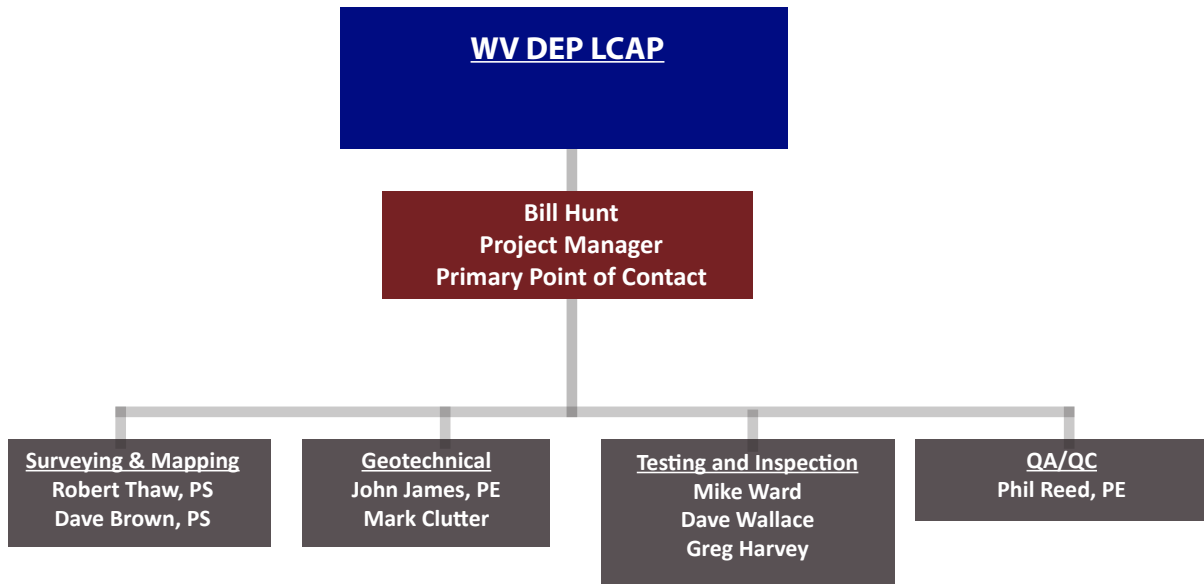

TERRADON engineers have numerous resources within the company to draw on, such as surveying, geotechnical engineering, environmental engineering, landscape architecture, materials testing, and construction monitoring. This allows the project manager to control all phases of the design process, from initial site reconnaissance through construction.

Key Personnel and Estimated Current Availability

<u>Name</u>	<u>Project Role</u>	<u>Percent Availability 40/Hr Work Week</u>
Bill Hunt, PG, LRS	Project Manager Primary Point of Contact	60
Phil Reed, PE	Project Engineer	60
John James, PE	Project Engineer	60
Robert Thaw	Surveyor	50
Dave Brown	Surveyor	60
Mark Clutter	Geotechnical Designer	60
Chris Morris	Inspector	50
Mike Ward	Inspector	50
Dave Wallace	Inspector	50
Greg Harvey	Inspector	50

Proposed Roles/Organizational Chart

The following organizational chart lists key personnel and their roles in this project:

Bill Hunt, PG, LRS

Vice President of Geo-Environmental, Testing & Inspection

Bill Hunt is a Professional Geologist, Licensed Remediation Specialist and Vice President of the Geo-Environmental department at TERRADON Corporation. Hunt offers relevant experience in environmental documentation, investigations, and coordination with federal, state, and local agencies. He prepares Environmental Impact Statements, Environmental Assessments, Section 4(f) Evaluations, and other environmental technical documents. He supervises and participates in work plan development, field surveys, on-site monitoring, data collection, impact analysis, subconsultant management, public meeting organization and group presentations.

