STATE OF WEST VIRGINIA
Purchasing Division
PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(f), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

WITNESS THE FOLLOWING SIGNATURE:

REF: GSD1900000001

Dear Ms. Pettrey:

In response to your qualifications request for the professional Architectural and Engineering Design services, the E.T. Boggess Architect, Inc. team is pleased to submit information regarding our experience. We will provide the services necessary to accomplish the building evaluation and renovation design for Building 74 for the WVDNR. Our team will work with the State of WV and the WVDNR to ensure that everyone's vision for the project is achieved.

I will be your architect and will be the person-in-charge for all aspects of the project. Our consultants include E.L. Robinson for structural engineering, along with Harper Engineering who will be providing mechanical/electrical/plumbing engineering. Our team is familiar with the challenges associated with renovation projects and the possible issues that could arise during the demolition and construction process. We believe we offer the service, knowledge and experience you will need to successfully accomplish the proposed project with as little disruption to the daily operations of the DNR as possible.

ETB emphasizes a client-centered design approach, incorporating mutually defined project objectives. Through this focus, we can assure the State of West Virginia and the DNR that needs and project issues will be clearly identified and addressed through an engaged, interactive programming, design, and construction process. Our design process will be conducted with an attention to detail, creative problem solving and with a passion towards project success.

We value this opportunity to serve you and look forward to personally presenting our credentials.

Sincerely,

A handwritten signature in blue ink that reads 'Todd Boggess'.

Todd Boggess, AIA, NCARB, Architect
President

INTRODUCTION

The focus on “fiscal responsibility” (or lack thereof) by government agencies is definitely in the headlines these days. Ensuring that Building 74 works efficiently, operates cost effectively, and is code compliant is in the long-term best interests of our state. The investment made in renovating the DNR offices should be a fraction of the cost of designing and building a totally new facility. Our evaluation and subsequent renovation design will address issues of concern, recommend the most product use of space, and phase the renovations so that the employees experience as little disruption to their daily routine as possible.

ETB has a great deal of experience with government facilities, both new and renovations. We understand the unique requirements associated with renovations and the importance of being prepared for any surprises that may be encountered. In recent years, ETB has worked on a number of renovations for various governmental agencies in our area. One of our historic renovation/adaptive re-use projects, the Princeton Public Library, received the WVAIA's Honor Award. The project involved transforming the vacant former USPO into a vital downtown center of activity. The interior renovations included a total re-design, while preserving some of the historical architectural details. New MEP systems were installed and existing windows were either restored or replaced. The exterior renovations included a thorough cleaning of the limestone and the creation of code compliant access to the building. Many interesting details were uncovered and incorporated into the design, including a skylight that had been hidden during a previous renovation. Additional renovations have been accomplished with emphasis on energy upgrades, access, and security for the Mercer County Courthouse and the Mercer County War Memorial Building. Our current renovation project is the adaptive reuse of a former wood processing facility for the City of Princeton. All city departments are being relocated onto a single “campus” setting, including administration, police, fire, public works and recreation. The work is being accomplished in phases, with the first phase (administration offices) currently under construction.

RENOVATIONS

In order to successfully accomplish the renovation of Building 74 for the WVDNR, we will approach the project by emphasizing the following procedure:

- Establish goals and objectives
- Review building condition, uses and evaluate space needs
- Recommend building interior/exterior restoration/remodeling
- List mechanical improvements
- Ensure compliance with all applicable codes
- Estimate the timing, phasing and projected costs for the project
- Establish project priorities for recommended remodeling
- Project schedule and final plan

Project Goals and Objectives 3.1 – “Goal One of the EOI is to solicit Architectural/Engineering (A/E) services to perform a thorough evaluation of the interior and exterior of the existing building, including functional analysis, building code, life-safety, present condition of windows, roof, mechanical and electrical systems”

E. T. Boggess Architect, Inc. has been developing architectural designs, plans, specifications, estimates and other construction/bidding documents for projects for over 50 years. Todd Boggess, President of ETB, serves on the WV Board of Architects and is active in verifying that all architects provide professional services within the state's laws and codes. He is, therefore, one of the first to be notified of any changes to any laws and codes that apply to the architectural profession. Todd will be *your architect* and point-of-contact in order to ensure the needs and objectives of the WVDNR are fully addressed to your satisfaction.

E.L. Robinson Engineering will be providing the structural engineering services. ELR is a multi-disciplined engineering and planning firm with a staff of over 135 fulltime professionals and support personnel located in nine offices. Over the last 39 years, they have grown to be one of the most respected firms in the region, offering realistic project solutions.

Harper Engineering will be providing the mechanical / electrical / plumbing design renovations and upgrades. Based in Charleston, HE has worked on a variety of renovation projects at state facilities and will ensure the mechanical system complies with current building codes and is cost effective.

ETB's experience with reports and evaluations includes the following:

EDA Preliminary Engineering Report on the Rahall Technology & Business Center for the Greenbrier Valley Economic Development Corporation – used to apply for grants to assist with renovations

WV Community and Technical College System Facilities Plan – used to evaluate and recommend how to move forward with new construction, renovations and additions to each of the campuses

Shanklin's Grand Theater Phase One Evaluation – used to apply for grants to assist with restoration

Comprehensive Educational Facilities Plans (2010) for the Mercer County Board of Education and the Greenbrier County Board of Education – submitted to WV School Building Authority as required every ten years

Mercer Health Facility Viability Report – used to document major deficiencies and ultimately lead to funding support for a new health facility

The following pages provide information developed by ETB for a private developer and submitted to the WV Division of Culture and History and the National Park Service as part of the Historic Properties Inventory.

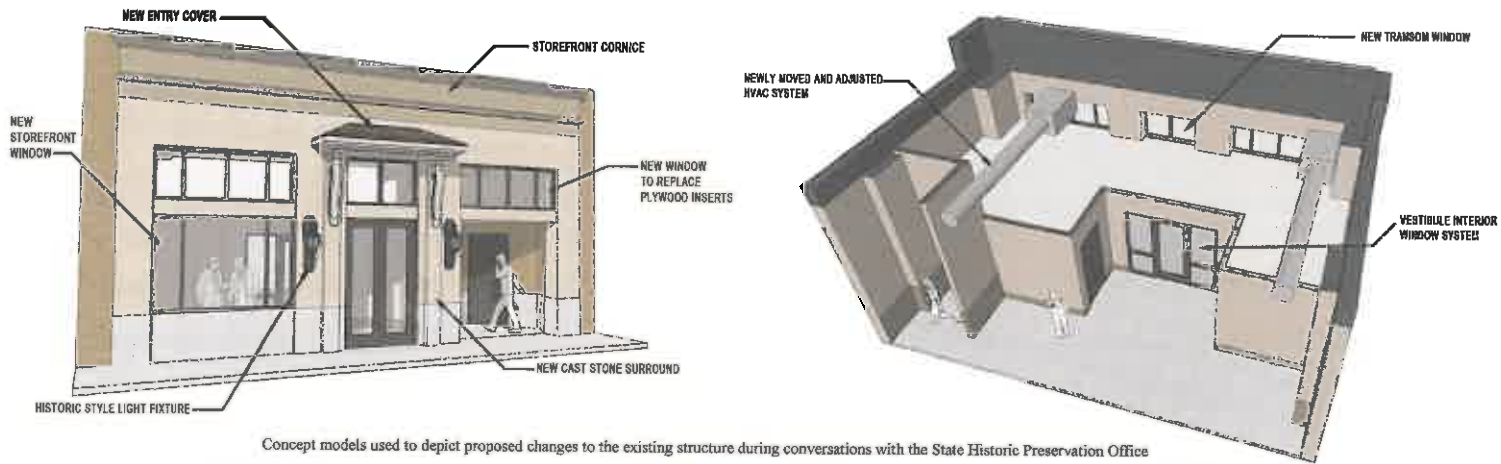

APPALACHIAN POWER COMPANY OFFICE BUILDING – BLUEFIELD, WV

Existing Image (2014) of the AEP Building from Raleigh Street Bluefield, WV - Circa 1923
Architect Alex B. Mahood

One of our recent renovation reuse projects is the renovation of the 1923 Appalachian Power Company Office Building in downtown Bluefield, WV. Purchased by an individual in 2013 with aspirations to convert the less than maintained 5 story building into a thriving restaurant and bar on the lower level, banquet hall venue space on the second, leasable office space on the third and apartments above with a direct access to a roof terrace / garden. All while adhering to the standards and requirements of the National Park Services to be eligible for historical tax credits.

Needless to say, this would be a difficult task. However, the ETB team, working in constant communication with the State Historic Preservation Office and NPS has prepared the required Part One and Part Two submissions to along with the needed design and construction documents for the work being performed.

Concept models used to depict proposed changes to the existing structure during conversations with the State Historic Preservation Office

The finished result from the concept models depicted above

The owner has proudly opened the RailYard Restaurant / Bar along with the Clover Club venue space. With the success of these businesses, work should begin soon on the remaining floors and roof.

