Waste Disposal Services as outlined on the attached bid sheet.

SOLICITATION NUMBER: CRFQ DEP1800000020
Addendum Number: No.01

The purpose of this addendum is to modify the solicitation identified as ("Solicitation") to reflect the change(s) identified and described below.

Applicable Addendum Category:

- | Modify bid opening date and time
- | Modify specifications of product or service being sought
- | Attachment of vendor questions and responses
- | Attachment of pre-bid sign-in sheet
- | Correction of error
- | Other

Description of Modification to Solicitation:

This addendum is issued to modify the solicitation per the attached documentation and the following:

1. The purpose of this addendum is to extend the bid opening date to allow the agency additional time to respond to vendor questions.

Bid opening date WAS April 24, 2018 at 1:30 PM EDT.
Bid opening date IS NOW May 8, 2018 at 1:30 PM EDT.

No other changes.

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

West Virginia Ethics Commission

Disclosure of Interested Parties to Contracts

Pursuant to *W. Va. Code* § 6D-1-2, a state agency may not enter into a contract, or a series of related contracts, that has/have an actual or estimated value of \$100,000 or more until the business entity submits to the contracting state agency a Disclosure of Interested Parties to the applicable contract. In addition, the business entity awarded a contract is obligated to submit a supplemental Disclosure of Interested Parties reflecting any new or differing interested parties to the contract within 30 days following the completion or termination of the applicable contract.

For purposes of complying with these requirements, the following definitions apply:

"Business entity" means any entity recognized by law through which business is conducted, including a sole proprietorship, partnership or corporation.

"Interested party" or *"Interested parties"* means:

- (1) A business entity performing work or service pursuant to, or in furtherance of, the applicable contract, including specifically sub-contractors;
- (2) the person(s) who have an ownership interest equal to or greater than 25% in the business entity performing work or service pursuant to, or in furtherance of, the applicable contract. (This subdivision does not apply to a publicly traded company); and
- (3) the person or business entity, if any, that served as a compensated broker or intermediary to actively facilitate the applicable contract or negotiated the terms of the applicable contract with the state agency. (This subdivision does not apply to persons or business entities performing legal services related to the negotiation or drafting of the applicable contract.)

"State agency" means a board, commission, office, department or other agency in the executive, judicial or legislative branch of state government, including publicly funded institutions of higher education: Provided, that for purposes of *W. Va. Code* § 6D-1-2, the West Virginia Investment Management Board shall not be deemed a state agency nor subject to the requirements of that provision.

The contracting business entity must complete this form and submit it to the contracting state agency prior to contract award and to complete another form within 30 days of contract completion or termination.

This form was created by the State of West Virginia Ethics Commission, 210 Brooks Street, Suite 300, Charleston, WV 25301-1804. Telephone: (304)558-0664; fax: (304)558-2169; e-mail: ethics@wv.gov; website: www.ethics.wv.gov.

Revised October 7, 2017

West Virginia Ethics Commission Disclosure of Interested Parties to Contracts

(Required by W. Va. Code § 6D-1-2)

Contracting Business Entity: Veolia ESTechnical Solutions Address: 350 Jacobson Drive, Poca, WV 25851

Authorized Agent: Gerald Dillman Address: _____

Contract Number: _____ Contract Description: _____

Governmental agency awarding contract: _____

Check here if this is a Supplemental Disclosure

List the Names of Interested Parties to the contract which are known or reasonably anticipated by the contracting business entity for each category below (attach additional pages if necessary):

1. Subcontractors or other entities performing work or service under the Contract

Check here if none, otherwise list entity/individual names below.

2. Any person or entity who owns 25% or more of contracting entity (not applicable to publicly traded entities)

Check here if none, otherwise list entity/individual names below.

3. Any person or entity that facilitated, or negotiated the terms of, the applicable contract (excluding legal services related to the negotiation or drafting of the applicable contract)

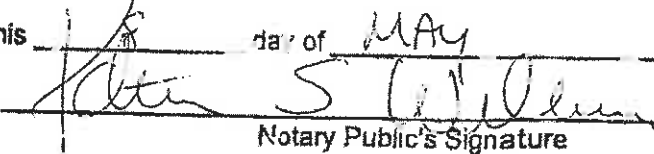

Check here if none, otherwise list entity/individual names below.