Relevant Project Experience

Skinner Landfill -- West Chester, OH

- Work included groundwater sampling and monitoring
- Soil boring inspection, soil logging and sampling

CECOS International Landfill -- Williamsburg, OH

- Soil and groundwater sampling
- RCRA Closure sampling of roadway

Wright Patterson AFB Former Landfill Closure – Fairborn, OH

- Soil and Leachate Sampling
- Project Health and Safety Plan Preparation
- Project Safety Oversight/Air Monitoring
- Work was conducted using Levels B, C and D personnel protection

Shell Methane Recovery System – Rumpke Landfill – Colerain Township, OH

- Supervised drilling program to install methane recovery wells as designed by Shell.

Waste Assessment – Rumpke Landfill – Colerain Township, OH

- Design and oversight of program to assess waste limits at two cells at the landfill. Field activities consisted of soil borings and use of ground penetrating radar to determine the horizontal extent of waste burial at two cells of this landfill.

Capping of Heavy Metals Contaminated Soils -- Marilla Street Landfill – Buffalo, NY

- Prepared Health and Safety Plan, designed decontamination stations, and conducted perimeter air monitoring during construction (capping) actions.

Closure of Coal Tar Landfill – US Steel – Elyria, OH

- Prepared Health and Safety Plan, designed decontamination stations, and conducted air monitoring during construction actions. Also oversaw the excavation, removal, over-packing and disposal of unknown waste drums encountered at the site.

Waste Assessment – Charleston Landfill – Charleston, WV

- Design and oversight of program to assess waste limits at two cells at the landfill. Field activities consisted of soil borings and use of ground penetrating radar to determine the horizontal and vertical extent of waste buried at two cells of this landfill.

Groundwater Monitoring and Statistical Analysis – Tucker County Landfill – Davis, WV

- Conduct Semi-Annual groundwater monitoring and statistical analysis of groundwater data. Data is analyzed using DumpStat software package. Reporting is provided to WVDEP semi-annually.

Greenhouse Gas Emissions – Tucker County Landfill – Davis, WV

- Estimation of greenhouse gas emissions for the facility from 2010 to 2013. Emission estimates were modeled utilizing US EPA Subpart HH estimation equations for Municipal Solid Waste Landfills. Calculated emissions were reported to USEPA through their electronic reporting system (e-GGRT).

Environmental Scientist

Mark Clutter

LANDFILL DESIGN ENGINEER

Mark Clutter is a Project Manager/Design Engineer who is experienced in preparing construction documents and associated permitting for numerous projects throughout Kentucky, Ohio, and West Virginia including: creating erosion and sediment control plans, storm water management, design of impoundment closures, slope stability analysis, field surveying, drawings and specification preparation, design, design drafting, construction inspection, quality control testing, shop drawing review, project management, contract administration, permitting, and report preparation.

Clutter's landfill experience adheres to the WVDEP's Landfill Closure Assistance Program (LCAP) for landfill designs and construction, including all closure-related activities such as: leachate management control, sediment and erosion, natural gas management, groundwater monitoring, and a final cover on non-composite lined landfills.