Interior of the Rail Yard located in the renovated 1st floor of the AEP Building

Uncovered stair from the 1920's found in the walls revived to match existing drawings

Interior of the Clover Club, located in the renovated 2nd floor of the AEP Building

Original Drawing of connecting stair by Architect Alex B. Mahood. Circa 1923

Here is depicted a concept upper level solarium and roof garden planned for a future phase of construction, that meets NPS requirements for additions to a roof in keeping with historic sight lines.

Project Goals and Objectives 3.2 – “Goal Two is the redesign of the existing building to resolve issues noted in the evaluation and to bring the building up to current office building standards.”

The following pages contain the *City of Princeton Municipal Complex Eight Year Development Plan*. This plan is being used for the \$11 million adaptive re-use of the former Dean Company Wood Manufacturing Plant and will be phased in over a number of years. Once completed, the 272,902 sf space will contain city administration offices, police department, fire department, public works and recreation department. Plans are also being considered that will develop the surrounding 30+ acres for a new pool, soccer and baseball/softball playing fields, and walking paths.

These plans have been developed by consulting with city employees and department heads. ETB has examined the existing offices of every department, listened to what they need, and then developed a new floor plan for their approval. This total re-design will create an entire “campus” for all city government functions, as well as providing spaces that could be utilized by private entities.

Project Goals and Objectives 3.3 – “Goal Three is for the construction documents and construction phase services to be proposed as a multi-phased project in order to keep the building in service during renovations.”

ETB understands the importance of continuing to function efficiently during renovations. The \$20 million renovations/addition we designed for Greenbrier West High School was accomplished with the students continuing to attend classes as usual. Safety and security were primary concerns as major construction was underway. We also designed a renovation to an existing rehabilitation hospital in phases in order for the patients to continue receiving the care and physical therapy needed to recover. Even if a renovation project is not “phased-in” we coordinate construction activities with the occupants to work around their schedules as was necessary with the renovations for the WVARNG at Coonskin. Our goal was to make sure nothing interfered with the military and we requested the G.C. control noise levels during normal working hours.

As mentioned above, the following pages contain the *City of Princeton Municipal Complex Eight Year Development Plan*.

CITY OF PRINCETON MUNICIPAL COMPLEX

EIGHT YEAR DEVELOPMENT PLAN

EXECUTIVE SUMMARY

The Eight-year Development Plan shall establish a roadmap for Princeton's consolidation of city services in a new municipal complex and the development of public sports and recreational grounds and facilities on the property formerly occupied by the Dean Company.

Concurrent Strategic Planning Efforts

The milestones established in the Eight Year Development Plan primarily involve the planning, design and construction/renovation activities for the development of Tracts 1-4 of the property formerly occupied by the Dean Company. In addition to the property development tasks and objectives defined in the Plan, strategic planning efforts have been initiated and will continue and evolve concurrent with development. The City's strategic planning efforts include:

- **Vision and Planning**
 - Short Term
 - Long Term
- **Branding / Marketing**
 - Short Term Strategies
 - Long Term Strategies
- **Leasing opportunities**
 - Initial Market Assessment
 - Establish Relationship with Commercial Brokers
 - Financial and Tax Incentives
- **Business Plan**
 - For the Reinvestment of Leased Property
- **Feasibility Studies**
 - Recreational Opportunities
 - Regional Recreational Demands / Trends

CITY OF PRINCETON MUNICIPAL COMPLEX

EIGHT YEAR DEVELOPMENT PLAN

YEAR ONE

1.1 Planning and Programming

a. **Building and Property Condition Assessment: Tracts 1-4**

Inspection and documentation of the property and building systems with the use of photographs, note taking, drawings and information provided by the City and Donor.

Analysis and Identification of functional opportunities and challenges including; building materials, finishes and systems, site utilities, site access and circulation, topography, drainage and floodplain management.

b. **Building and Property Needs Assessment: Tracts 1-4**

The Architect will meet with City and Departmental representatives to determine design objectives, spatial requirements, special equipment, special systems, and specific site requirements. A Needs Assessment Report will be created to guide Project Programming.

c. **Project Programming: Tracts 1-4**

Based upon the Needs Assessment Report a Program Statement will be developed for approval by the City. This document will consolidate assessed needs in hierarchical format with supplemental diagrams and tables that document potential building space and site component relationships for the project. The Program Statement and Needs Assessment Report will guide Conceptual Design.

d. **Budget Analysis: Tracts 1-4**

The stated project goals identified in the Needs Assessment Report and Program Statement will be compared to the proposed project budget hard costs and soft costs to assess if the budget is adequate to complete the project.

e. **Code Compliance Analysis: Tracts 1-4**

Conduct comprehensive study of applicable National, State and Local regulations governing project use, design and construction. This Code Analysis will become part of the final Project Documents and will be referenced throughout the planning and design process.

f. **Project Phase Planning: Tracts 1-4**

Develop graphical documents illustrating the logical and planned evolution of the project through distinct construction phases consistent with project milestones established in the Eight-Year Plan.

CITY OF PRINCETON MUNICIPAL COMPLEX

EIGHT YEAR DEVELOPMENT PLAN

1.2 Design and Documentation

a. **Conceptual Design Documents (30% Progress): Tracts 1-4**

Based upon the Program Statement, conceptual design concepts will be developed and documented with graphical illustrations of the project which can include floor plans, building elevations and renderings showing spatial relationships between rooms, program and/or spaces. Conceptual Design drawings, where applicable, will include locations for special equipment and diagrammatic relationships including common, shared and flexible spaces. and future expansion.

b. **Design Development Documents (60% Progress): Tract 1**

Conceptual Design concepts will be refined to incorporate City comments / directives and extended to include, where applicable, material, equipment and furnishings selection/placement, outline specifications and 60% construction drawings.

c. **Construction Permit Documents (100% Complete): Tract 1 - City Administrative Offices**

Design Development documents will be revised to incorporate City comments / directives and extended to include 100% complete drawings and specifications necessary for construction permit application.

d. **Marketing Images/ Graphics: Tracts 1-4**

Development of graphical documents of the proposed project illustrating site and/or floor plans, elevations and 3D renderings for City use for project marketing, advertising or fund raising.

1.3 Construction

a. **Construction Substantial Completion: Tract 1 - City Administrative Offices**

Substantial completion of construction of interior up-fit, building shell and site improvements for City Administrative Offices.

1.4 Third Party Lease of Excess Space

a. **Marketing efforts will be ongoing**

b. **Construction Permit Documents (100% Complete): Tract 1 - Third Party Lease of Excess Space**

Upon the execution of a commercial lease agreement for Tract 1 Excess Space between the City and a Third-Party, Design Development documents will be revised and extended to include 100% complete drawings and specifications necessary for construction permit application. (Note: The specific scope and schedule for the work included under this item will be defined in the commercial lease agreements between the City and Third Parties.)

CITY OF PRINCETON MUNICIPAL COMPLEX

EIGHT YEAR DEVELOPMENT PLAN

YEAR TWO

2.1 Design and Documentation

a. **Construction Permit Documents (100% Complete): Tract 1 - Police, Fire and Public Works Departments**

Design Development Documents will be revised to incorporate City comments / directives and extended to include 100% complete drawings and specifications necessary for construction permit application for at least two of the following three departments: Police Department, Fire Department, and Public Works Department. *Should Construction Permit Documents for one of these three departments be postponed, they will be included under Item 2.1c.*

b. **Design Development Documents Design Development Documents (60% Progress): Tracts 2, 3 & 4 - Recreational Grounds and Facilities**

Conceptual Design concepts will be refined to incorporate City comments / directives and extended to include, where applicable, material, equipment and furnishings selection/placement, outline specifications and 60% construction drawings for public sports and recreational grounds and facilities on Tracts 2, 3 & 4.

