Vendor's signature on its bid or offer also affirms that neither it nor its representatives have any interest, nor shall acquire any interest, direct or indirect, which would compromise the performance of its services hereunder. Any such interests shall be promptly presented in detail to the Agency. The individual signing this bid or offer on behalf of Vendor certifies that he or she is authorized by the Vendor to execute this bid or offer or any documents related thereto on Vendor's behalf; that he or she is authorized to bind the Vendor in a contractual relationship; and that, to the best of his or her knowledge, the Vendor has properly registered with any State agency that may require registration.

36. VENDOR RELATIONSHIP: The relationship of the Vendor to the State shall be that of an independent contractor and no principal-agent relationship or employer-employee relationship is contemplated or created by this Contract. Accordingly, prior to contract award, Vendors are required to sign, notarize, and submit the Purchasing Affidavit to the Purchasing Division affirming under oath that it is not in default on any monetary obligation owed to the state or a political subdivision of the state.

39. ADDITIONAL AGENCY AND LOCAL GOVERNMENT USE: This Contract may be utilized by other agencies, spending units, and political subdivisions of the State of West Virginia; county, municipal, and other local government bodies; and school districts (“Other Government Entities”). Any extension of this Contract to the aforementioned Other Government Entities must be on the same prices, terms, and conditions as those offered and agreed to in this Contract, provided that such extension is in compliance with the applicable laws, rules, and ordinances of the Other Government Entity. If the Vendor does not wish to extend the prices, terms, and conditions of its bid and subsequent contract to the Other Government Entities, the Vendor must clearly indicate such refusal in its bid. A refusal to extend this Contract to the Other Government Entities shall not impact or influence the award of this Contract in any manner.

40. CONFLICT OF INTEREST: Vendor, its officers or members or employees, shall not presently have or acquire an interest, direct or indirect, which would conflict with or compromise the performance of its obligations hereunder. Vendor shall periodically inquire of its officers, members and employees to ensure that a conflict of interest does not arise. Any conflict of interest discovered shall be promptly presented in detail to the Agency.

41. REPORTS: Vendor shall provide the Agency and/or the Purchasing Division with the following reports identified by a checked box below:

Such reports as the Agency and/or the Purchasing Division may request. Requested reports may include, but are not limited to, quantities purchased, agencies utilizing the contract, total contract expenditures by agency, etc.

Quarterly reports detailing the total quantity of purchases in units and dollars, along with a listing of purchases by agency. Quarterly reports should be delivered to the Purchasing Division via email at purchasing.requisitions@wv.gov.

42. BACKGROUND CHECK: In accordance with W. Va. Code § 15-2D-3, the Director of the Division of Protective Services shall require any service provider whose employees are regularly employed on the grounds or in the buildings of the Capitol complex or who have access to sensitive or critical information to submit to a fingerprint-based state and federal background inquiry through the state repository. The service provider is responsible for any costs associated with the fingerprint-based state and federal background inquiry.

After the contract for such services has been approved, but before any such employees are permitted to be on the grounds or in the buildings of the Capitol complex or have access to sensitive or critical information, the service provider shall submit a list of all persons who will be physically present and working at the Capitol complex to the Director of the Division of

Protective Services for purposes of verifying compliance with this provision. The State reserves the right to prohibit a service provider's employees from accessing sensitive or critical information or to be present at the Capitol complex based upon results addressed from a criminal background check.

Service providers should contact the West Virginia Division of Protective Services by phone at (304) 558-9911 for more information.

43. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more of such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
- c. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
- d. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

44. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

45. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$100,000, the vendor must submit to the Agency a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-award interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. "Interested parties" means: (1) A business entity performing work or service pursuant to, or in furtherance of, the applicable contract, including specifically sub-contractors; (2) the person(s) who have an ownership interest equal to or greater than 25% in the business entity performing work or service pursuant to, or in furtherance of, the applicable contract; and (3) the person or business entity, if any, that served as a compensated broker or intermediary to actively facilitate the applicable contract or negotiated the terms of the applicable contract with the state agency: Provided, That subdivision (2) shall be inapplicable if a business entity is a publicly traded company: Provided, however, That subdivision (3) shall not include persons or business entities performing legal services related to the negotiation or drafting of the applicable contract. The Agency shall submit a copy of the disclosure to the Ethics Commission within 15 days after receiving the supplemental disclosure of interested parties.

This specification covers requirements for an Automated Salt Brine Production System intended for use as a generator of quality salt brine that is used as a prewetting, anti-icing, and/or a de-icing agent on pavement or roadways. The system shall be fully automated eliminating the need for manual salinity testing, monitoring, and adjustment.

The system must use an upflow brine production process to insure single pass saturation of fresh water being introduced into the salt bed for increased production. In addition, the upflow process will provide a sediment free brine solution that can be stored in standard flat bottom storage vessels. The need for cone bottom storage vessels is unacceptable.