Relevant Project Experience

- **Tucker County Landfill (TCLF), Cell 7 Design**
For the Tucker County Solid Waste Authority, performed major modification of the permit, geotechnical investigation, new 50-year cell design, and leachate pond closure plan, groundwater statistical report, leachate management, QA/QC services, stormwater ponds, subsurface investigation, and Certificate of Need (CON) application, HELP mode and installation of monitoring wells for a 20 acre cell at the Tucker County Landfill in Davis, WV.
- **Tucker County Landfill Permitting**
Solid Waste Facility Siting Plan, Certificate of Need, Certificate of Site Approval, Part 1-Site Evaluation Application, Part 2-Design Application, DWWM-Module A-NPDES, Major Modification, Quarterly Report, Annual Report for the Tucker County Landfill.
- **Tucker County Landfill Cells 1-4 Capping**
The project consists of capping approximately 20 acres of previous landfill cells with a HDPE Liner. The project included the following: preparation of construction drawings, technical specifications, contract and bidding documents, advertisements for bid, design report outlining the calculations to support the design, Erosion and Sediment Control permits, modifications to the NPDES storm water permit, permits to the West Virginia Solid Waste Authority for capping and reuse of methane, air pollution control permits for use of the methane gas emissions, and field services for Quality Control.
- **Tucker County Landfill**
TERRADON provides quarterly surveying of the current landfill surface and calculation of the quarterly volume and compaction rate; producing semi-annual statistical analysis and reports; creating annual reports that include: construction activities, financials, MSW tonnage, leachate generation, groundwater and discharge monitoring reports, and air-space summaries.
- **Ham Landfill Expansion Project**
Provided site characterization, surveying, mapping, subsurface investigation, groundwater study, monitoring, cell design, major modification to permit, and Certificate of Need application for the Ham Sanitary Landfill Expansion Project in Peterstown, WV.
- **LCAP EXPERIENCE**
Provided design and permitting for the following under the WVDEP LCAP Program:
 - Pine Creek/Omar Landfill, 12 Acres HDPE Liner, Pine Creek, Logan County, WV
 - Buckhannon Landfill, 14 Acres Geosynthetic Clay Liner, Buckhannon, WV
 - Don's Disposal, 24 Acres HDPE Liner, near Eden's Fork, Kanawha County, WV
 - McDowell County Landfill, 12 Acres HDPE Liner, near Welch, McDowell County, WV

John James, PE
 Geotechnical Engineer

Mr. James is a Senior Geotechnical Engineer for various environmental, transportation, and mining projects. Mr. James specializes in innovative and cost-saving concepts for his projects.

James' project experience includes: studies and designs for landfills and environmental facilities; surface and ground water studies and remediation; design of liners for landfills and various impoundments; earth and rockfill dams; roads; highways and bridges; numerous foundation investigations; foundation investigations and designs ranging in size from small projects to major industrial complexes; storm drainage facilities; airport facilities; landslide analysis and correction; and forensic engineering.

Relevant Project Experience

- **Tucker County Landfill (TCLF)**
 James has been the lead design engineer/engineer of record for the TCLF for the past 10 years, including responsibility for siting, permitting, design and all other services for the landfill. He has devised many cost-saving solutions and designs, including the incidental mining of previous mined -out coal workings for a cost savings for \$8,000,000 of \$10,000,000 Cell 7 cost.
- **Ham Landfill Expansion Project**
 Provided site characterization, surveying, mapping, subsurface investigation, groundwater study, monitoring, cell design, major modification to permit, and Certificate of Need application for the Ham Sanitary Landfill Expansion Project in Peterstown, WV.
- **LCAP Experience**
 Provided design and permitting for the following under the WVDEP LCAP Program:
 - Pine Creek/Omar Landfill, 12 Acres HDPE Liner, Pine Creek, Logan County, WV
- **Dam Experience**
 James has been Engineer of Record for numerous earth and rock fill dams in West Virginia, and some recent projects include: Mallard Dam (presently in design), 8 acres; Upper Glade Creek Water Supply Dam upgrade (from 95 to 112 acres+/-; Dawson Dam, 30 acres+/-; Lake Chaweva Reconstruction, 24 acres+/-; and Chatham Dam, 65 acres+/-/. Also provided consultation and construction design for the United States Army Corps of Engineers for Bluestone Dam.
- **Site Selection Experience**
 James specializes in site evaluation from geologic and topographic perspectives with an ability to visualize relevant features of both geotechnical and topographical, including literature research and site reconnaissance, for specific project needs.
- **Transportation Experience**
 Worked on numerous roadway (cut and fill slopes) designs, landslide evaluation and remediation, site designs for numerous projects and foundation investigations for approximately 1,000 projects in West Virginia and the surrounding states.
- **Landslide Experience**
 Worked on numerous landslides of all sizes and complexity in West Virginia.
- **Foundation Investigation and Design**
 Performed foundation investigation services for more than 1,000 projects in West Virginia, from small residential sites to major industrial projects (valued at up to \$2 B) including complicated foundation designs.
- **Retaining Walls**
 Designed numerous retaining structures including simple gravity concrete and MSU walls, cantilever walls and complicated sheet piling or H pile and lagging walls.