2.2 Construction

a. **Substantial Completion of Construction: Tract 1 - Police, Fire and Public Works Departments**

Substantial completion of construction of interior up-fit, building shell and site improvements for at least two of the following three departments: Police Department, Fire Department, and Public Works Department. *Should Construction Permit Documents for one of these three departments be postponed, they will be included under Item 3-2b.*

CITY OF PRINCETON MUNICIPAL COMPLEX

EIGHT YEAR DEVELOPMENT PLAN

YEAR THREE

3.1 Design and Documentation

a. **Construction Permit Documents (100% Complete): Tract 1 - Additional City Staff or Departments**

Design Development Documents will be revised to incorporate City comments / directives and extended to include 100% complete drawings and specifications necessary for construction permit application. *Should Construction Permit Documents under this item include the Parks and Recreation Department, they will substitute for one of the three departments identified in Item 2.1a.*

b. **Construction Permit Documents (100% Complete): Tracts 2, 3 & 4 - Recreational Grounds and Facilities**

Design Development documents will be revised to incorporate City comments / directives and extended to include 100% complete drawings and specifications necessary for permit application for public sports and recreational grounds and facilities on Tracts 2, 3 & 4. *(Note: Extent of work under this item may not include all improvements for each tract or concurrent development of all three tracts. The specific scope and schedule of work planned for Tracts 2,3 & 4 will be determined at a future date.)*

3.2 Construction

a. **Substantial Completion of Construction: Tract 1 - Additional City Staff or Departments**

Substantial completion of construction of interior up-fit, building shell and site improvements for at least two of the following three departments: Police Department, Fire Department, and Public Works Department. *Should Construction Permit Documents under this item include the Parks and Recreation Department, they will substitute for one of the three departments identified in Item 2.2a.*

b. **Initiation of Construction Activities: Tracts 2, 3 & 4 - Recreational Grounds and Facilities**

Construction activities will be initiated for public sports and recreational grounds and facilities on Tracts 2, 3 & 4. *(Note: Extent of work under this item may not include all improvements for each tract or concurrent development of all three tracts. The specific scope and schedule of work planned for Tracts 2,3 & 4 will be determined at a future date.)*

CITY OF PRINCETON MUNICIPAL COMPLEX

EIGHT YEAR DEVELOPMENT PLAN

YEAR FOUR - EIGHT

4.1 Construction

a. **Continuation of Construction Activities: Tracts 2, 3 & 4 - Recreational Grounds and Facilities**

Progress completion of construction of public sports and recreational grounds and facilities on Tracts 2, 3 & 4. *(Note: Extent of work under this item may not include all improvements for each tract or concurrent development of all three tracts. The specific scope and schedule of work planned for Tracts 2,3 & 4 will be determined at a future date.)*

4.2 Third Party Lease of Excess Space

a. **Marketing efforts will be ongoing**

b. **Construction Permit Documents (100% Complete): Tract 1 - Third Party Lease of Excess Space**

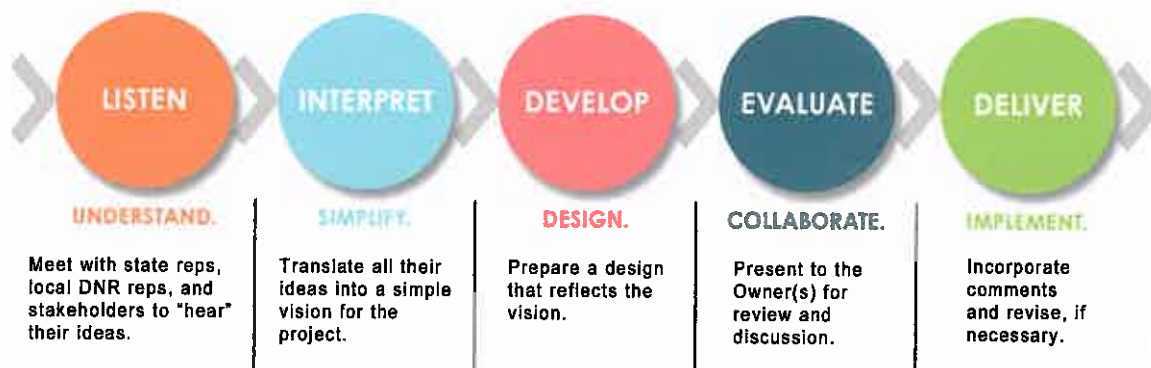

Upon the execution of a commercial lease agreement for Tract 1 Excess Space between the City and a Third-Party Design Development documents will be revised and extended to include 100% complete drawings and specifications necessary for construction permit application. *(Note: The specific scope and schedule for the work included under this item will be defined in the commercial lease agreements between the City and Third Parties.)*

APPROACH

Communication, collaboration, and consensus are the three elements we feel are essential to the planning, design and building process. The architect is responsible for the finished product, but the design process must include guidance and review by the State of West Virginia and representatives from the WVDNR. Our goal is to develop a “partnership” with our clients – a relationship that includes a long-term commitment, trust, and shared vision.

Although there are more ways than ever to communicate these days, the art of listening continues to be a challenge. If your message is not being heard and understood, then communication has failed. Our cycle of communication is best depicted by the image below and this procedure is repeated throughout the design and construction process.

In order to successfully accomplish your goals and objectives, we normally approach a project in the following manner:

- Review existing documentation and field verify
- Inspect existing conditions including building envelope, interior and exterior, windows, roof, mechanical and electrical systems
- Examine existing offices and work flow
- Research applicable building codes
- Prepare Building Evaluation Report
- Recommend possible renovations
- List of improvements to utilities, telecommunications, and infrastructure
- Estimate the timing, phasing and projected costs for each project
- Establish project priorities for Phase One

SCOPE of SERVICES

The tasks listed above will be accomplished in steps. We will utilize an interactive design approach and will be involving your designated representatives in order to understand and address your specific needs.

Typically, ETB renovation projects involve 4 phases:

- Investigation, evaluation and report preparation for existing systems and structure.
- Preparation of Preliminary Design Documentation and Preliminary Estimate of Probable Construction Costs.
- Preparation of Construction Documents and Final Estimate of Probable Construction Costs.
- Bidding and Construction Administration Services.

Investigation and Evaluation Phase (One):

- Upon receipt of Notice to Proceed, ETB will review all available original plans, specifications and other relevant data documenting existing systems and structures.
- Conduct a thorough evaluation and inspection of the interior and exterior of the existing home(s), as necessary
- Perform engineering analysis to establish design criteria including structural loading/uplift capacities, fire resistance ratings, thermal resistance ratings, drainage capacities and other relevant data for evaluation of suitability for renovations
- Meet with representatives from the WVDNR to present our report and discuss preliminary findings, including preliminary budget amounts for renovations.

Preliminary Design Phase (Two):

- Prepare preliminary design drawings including plans and typical sections and details.
- Prepare Outline Specifications and Preliminary Estimate of Probable Construction Costs.
- Meet with representatives from the WVDNR to review preliminary design drawings, proposed scope of work, proposed system product selections and alternatives, and Preliminary Estimate of Probable Construction Cost.

Construction Document Phase (Three):

- Prepare Construction Documents including detailed drawings and specifications commensurate with established scope of work.
- Prepare Final Estimate of Probable Construction Costs.
- Assist with coordination/preparation of non-technical provisions of the contract documents. (Bid Advertisement, safety/security compliance, temporary facilities, utility access, etc.)
- Meet with representatives the WVDNR to review progress, discuss proposed design and budget refinements, value engineering proposals and other general coordination issues.
- Assist with review, selection and pre-approval of Contractors, if required

Bidding and Construction Phase:

ETB will provide general administrative assistance to the WVDNR and the contractor(s) during the Bidding and Construction Phases including:

- Distribution of Construction Bid Documents
- Attendance at pre-bid meeting
- Preparation of addenda
- Review of contractor submittals
- Review/approval of contractor's applications for payment
- Review/response to RFI and construction change order requests.
- Regular on-site construction observation and reporting
- Assistance/coordination with governmental/ regulatory agencies
- Preparation of project punch list and sign-off
- Review of project close-out documents / compliance

The flow-chart on the following page shows an example of our approach to a recent renovation project.

HISTORY

E. T. Boggess Architect, Inc. was established in Princeton, West Virginia, by Ted Boggess in 1966. ETB has been a successful architectural firm primarily because of a team approach and partnership-type attitude with all involved in the design and construction process. Having grown up in the practice and with a life-long love of architecture, Todd became a full time presence with the firm in 1988 after receiving a Masters in Architecture from Clemson University. Their unique relationship as father/son/mentor/apprentice and partners has been both exciting and rewarding as the practice continues to flourish and evolve.

REPUTATION

Our firm lives or dies by its reputation. We have cultivated a team that strives to deliver the highest level of project management, service, and design. Our approach is client and site specific, and questions conventional assumptions. The greatest testament to the success of ETB's work goes beyond the organizational, operation and business stewardship we provide; it is in our enduring client relationships.

The architects at ETB are well-respected for their high ethical standards, as well as professional and civic activities. They have been asked to serve as expert witnesses and arbitrators in legal disputes. They have also been selected to serve on various local, state and national committees. These committees cover areas from determining local zoning ordinances to reviewing and developing educational requirements for future architects, to preserving West Virginia's historic architecture. In 2014, Todd was appointed to the WV Board of Architects by Governor Tomblin. The Board of Architects protects the life, health, and property of the people of the State of West Virginia by ensuring that proper architecture practices are used in the state.

SIZE

Bigger is not always better. ETB has purposely controlled size in order to maintain personal involvement and quality control. We feel that it is important to maintain close client contact so we can respond to your needs and questions, as well as address any situations that may arise in a timely manner. Our talented staff is ready to accommodate the needs of your project and ensure the successful completion of our current workload. The depth of our personnel is such that we can assign individuals to the appropriate task during each phase to ensure all your project's needs are satisfied.

TEAMWORK

Our projects and design services are dependent on both our abilities as architects and our commitment to perform and implement a set of standards in order to create a design that responds to the needs of our client. In house, ETB actually functions as a team of consultants with individual strengths and abilities emphasized by each employee's role within the team. In addition to being a strong design oriented firm, we offer expertise in communication, construction documentation, construction administration, and quality control.

