Global Warranty Information

A History of Success

Founded in Canada in 1966, The Global Group is one of the largest manufacturers and marketers of quality business furniture in the world. Our facilities include more than 40 just-in-time manufacturing and product assembly plants, plus offices, showrooms and distribution facilities.

Customer service is the cornerstone of our continued success and the reason why the Global choice is often the first choice for office furniture solutions by clients the world over.

Ergonomics

Global manufactures an extensive selection of office furniture in the areas of seating, files and storage, casegoods, panels and computer accessories. The people at Global are proud to bring you office furniture manufactured with ergonomic features integrated into every product in order to help build a healthy, comfortable and productive work environment.

ISO 9000

At Global, we continue to set the highest quality product standards. Registration to ISO 9000, the international standard for quality systems is just one example of our longstanding promise to manufacture office furniture that is built to work better and last longer.

Research and Development

The Global Group is one of the very few business furniture companies worldwide to maintain an in-house testing laboratory. The testing laboratory and its support programs certify our components and finished products. Global certified office furniture products meet, and often exceed industry and government standards.

The Environment

At Global we're proud of our pledge to maintain a clean environment. We have long established environmental programs throughout our plants and offices to sustain our 'earth friendly' commitment. The people at Global take every opportunity to Reduce, Reuse and Recycle.

ISO 14001

At Global we're proud to say we're ISO 14001 registered. ISO 14001 is the benchmark international standard for the implementation and operation of an environmental management system. Certification requires a commitment to continuously improve practices that protect the environment.
