RE:

Expression of Interest

Quality Assurance / Quality Control for DEP / Randolph County

Solicitation #CEOI 0313 DEP 1800000003

Triad Proposal No. 01-18-0197

Dear Ms. Ingraham:

Triad Engineering, Inc. (Triad) is pleased to submit this Expression of Interest (EOI) in response to your solicitation for QA/QC services for the Closure Cap Construction and Leachate Management System for the Elkins-Randolph County Landfill.

Triad has significant experience in the monitoring of landfill closures and leachate collection tanks across the mid-Atlantic region (and in particular in West Virginia). Mr. Randy Moulton, P.E., Principal, Chief Engineer, has been responsible for managing design of corrective measures at three sanitary landfills under the Landfill Corrective Action Program (LCAP). These projects all included construction monitoring services. Triad will bring to your project the professional expertise and lessons learned from the past 43 years of engineering and construction experience in this area.

We appreciate the opportunity to provide the enclosed information describing how we can assist you in the successful and environmentally safe completion of this project. We look forward to meeting with you to discuss our capabilities and qualifications in more detail.

Sincerely,

TRIAD ENGINEERING, INC.

Benjamin D-Tayphell

Benjamin G. Campbell, P.E. Senior Project Engineer bcampbell@triadeng.com 304.296.2562 – Office

Randy L. Moulton, P.E. Principal Engineer rmoulton@triadeng.com 540.667.9300 – Office

Overall Capabilities to Perform the Work

Triad Engineering, Inc. (Triad) is a regional engineering firm providing services in the areas of construction inspection and materials field and laboratory testing, geotechnical engineering, survey, civil design, and environmental services, as well as, related earth-science disciplines. The firm has provided services on thousands of projects of varying size and complexity since beginning operations in 1975. Our clients include government agencies, educational institutions, mining, energy, and manufacturing, general contractors, architects, commercial developers, and other engineers.

Triad was founded in 1975 in Morgantown, WV, by three civil engineers from West Virginia University. A second office was opened in the Charleston, WV, area in 1979. In 1989 Triad expanded into Virginia with offices in Winchester and Ashburn. Triad began operations near Pittsburgh, PA, in 1990 and opened an office in Hagerstown, MD, in 1999. Our most recent office opened in Athens, OH. In 1995, Triad became an Employee Stock Ownership Plan (ESOP) which contributes to the overall dedication and commitment of its personnel.

Facilities and equipment available to support Triad's staff and projects have grown substantially since 1975. Eight drilling rigs are located in West Virginia offices and a fleet of four-wheel drive and two-wheel drive vehicles are maintained in-house to meet the needs of our field operations. Fully equipped materials testing laboratories are maintained in five of our seven offices to provide support for our engineering and construction related projects. Each office maintains state of the art computer facilities utilized for roadway design, survey data reduction and mapping, and CADD applications, groundwater modeling, hydraulic evaluations, and stability analysis. Triad's drafting and reproduction facilities are sufficient for development of detailed design drawings, construction specifications, and other necessary reports and documentation. These broad in-house capabilities give Triad control over schedule, cost, and quality thereby minimizing the possibility of time delays, cost overruns, or errors due to coordination with other firms.

Triad's Materials Testing Laboratory is accredited by the American Association of State Highway and Transportation Officials (AASHTO) for Establishing and Implementing a Quality System for Construction Materials Testing for Laboratory Testing of Soils, Concrete, and Concrete Aggregates.

Triad's Mobile Business Application provides the capabilities of electronic reporting procedures. Triad's personnel have the ability to submit inspection and testing reports prior to leaving the project site. Project Managers are able to review these reports and submit PDF versions of customizable reports to our clients within 24 hours via email.

Personnel Qualifications

Work under this contract will be managed from Triad's Morgantown, WV office, which is located within one mile of 1-79. Benjamin Campbell (WV P.E. License #20492) will be the Project Engineer / Project Manager for this contract. Mr. Campbell has over 11 years' experience and holds a MS degree from Marshall University in Engineering, a BS degree from Fairmont University in Civil Engineering Technology, and an AA degree from Potomac State College in Civil Engineering. In addition to his PE license, Mr. Campbell is certified by WVDOT-DOH in Aggregate and Soil Compaction Inspection, Portland Cement Concrete Inspection and Technician, Aggregate and Soil Compaction Testing, and Asphalt Field Testing.