Throughout our state, we have developed relationships with government agencies, contractors and material suppliers which will be valuable as we address the challenges associated with this project. ETB has worked with many of the code officials, including the state fire marshal, and consider them an extension of our team, another member who is concerned about the final design. We review our designs with the Office of the State Fire Marshal in Charleston at regular intervals during the design process, as well as on-site inspections during construction.

EXPERIENCE

Over the past 50+ years, ETB has accomplished many different types of buildings in 12 different states and 1 foreign country. We have not limited ourselves by focusing on one particular type of project or a single location. Instead, we choose to maintain a diverse practice which allows us to begin each project with renewed enthusiasm. Our strength is in the delivery of appropriate and analytical solutions for complex buildings and doing so within restricted budget and time constraints.

ETB was one of the first architectural firms in the state to implement the use of computer-aided design and drafting into the everyday practice of architecture more than thirty-five years ago. Today we continue to implement current technology as we have become very efficient with photorealistic imagery through computer modeling and digital photography. The building 3-D model and associated imagery can be developed early in the design process for presentations. This helps everyone better understand design approaches and project contextual relationships within a setting.

SCHEDULES & BUDGETS

ETB understands the importance of ensuring that all schedules and budgets are met. Our strength is in the delivery of appropriate and analytical solutions for complex buildings in strict conformance with budget and time constraints. Some of our most recent projects, especially for state agencies, have presented us with very rigorous scheduling goals. Our projects for the West Virginia School Building Authority have penalties built in if schedules and established budgets are not adhered to as an added incentive to meet the deadlines.

QUALITY

Quality Assurance - We feel quality assurance is the ability of an architect to provide the client with a set of documents that satisfies the client's needs and are as accurate as possible. ETB believes quality assurance is an ongoing process, not just a one-time occurrence. No project is perfect, however, we strive to achieve maximum client satisfaction.

To that end, we have set the following goals for ourselves:

- Promote teamwork
- Quality management throughout entire project – *Website*
- Prompt response to client's requests – *Availability*
- Creation of quality construction documents – *Purpose Driven*
- Error *prevention*, not error catching – *Standard Practices*
- Personal pride in our work - *Motivation*
- Education and Training in-house (staff mentoring) – *Continuing Education*
- Go the extra mile whenever necessary – *Service Oriented*

Quality Control - Quality control starts with matching expectations about quality standards and life cycle costs with budget and scope during planning and design reviews. This continues through construction delivery with a program of inspections, tests, and certifications that are typically handled through a third-party agency. Quality control should flow seamlessly from one phase to another. The "partnership" we develop during the project assists us in maintaining a high level quality control standard with everyone working together in the project's best interest. We strive to coordinate performance among the entire project team in order for a completed building program to fully satisfy your needs and expectations. The quality control plan we follow should help eliminate errors, reduce cost and improve overall building quality.

Our team will do everything within our power to ensure the project stays within budget and on schedule. We will work with the general contractor to provide him with the information he needs as quickly as possible. As mentioned earlier, the key to addressing any issues or problems during construction will be **communication, collaboration, and consensus.**

Mechanical, Electrical, and Plumbing Engineering

Harper Engineering, PLLC has the talent and resources to provide quality mechanical, electrical, and plumbing design. Our staff utilizes the latest building information modeling (BIM) software to provide the accurate system designs with minimal change orders during construction.

Our goal is to design optimized systems that meet all of our client's performance, energy use, and budgetary needs.

The staff at Harper Engineering, PLLC has over 100 years of experience working with clients in a variety of fields including, but not limited to, K-12 schools, hospitals, offices, airports, manufacturing, multi-family housing, and Design/Build.

The following is a partial listing of projects that demonstrate Harper Engineering's mechanical, electrical, and plumbing design experience:

State Projects

Cabwaylingo State Park Dining Hall

HVAC, Plumbing and Electrical Design for a new 3800 SF facility.

Chief Logan Lodge and Conference Center Pool

MEP design for new ventilation system for pool filtration.

Palentine Park Improvements

Site lighting and power for Splash Park pump, rest rooms, Amphitheatre and power for vendor receptacles.

WV Department of Highways SRC Office Building

HVAC, Plumbing, Electrical, Fire Alarm, and Sprinkler design for renovations to the 39,400 SF addition and renovations to existing office building in Charleston, WV.

E.L. Robinson has a strong background in site facility development and renovations. Our team has over 39 years of experience working with various communities, developing a diverse range of capabilities to handle the most complex development projects. From the initial planning and layout through the construction phase, the team at ELR provides clients with top quality site development services. Our areas of expertise include community and public facilities, business parks, recreational areas, residential neighborhoods, urban planning and streetscape design, planned unit and community development, park and recreation design, and campus planning.

E.L. Robinson has over 135 staff members including 57 degreed engineers, 37 of which are registered professional engineers; 15 construction inspectors and a support team of administrative and technical personnel. Our firm's office in Charleston will provide the identified scope of services. This team of professional engineers, funding specialists, surveyors and construction inspectors has been specifically assembled for this project because of their experience relating to your project and for preparing solutions that are realistic.

ELR's team has been fortunate to assist other clients with various types of site design projects including numerous building facilities and centers to serve various communities.

- Greenfield Cabinetry Building Expansion
- Putnam PSD Maintenance Facility
- Mingo County 911 Center
- Putnam County 911 Command Center and EMS Garage

PIPESTEM STATE PARK CONFERENCE CENTER

Pipestem, WV

PROJECT DETAILS

owner/district:
WV DNR

year:
1999

size:
20,000 sf

The Pipestem Conference Center Project involved a two-story addition to the McKeever Lodge. The project centered around the addition of a multi-purpose conference area that can accommodate a single, large group or be divided with panels for multiple, smaller groups.

In order to allow for ADA compliant access, an enclosed, connecting bridge-way was designed to connect the new conference center to the existing lodge.

The existing kitchen area was also renovated during this project.

MUNICIPAL COMPLEX

Princeton, WV

PROJECT DETAILS

owner/district:
City of Princeton

year:
2018

size:
272,902 sf
37.5 acres

The former Dean Company Property is being considered as the new location for a multi-functional governmental complex. ETB designed a master plan that incorporated administrative offices, fire department, police department, public works, a recreational center and nautical center. This new hub will also be home to maker spaces, leasable space for large business ventures and a multi-sport outdoor facility for travel sports - baseball, softball and soccer. Outdoor amenities may include a skate park, family pavilions and running / walking paths.

PRINCETON PUBLIC LIBRARY

Princeton, WV

PROJECT DETAILS

owner/district:
City of Princeton

year:
2010

size:
13,331 sf (Two Story)

This renovation/adaptive re-use project involved a total interior renovation and exterior restoration that transformed the abandoned former USPO building into a new focal point for Mercer Street. In addition to providing much needed space for books, this design enabled the library to have designated spaces for audio/visual, and an exclusive West Virginia Room. Activities associated with the operation of the library are easily maintained from the custom designed control desk. Rooms in the basement are dedicated to three specific age groups, and include an open computer area. Public meeting /conference rooms with state-of-the-art technology equipment are also located on the lower basement level.

PRINCETON PUBLIC LIBRARY

Princeton, WV

PROJECT DETAILS

owner/district:
City of Princeton

year:
2010

size:
13,331 sf (Two Story)

Exterior work involved the restoration of the cut stone and brick, total roof replacement and improved access. Existing windows were either restored/refurbished or replaced.

PRINCETON RESCUE SQUAD MULTI-USE BUILDING

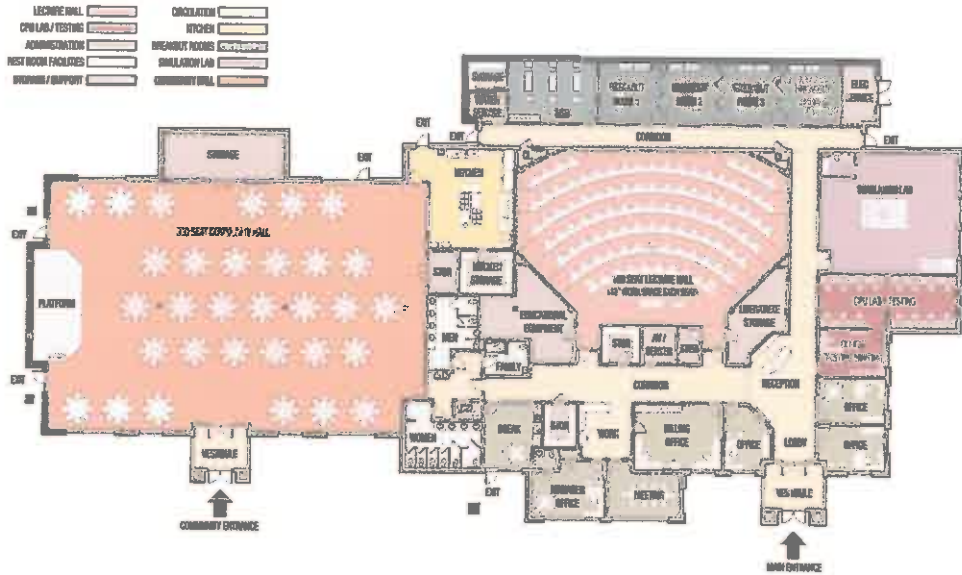

Princeton, WV

PROJECT DETAILS

owner/district:
Princeton Rescue Squad

year:
2018

size:
19,000 sf

ETB designed the new education and emergency shelter for the rescue squad in order to provide better training opportunities for their employees. The center can offer classes for emergency responders throughout the region, as well as provide for standard professional testing classrooms. The community center will be available for a variety of gatherings and activities. The facility can also feed a large number of emergency responders should the need ever arise.

