**CONSTRUCTION CONTRACTS:** Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

**ALL OTHER CONTRACTS:** Under W. Va. CRFQ 0803 DOT1800000014

19,000 GVWR 4x4 Truck w/Service Body & Equipment

The original language in contract will be listed first with question and answer to follow below.

1. 3.1.2.7 Engine shall have operator command exhaust filter regeneration manual switch.

**Question # 1:** On bid DOT1800000014 regarding 3.1.2.7 states "Engine shall have operator command exhaust filter regeneration manual switch." The Ram's do not have these. Will this disqualify Ram? Also the Ram's have an automatic switch built in and does as needed.

**Answer:** No, we will change to read: 3.1.2.7 Engine shall have operated command exhaust filter regeneration manual switch if offered by manufacturer being bid.

2. 3.2. Aluminum Service Body Stellar Model TMAX 1-9 or Equal

**Question:** Will you accept galvanneal construction?

**Answer:** No, leave as written.

3. 3.2.2.2 Body curb side vertical compartment shall be tall enough to accommodate (1) oxygen bottle minimum size 51 inches high x 9-inch diameter. (1) acetylene bottle minimum size 34 inches high x 8-inch diameter with bottle holder, vent and oxygen -acetylene twin hose reel with minimum of 50' of twin hose. Reel-craft Model: TWD8450OLPT or equal.

**Question: Welding Compartment Height?**

This body also needs to have a raised compartment or a pocket to accept the oxygen bottle with the regulators on the bottle. Typically, the regulators add 2" or more to the height of the bottle depending upon the regulator vendor.

**Answer:** We will change to read: 3.2.2.2 Body curb side vertical shall be one compartment with dual overlapping doors, vented with tank hold downs with (1) one oxygen-acetylene twin hose reel with minimum of 50' foot of twin hose. Reel-Craft model # TWD8450OLPT or equal.

#### 4. Telescopic Service Crane (hydraulically Driven) Stellar Model 3315 or Equal.

3.2.5.1 Crane shall have a minimum lift capacity of 5,000 lbs. @ 5' foot 10" inches.

3.2.5.2 Crane shall have a minimum ft-lbs rating of 29,500.

3.2.5.3 Crane shall have power boom in and out minimum 21' foot.

3.2.5.4 Crane shall have power rotation of 400 degrees.

3.2.5.5 Crane shall have compact wireless radio remote control for all functions with overload alert.

3.2.5.6 Crane shall have adjustable boom support with roller rest

3.2.5.12 Right rear vertical steel compartment shall be reinforced at right rear to accommodate up to 44,840 Ft. Lb. crane

#### Question: Crane Working Limits and Extension over Cab

The specifications call for a 5,000 lb. capacity crane. While everybody and chassis react differently supporting a crane. A requirement should be that the successful provider of the body will provide a stability chart showing the maximum safe weight for the crane in each of the operating quadrants. Our experience at Wilcox Bodies on short wheel base truck regardless of the manufacture the safe capacity of the crane will be reduced on the passenger side of the truck in the front right quadrant. Typical crane controls provide no safety limits in reduced capacity areas.

Be aware that the crane length will exceed the length of the body and the crane hook will be above the cab on the passenger side of the vehicle. You will have a finished truck that will appear much like this. This is not a typical build and represents less the 5% of all crane trucks. Typically 5,000 lb cranes are installed on 11' bodies not 9' bodies. The crane will extend approximately 2'6" to 3" over the cab. Your requirements call for a 52" high body without raised compartments. An oxygen bottle is specified to be 51" high oxygen bottle can be placed into 52" high compartment with much difficulty. It would be impossible to place a regulator on the bottle. Our recommendations are for a vented 60" high compartment or a body height of 60" with a vented cabinet. Venting is required by DOT requirements and provide your workers with a usable oxygen bottle configuration that would allow regulators to remain on the bottles. A detailed DOT specification is available at: <https://www.law.cornell.edu/cfr/text/49/173.301>

**Wireless Control Clarification:**

The specification on the wireless control does not require dual functions on the wireless control. Example Boom out while simultaneously lowering the hook. This feature is available from some manufactures at additional cost. You specification include proportional control.

**Answer: See following line items under crane section that have been changed.**

**3.2.5 Telescopic Service Crane (hydraulically Driven) Stellar Model 3315 or Equal.**

- 3.2.5.1 Crane shall have a minimum lift capacity of 3,200 lbs. @ 3' foot 7" inches.
- 3.2.5.2 Crane shall have a minimum ft-lbs rating of 11,500.
- 3.2.5.3 Crane shall be hydraulically driven both sections boom in and out minimum 15' foot.
- 3.2.5.4 Crane shall have power rotation of 370 degrees.
- 3.2.5.5 Crane shall have compact wireless radio remote control for all functions with overload alert. Stellar crane dynamics technology (CDT) or equal.
- 3.2.5.6 Crane shall have boom support with roller rest
  
- 3.2.5.12 Right rear vertical steel compartment shall be reinforced at right rear to accommodate up to 11,500 Ft. Lb. crane rating.

Accordingly, prior to contract award, Vendors are required to sign, notarize, and submit the Purchasing Affidavit to the Purchasing Division affirming under oath that it is not in default on any monetary obligation owed to the state or a political subdivision of the state.

**42. BACKGROUND CHECK:** In accordance with W. Va. Code § 15-2D-3, the Director of the Division of Protective Services shall require any service provider whose employees are regularly employed on the grounds or in the buildings of the Capitol complex or who have access to sensitive or critical information to submit to a fingerprint-based state and federal background inquiry through the state repository. The service provider is responsible for any costs associated with the fingerprint-based state and federal background inquiry.

After the contract for such services has been approved, but before any such employees are permitted to be on the grounds or in the buildings of the Capitol complex or have access to sensitive or critical information, the service provider shall submit a list of all persons who will be physically present and working at the Capitol complex to the Director of the Division of Protective Services for purposes of verifying compliance with this provision. The State reserves the right to prohibit a service provider’s employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

**43. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS:** Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
- c. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

**44. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL:** In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.