Triad's Morgantown laboratory is supervised by Danny Blake who has over 32 years experience with Triad and has substantial concrete and compaction experiences. Mr. Blake holds certifications from NICET in Level II Construction Materials Testing for soils and concrete and Level III for Geotechnical Laboratory Testing. He is certified through ASCET for Soil, Concrete and Asphalt technician, and the WVDOT-DOH for Inspection in Soil and Aggregate Compaction Testing and Portland Cement Concrete Testing.

Mr. Allan Kennedy will be supervising the technicians who will be assigned to this project. He brings over 21 years' experience and has certifications by ACI for concrete strength testing, concrete lab testing, aggregate testing, and field concrete testing. Additionally, Mr. Kennedy is certified through WVDOT-DOH for soil compaction inspector and Portland cement concrete inspector. Each technician assigned to this contract will have the appropriate certifications, training, and experience necessary to perform job functions with professionalism and thoroughness.

Please refer to Appendix II for resumes specific to each of the personnel assigned to this project.

Proposed Staffing Plan and Methods of Approach

Triad should not require any subcontractors for services to be provided under this contract. It has been the philosophy of Triad from our inception to provide full service consulting to the degree we have the ability and expertise in-house. Therefore, over the years Triad has invested a great deal of capital to assemble modern and reliable equipment as well as teams of qualified and experienced personnel. Because we have focused on investing in people and equipment, Triad rarely needs to utilize subcontractors. Triad has found that maintaining capability in-house provides better control over schedule, cost, and quality.

Triad performs QA/QC testing and inspection in strict accordance with the specifications and Quality Assurance/Quality Control plan for each specific project. As with the 22 landfill projects of which Triad has provided QA/QC services over the past 25 years, services for the Randolph County Landfill project will be performed per the specifications of the plan.

Past Project Descriptions

Triad Landfill Project Experience includes the following, but is not limited to:

Project Name Location	Contact Information	Triad Services		
MARION COUNTY LANDFILL Farmington, WV	Mr. Paul Benedum (304) 368-2000	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial Photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management		
MORGAN COUNTY LANDFILL GREAT CACAPON, WV Mr. Mark Church (540) 665-5643 Closure co Construction Closure co		Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management		
DONS DISPOSAL Charleston, WV	Mr. Clyde Bennett (304) 872-3800	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management		
CITY OF BUCKHANNON CLOSURE CAP Buckhannon, WV Mr. Mark Church (540) 665-5643		Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management		
CITY OF BUCKHANNON LEACHATE COLLECTION Buckhannon, WV	Mr. Mark Church (540) 665-5643	Leachate treatment feasibility study; Borrow soils investigation; Laboratory soils & permeability testing; Leachate sampling and testing; Site design; Leachate lift station design; Sewer design; Construction drawings & specifications; Construction cost estimate; Construction bid preparation and management		

Project Name Location	Contact Information	Services			
MCDOWELL COUNTY LANDFILL Roderfield, WV Mr. Clyde Bennett (304) 872-3800		Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management			
GRANT CO. LANDFILL Petersburg, WV	Mr. Mark Church (304) 872-3800	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management			
ERO LANDFILL Mason County, WV	Mr. Clyde Bennett (304) 872-3800	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management; Monitoring well installation; Wetland treatment system design			
MINGO CO. LANDFILL Mingo County, WV	Mr. Clyde Bennett (304) 872-3800	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management			
North Landfill Marietta, OH	Mr. Tim King (304) 747-3763	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management			
CHARLES PACE TIRE SITE Tunnelton, WV	Mr. Charlie Jordan (304) 558-0844	Review of soils & hydrogeological data; other siting information; and, preliminary plans & specifications			

Project Name Location	Contact Information	Services
GOFF MOUNTAIN LANDFILL Institute, WV	Mr. Steve Graves (304) 767-6613	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management
FREDERICK COUNTY CDD LANDFILL Winchester, VA	Mr. Harvey E. (Ed) Strawsnyder (540) 665-5643	Aerial photography and development of contour mapping; Geotechnical investigation; Monitoring well installation; Construction drawings & specifications; Permit document preparation; Construction inspection of several cells
Local Sanitation Service Morehead, KY	Mr. Steve Hodges (606) 784-6544	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management
FREDERICK COUNTY SANITARY LANDFILL Winchester, WV	Mr. Harvey E. (Ed) Strawsnyder (540) 665-5643	Geotechnical and hydrogeologic studies; Laboratory soils & permeability testing; Monitoring plan preparation; Groundwater sampling and testing; Monitoring well installation; Construction monitoring and testing of numerous cells
PRICHARD LANDFILL Prichard, WV	Maynard	
SYCAMORE LANDFILL Hurricane, WV	Mr. Charles A. Forth (304) 562-2611	Closure design; Permit document preparation; Borrow soils investigation; Site characterization and evaluation (groundwater, waste limits); Closure construction inspection; Aerial photography and development of contour mapping; Construction drawings & specifications; Closure construction cost estimate; Construction bid preparation and management
SOIL OPERABLE UNIT 1 Marietta, OH	Mr. Tim King (304) 747-3763	Construction oversight on behalf of owner on two-year construction project for closure of several superfund landfill units