The system shall include a secondary pump and plumbing arrangement allowing for manual brine production in the event of a primary pump, valve, or other electrical component failure. The secondary plumbing must include a means of automatic shutdown when the onboard storage tank is full. The secondary pump and all plumbing components shall be pre-installed and wired to provide immediate operation.

If utilized, the material thickness, pin location, size and style of the coupler will be determined based on the make and model of the customer's loader(s). The coupler shall be constructed of mild carbon steel.

6.0 Plumbing and Plumbing Components:

Water service piping is 2" PVC throughout entire system- Water service is controlled by a 2" Glass filled polypropylene, non-electric hydraulic diaphragm valve- automatically controls the water infeed to the hopper tank and maintains the level of brine in the main tank.

- 2" PVC water infeed and salinity dilution ball valves- One piece sealed unit requires no adjustments- EPDM O-ring seals and Teflon seats.

- Plastic float valve controls water to the diaphragm valve- Non-hammering- Valve body is celcon plastic with Buna-N plunger.

- 3" Brine overflow pipe to fill main brine tank- 2" salinity dilution piping connected to the overflow pipes provide fine-tuning of salinity percentage adjustments.

2" glass filled polypropylene quick disconnect cam lock coupling from pump discharge.

The primary and secondary pumps shall be a 2" x 1 1/2" stainless steel centrifugal pump that is close coupled to a 3 HP, 230V, single phase, TEFC motor. Based on water, the pump shall produce 165 GPM at 30' TDH. A dual volute casing and mechanical shaft seal shall prevent the intrusion of liquid to the electric motor.

7.0 Control Package:

The control system shall allow for either continuous brine production to fill a single or multiple vertical storage tanks, or batch production to fill a truck mounted applicator tank. In addition, the control system shall allow for truck loading and offloading from a single or multiple vertical storage tanks. All of these functions shall be accomplished with a single pump and control package.

The system controls shall come standard with the option of multiple users tracking for filling and offloading of storage tanks in a shared environment. Each user shall have their password to access the truck fill operation. All operation and calibration features shall be password protected to prevent unauthorized use or inadvertent start-up. During production, the system shall utilize a dual toroidal sensor application to insure that the brine that is transferred to storage or truck tanks is within the acceptable range of 23.3% plus or minus .3%. If the brine is oversaturated it shall be looped back through the system while fresh water is incorporated to provide an acceptable solution. Once the brine is within range it would be diverted to a storage or truck tank. Should the brine concentration fall below the target range the system will shut down and the user will be prompted to add more salt.

The controller shall include a 12.1" TFT, 32000 color touch screen. The controller shall include USB ports and a CompactFLASH card that is removable for data transfer. The controller shall also be capable of integrating optional networking and Ethernet support for remote access and data transfer.

The operation screen of the controller shall be capable of showing the following: target brine concentration, real-time brine concentration, mode, gallons ordered, gallons produced or transferred, and storage tank volume in gallons for up to 8 storage tanks. In addition, the liquid flow throughout the system shall be displayed in real-time.

The controller shall be capable of logging the following information per production event: time and date, brine concentration produced, salt used, water used, gallons ordered, gallons completed, truck ID, user group if multiple users are selected, and any errors. Any transfer event shall track: time and date, gallons ordered, gallons completed, truck ID, user group if multiple users are selected, and any errors.

In the event of a component malfunction or failure, the system shall shut down and perform a self-diagnosis to inform the user of the fault.

8.0 Installation:

The controller shall come prewired and ready to plug into a customer supplied 220V, single phase power service. The brine system will be plumbed into customer supplier water service. The seller must provide a minimum of 8 hours of on-site support for installation and training.

Blend Boss™

FEATURES

The Blend Boss is a stand-alone chemical blending station that will allow for up to a three product in-line blend of nearly all liquid de-icing chemicals. This ground breaking unit can be installed with any new or existing tank farm. Quick and accurate volume based blending can now be accomplished with the touch of a button.

All plumbing components are enclosed in a stainless steel enclosure with a rugged, galvanized steel base. The control panel and remote fill pendant are enclosed in NEMA rated enclosure to withstand the harshest winter environments.

- **Three Product Volumetric Blending**
Ability to make “hot mix” blends using nearly any de-icing chemical
- **On-the-Fly Adjustability**
Make changes to your blend before or during a storm depending on precipitation and temperature changes
- **Inline Blending**
Fill the truck as needed - no need to store a premixed blend in a storage tank prior to an event. This also eliminates the “layering” effect associated with a manual filling process.
- **Closed Loop Control**
Ensures fast, efficient blending with an automatic shutdown once the target gallonage has been met
- **Storage Tank Recirculation**
Allows for off-season recirculation of tank farm to prevent material settling
- **Stainless Steel Pump Heads**
- **Full Data Tracking and Logging**
Track actual blends as well as material used in one easy interface
- **RFID Login**
Prevents any unauthorized changes to blending target rates
- **Remote User Interface**
Allows defined users to log in from remote locations
- **Totally Enclosed Fan Cooled (TEFC), Thermally Protected Motors**
Available in single or three phase