Philip Reed, PE

Lewisburg Office Director, Civil Engineer

Philip Reed serves as TERRADON'S Lewisburg, WV Office Director and provides services to clients for Engineering Design, Quality Control and Materials Testing. Reed provides technical direction on a variety of civil engineering markets including landfills, commercial and industrial developments, housing, energy and infrastructure. Reed is responsible for engineering analysis and modeling, design, regulatory compliance and permitting, in addition to quality control and assurance. He has more than 20 years of experience in landfill design and construction.

Relevant Project Experience

- **HAM Sanitary Landfill**
Responsible for all aspects of solid waste landfill permitting (H.A.M. Sanitary Landfill, Inc.), including: Certificate of Site Approval through local county Solid Waste Authority; Certificate of Need through Public Service Commission; Part 1 Solid Waste Facility Permit to include geologic and hydrologic evaluation of site; Part 2 Solid Waste Facility Design Application to include site design, leachate modeling, and composite liner design; and solid waste cell construction drawings, Construction Specifications, and Construction Quality Assurance / Quality Control Plan. Also responsible for all aspects of Construction Monitoring, including: monitoring of construction of both municipal solid waste disposal cells and Construction/demolition and asbestos disposal cells; responsible for construction stakeout and monitoring of construction, and Final Certification of construction.
- **Triana Energy Fresh Water Impoundment**
Responsible for site design, construction certification, and bi-weekly inspections for 15 acre-feet freshwater impoundment in Northern, WV. Responsible for oversight of construction monitoring inspectors, reporting and permit compliance.
- **Summit Bechtel Reserve**
Provided Engineering Support for a 12,000-acre site development in Fayette County, WV. Oversaw site layout, grading, and survey support for one of the largest infrastructure projects in West Virginia. Oversaw all QC services and provided project direction of 20 inspectors and technicians during installation of more than 100 miles of utilities and nearly 50 miles of roadway construction. Additional inspection and monitoring activities included vertical construction of three buildings and an iconic wingtip pedestrian bridge.
- **Gordy Oil**
Provided survey and design for 5 natural gas pads and support for freshwater impoundments.
- **Environmental Permitting**
Managed environmental permitting of rock quarries (RBS Inc., ALTA Sand Quarry, and Muddy Creek Mountain Stone) to include air pollution control permits and water quality permits.
- **Sporting Club, Creekside Apartments**
Responsible for surface drainage remediation and rehab for the Sporting Club, Creekside Apartments, White Sulphur Springs, WV.
- **West Virginia School of Osteopathic Medicine**
Evaluated the stormwater system and designed a sink hole underground injection system for the WVSOM in Lewisburg, WV.
- **Greenbrier Valley Medical Center**
Evaluated the stormwater system and designed a sink hole underground injection system for the medical center in Ronceverte, WV.
- **City of Alderson**
Evaluated drainage issues and made remediation recommendations for the City of Alderson, WV.

Robert Thaw, PS

Vice President - Survey and Mapping

With more than 30 years of experience in a wide range of surveying projects, Robert Thaw serves as head of TERRADON's Survey and Mapping department. He organizes and supervises survey crews, reviews project plans and creates base mapping for various projects including: landfills, noise barriers, interchanges, connectors, bypasses, sidewalks, bike paths and bridges.

Thaw oversees all TERRADON survey activities, including: preparation of Right-Of-Way plans; the development of GPS static networks for aerial mapping in the design of roadways; identification of existing utilities and property lines; base image development and control placement for construction projects; and drafting of legal descriptions for ROW parcels.

Thaw has been directly responsible for survey and mapping services on a number of landfill projects including:

- **Nitro Landfill Topographic Survey**
Surveyed the boundary of the former Landfill for future cap and development. Performed topographic survey of the site , prepared project mapping.
- **Tucker County Landfill**
Established survey control for the landfill. Created topographic surveys on a quarterly basis to be used for volume reporting.
- **Charleston Landfill**
Performed topographic surveys, and located bore hole locations
- **Charleston Landfill for Geotechnical Studies**
Conducted a feasibility study for Leachate tank siting. Performed topographic surveys of proposed leachate tank sites to be used in the feasibility study.
- **Nicholas County Landfill Design**
Provided survey services to establish control for the landfill. Created topographic surveys for design studies.
- **AEP – John Amos Power plant industrial Landfill - Client, Shelly and Sands, Inc.**
Established survey control, performed topographic surveys used for access road design, Completed construction staking for access road, and excavation, provided daily volume reports.