STATE OF WEST VIRGINIA
Purchasing Division
PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

RE: HSER Waste Disposal Services
CRFQ 0313 DEP 1800000020
General Terms and Conditions

To Whom It May Concern:

Veolia requires the following modifications to the above-referenced document(s):

ARTICLE 11

LIQUIDATED DAMAGES

Delete this Article in its entirety.

ARTICLE 37

INDEMNIFICATION

In the second line after, "... (1) Any claims or losses"

Insert: ",to the extent caused by the Vendor's negligence, breach or willful misconduct,"

In the fourth line after, "... (2) Any claims or losses"

Insert: ",to the extent caused by the Vendor's negligence, breach or willful misconduct,"

Add the following language to the end of Article 37:

"NOTWITHSTANDING ANYTHING TO THE CONTRARY IN THIS AGREEMENT, CONTRACTOR'S AGGREGATE LIABILITY ARISING OUT OF SERVICES PROVIDED HEREUNDER, OTHER THAN TRANSPORTATION SERVICES PROVIDED BY CONTRACTOR OR STORAGE, TREATMENT AND/OR DISPOSAL SERVICES PROVIDED BY CONTRACTOR AT

CONTRACTOR LOCATIONS, SHALL NOT EXCEED THE GREATER OF THE AGGREGATE FEES PAID IN ANY CALENDAR YEAR HEREUNDER OR ONE MILLION DOLLARS (\$1,000,000).”

If there are any questions or comments, please do not hesitate to contact me.

Sincerely,

Melanie Free-Clinton

PO Box 50130

Charleston, WV 25305-0130

To whom it may concern,

Fulminic Acid, Mercury, Lines 147 & 148 is forbidden for shipment by DOT when dry, and is an explosive 1.1A when wet. Not enough information was given about the fulminic acid, mercury to offer a disposal price. A price of \$0.00 was entered Exhibit A for lines 147 & 148 in order for the spreadsheet to calculate the total.