NEW RIVER COMMUNITY AND TECHNICAL COLLEGE

Lewisburg, WV

PROJECT DETAILS

owner/district:
WV Council for Community and
Technical College Education

year:
2014

size:
3-Story

The Kyle and Ann Fort Arts & Sciences Building was created by renovating the former DOH building in Lewisburg. Interior and exterior renovations provided for an ADA compliant facility. The re-designed building offers students at NRC&TC the following:

- new classrooms
- allied health labs
- graphic arts areas
- student commons
- cafeteria
- office spaces

BEFORE

AEP BUILDING - THE CLOVER CLUB

Bluefield, WV

PROJECT DETAILS

owner/district:
Cole Properties

year:
2016

size:
4 floors

Renovations to the former AEP Building are being completed in phases and by floors. The Clover Club is located on the second floor. It was designed to function as a banquet hall and includes a stage for live performances. The area can also be used for private gatherings and celebrations, public meetings, seminars or community presentations,

A previously hidden staircase was uncovered during renovations and has been impressively restored beautifully connecting the first and second floors. ETB is working with the Owner, Contractor and National Park Service to document the renovations and utilize the Historic Tax Credit Program.

AEP BUILDING - THE RAILYARD

Bluefield, WV

PROJECT DETAILS

owner/district:
Cole Properties

year:
2016

size:
4 floors

Renovations to the former AEP Building are being completed in phases and by floors. The Railyard is located on the first floor and provides an upscale atmosphere with railroad pictures incorporated into the bar's countertop. A previously hidden staircase was uncovered during renovations and has been impressively restored. ETB is working with the Owner, Contractor and the National Park Service to document the renovations and utilize the Historic Tax Credit Program.

AEP BUILDING THIRD & FOURTH FLOORS

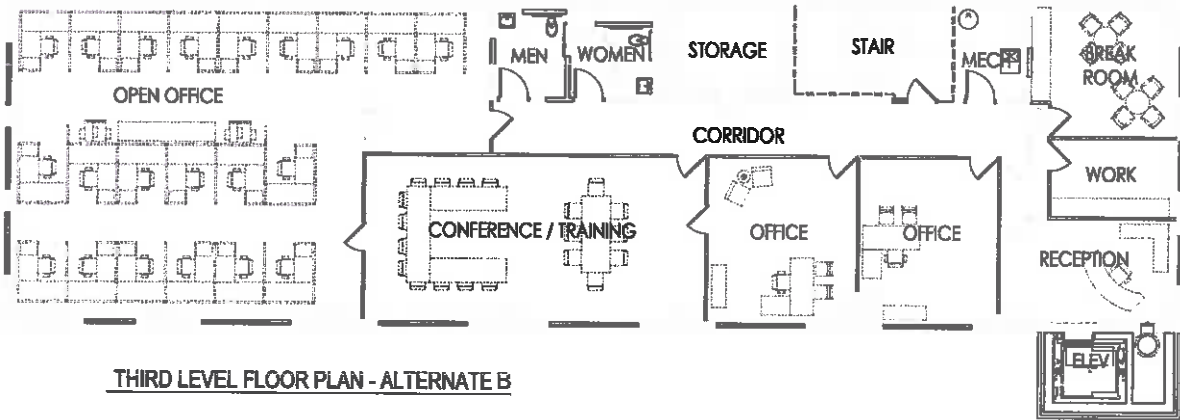

Bluefield, WV

THIRD LEVEL FLOOR PLAN - ALTERNATE A

GREENBRIER COUNTY CONVENTION & VISITORS CENTER

Lewisburg, WV

PROJECT DETAILS

owner/district:
Greenbrier CCVC

year:
2010

size:
16,800 sf

The design and renovations to the former Yarid's Building allowed the adaptive re-use of a former department store in order to serve as a convention and visitors center. The lower level contains a conference room for public meetings and a large, open floor plan showcases an information desk, displays, kiosks, and computers for use by visitors. The upper level design provided new office space for the Chamber of Commerce, the Development Authority, and two additional rentable units.

The exterior "facelift" included the installation of new windows, awnings, roof and exterior lighting.

HIGHER EDUCATION POLICY COMMISSION FACILITIES PLAN

Statewide

PROJECT DETAILS

owner/district:
WV HEPC

year:
2008

ETB and MBAJ Architecture prepared the Facilities Plan used by the WV Higher Education Policy Commission to address the needs of the Community & Technical College System. The buildings at each of the colleges were evaluated and recommendations were made regarding how to move forward with new construction, renovations and additions to each of the campuses.

The report recommended the construction of two new advanced technology centers which ETB also designed. These centers include state of the art training classrooms and labs which were designed to provide a skilled workforce for major local manufacturers.

The WV C&TCS includes nine community colleges with multiple campuses throughout the state, including:

- Blue Ridge C&TC
- BridgeValley C&TC
- Eastern C&TC
- Mountwest C&TC
- New River C&TC
- Pierpont C&TC
- Southern C&TC
- WV Northern C&TC
- WVU at Parkersburg

SHANKLIN'S GRAND THEATRE PHASE ONE EVALUATION

Ronceverte, WV

PROJECT DETAILS

owner/district:
Ronceverte Historic Landmarks
Commission

year:
2014

size:
7,100 sf

ETB prepared the Phase One Evaluation Report of the theatre for the Ronceverte Historic Landmarks Commission to submit with grant applications.

Culturally relevant material was collected on the historic district and surrounding areas, along with documenting the theatre's history since it opened in 1937.

Existing conditions were assessed for both the interior and exterior of the building. The report then identified the steps necessary to restore the theatre as close to possible to its original condition.

EXISTING

Shanklin's Grand Theater Circa 1943

ORIGINAL BUILDING

COMPREHENSIVE EDUCATIONAL FACILITIES PLAN

for the West Virginia School Building Authority

PROJECT DETAILS

owner/district:
 Mercer County Schools
 Greenbrier County Schools
 year:
 2010

Every ten years, the West Virginia School Building Authority requires each county school system to submit a Comprehensive Educational Facilities Plan for the upcoming decade. Part of the CEFP requires that all existing schools be inspected and their conditions reported. This information is used by each county to justify why they should be awarded funding for renovations and new construction.

ETB provided the current school facilities assessments for both Mercer and Greenbrier Counties. The number and types of schools that were inspected and included in the CEFP were broken down as follows:

MERCER COUNTY
 19 - Elementary
 2 - Middle
 4 - High
 1 - Tech Center

GREENBRIER COUNTY
 9 - Elementary
 2 - Middle
 2 - High

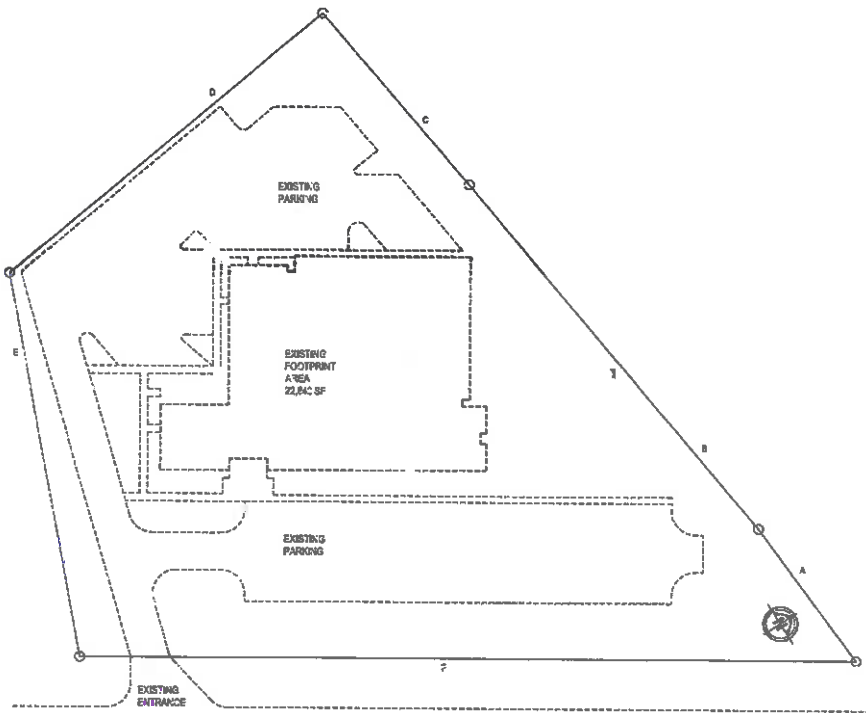

MERCER HEALTH FACILITY VIABILITY REPORT

Green Valley, WV

PROJECT DETAILS

owner/district:
Mercer County Commission

year:
2007

ETB prepared the Health Facility Building Viability Report to document the existing conditions as well as provide options for dealing with those issues. The report described several items that needed to be addressed through either a comprehensive demolition & renovations or a totally new building construction.

