Galvanized Chain-Link... made to be versatile

Galvanized hot-dipped zinc coating is the most popular and inexpensive method for protecting chain-link fence systems. Preferred for decades to define property lines and protect property, galvanized chain-link offers a versatile fencing solution that will provide years of maintenance-free protection.

Galvanized Fencing System

All steel components are hot-dip zinc coated and guaranteed for 12 years.

12 Year Warranty

Meets and Exceeds all ASTM Standards

Galvanized After Weaving (GAW)

This process forms or weaves chain-link into a fabric first, and then soaks it in a large galvanized bath which adheres the zinc coating. This ensures that all the wire is coated, even the cut ends created during the weaving process.

Galvanized Before Weaving (GBW)

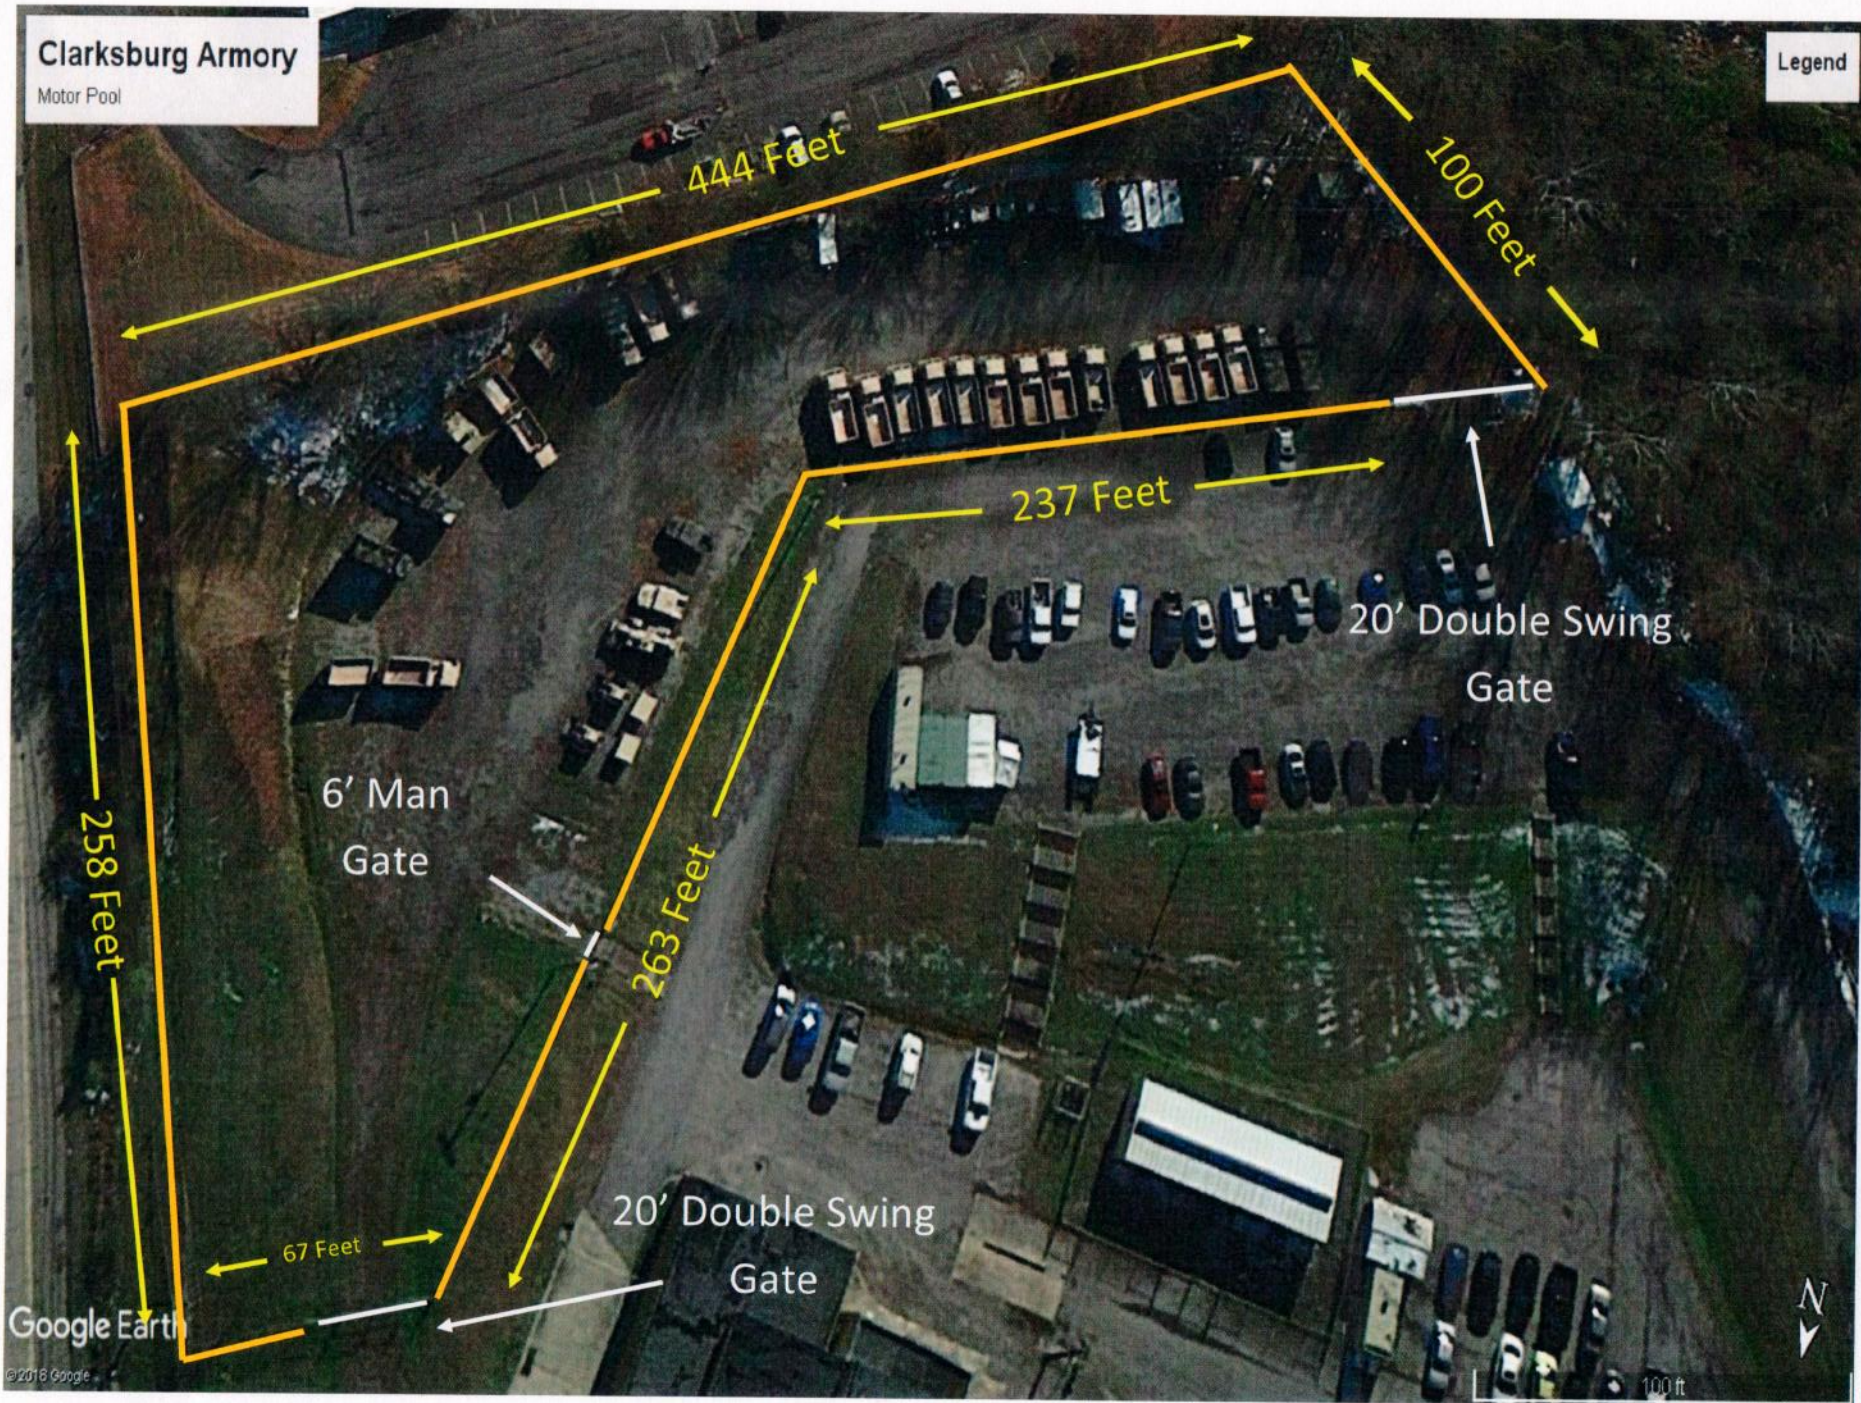

In this process, the wire is pre-galvanized before it is formed into a fabric. The weaving process creates an exposed cut end that will lack coating and be more apt to some minor rust in wet and severe weather conditions.