Thank you,

Jerry Dillman
Account Manager

Veolia ES Technical Solutions, L.L.C. - 3 Year Environmental Compliance History

Entity Name	Entity State	Receiving Entity	Type of Violation	Inspection Date	Violation Description	Inspection Date	Response/Status
VES - West Carolina	Ohio	Ohio Environmental Protection Agency	Notice of Violation	3/29/15	During an inspection one container was observed without an accumulation start date and proper hazardous waste marking	3/27/15	Container marking was completed at the time of the inspection. No further action required. OEPA acknowledges return to compliance.
VES - Puerto Rico	Puerto Rico	Environmental Quality Board	Notice of Violation	4/9/15	The 10-day interim facility hold waste in excess of the maximum 10 days while in transportation	5/1/15	Veolia identified the error and self-reported it to the EQB. Penalty of \$3,000 paid.
VES - Port Arthur	Texas	Texas Commission on Environmental Quality	Notice of Violation	4/23/15	Alleged violations for TPOES compliance including failure to sample outfit in compliance with Water Quality Discharge Permit, failure to properly calculate the daily average for E coli and failure to correctly report effluent data on the DMR	6/10/15	Response submitted by Veolia to the TCEQ and response received from the TCEQ that no further action required.
VES - Arizona	California	Department of Toxic Substances Control	Notice of Violation	5/4/15	During an inspection the DTSC noted that the facility was not properly closing hazardous waste in relation to its solvent shipment process. The DTSC contends that the intermediate product from the reclaiming requires storage as a hazardous waste.	Pending	Veolia submitted a written response to the DTSC to clarify that the intermediate material is a product.
VES - Henderson	Colorado	Colorado Dept of Public Health and Environment	Notice of Violation	9/9/15	Based on an October 2015 inspection, this Division identified issues related to incompatible waste storage, weather-resistant container labels, and cracks in secondary containment areas.	2/11/16	Veolia implemented corrective actions and agreed to a settlement amount of \$7,742. Veolia received a letter from DPHHE "Closing the case on 3/20/16.
VES - Monticello Falls	Wisconsin	USEPA Region 5	Notice of Violation	10/6/15	Based on an August 2014 inspection, EPA alleges non-compliance with the following: accumulation of hazardous wastes following treatment, marking containers with the accumulation start date, and performing scheduled daily inspections.	Pending	Veolia submitted a written response to the agency to contest the referenced violations.
VES - West Carrollton	Ohio	USEPA Region 5	Notice of Violation	10/9/15	Based on an April 15, 2015 inspection, EPA alleges non-compliance with the following: location of storage of hazardous waste, submission of manifest copies to the state agency, asbestos vapor pressure on tanks, and waste exporter reporting.	Pending	Veolia submitted a written response to the agency to contest the referenced violations.
VES - Middlesex	New Jersey	USEPA Region 2	Notice of Violation	10/23/15	Based on a July 2015 inspection, EPA alleges non-compliance with the following: air emission monitoring of pumps, improper container closure, contingency plan updates, and financial insurance updates.	6/11/16	Corrective actions completed. Veolia submitted a written response to the agency to contest some of the referenced violations. Penalty paid of \$8,600.
VES - Midchester	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	2/12/16	NJDEP inspection noted a tank wagon that was staged temporarily outside of the permitted storage area.	6/20/16	Veolia completed corrective actions. Penalty paid of \$12,000.
VES - Waukegan	New York	New York Department of Environmental Conservation	Notice of Violation	2/12/16	NYDEC inspection on 1/22/16 noted issues related to the secondary containment for 10-day operations and the transfer of solid wastes within the 5-day timeframe.	Pending	Veolia submitted a written response to the agency to contest the referenced violations.
VES - Tallahassee	Florida	USEPA Region 4	Notice of Violation	4/11/16	USEPA inspection completed 12/17/15 noted violations related to universal waste container management standards, personnel training and acquisition of signed manifests.	5/13/16	Veolia completed corrective actions. Penalty paid of \$8,700.
VES - Monticello Falls	Wisconsin	USEPA Region 5	Notice of Violation	5/25/16	A review of the 2010-2012 export annual reports and associated manifests indicated manifest errors and several undershipped waste volumes.	Pending	
VES - Port Arthur	Texas	Texas Commission on Environmental Quality	Notice of Violation	5/27/16	Agency alleges failure to operate reactor in compliance with the parameters specified in the permit, including, the maximum combustion temperature, maximum CO emissions, maximum metals emissions. Also failure to prevent costly leaks, emissions and complex tank repairs.	8/20/16	Veolia submitted a written response to the TCEQ on 6/16/16 and received a no further action letter from TCEQ on 6/17/2016.
VES - Port Arthur	Texas	Texas Commission on Environmental Quality	Notice of Violation	7/29/16	Alleged violations related to documentation of tank inspections, documentation of emergency response equipment, and posting of security signs.	3/1/17	Veolia completed corrective actions and received a no further action letter from TCEQ on 3/1/2017.
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	8/13/16	Agency alleges failure to close a waste container prior to leaving an area.	Pending	Veolia completed corrective actions and submitted a written response to NJDEP on 9/27/2016.
VES - Arizona	California	Department of Toxic Substances Control	Notice of Violation	11/1/16	Alleged violations include: improper container storage, spill spillover, secondary containment, and the documentation of inspections.	10/6/17	Veolia completed corrective actions and submitted a written response to DTSC on December 27, 2016. Return to compliance letter issued by DTSC on 10/6/17.
VES - West Carrollton	Ohio	Ohio Environmental Protection Agency	Notice of Violation	3/16/17	Agency alleges hazardous wastes were stored in non-hazardous waste storage unit.	Pending	Veolia participated in a meeting with OEPA on 4/17/17 to discuss the NOV. Discussions ongoing.
VES - San Diego	California	Department of Toxic Substances Control	Notice of Violation	3/22/17	Agency violations include: improper labeling/markings of container, improper packaging (overpack), shipment of hazardous waste to a non-TSDP, improper manifesting.	Pending	Veolia conducted re-training on proper packaging of overpack containers and submitted a written response to DTSC on 5/29/2017.
VES - Port Arthur	Texas	Texas Commission on Environmental Quality	Notice of Violation	4/18/17	Agency issued NOV for air emissions exceedances self reported by Veolia.	9/29/17	Received a no further action letter from TCEQ on 9/29/2017.
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	5/7/17	Agency alleges that the facility did not adequately document integrity assessment inspections for tank systems, process areas and secondary containment systems.	Pending	Veolia completed corrective actions and submitted a written response to NJDEP on 5/22/17.
VES - Arizona	California	Department of Toxic Substances Control	Notice of Violation	7/21/17	Agency alleges that the vessel failed to maintain and operate the facility in a manner that minimizes the possibility of a sudden or non-sudden release of hazardous waste constituents (a sample of sediment collected in a corner of the facility indicated hazardous levels of lead).	Pending	Veolia completed corrective actions and submitted a response to DTSC on 7/27/17.
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	9/16/17	Agency alleges that the facility failed to clearly mark an intermediate container with the words "hazardous waste", the applicable EPA hazardous waste codes, and the hazards of the contents.	Pending	Veolia completed corrective actions on 9/13/17, the date of the inspection.
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	9/30/17	Agency alleges that the facility failed to clearly mark seven 55-gallon containers with the words "hazardous waste", the applicable EPA hazardous waste codes, and the hazards of the contents.	Pending	Veolia completed corrective actions on 9/13/17, the date of the inspection.
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	10/20/17	Agency alleges that the facility did not properly classify four bulk solvent shipments.	Pending	Veolia submitted a response to NJDEP on 11/6/17.