The report was successfully used to obtain the funding needed for a brand new facility. The services were temporarily relocated while the previous facility was demolished and the new Mercer County Health Center, also designed by ETB, was built on the same site.

RENDERING - MERCER HEALTH CENTER

ORIGINAL BUILDING

Recent Public Works Buildings

New Bus Garage

HVAC, Plumbing, Sprinkler, Electrical and Fire Alarm design for a new 5,900 sq. ft. bus garage in West Union, WV.

Public Works Building

HVAC, Plumbing, Sprinkler, Electrical and Fire Alarm design for a new 4,500 sq. ft. bus garage in Romney, WV.

Energy Corporation of America

HVAC, Plumbing, Electrical, Fire Alarm and Sprinkler design for a 60,000 sq. ft. office located in Charleston, WV.

St. Albans Armory Storage Building

HVAC, Plumbing, Electrical and Fire Alarm design for a 3,000 sq. ft. storage building.

WV Veterans Home Barboursville

Electrical design for a new 1,000 sq. ft. storage building.

WV DOH Weigh Station

HVAC, Plumbing and Electrical design for a new 885 sq. ft. weigh stations to replace existing weigh stations in Putnam County.

Dominion Gas Office Building

HVAC, Plumbing, Electrical, Fire Alarm and Sprinkler design for a 20,000 sq. ft. office located in Clarksburg, WV.

Beckley VA Parking Garage

HVAC, Plumbing, Electrical and Fire Alarm design for a new 4-story parking garage.

W. Kent Carper Justice and Public Safety Complex

HVAC, Plumbing, Electrical, Fire Alarm and Sprinkler design for a renovations to a 62,400 sq. ft. Justice and Public Safety Complex.

WV Department of Highways SRC Office Building

HVAC, Plumbing, Electrical, Fire Alarm and Sprinkler design for a renovations to a 39,400 sq. ft. addition and renovation to existing office building in Charleston, WV.

Recent Public Works Buildings (continued)

Office Addition to Boone County Courthouse Annex

HVAC, Plumbing, Electrical, Fire Alarm and Sprinkler design for a 20,400 sq. ft. addition and renovation to Boone County Courthouse Annex.

Fayette County 911 Emergency Communication Center

Provided mechanical, electrical, and plumbing services for the new 911 Emergency and Communications Center. Project utilized energy efficient water heating system, strategic lightings to reduce screen glare, diesel emergency generator and automatic transfer switch, and a dual action sprinkler system.

Wayne County 911 Emergency Communication Center

Mechanical, Electrical and Plumbing services for the new 911 Emergency and Communications Center. Project utilized energy efficient water heating system, strategic lighting to reduce screen glare, diesel emergency generator and automatic transfer switch, and dual action sprinkler system.

South Charleston Fire Station #1

Mechanical, Electrical, and Plumbing services for the new 10,000 sq. ft. Fire Station located in downtown South Charleston, WV.

Charleston Fire Station #3

Mechanical, Electrical, and Plumbing services for the new 6,400 sq. ft. Fire Station located in Oakwood Road in Charleston, WV.

Project Data

<i>Project</i>	<i>Project Type</i>	<i>Goals & Objectives</i>	<i>How Goals were Met</i>
<p>Mingo County Wood Products Industrial Park</p> <p>Location: Mingo County, WV</p> <p>Client Contact: Leasha Johnson 304.235.0042</p>	Site Development	Provide site design for a 100 acre section of land to allow for economic development in Mingo County	ELR successfully designed the industrial park resulting in the completion of the project on time and under budget
<p>Putnam County Business Park Phase II Industrial Access Road</p> <p>Location: Fraziers Bottom, WV</p> <p>Client Contact: Andrew Dunlap 304.757.0318</p>	Site Development	Provide access road design with the purpose that the existing Putnam County Business Park could connect to the new US Route 35 and therefore benefit for it's development	ELR successfully designed the industrial park access road resulting in the completion of the project on time and under budget
<p>Earl Ray Tomblin Industrial Park</p> <p>Location: Holden, WV</p> <p>Client Contact: Roscoe Adkins 304.752.4600</p>	Site Development	Provide site design and access road design for a 52 acre section of land to precipitate development in Logan County	ELR successfully designed the industrial park and access road resulting in the completion of the project on time and under budget
<p>Upshur County Industrial Park</p> <p>Location: Buckhannon, WV</p> <p>Client Contact: Stephen Foster 304.472.1757</p>	Site Development	Provide site design for an approximately 20 acre industrial site to stimulate growth and development in Upshur County	ELR successfully designed the industrial park resulting in the completion of the project
<p>Belo Industrial Park</p> <p>Location: Mingo County, WV</p> <p>Client Contact: Leasha Johnson 304.235.0042</p>	Site Development	Provide site design for approximately 7 acres of undeveloped land industrial site to stimulate growth and development in Mingo County	ELR successfully designed the industrial park resulting in the completion of the project on time and under budget
<p>Southern Highlands Initiative Project Wood Park 20 Acre Site</p> <p>Location: Mingo County, WV</p> <p>Client Contact: Leasha Johnson 304.235.0042</p>	Site Development	Provide site design for a 20 acre sight formerly used for mountaintop removal mining to allow for further economic growth in Mingo County	ELR successfully designed the 20 acre site resulting in the completion of the project on time and under budget

Williamson DHHR Building

CLIENT:
City of Williamson

COMPLETION DATE:
2006

PROJECT COST:
\$2.3 Million

OUR ROLE:
Structural design

E.L. Robinson Engineering and Associated Architects worked with the City of Williamson to develop plans and specifications for a 17,000 SF office facility in downtown Williamson. The building was constructed using a steel frame with masonry brick veneer exterior. The plans also included the design of a parking lot and improvements to sidewalks to serve the facility.

E.L. Robinson and Associated Architects performed construction administration and provided inspection throughout the project.

The project was bid in February 2006 and was completed in December 2006.

Williamson Fire-Police Station

CLIENT:
City of Williamson

COMPLETION DATE:
2011

PROJECT COST:
\$148,856

OUR ROLE:
Project Design

E.L. Robinson Engineering teamed with Associated Architects to evaluate the existing roof system at the Williamson Fire-Police Station. After the evaluation was completed, plans and specifications for a new roof system were developed. The project was bid and awarded. ELR prepared advertisements, assisted in receipt and opening of bids. ELR performed final inspection and developed a punch list when the contract was substantially completed. The project was final in the fall of 2011.

Williamson City Hall Exterior Updates

CLIENT:
City of Williamson

COMPLETION DATE:
2012

PROJECT COST:
\$60,000

OUR ROLE:
Structural design

ELR was contracted to provide the exterior updates to the Williamson City Hall allowing it to become ADA compliant. By providing the three main entrances to the building with handicap accessible ramps, repairing several sections of sidewalk and developing adequate handicap parking for the structure the city hall will then meet ADA standard.

The improvements to the three main entrances provide an open 3' handicap ramp along with the adequate 5' wide platform at the top of each ramp. A railing is provided on each side for safety and follows the guidelines set by the Department of Justice.

New sections on sidewalk are to be replaced, fixing issues such as cracking and weathered deterioration that has taken place over time. Also this will correct any uneven pavement and provide the correct 2% cross slope for proper rain water drainage.

Also three handicap parking spaces will be added to the current lot along with the appropriate curb ramps to provide easy access to the sidewalk. The parking lot is currently an uneven pavement of brick that will be corrected with asphalt to allow for an even surface.

Mason County 911 Center

CLIENT:

Mason County Commission

COMPLETION DATE:

2008

PROJECT COST:

\$1.7 Million

OUR ROLE:

Environmental assessment, topography and boundary survey, geo-technical, structural, site/civil engineering, construction observation and administration

ELR served as the prime design consultant providing the following services:

Provided field visitations as necessary to complete preliminary sit/civil engineering and the preparation of bid documents which included a site layout, grading, storm drainage plan, and utilities plan.

Provided structural plans and construction documents for architectural floor plans, building elevations, and sections for the proposed facility

Provided construction specifications for the proposed facilities including architectural, plumbing, sprinkler, HVAC, electrical, fire alarm, security, data and telephone (rough-in only) and associated electrical systems, structural, and civil specifications as a part of the project.

Reviewed required contractor shop drawings and provide coordination for the contractor in answering any design clarification questions during construction.

Attended construction meetings for a pre-bid meeting, a bid-opening meeting, pre-construction meeting, two construction observation visits per month during construction, one substantial completion observation, punch list development and final inspection.

 Prepared all the necessary permitting for project construction.