Professional Surveyor,
West Virginia

Chris Morris

Senior Inspector

Chris Morris is a Senior Inspector for TERRADON Corporation. He is responsible for quality control testing and inspection for WVDOH, commercial, and residential construction projects throughout West Virginia. He interfaces with site owners (public and private) and contractors to complete testing and inspection projects.

Morris is responsible for monitoring contractor's work for conformance to the design plans, specifications and general permit requirements; experience tracking daily quantities, completing daily inspection reports, reviewing payment requisitions and maintaining field sketchbooks and as-built drawings.

Morris holds the following registrations:

- WVDOH Compaction Inspection
- WVDOH Portland Cement/Concrete
- WVDOH Asphalt Plant Technician
- WVDOH Asphalt Field Technician Compaction
- WVDOH Aggregate Inspector
- Nuclear Radiation Safety Officer
- FAA Eastern Regional Laboratories List
- PTI—Post-Tensioning Institute Level #2
- OSHA 10-Hour Construction Safety and Health

Morris has completed Testing and Inspection Services on the following notable projects:

- Mingo County Airport—Williamson, WV - Primary QA Technician
- Western Regional Jail—Barboursville, WV - Owners QA Technician of Auger Cast Pile Installation
- AEP John Amos Plant—Winfield, WV - QA/QC mass concrete pours for large mat foundations and contractor's QC of controlled fill and various concrete placement.
- AEP Glen Lynn Power Plant, Glen Lynn, VA - Observation and Density Control
- Charleston Landfill—Charleston, WV - Observation and Density Control
- Raleigh Memorial Airport—Beckley, WV - Observation and Density Control
- Winfield Locks and Dam—Winfield, WV - Observation and Density Control
- Blennerhassett Bridge—Parkersburg, WV - QA/QC for all facets of construction of new bridge
- AEP Kyger Creek Power Plant—Cheshire, OH - Observation and Density Control

Greg Harvey

Construction Inspection/Monitoring

Relevant Project Experience

- **S&S Landfill, Clarksburg WV (now owned by Waste Management)**
QA/QC and Inspection which included but was not limited to; Earthwork, Drainage, Concrete and HDPE Liner. The various projects included 3 new MSW cells and one cell that was tied into an existing cell. Total cost was approximately 9 million dollars.
- **Nicholas County Landfill, Craigsville WV**
Environmental Study for WV LCAP Program which included but was not limited to; Field work and Final report preparation.
- **Fayette County Landfill Closure, Cunard WV**
Design, QA/QC and Inspection which included but was not limited to; Earthwork, Drainage, Concrete and HDPE Liner. The Project was a landfill closure under WVLCAP program.
- **McDowell County Landfill Closure**
Project Management/ Construction Management, Design, QA/QC and Inspection which included but was not limited to; Earthwork, Drainage, Concrete and HDPE Liner. The Project was a landfill closure under WVLCAP program.
- **Union Carbide/ Dow Chemical Environmental Remediation Project**
Construction management of a \$40 Million remediation project which involved the removal of phenol and monochloric benzene from a stream and the construction of 4 hazardous landfills and stream bank stabilization. Coordinated with the US EPA, Ohio EPA and the plants industrial neighbors.

Dave Wallace

Senior Inspector

Dave Wallace is a West Virginia Certified Compaction Inspector who is responsible for quality control testing and inspection for WVDOT, commercial, and residential construction concerns. He is the interface with site owners (public and private) and contractors to complete high quality projects. He works independently at sites throughout West Virginia and maintains appropriate documentation.