VES - Chicago	Puerto Rico	Puerto Rico Environmental Quality Board	Notice of Violation	11/21/17	Environmental Quality Board alleges that hazardous waste in transportation exceeded the 10 days storage time allowed to treat, store and dispose of a permit	Pending	Veolia submitted a response to the Environmental Quality board within the required 10 day timeframe
VES - Port Washington	Wisconsin	Wisconsin Department of Natural Resources	Notice of Violation	12/15/17	Exceedance of mercury 24-hour average ambient air standard for a period of 18 hours	Pending	Veolia completed corrective action. Discussions ongoing
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	1/17/18	Agency alleges that the facility failed to clearly mark an intermediate container with the words "Hazardous Waste", the applicable EPA hazardous waste code, and the hazards of the contents	Pending	Veolia completed corrective actions on 1/17/18 the date of the inspection
VES - Middlesex	New Jersey	New Jersey Department of Environmental Protection	Notice of Violation	1/23/18	Agency alleges that the facility did not notify NJDEP that they were installing a permit less shredder. The permittee shall give notice to the Department as soon as possible of any planned physical alterations or additions to the permitted facility	Pending	Veolia submitted a response including a revised site plan to NJDEP on 1/25/18

Certificate of Completion

This certifies that

Background and Description of Company

Veolia ES Technical Solutions, L.L.C., (Veolia) provides hazardous waste services through a network of more than 40 strategically located facilities nationwide and in Puerto Rico. These facilities are staffed by over 800 of the most dedicated and highly trained personnel in the industry. Veolia personnel and customers benefit from the use of state-of-the-art, customized equipment designed to efficiently identify, document, package and transport wastes.

Another advantage that Veolia provides is the proficiency gained from many years of hazardous waste management experience. Veolia was formed in June 1999, as a joint venture between Waste Management's Hazardous Business Unit (HBU) and Vivendi, S.A. Waste Management's HBU consisted of Advanced Environmental Technical Services, Inc. (AETS) and Chemical Waste Management (CWM) facilities. AETS, as a corporation, was formed in 1995 as the result of a merger between CWM and Advanced Environmental Technology Corp. (AETC). In August of 2000, Veolia became a fully owned subsidiary of Vivendi, S.A.

The knowledge gained from thousands of experiences in safety planning, packaging, emergency procedures, and disposal technology selection are woven into each project. Especially valuable is the ability to anticipate the important consideration of selecting the proper disposal, treatment, or recycling facilities. Veolias' experience prevents disposal administration delays caused by mislabeled waste packaging, or erroneous commingling of incompatible wastes.

Veolia is committed to service reliability, constant improvement in technical, safety, and material handling methods, and an ever-expanding portfolio of innovative, problem-solving services. With the technical staff and Veolia's facility network available to address all aspects of hazardous waste management, Veolia is able to offer a fully-internalized program which consolidates into one company the various liabilities associated with accepting wastes ranging from the non-hazardous to the radioactive.