Putnam County 911 Command Center and EMS Garage

CLIENT:

Putnam County Commission

COMPLETION DATE:

2009

PROJECT COST:

\$3.4 Million

OUR ROLE:

Topography survey, geo-technical, structural, site/civil engineering, construction observation and administration

ELR served as the prime design consultant providing the following services:

Provided field visitations as necessary to complete preliminary sit/civil engineering and the preparation of bid documents which included a site layout, grading, storm drainage plan, and utilities plan.

Provided structural plans and construction documents for architectural floor plans, building elevations, and sections for the proposed facility. Plumbing, Mechanical, and Electrical were also provided as a part of subconsultants' role.

Provided construction specifications for the proposed facilities including architectural, plumbing, sprinkler, HVAC, electrical, fire alarm, security, data and telephone (rough-in only) and associated electrical systems, structural, and civil specifications as a part of the project.

Reviewed required contractor shop drawings and provide coordination for the contractor in answering any design clarification questions during construction.

Attended construction meetings for a pre-bid meeting, a bid-opening meeting, pre-construction meeting, two construction observation visits per month during construction, one substantial completion observation, punch list development and final inspection.

 Prepared all the necessary permitting for project construction

Mingo County 911 Center

CLIENT:
Mingo County Commission

COMPLETION DATE:
2000

PROJECT COST:
\$500,000

OUR ROLE:
Planning, design, and construction management

ELR served as the prime design consultant providing the following services:

Our team converted an existing garage with limited office space at Mingo County Airport into new office space for the new county 911 center.

Provided specifications for all the required 911 equipment and electronics.

Updated 3 tower sites within the county with new antennas and equipment.

ELR attended construction meetings for a pre-bid meeting, a bid-opening meeting, pre-construction meeting, two construction observation visits per month during construction, one substantial completion observation, punch list development and final inspection.

Prepared all the necessary permitting for project construction.

Wetzel County 911 Center

CLIENT:
Wetzel County Commission

COMPLETION DATE:
2009

PROJECT COST:
\$3 Million

OUR ROLE:
Environmental assessment,
topography and boundary survey,
geo-technical, structural, site/civil
engineering, construction observa-
tion and administration

ELR served as the prime design consultant providing the following services:

Provided boundary and topographical mapping for the proposed one acre site. Completed exploratory borings and soil samples for a geotechnical report

Provided field visitations as necessary to complete preliminary sit/civil engineering and the preparation of bid documents which included a site layout, grading, storm drainage plan, utilities plan and structural plan

Provided construction documents for architectural floor plans, building elevations, and sections for the proposed facility. Plumbing, Mechanical, and Electrical were also provided as a part of subconsultants' role.

Provided construction specifications for the proposed facilities including architectural, plumbing, sprinkler, HVAC, electrical, fire alarm, security, data and telephone (rough-in only) and associated electrical systems, structural, and civil specifications as a part of the project.

Reviewed required contractor shop drawings and provide coordination for the contractor in answering any design clarification questions during construction.

Experience
Site Development

Mingo County Wood Products Industrial Park

CLIENT:
Mingo County Redevelopment
Authority

COMPLETION DATE:
2007

PROJECT COST:
\$3.875 Million

OUR ROLE:
Planning, design, and construction
inspection

E.L. Robinson Engineering was contracted by the Mingo County Redevelopment Authority to provide site design including storm water drainage, expansion of existing wastewater treatment plant, preparation of construction plans and specifications, surveying and mapping, preparation of all necessary permit applications, preparation of bid/contract documents, participation in the solicitation and evaluation of bids, construction administration and inspection for the Mingo County Wood Products Industrial Park located in Mingo County, West Virginia.

Forks of Coal State Natural Area/Claudia L. Workman Wildlife Education Center

CLIENT:
West Virginia Division of
Natural Resources

COMPLETION DATE:
2019

**ESTIMATED CONSTRUCTION
COST:**
\$7 Million

WVDNR retained E.L. Robinson in 2015 to prepare a master plan for this 100 plus acre site donated to the State of West Virginia for the development of the state's first natural area. The site is located at the forks of the Big Coal and Little Coal River, approximately twenty miles from downtown Charleston.

In 2015, WVDNR retained the team of E.L. Robinson Engineering and ZMM Architects to prepare construction documents for the Forks of Coal Natural Area and the Wildlife Education Center.

This site related elements ELR will design are:

- Access road off US 119 and car and bus parking area for the Claudia L. Workman Wildlife Education Center
- Site development for the Education Center including entry courtyard and outdoor classroom/amphitheater
- Entry sign
- Trailhead parking
- Waterline extension from the Lincoln County PSD and an onsite sewage treatment facility for the education center
- Landscape plans for the center
- Other pedestrian linkages

Beech Fork State Park Lodge Development

CLIENT:
West Virginia Division of
Natural Resources

PROJECT COST:
Total Architecture & Site
Related Cost \$35 Million

OUR ROLE:
Site feasibility, studies,
preliminary design, lead
consultant involving civil,
structural, transportation,
geotechnical engineering,
landscape architecture with
additional services from other
consultants.

West Virginia Division of Natural Resources has considered a lodge for Beech Fork State Park since before it was opened in 1979. Several studies were completed in the past examining six possible sites for lodges ranging in size from 75 to 150 rooms. The last studies completed in 1995 recommended a 150 room lodge at Stowers Branch.

WVDNR retained E.L. Robinson's landscape architects in 2008 to study a new site near the Beech Fork Lake dam and marina for the feasibility of building a 35, 50, or 75 room lodge. This study found from earth work calculation, cost estimates, and slope analysis maps that the Stowers Branch site was still the most desirable based on costs, proximity to the lake, and visual impact on the park.

In 2013, WVDNR retained the team of E.L. Robinson Engineering and ZMM Architects to prepare construction documents for a 75 room lodge at the Stowers Branch location. This site is located near the swimming beach owned and operated by US Army Corps of Engineers and two miles by road from the Beech Fork Lake Dam. In 2015, the project was put on hold after completion of the design development phase due to state budget issues.

Management & Staffing Capabilities

Todd Boggess is President of E.T. Boggess Architect, Inc., and will serve as the design team leader. Todd will be the architect-of-record and will be assisted by . . .

Stephen Mackey is responsible for design, code review, project programming, and research standards review.

Nathan Turner will be the project manager responsible for coordinating all project information amongst the team.

Dale East will be managing the construction documentation and, along with Mr. Mackey, they will be generating the design and construction approach to realize the project.

Chris Canterbury is ETB's construction contract administration manager. With over 19 years of CA experience, Chris' knowledge and background of all building systems has been an invaluable asset to our team. Nathan Turner, as project manager, and Todd Boggess also remain very active during the CA phase to help ensure the design intent is realized.

A component of our management approach is the development of an individual strategy for each project, focused on the specific problems to be solved. This strategy considers the staff members assigned to the project, the scheduling and duration of work phases, the use of special consultants or specialized studies. Our Project Management Plan (PMP) will document key management and oversight tasks and is updated throughout the project as changes occur. The plan will include a definition of your program goals, technical requirements, schedules, resources, budgets, and management programs.

As we gain a better understanding of your scheduling targets, we will be able to determine exactly what resources we will need to dedicate to the project. Regardless of the schedule, we are confident that our manpower and skill level will remain more than adequate, even in the early, labor intensive phases. Our projected workloads and the depth of personnel available are such that staffing projects of this size and complexity will have no adverse impact on any current or future projects in our office. We experience in planning, designing and managing similar renovation projects for various state and local agencies and will be able to meet your program objectives within the time schedule agreed to.

Resumes for our design team can be found on the following pages.

Todd Boggess, AIA, NCARB, Architect
President

EDUCATION

- Master of Architecture, Clemson University School of Architecture
- International Studies, Clemson University Daniel Center for Urban Design & Building Studies, Genoa, Italy
- Bachelor of Arts Degree in Design, Clemson University School of Architecture

RESPONSIBILITIES

Todd joined ETB as a project architect and office manager in 1988 after graduating from Clemson University. In January, 2001, he assumed the office of President.

Todd is responsible for . . .

- architectural design and development
- project management and coordination
- computer aided design and visualization
- interior design
- site planning

Your project will receive his complete attention, from the interview and project meetings, through the construction process. As the president of the firm, you are putting your trust in him and he takes that commitment very seriously. He wants to make sure you are satisfied with our service, performance, and design.

COMMITTEES

West Virginia Board of Architects (since 2014) – Governor Tomblin recently appointed Todd to this board which is responsible for protecting the life, health and property of the people of the State of WV by ensuring that proper architecture practices are used in the state.

Princeton Zoning Board of Appeals (since 2000) – Todd has been asked to serve on this local committee for the past 17 years. He currently serves as vice-chair. The board is responsible for reviewing and ruling on appeals to the existing Princeton Zoning Laws.