Relevant Project Experience

- Southridge Industrial Park
- Garden Ground Materials Testing and Construction Monitoring
- Office of Surface Mining Compaction Testing
- State Route 34 Widening
- US Route 35 - Interstate 64 Interchange
- US Route 35 - New Construction of approximately 1.5 miles of road
- WVDOH District 3 (Parkersburg) - Consultant for Materials Inspection
- WV Corridor D (four sections)
- Stollings-Logan Road
- Merritts Creek Connector
- Witcher Creek
- Ripley Bridge
- Williamstown Welcome Center
- Route 60, S. Charleston
- Robinson Run Bridge
- Crab Creek Bridge

Mike Ward

Senior Field Technician

Michael Ward serves as a Senior Field Technician for TERRADON Corporation. He has provided construction management, construction observation, testing and inspection services in the engineering industry for 30 years. Ward serves as a third-party independent inspector, or the owner's representative for municipal, commercial and industrial projects. He has extensive experience in heavy highway construction, underground utilities, soils, asphalt, concrete, grout, auger cast piles, and anchor testing.

Relevant Project Experience

- **The Summit Bechtel Family National Scouting Reserve** - Provided QA/QC inspection services for four (4) earthen dams. Inspection consisted of the observation of fill placement, soil compaction testing of fill, observation of concrete placement for spillways and strength testing of concrete. In addition, Mr. Ward performed evaluations of soil areas used as fill material for the construction of these four (4) dams.
- **Above Ground Storage Tank Inspections (WV SB 37 Compliance)** - Senior Inspector for approximately 1,800 Above Ground Storage Tank inspections. Task included field inspection of AST's and certification of tanks for WVDEP compliance.
- **Tucker County Landfill** - Completed QA/QC services for the construction of a new cell. He was responsible for onsite observation, testing, verification and reporting of all piping, erosion control, HDPE and clay liner systems, leachate collection and management of a permanent leachate pond and additional sediment pond.
- **The Summit Bechtel Family National Scouting Reserve** - Senior inspector who oversaw QA/QC on 14 miles of new road construction built per WVDOH specifications; installation of 64 miles of underground utilities including 21 miles of waterline, 24 miles of sewer line, 17 miles of electric and 2 miles of gas; installation of the largest grey/Blackwater sewage system east of the Mississippi. The camp also had 600 acres cleared, grubbed and graded with 28 miles of drainage swales including erosion and sediment controls. The work also included the testing of over 7,000 CY of structural concrete and over 5,000,000 CY of mass excavation and compaction. In addition 4 earthen dams were built with over 800,000 CY of embankment.
- **City of Dunbar Wastewater Treatment Plant** - Construction Manager and Field Inspector 10M Wastewater treatment plant and storm and sanitary line upgrades for the City of Dunbar, WV and the West Virginia Department of Environmental Protection. Contracts 2&3 installation of storm conduit and wastewater piping Inspection of 50,000 ft. of waste water and sanitary piping. 48" to 6". Excavation depths 6' to 28' monitoring excavation, backfill and compaction procedures and road repairs to ensure compliance with approved plans and specifications, inspection for alignment, grade and leakage. Extensive documentation and resolve of any complaints concerning construction activities.
- **Waterline Inspections in Ohio**
 - Franklin County, Ohio - Construction inspection for 3000 ft. of 20" water transmission line from 5th Street to Division Street. Ductile iron, PVC and Polyethylene material used.
 - Columbus, Ohio - Construction inspection for 4000 ft. of 12" waterline to replace existing 6" waterline.
 - Inspection for the relocation of one mile of 16" ductile iron water line. The line was relocation in 8 separate locations to avoid interference with the road construction. Included were several road crossing relocations involving 6", 48" water lines as well as 200 ft of 15" and 300 ft. of 8" Sanitary sewer with manholes.

- **(Private Client) Foundation Contract** - Served as Project Manager and Inspector for a 250' x 250' footprint that included installation of 700 + auger cast piles and an 18" reinforced hydrostatic foundation slab. Provided construction management services and daily site inspections.
- **Federal Building and Courthouse, Charleston, WV** - Serving as Project Coordinator, provided construction management services from the pre-design through post construction phases of the \$80,000,000 project.
- **General Inspection Services** - Position involved extensive travel throughout PA, OH, VA, & WV performing special inspection services, inspection and progress monitoring of commercial and public works. Contractor/ Architect support, owners representative services, construction schedule review, sub operations, building code compliance including ADA and OSHA standards enforcement.

