# Hardware Products

## IT Products offered based on your needs, not the manufacture's sales goals

Get the performance your company requires without the high price tag and shipping delays associated with OEM purchases.

## NETWORKING

Whether upgrading or maintaining existing infrastructure, fill your equipment needs on your schedule while saving money.

## DATA

Keep control over your IT Budget and the ever-changing data hardware environment with Function5's help. You can rely on our secondary market reach and experience to meet your needs.

## STORAGE

Whether expanding, maintaining or upgrading, depend on Function5 to provide tested, reliable storage products to keep your data safe, reliable and accessible.

## IP TELEPHONY

Lower your acquisition costs while simultaneously leveraging the increased functionality of Internet Protocol communications.

## New & Refurbished Options

We offer new and refurbished equipment from most IT manufacturers. Whether you require next generation equipment or need to supplement legacy systems, Function5 can offer a solution tailored to your specifications. If you are considering an upgrade or maintaining an in-place network, discover how Function5 can help you maximize your IT budget.

We offer equipment you need regardless of manufacturer. You can buy with confidence because all equipment we provide comes tested with an industry leading warranty. Join the majority of companies that now leverage the savings available in the secondary market while simultaneously supporting environmentally sound reuse and recycle policies.

### Secondary Market Advantages

High performance and reliability do not have to cost a fortune and can be sourced other than from an OEM. The secondary market operates to meet the demand of customers, whether seeking new or refurbished equipment, at prices well below manufacturer list prices.

### Quality Assurance

You demand reliability. We require testing. We provide quality. Each piece of equipment we sell is thoroughly inspected and tested. You demand reliability; Function5 delivers.

### Warranty Policy

We stand behind what we sell. For end users, we provide a lifetime warranty limited only by end-of-life dates as established by the manufacturer.

# ABOUT FUNCTION5 TECHNOLOGY GROUP

Since 1999, Function5 Technology Group has helped hundreds of enterprise customers—from Fortune 500 companies to regional industry leaders—control rising IT budgets in two ways. We offer effective, efficient and successful asset management services, improving ROI on excess, legacy and idle assets and protecting our environment with beneficial recycling practices. We also offer enterprise IT hardware supporting both next generation and legacy platforms, at significantly reduced prices compared to list.

At Function5, we encourage an entrepreneurial spirit that helps us respond quickly and successfully to new opportunities. Employee development is fostered through a collaborative, challenging work environment that emphasizes respect, leadership, and measured risk-taking.

Our staff is motivated by doing great work, solving client problems, and enhancing their skills. Since inception, Function5 employees have demonstrated an unwavering commitment to quality in everything they do, whether through focus on their work, involvement in their community, or loyalty to their family.

# *Flexible options for*
## *your business needs*

## *IT Options built around your needs, not the manufacturer's*

### FLEXIBILITY

We adhere to our core principles while taking a flexible one-size-does-not-fit-all approach with each of our business partners. Our goal is to make your job simpler. We tailor our processes to meet your business needs.

### ADVANTAGES

Face facts. OEMs are in the business of manufacturing products and selling those products. They build end-of-sales (EOS) and end-of-life (EOL) into their products to suit their business model, not yours.

### EXPERIENCE

Our certified engineers and account managers possess the market knowledge and technical expertise to ensure your equipment is the highest quality, delivered at the best possible value. Your equipment doesn't get our seal of approval until it goes through our rigorous certification process in our state-of-the-art testing & configuration lab.

### QUALITY

At Function5, the very best products are in the best of hands. We only carry brands from manufacturers that meet our high standards for quality and value. We deliver precisely the equipment you need regardless of manufacturer.

# A New Alternative

## RECOVER • RESTORE • REMARKET • RECYCLE

### A WINNING FORMULA FOR SUCCESSFUL ASSET RECOVERY

## The Function5 Process

We have developed a unique comprehensive four-step process to maximize the value of your overbought and decommissioned IT assets. Our process is flexible—yet focused. Asset recovery with a maxi–mini twist, producing the maximum return for your assets with the minimum disruption to your resources.

### RECOVER

The first step in Asset Recovery is knowing your assets. The ability to recover the maximum value from excess assets begins with a thorough understanding of what assets are available, what their condition is, and what value the market assigns to each asset. We work closely with our clients to develop the most efficient method to retrieve assets from enterprise-wide facilities.

### RESTORE

Remove components. Add components. Reinstall factory settings. Repair physical or functional damage. Restoring value requires an in–depth knowledge of what the market needs.

### REMARKET

Leverage the benefits of the secondary market. Our knowledgeable experienced IT specialists will offer your assets in the manner that maximizes their value. As such, understanding the market is critical. We take that burden off you. We understand supply in the market and anticipate changes driven by new product releases. We take the steps necessary to maximize the value for your idle IT assets.

### RECYCLE

Returning idle assets to their best, highest use starts with returning useful assets back into production and concludes with returning unmarketable assets to their least destructive state.

Function5 operates under a "No Landfill Policy" protecting our increasingly fragile environment. Those assets determined to have no economically feasible market value are destroyed with base elements reused in manufacturing.

# IT Asset Recovery & Remarketing

## IT ASSET RECOVERY

Function5 has developed a unique comprehensive four-step approach to maximize the value of your excess and legacy IT assets.  Function5's approach has been perfected over 15 years in the dynamic IT asset market.

## CONSIGNMENT PORTAL

Function5's secure web portal gives multiple enterprise-wide staff immediate, real time access to view and control consignment inventory.

## HARDWARE PRODUCTS

Function5 offers a wide variety of data, storage, network and VOIP hardware delivered fully tested and network ready to your site. We offer solutions from most leading manufacturer, and we support both next generation and legacy networks.

# Success through Commitment

At Function5, we encourage an entrepreneurial spirit that helps us respond quickly and successfully to new opportunities. Employee development is fostered through a collaborative, challenging work environment that emphasizes respect, leadership, and measured risk taking. Our staff is motivated by doing great work, solving client problems, and enhancing their skills. Since inception, Function5 employees have demonstrated an unwavering commitment to quality in everything they do, whether through focus on their work, involvement in their community, or loyalty to their family.