Technical Solutions Service Locations

The following hazardous waste management services are offered by Veolia:

- Waste Packaging, Transportation and Disposal
- Thermal Destruction and Fuels Blending
- Reactive Chemical Handling
- Land Disposal
- On-Site Service Support
- Household Hazardous Waste Collection
- Information Management and Computerized Waste Tracking
- Customer Training and Awareness Programs
- Less Than Truckload (LTL) Transportation Services

Service Capabilities

Veolia has been engaged in the management of hazardous waste for over twenty years. Veolia operates a network of transportation, storage, and disposal facilities (TSDFs) and branch field offices in locations throughout the United States and Puerto Rico. This national coverage gives our customers convenient access to a complete line of environmental services. Services offered by Veolia include:

- On-Site Waste Management Services
- Drummed Chemical Waste Management
- Recycling and Reclamation
- Incineration and Fuels Blending
- Laboratory Chemicals Packaging
- Reactive Chemicals Handling
- Site Remediation Services
- Household Hazardous Waste Collection
- LTL Drum Transportation Services
- Information Management Services
- Educational Services
- Specialty Services
- Mercury Waste Management
- Cylinder Sampling, Identification, and Disposal

On-Site Waste Management Services

Organizations concerned with reducing costs and improving efficiency and productivity utilize our On-Site Services to manage their hazardous materials and chemical wastes. Our customers are able to then concentrate on their core business and profits while Veolia reduces liability, costs, and minimizes hazardous wastes generated.

Veolia field personnel provide direct access to all standard field services while performing many of the day-to-day functions normally done by the customers' employees. The customer decides on the number of personnel and whether their need is full time, part time or on an as-need basis. With this option, customers avoid the expense associated with hiring, training, and supporting these specialized personnel. Every company operates differently, as a result, each On-Site Service program is unique and customized to our customers' needs.

Drummed Chemical Waste Management

Veolia offers its customers a wide variety of disposal options for a multitude of chemical waste types, which are packaged in drums. Veolia' Part B permitted TSDFs coordinate less than truckload (LTL) quantities of hazardous waste onto long-haul trailers which are destined for fully approved disposal and treatment facilities. Veolia provides pre-approved generic profiles that speed up the waste approval process and saves time in scheduling waste pickups.

Recycling and Reclamation

In addition to its solvent recycling centers (California, Colorado, Ohio), Veolia has a wide variety of specialty recycling options for materials such as acids, batteries, paints, mercury compounds, antifreeze and precious metals.

Fuels Blending and Destructive Incineration

Veolia conceptually evaluates all waste streams for process management, according to an industry acceptable hierarchy of waste principles: reduce, recycle, treatment and disposal. When waste materials cannot be reused/recycled, organic waste streams are further evaluated for fuels blending (California, Colorado, Georgia and Ohio) or destructive incineration (Illinois, Texas).

Laboratory Chemicals Packaging

Veolia can identify, package and dispose of laboratory chemicals with a high level of expertise, dedication and attention to detail. Veolia has been in the business longer than most, and has developed a number of safe, efficient, and accountable programs for dealing with laboratory chemicals. All projects are administered by a highly trained group of professionals, including experienced approval specialists who expeditiously review and process chemical wastes for transport and disposal.

All quantities of chemical wastes including less-than truckload amounts will be removed. Our packaging methods meet all regulatory standards, maximize useable volume, decrease costs and enhance safety. A computer tracking system is utilized which documents the movement of all materials from your site to final disposal. In addition, Veolia will perform environmental and technical audits of all disposal sites. We will assist any customer with developing programs to minimize the generation of laboratory chemical wastes at the site.

Reactive Chemicals Handling

Veolia' Reactive Chemical Group (RCG) has set a benchmark standard for handling specialty wastes. This department has proven invaluable to large research facilities which house numerous laboratories where reactive and energetic chemicals are regularly employed and where certain dated chemicals can acquire reactive properties.

Veolia' RCG provides a team of trained personnel specializing in the safe handling of reactive chemicals. In addition, Veolia has designed and engineered specialized equipment capable of remotely opening various size containers of potentially reactive chemicals. This equipment, in conjunction with specific procedures for the stabilization of reactive chemicals, affords our customers the highest degree of safety when dealing with reactive, energetic or unknown materials. In the event temperature sensitive materials are encountered, Veolia can provide the necessary equipment and expertise required to transport and dispose of these chemicals.