14. PROVIDE A LIST OF SOFTWARE AND EQUIPMENT AVAILABLE IN THE PRIMARY OFFICE WHICH WILL BE USED TO COMPLETE THIS PROJECT City of Elkins Landfill Construction QA/QC

Each Triad office maintains secure computer networks to support CADD functions, hydrogeologic evaluations, water balance modeling, roadway design, storm water management and surface water drainage design, stability analyses, risk assessment, survey data reduction, and mapping. These broad in-house capabilities give us better control over project schedule, quality, and cost, thereby minimizing problems that can occur during the various contract phases.

Field equipment which will used includes nuclear density gauges for in-place moisture-density testing of compacted soils and concrete testing. Each office maintains an AASHTO accredited laboratory for testing of soils and other construction materials.

Triad's Mobile Business Application provides the capabilities of electronic reporting procedures. Triad's personnel have the ability to submit inspection and testing reports prior to leaving the project site. Project Managers are able to review these reports and submit PDF versions of customizable reports to our clients within 24 hours via email.

19. Use this space to provide any additional information or description of resources supporting your firm's qualifications to perform work for the WV Department of Environmental Protection.

Since Triad's inception in 1975, we have specialized in geotechnical engineering and construction services (QA/QC). Triad's history is extensive throughout the mid-Atlantic region, and in particular in West Virginia. Mr. Moulton, Triad's Principal Engineer, has been responsible for managing design of corrective measures at four sanitary landfills under the Landfill Corrective Action Program (LCAP) in West Virginia and characterization and design of remedial measures for an old landfill in Virginia. Triad's Environmental personnel have worked extensively with the WV DEP in Brownsfield reclamations and other environmental issues.

HIGHLIGHTS OF EXPERIENCE

Mr. Moulton is a Principal Engineer for Triad Engineering, Inc. In this capacity, he has the responsibility for corporate contract administration, risk management and overall quality control and technical quality assurance of projects undertaken by the company. Specific technical activities include preparation of geotechnical proposals, review and/or preparation of subsurface exploration programs, evaluation of geotechnical data and review and preparation of detailed geotechnical reports. Mr. Moulton has also been responsible for managing design of corrective measures at three sanitary landfills under the Landfill Corrective Action Program (LCAP) in West Virginia and characterization and design of remedial measures for an old landfill in Virginia

RELEVANT PROJECT EXPERIENCE

Morgan County Landfill, Morgan County, WV

As Senior Engineer, Mr. Moulton served as Project Manager for design of permanent closure measures for this 17-acre landfill under the WVDEP LCAP program. The project included design of a leachate collection system, a leachate storage tank, a new permanent access road, a surface water collection system, two new stormwater management ponds and a final closure cap. The project required permitting through several state agencies and construction monitoring and materials testing services. Subsequent design work after the initial closure included corrective measures for erosion problems and enhanced soil amendments for revegetation.

Marion County Landfill, Marion County, WV

As Project Manager and Senior Engineer, Mr. Moulton provided the design of permanent closure measures for two (2) adjacent landfills under the WVDEP LCAP program. The project included design of a leachate collection system including two (2) leachate pump stations and a leachate storage tank, a new permanent access road, a surface water collection system, several new stormwater management ponds and a final closure cap. The project required permitting and construction monitoring and materials testing services.

Grant County Landfill, Petersburg, WV

Mr. Moulton served as Project Manager for several design projects for this LCAP facility. Initially was the design of interim corrective measures for fugitive leachate seeps, failing leachate collection lagoons, and inadequate stormwater management. Design of a leachate sewer system including two grinder pump stations, force main and gravity line to eliminate pump and haul expense and deliver leachate to the local sewer system was provided. The final design and construction project included a permanent closure cap, additional leachate interceptor trenches, passive gas vents, and additional stormwater management facilities to comply with NPDES requirements.