CERTIFICATES OF AUTHORIZATION

TERRADON CORPORATION is a certified Women's Business Enterprise as defined by the Women's Business Enterprise National Council.

TERRADON is the largest woman-owned engineering firm in West Virginia and is controlled by Virginia King, who provides more than 32 years of administrative experience to the company.

TERRADON CORPORATION is well qualified to provide all of the services as described in the Scope of Services of the Request for Qualifications to include: site investigation of existing features, surveying and mapping, laboratory analysis of soil and water, subsurface investigations to determine location as well as limits and depths of waste, location of potential borrow areas either on-site or nearby, engineering and design of the capping system to be installed including grading plans and cross sections of the cap system, leachate collection and storage systems, sediment and erosion control plans including required ponds, preparation of construction contract drawings and specifications suitable for letting of construction bids and all applicable permitting. T E R R A D O N 's professional staff and previous experience with the WVDEP LCAP program and other municipal/industrial waste landfills will allow us to provide you with a quality project in a timely manner.

Tucker County Landfill, Cells 5-7 (Ongoing)

For the Tucker County Solid Waste Authority, TERRADON Corporation performed surveying, mapping, subsurface investigation, groundwater study, construction monitoring, cell design, and construction observation and certification for the extension of Cell 5 at the Tucker County Landfill in Davis, WV.

For Cell 6, TERRADON performed surveying, mapping, subsurface investigation, groundwater study, construction monitoring and certification, cell design, major permit modification, and Certificate of Need application for a six acre cell at the Tucker County Landfill in Davis, WV.

Cell 7, for the Tucker County Solid Waste Authority, performed major modification of the permit, geotechnical investigation, new 50-year cell design, and leachate pond closure plan, groundwater statistical report, leachate management, QA/QC services, stormwater ponds, subsurface investigation, and Certificate of Need (CON) application, HELP mode and installation of monitoring wells for a 20 acre cell at the Tucker County Landfill in Davis, WV.

TERRADON provides quarterly surveying of the current landfill surface and calculation of the quarterly volume and compaction rate; producing semi-annual statistical analysis and reports; creating annual reports that include: construction activities, financials, MSW tonnage, leachate generation, groundwater and discharge monitoring reports, and air-space summaries.

Tucker County Landfill Permitting Included: Solid Waste Facility Siting Plan, Certificate of Need, Certificate of Site Approval, Part 1-Site Evaluation Application, Part 2-Design Application, DWWM-Module A-NPDES, Major Modification, Quarterly Report, Annual Report for the Tucker County Landfill.

Tucker County Landfill Cells 1-4 Capping

The project consisted of capping approximately 20 acres of previous landfill cells with a HDPE Liner. The project included the following: preparation of construction drawings, technical specifications, contract and bidding documents, advertisements for bid, design report outlining the calculations to support the design, Erosion and Sediment Control permits, modifications to the NPDES storm water permit, permits to the West Virginia Solid Waste Authority for capping and reuse of methane, air pollution control permits for use of the methane gas emissions, and field services for Quality Control.

Ham Landfill Expansion Project (Ongoing)

TERRADON Corporation provided site characterization, surveying, mapping, subsurface investigation, groundwater study, monitoring, cell design, major modification to permit, and Certificate of Need application for the Ham Sanitary Landfill Expansion Project in Peterstown, WV.

Jackson County Sanitary Landfill

As part of the WVDEP's Landfill Closure Assistance Program (WVDEP LCAP), TERRADON Corporation prepared an interim closure plan including stormwater management, leachate management, sediment pond and leachate pond repairs and re-vegetation of disturbed areas for the Jackson County Sanitary Landfill in Jackson County, WV.