Veolia' Reactive Chemical Group has also developed procedures for sampling and identifying unknown drum and laboratory wastes for transportation and disposal.

In the field, chemicals are sampled, spot analyzed and tested for compatibility under level B personal protective equipment (PPE) procedures. To reduce analytical costs, chemicals are then grouped according to hazard class and a composite sample collected for more detailed analyses. The analyses, along with the field tests, will determine the proper packaging, transportation and disposal requirement of the unknown material.

Site Remediation Services

Veolia' site remediation team is highly trained and experienced in a wide variety of projects, and makes use of the latest equipment and technologies to provide a true "turn-key" service. Veolia can assess the site and plan its restoration; provide project planning, contain and remove all contaminants; decommission, remove and dispose of tanks and transformers and decontaminated lab and production equipment and industrial facilities.

Veolia teams work diligently to give the customer an accurate appraisal and estimate on services, and to expeditiously move remediation programs through to completion. Veolia' turnkey services include coordination with subcontractors, assistance with appropriate regulatory agencies, procurement of necessary approvals, and supervision of disposal.

Household Hazardous Waste

Every household, farm, and small business in America generates hazardous wastes such as spent chemicals, cleaners, pesticides, toxins, and solvents. While individually the amounts may not be overwhelming, collectively these amounts are significant. In recent years, municipalities and other civic organizations have become more active in providing outlets for wastes generated by residents, farmers, and small businesses. Veolia has performed over 2,500 of these programs and is continually expanding them to meet a growing demand. Veolia household hazardous waste programs include:

- *Event planning, including site selection, promotion*
- *Collection site setup and traffic control*
- *Unloading, segregating and classifying wastes*
- *Packaging, bulking, inventorying, and labeling*
- *Transporting, recycling, or disposal of collected materials*

LTL Drum Transportation Services

Veolia offers less-than-truckload transportation capabilities to customers with small quantity drum shipments. The Veolia LTL program is designed to provide the logistics necessary to optimize container movements. This service is supported by a nationwide network of internal and external transportation resources. Veolia makes customer waste shipments easy by providing efficient and cost effective pickup service; manifest and label service; and dedicated route specialists ready to provide customer assistance.

Waste Information Tracking System

Veolia's Waste Information Tracking System (WITS) provides customers with timely, accurate information on all aspects of their waste shipping activities. This service is based on our unique, fully integrated tracking system. WITS collects data from Veolia field operations and subjects it to a strict quality control review. Data is secured and backed up routinely to prevent loss. By accessing this centralized database, our customers can save countless hours reproducing information for their own use.

Customers can choose report formats in three different modules:

Management Reports - which contain all data necessary to prepare annual/biennial reports to the regulatory community.

Waste Activity Reports - which contain summaries of data to monitor and manage off-site shipments.

Certificates of Tracking - which document movement of all wastes from the point of generation to final treatment or disposal.

State of the Art Field System:

The Veolia Field System is currently being upgraded to meet significant and specific customer needs (i.e., invoicing, waste management, annual reporting) while providing an improved system that will allow our field personnel to operate and manage our customers' needs more efficiently. The objectives of the Field System upgrade are:

- Improve data integration with the sales automation system
- Enhance data accuracy and usability
- Enhance quality control
- Reduce maintenance cost
- Increase flexibility and adaptability of the system
- Integration with customer's systems
- Streamline our business processes

The Veolia Field System will have the following features:

- **Ability to audit packing slips.** The system will audit various fields on the packing slips to ensure that all materials are compatible and that the packing slip is in compliance with disposal site protocol, customer requirements, and state and federal regulations.
- **Ability to access various reference materials.** The system will allow the Environmental Technician to access a large selection of reference materials on demand. Reference materials available includes the following: CFRs, MSDSs, NIOSH Guide, Personal Protection Equipment Selection Chart, USDOT Exemptions, Aldrich Chemical Dictionary, Hazardous Materials Compliance Guide, Veolia Chemical Database, and Veolia Health and Safety Plans.
- **Ability to track inner and outer containers.** The system will provide "cradle to grave" tracking for both inner and outer (i.e., shipping containers) containers. Inner container tracking will allow our customers to manage their waste streams more efficiently. This feature will allow the customer to track waste streams from their original source and analyze waste trends for waste minimization and cost allocation.
- **Ability to automatically segregate chemicals.** The system will segregate chemicals as they are entered. This feature will segregate chemicals based on criteria (i.e., chemical compatibility, hazardous Vs non-hazardous waste, DOT shipping names) selected by the Environment Technician.