New Shenandoah County Solid Waste Landfill, Shenandoah County, VA

As Principal Engineer, Mr. Moulton served as project manager for detailed geotechnical investigation of an area for construction of a new sanitary landfill situated in karst geologic terrain. Field explorations included test pits, conventional test borings, seismic refraction surveying, microgravity surveying and air-track probes to explore anomalies detected by geophysical methods. Work included design of preventative reinforcement measures for specific areas underlain by solutioning channels and seams so that the double liner system would remain intact in the event of subsidence. This was the first sanitary landfill proposed in a documented karst setting to be approved for construction by the Commonwealth of Virginia Department of Environmental Quality (DEQ).

HIGHLIGHTS OF EXPERIENCE

Mr. Campbell has over 11 years of engineering experience, with more than six years as a QC / Construction Services Manager. He is responsible to Triad's Geotechnical Engineering Services projects and supports the Construction Field and Laboratory Services projects. Mr. Campbell is responsible for performance of geotechnical investigations, assessments, and evaluation of exploration results, foundation recommendations and reporting, laboratory testing, field inspections, and special inspections.

RELEVANT GEOTECHNICAL / QC PROJECT EXPERIENCE

Rice Tonkin Cell Site, Doddridge County, WV

As project engineer, Mr. Campbell provided geotechnical exploration and initial foundation recommendations for this 320' tall, 3 leg lattice steel tower. Challenges included structural loadings and uplift relative to the bearing strata.

CONSOL Midstream Green Hills Slide, Morris Township, PA

As project engineer, Mr. Campbell provided geotechnical exploration for landslide repairs of an approximate 300 cubic yard slip along trunk line right of way. Mr. Campbell's responsibilities included supervision of the field exploration program, drilling inspection, logging of boring locations, and initial slide repair recommendations.

Unit 1 Cooling Tower Rehabilitation, Fort Martin, Maidsville, WV

Mr. Campbell was responsible for the implementation and oversight of construction monitoring and materials testing services for this Cooling Tower repairs project. Primary services included visual inspection, observation of project repair operations, shotcrete and concrete testing, bond testing, reinforcing inspection, verification of CSP rating, clear cover, general repair prep, hammer sounding, photo-documentation of repair areas, repair methods including exterior through wall, interior partial depth, route and seal, and final visual inspections to address repair leaks and closeout.

Various Projects, Mt. Storm Power Plant, Mt. Storm, WV

Oversight of construction quality control testing services for various projects at the plant site including coal yard, settling ponds, filter structure, outfalls 015 & 012. Services included visual observation and inspection; soil and stone compaction; concrete & grout testing; reinforcing inspection.

Various Projects, Mylan Pharmaceuticals, Morgantown, WV

Mr. Campbell was responsible for the oversight of construction monitoring and materials testing services for various projects at the site including the 74 addition renovation, transformer pad, IPA tank truck containment and packaging hallway. Services included visual observation and inspection, soil compaction, concrete testing, and subgrade verification.

Allegany Ballistics Laboratory, Rocket Center, WV

Mr. Campbell was responsible for overseeing construction monitoring and materials testing services for building construction of three new structures and site work. Services included concrete testing, floor flatness testing, subgrade verification, visual observation and inspection, and soil and stone compaction.

HIGHLIGHTS OF EXPERIENCE

Mr. Kennedy has been an Engineering Technician with Triad Engineering for 20 years. He has provided QA / QC services including field tests for soils, asphalt and aggregate compaction, concrete placements, mortar and grout testing, and structural bolt testing for numerous private industry and government / public sector clients including coal / energy companies and the WV Department of Highways. Mr. Kennedy has experience in conducting soil foundation and rebar and subgrade inspections. He is knowledgeable in most laboratory testing procedures for soil, concrete and aggregates. He has been involved with a variety of construction projects throughout his career, which enables him to read plans and specifications, complete clear and thorough field reports, and organize and manage on-site as needed to complete inspection tasks. Mr. Kennedy has maintained a leadership role in Triad's QC/QA department for the past 2 years.