PROJECTS – New Construction / Additions

- WVARNG Readiness Center, Elkins, WV
- Princeton Rescue Squad Multi-use Building, Princeton, WV
- Pipestem Conference Center (*Addition*), Pipestem State Park
- WVDOH (Office buildings, equipment shop, bridge & sign shop, lab building)
 - District 10 Headquarters Complex (all four buildings)
 - District 6 Headquarters Complex (three buildings)
 - District 9 Office Building
 - District 1 Office Building
 - District 8 Equipment Shop
 - District 7 Office Building & Equipment Shop

PROJECTS – Renovations / Adaptive Re-use

- Municipal Complex for the City of Princeton (adaptive re-use), including
 - Administrative
 - Police
 - Fire
 - Public services
 - Recreation
- WVARNG Coonskin Joint Facilities Exterior Renovation, Charleston, WV
- Princeton Public Library (former USPO), Princeton, WV
- New River Community & Technical College (former Bank Building), Princeton, WV
- New River Community & Technical College Arts & Sciences (former DOH), Lewisburg, WV
- Hatfield/McCoy Regional Authority Offices, Lyburn, WV
- The Railyard and Clover Club (*Adaptive Reuse*), Bluefield

AWARDS

- WVAIA “Honor Award” for Renovation Design of the Princeton Public Library – April 2012
- Princeton/Mercer County Chamber of Commerce “Excel Award” – January, 2011
- *West Virginia Executive Magazine’s* “Young Guns” - Fall, 2003
- Princeton/Mercer County Chamber of Commerce “Citizen of the Year - 2000”
- Princeton Elks Club “Citizen of the Year - 2000”

Stephen Mackey
Planning & Design

EDUCATION

- Bachelor of Arts Degree in Design, Clemson University School of Architecture
- Master of Architecture, Clemson University School of Architecture

RESPONSIBILITIES

With over 30 years of experience in all phases of design and construction, Mr. Mackey brought strong design, management and leadership skills to the firm. His significant experience has enabled him to successfully oversee the design and construction of a number of large educational projects. Specific project responsibilities include:

- code review and analysis
- program development
- conceptual design
- design visualization
- project coordination
- construction specifications

PROJECTS

Mr. Mackey rejoined ETB Architects in 2009 after serving as Executive Vice President for two architectural firms in Florida. During his absence, Mr. Mackey also served as project manager on several large school projects in the state of Florida and has been focused on education projects since his return to ETB.

- Municipal Complex for the City of Princeton (adaptive re-use), including
 - Administrative
 - Police
 - Fire
 - Public services
 - Recreation
- Princeton Rescue Squad Multi-use Building, Princeton, WV
- Courthouse Square Commercial Development, Princeton, WV

Nathan Turner, LEED G.A.
Project Manager

EDUCATION

- Bachelor of Science, Engineering – Architecture, Fairmont State University
- Master of Architecture (May, 2009), Boston Architectural College

RESPONSIBILITIES

Mr. Turner joined ETB in 2009 and brought with him a wealth of experience in architectural design, as well as construction methods and practices. His prior experience with educational facilities has already proven extremely valuable as we have several elementary, middle, and high school projects at various stages of completion. Nathan has obtained LEED certification and will assist in our efforts to provide a “green” approach to as many projects as possible.

Specific project responsibilities include:

- architectural programming
- construction documentation
- project management
- project coordination
- construction specifications
- construction administration

PROJECTS

- Municipal Complex for the City of Princeton (*Adaptive re-use*), including
 - Administrative
 - Police
 - Fire
 - Public services
 - Recreation
- Princeton Rescue Squad Multi-use Building, Princeton, WV
- New River CTC Arts & Sciences (*Adaptive re-use*), Lewisburg, WV
- New River Community & Technical College (*Adaptive re-use*), Princeton, WV
- Princeton Public Library (*Adaptive re-use*), Princeton, WV

Dale East
Production Management

EDUCATION

- Bachelor of Science - Architectural Engineering
 Bluefield State College

RESPONSIBILITIES

Mr. East is an architectural intern with 10 years of experience who joined ETB in November of 2013. Prior to returning to Princeton, his work at architectural firms in Tennessee allowed him to manage projects from New Jersey to Atlanta, ranging from educational facilities to zoological exhibits. Dale is involved in all phases of design documentation and production and is eager to handle any task needed to ensure a smooth project flow from start to finish.

Specific project responsibilities include:

- 3D modeling
- graphics/imagery
- construction documentation
- project coordination

PROJECTS

- WVARNG Coonskin Joint Facilities (*Exterior Renovation*), Charleston, WV
- Municipal Complex for the City of Princeton (*Adaptive re-use*), including
 - Administrative
 - Police
 - Fire
 - Public services
 - Recreation
- Princeton Rescue Squad Multi-use Building, Princeton, WV
- WVDOH D7 Office Building and Equipment Shop, Lewis County
- Bill Cole Automall Used Cars (*Renovations*), Green Valley, WV
- Ramey Chevy & Toyota (*Renovations*), Green Valley, WV
- The Railyard and Clover Club (*Adaptive Reuse*), Bluefield

Chris Canterbury, Associate AIA
Construction Administration Manager

EDUCATION

- Bachelor of Science Engineering Technology/Architecture, Fairmont State University

RESPONSIBILITIES

Chris joined ETB in 2000 as a CADD Technician. His focus in recent years has been project administration and his current position of Construction Administration Manager reflects that area of expertise. Your project will benefit from his superb organizational skills. He attends meetings and keeps track of your needs and wishes through notes and minutes. His timely response to submittals will ensure that your project stays on its construction schedule.

Chris is responsible for . . .

- construction administration
- organizing and attending meetings
- contacting material suppliers
- responding to contractor's requests for information
- reviewing submittals and shop drawings
- site visits/observations

PROJECTS

- WVDOT Buildings – multiple types/locations
 - District 9 Office Building, Lewisburg, WV
 - District 1 Office Building, Charleston, WV
 - District 8 Equipment Shop, Elkins, WV
 - District 7 Office Building & Equipment Shop, Weston, WV
- Bill Cole Automall Used Cars (*Renovations*), Green Valley, WV
- Ramey Chevy & Toyota (*Renovations*), Green Valley, WV
- Princeton Public Library (*Adaptive re-use*), Princeton, WV
- New River Community & Technical College (*Adaptive re-use*), Princeton, WV
- New River C&TC Arts & Sciences (*Adaptive re-use*), Lewisburg, WV
- Hatfield/McCoy Regional Authority Offices, Lyburn, WV
- Municipal Complex for the City of Princeton (*Adaptive re-use*), Princeton, WV

Experience

Mr. Harper brings 16 years of design experience to the firm. He has expertise with HVAC, electrical, plumbing, sprinkler and fire alarm system designs. His projects include educational facilities (including colleges and universities), health care facilities, office buildings, banks, emergency services facilities, postal facilities, and government buildings.

Mr. Harper's role with the firm includes, but is not limited to, office manager, project manager, draftsman, and Building Information Modeling coordinator. He oversees projects from the early design phase through construction administration to post construction. He assists the project architect and design team with valuable mechanical, electrical, and plumbing information early in the project to ensure it is adequately designed to handle the client's needs.

Bachelor of Science - Mechanical Engineering

Experience

Mr. King brings 14 years of electrical design experience and over 11 years of electrical construction/maintenance experience to the firm. His projects include educational facilities (including colleges and universities), health care facilities, office buildings, banks, emergency services facilities, government buildings, and industrial projects.

Mr. King's role with the firm includes, but is not limited to, project manager, draftsman, specification writer and construction administration. He oversees projects from the early design phase to post construction. He assists the project architect and design team with valuable electrical information early in the project to ensure it is adequately designed to handle the client's needs.

SITE CIVIL ENGINEER

Education

B.S. Civil Engineering, West Virginia University, 1981, Magna Cum Laude

Registrations

Registered Professional Engineer West Virginia (1986)

Registered Professional Surveyor in West Virginia (1995)

Professional Memberships

American Society of Civil Engineers (ASCE)

Professional Experience

Mr. Cart has over 35 years of experience in providing consulting engineering services. Clients served have included Industrial, Public and Private Institutions and State and Federal Agencies. He has served as Project Engineer on numerous geotechnical investigations over the years. These projects have included highways, bridges, industrial sites, buildings and various developments.

Mr. Cart has been the lead engineer for the design of structures including garage maintenance facilities, 911 centers, student resident housing additions, building renovations including additions of elevations and stairways. The projects vary in complexity to single story slab on grade structures to multi-story 911 centers.

Additionally, Mr. Cart has also provided clients with evaluation of existing structures to determine the modifications required for proposed changes in the structural loading. He has worked with architects and the fire marshal's office to provide structures designed to the latest code requirements.

Representative Projects

Mr. Cart has served as senior project engineer for numerous structural projects including the following:

- Buckwheat Express Bus Garage- Kingwood, WV
- Mason County 911 Center and Garage- Point Pleasant, WV
- Putnam County 911 Center and Maintenance Garage- Winfield, WV
- Mingo County 911 Center- Williamson, WV
- Wetzell County 911 Center- New Martinsville, WV
- CAMC General Student Resident Housing- Charleston, WV
- State Credit Union Building Addition- Charleston, WV

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.