- **Ability to network multiple systems.** Multiple systems will be able to feed packing slips into the same manifest. This feature allows for more than one Environmental Technician to enter packing slip information at the same time. This feature reduces on site time by reducing the dependency on one Environmental Technician for all data entry.
- **Ability to generate multiple manifest.** The feature will allow the Environmental Technician to set up several manifests for shipment. Once multiple manifests are set up, the Environmental Technician can create packing slips and assign the packing slips to the desired manifest.
- **Ability to audit manifest.** The system will audit various fields on the manifest to ensure that all materials are in compliance with disposal site protocol, customer requirements, and state and federal regulations. In addition, the Environmental Technician will be able to customize the manifest to meet customers' needs.
- **Ability to generate transportation report.** The system will generate a transportation report that will provide the transporter with the following information: Placard information, container segregation information, list of DOT exemptions, and a piece count.
- **Ability to generate Waste Information Profiles (WIPs).** The system will allow the Environmental Technician to computer generate WIPs.
- **Ability to generate Land Disposal Restriction (LDRs) Forms.** The system will allow the Environmental Technician to generate completed LDRs.

Another feature that Veolia offers is Annual Reporter®, a software program which can compile and complete annual or biennial Hazardous Waste Generator reports. A series of set-up forms creates a database that can sort information as requested. Existing Veolia customers can import all data electronically, eliminating manual data entry.

Annual Reporter provides viewing and reporting of:

- ✓ Waste Profiles
- ✓ Transporter/TSDF Information
- ✓ Waste Generation
- ✓ Waste Shipped
- ✓ Completed GM, OI and IC Forms Sorted to Specification

Annual Reporter can be used year-round to manage waste generation activities and to produce interim waste management reports. The program does all necessary converting and calculations. A built-in Forms Wizard™ feature takes the user through each EPA form, providing line-by-line instructions on-screen.

Educational Services

Veolia prides itself on its record of providing the industry highly skilled, well-trained, and frequently updated professionals. Veolia's internal and educational services programs feature hands-on customer instruction for maximum training effectiveness. Before initiating a program, a trainer from Veolia will visit the customer's facility and interface with key employees to learn about specific needs related to hazard training. Greater attention can be given to subject matter which related to the specific needs of the site or customer production process.

Specialty Services

Veolia has numerous Specialty Services designed to be flexible and uniquely responsive to evolving customer demands. These services currently include:

- Emergency Response Services conducted by trained personnel
- Assured disposal for product returns and other off-specification materials
- Government Services specifically designed to meet the needs of state and federal generators
- Transportation Services via a fleet of fully permitted vehicles
- Low-Level Radioactive Waste Disposal
- Medical Waste Disposal
- Refrigerated Materials Disposal
- Controlled Substances Destruction
- Chemical Moving Services

Mercury Waste Management

Producers and users of mercury-bearing products are provided an improved and environmentally sound technique by which mercury is reclaimed. Mercury lab waste, spill clean-up, thermometers, electrical devices, batteries, powerpacks, dental amalgam, and fluorescent lamps are processed using patented technology. Recovered elemental mercury is triple distilled to ACS standards and marketed or resold to manufacturers and chemical suppliers as a 99.9% pure product. Mercury reclamation services are provided through Veolia's relationship with Advanced Environmental Recycling Corporation (AERC). AERC operates facilities in Pennsylvania, Florida and California.

Cylinder Sampling, Identification and Disposal

Veolia has established a direct disposal outlet for most lecture bottle and cylinder waste at various approved RCRA disposal facilities located throughout the United States. For identified cylinders which cannot be directly disposed, Veolia's Reactive Chemical Group has established procedures for transferring gases into suitable containers or into a liquid medium. The stabilized liquid is then sent for incineration disposal.

In the event cylinder contents are unknown, our Reactive Chemical Group has also developed a program to safely identify unknown cylinders. Cylinders are visually inspected, sampled, and if appropriate, spot tested. Based upon the initial investigation, analytical testing is prescribed. The subsequent laboratory analysis allows Veolia to safely remove cylinders from customer sites.