HIGHLIGHTS OF EXPERIENCE

Mr. Blake has over 32 years of diversified experience performing and providing QA/AC construction monitoring and inspection and materials testing services for Triad Engineering. He has been a technician and supervisor for over 25 years gaining comprehensive project experience in all phases of construction and earthwork including infrastructure, highway, bridge, and building development. Mr. Blake has extensive experience in field work including monitoring and performance of compaction testing, steel inspections, concrete testing and verification of work completion according to plans and specifications. Currently, Mr. Blake leads Triad's regional materials testing laboratory providing testing services and oversight for geotechnical engineering and construction projects involving soils, aggregates, concrete and asphalt.

RELEVANT PROJECT EXPERIENCE

West Virginia Department of Highways (WVDOH), Various Locations

As a former WVDOH Inspector, Mr. Blake has provided construction monitoring and inspections, field materials testing, and/or laboratory testing services for WVDOH projects for over 30 years. As Triad's Laboratory Services Manager, Mr. Blake conducts laboratory testing for QC projects and for the firm's geotechnical engineering services. Some of his recent projects include, but are not limited to:

- Hartman Run Road Bridge, Monongalia County
- Evansville Road, Barbour County
- Kasson Dent Road, Harrison County
- Rt. 250 Mannington, Marion County
- West Farmington Road, Marion County
- River Road Slide, Monongalia County
- Monongalia County / I-79 Welcome Center

West Virginia University, Morgantown, WV

Mr. Blake has provided services for WVU projects for over 30 years. Some of his recent projects include, but are not limited to:

- Mountaineer Field (Construction, Expansion, Upgrades to Field and Facilities)
- Basketball Practice Facility (Construction)
- Downtown Residence Hall (Construction)
- Evansdale Greenhouse (Construction)
- Women's Soccer Practice Facility (Construction)
- Nursery School / Day Care Facility (Construction)
- Brooks and White Halls (Renovations)
- Mountaineer Station (Construction)

West Virginia Statewide Agreement, Districts 1 and 4

Served as Laboratory Manager and Senior Engineering Technician for a statewide contract with the WVDOH, for which we provided construction monitoring, inspections, field and laboratory testing, and data entry on an as-needed, per project basis. Triad was awarded the Department of Highways Engineering Excellence Award in the category of Construction Inspection for the years 2002, 2004 and 2007.

HIGHLIGHTS OF EXPERIENCE

Mr. Posey is a Senior Engineering Technician for Triad. In this capacity, Mr. Posey is responsible for construction testing and inspections for various projects located throughout the Mid-Atlantic region. Specifically, Mr. Posey is responsible for performing such inspections as asphalt, soils, and aggregate compaction testing, concrete testing, masonry, spray-on-fire resistive materials, foundation, structural and reinforcing steel inspections. Mr. Posey also has experience with performing non-destructive testing such as Windsor probe, floor flatness and reinforcing steel inspection using a cover meter. In addition, Mr. Posey performs periodic thorough masonry inspections, to include compliance of material and reinforcing steel placement with project drawings and specifications and testing of mortar and grout materials for various projects. He is a very detailed oriented individual who performs various third-party/special inspections for many Counties throughout Virginia and West Virginia, capable of performing pre-blast inspections, blast monitoring, floor flatness testing and caisson inspections and has extensive experience in FAA and WVDOH projects.

RELEVANT PROJECT EXPERIENCE

Bass Hoover Elementary School Addition, Stephens City, VA

Duties included inspections of asphalt, soils, and aggregate compaction testing, concrete testing, masonry, spray-on-fireproofing, foundation, slab and reinforcing steel inspections for a 10,000 square foot single story elementary school addition with partial basement, access road and utility alignments, paved parking areas and other appurtenances. Worked closely with Frederick County Public Schools Project Manager, general contractor and various subcontractors to verify work was being performed within the project drawings and specifications.

Sysco Regional Distribution Center, Warren County, WV

Work performed included footing inspections, slab inspections, concrete testing and compaction testing for a new warehouse.

Home Depot Rapid Response Center, Frederick County, VA

Work performed included footing, wall and slab inspections, structural steel inspection, compaction and concrete testing, and various other special inspections.

Wakefield School, Fauquier County, VA

Duties included inspection of rubble constructed retaining walls, controlled fill monitoring, SWM pond construction, asphalt pavement testing, concrete, mortar and grout sampling/testing and various other activities working as the owner's QA/QC agent for this project.

Winchester Medical Center - ODC, Winchester, VA

Work included extensive firestop inspections for this recently completed structure.

Tailings Pond "0" Impoundment, Utica, IL

Performed testing inspection services in relation to the Decant system for the initial project phase.