Pine Creek Landfill

For the WVDEP LCAP, TERRADON Corporation designed the permanent closure plan including an additional landfill cell, stormwater management, capping, leachate management and storage tank, construction QC and certification for the abandoned landfill in Logan County, WV.

Wyoming County Sanitary Landfill

TERRADON Corporation provided site characterization; stormwater management and leachate management design including storage tank, pump station and force main to POTW; slope stability; and Subtitle D Cap for the WVDEP for the Wyoming County Sanitary Landfill.

ATTACHMENT 12.B ASSESMENT AND EVALUATION

TERRADON was retained by the WVDEP to complete a site characterization of the Pinecreek/Omar Landfill. The site characterization included surveying, subsurface investigation including auger and rock core borings, leachate and surface water sampling, groundwater user

survey including sampling of water wells, review of historical records, site reconnaissance, assessment of the sites's compliance with the Solid Waste Management Rules, and development of a conceptual closure plan. See Attachment 12.A for more project examples.

ATTACHMENT 12.C CONSTRUCTION INSPECTION

TERRADON is experienced in landfill closure construction inspection. TERRADON's construction monitoring and QA/QC services include final certifications of the construction. TERRADON will prepare construction reports to including test data, daily field activity logs, and as-built record drawings along with the certification.

ATTACHMENT 12.D CONTOUR MAPPING

TERRADON's is experienced in aerial photography and development of contour mapping. TERRADON has the equipment and staff to produce contour mapping. TERRADON has been directly responsible for survey and mapping services on a number of landfill projects. See Attachment 12.A for project examples and additional landfill projects listed below.

Nitro Landfill Topographic Survey

Surveyed the boundary of the former landfill for future cap and development. Performed topographic survey of the site, prepared project mapping.

Tucker County Landfill

Established survey control for the landfill. Created topographic surveys on a quarterly basis to be used for volume reporting.

Charleston Landfill

Performed topographic surveys, and located bore hole locations.

Charleston Landfill for Geotechnical Studies

Conducted a feasibility study for Leachate tank siting. Performed topographic surveys of proposed leachate tank sites to be used in the feasibility study.

AEP -John Amos Power Plant Industrial Landfill -Client, Shelly and Sands, Inc.

Established survey control, performed topographic surveys used for access road design, Completed construction staking for access road, and excavation, provided daily volume reports.

ATTACHMENT 12.E GROUNDWATER

TERRADON is experienced in evaluating groundwater contamination associated with landfills. TERRADON has qualified and experienced staff to handle the evaluation of groundwater contamination. We complete semi-annual groundwater monitoring at Tucker County Landfill along with statistical analysis and reporting of results to WVDEP. TERRADON routinely samples groundwater monitoring wells on several industrial, voluntary remediation, and landfill sites in West Virginia. See Attachment 12.A for more project examples.

ATTACHMENT 12.F COST ESTIMATING

TERRADON is experienced in landfill closure cost estimating. TERRADON has prepared engineers construction cost estimates for numerous landfill projects to include Closure/Post Closure Costs. See Attachment 12.A for project examples.

TERRADON CORPORATION

CORPORATE CULTURE

TERRADON Corporation offers a multi-faceted approach to design engineering and consulting services. For the past 25 years TERRADON staff has provided a wealth of engineering solutions blanketing the Appalachian and Mid-Atlantic region with successful projects. The company built its reputation on expert personnel and quality, time-sensitive service. Those same founding principles hold true today.

The second-generation, family-owned business has built a strong reputation by providing flexible, cost effective design solutions and maintaining the highest level of customer service. The firm has been recognized through numerous awards from professional organizations and agencies including the American Society of Civil Engineers, State Highway Departments, the Department of Environmental Protection and the American Institute of Architects.

TERRADON's corporate culture promotes innovation and progressive thinking. Project leaders strive to sustain customers through a wide-range of engineering offerings. TERRADON employees understand the purpose behind their services and work to cultivate lasting relationships with clients through honest, hard work.

TERRADON is a certified Women's Business Enterprise as defined by the Women's Business Enterprise National Council and is the largest woman-owned engineering firm in West Virginia.
