PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

RE: EOI: Roof Replacement - 600 Capitol Street

Dear members of the selection committee:

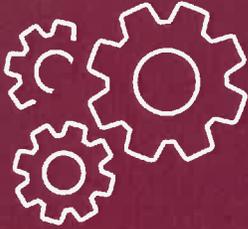

Over the past 30 years, the Thrasher team has built an impressive portfolio of renovation projects throughout West Virginia similar in nature to this roof replacement project at 600 Capitol Street in Charleston, WV. The success of these projects is a direct result of building strong relationships with our clients and working hand-in-hand with the facility personnel to ensure that the project meets not only the immediate specific goals of the project but also aligns with the long-term goals for the facility. To make this happen, we employ professional staff with expertise in roof specific project design and management who have an understanding of local and state building codes.

Additionally, our team has a superb track record of producing solid construction documents, getting projects competitively bid, administering the construction process to assure the quality of work is in accordance with contract documents, and is completed on time and within the established project budget.

As you will see in this Statement of Qualifications, we have the right team and experience in West Virginia to complete this project. We look forward to the opportunity to answer any questions you may have.

Sincerely,
THE THRASHER GROUP, INC.

of delivering successful projects

Diverse services that grow communities.

THRASHER'S GOT IT.

A critical step in meeting your goals is first ensuring we understand them. Thrasher's team has thoroughly reviewed the Expression of Interest request and is confident in our ability to deliver the highest-quality solutions to your problems. We are capable of meeting each goal/objective you have outlined and feel strongly that you will be satisfied with the outcomes you receive.

We understand your goals for the auditorium renovations needed and will handle them in the following manner:

GOAL/OBJECTIVE 1

The Thrasher Group will provide all evaluations and determine what type of systems and construction will be used and whether or not asbestos is present. If asbestos is an issue, we have a specialist on-staff and ready to perform any studies necessary.

GOAL/OBJECTIVE 2

Our designated designers will provide a roof system design that will improve the drainage efficiency and overall layout of the roof.

GOAL/OBJECTIVE 3

Drawings and specifications will be submitted at 35%, 65%, 95%, and 100%. Additionally, our in-house cost estimator will provide estimating services with each submission.

GOAL/OBJECTIVE 4

Construction Administration always plays a major role in the Thrasher full-services package. This is a piece that we feel is important to offer for every project, and we consistently bid more projects than any other firm in the state. Thrasher has the competent professionals your team needs to ensure your project is constructed correctly and functions as designed.

CRAIG BAKER, ALEP

Architecture Division Manager

Craig Baker, ALEP is an experienced designer and manager with an extensive background working with clients to design, plan, and manage projects both large and small. As an Accredited Learning Environment Planner (ALEP), he has a special interest in the functionality and design of educational facilities.

Craig has worked on a wide variety of projects during his tenure at Thrasher. His knowledge includes a thorough understanding of industrial facilities, administrative office spaces, academic building design, government buildings, residences, medical facilities, and hospitality.

As manager of Thrasher's Architectural Division, Craig works hand-in-hand with staff and clients to ensure projects remain on time and within budget. In addition to his strong technical skills, Craig's attention to client communication and responsiveness make him an excellent manager. He manages coordination of construction, detailed construction document preparation, bidding, construction management and contract administration.

Brittany Parks is an Environmental Scientist for The Thrasher Group. During Brittany's professional career, she has worked on a range of projects in the fields of agronomy, remediation, environmental site assessments, asbestos, multimedia sampling, West Virginia Department of Environmental Protection (WVDEP) Voluntary Remediation Program (VRP), and most recently, project management.

Since coming to Thrasher, Ms. Parks has been heavily involved with remediation projects and is actively working toward obtaining her LRS certification. Brittany has also worked diligently on various Phase I and Phase II Environmental Site Assessments, Asbestos Inspection Reports, Anti-Degradation Reports, VRP documents (agreements, applications, work plans, and sampling analysis reports), and several permitting documents, such as SWPPPs.

Previously, Brittany worked as an Environmental Technician for a Washington, D.C.-based firm on a large class-action settlement project in northcentral West Virginia. Her experience in this role included performing soil and air sampling, QA/QC and oversight for various topsoil and interior remediation projects, asbestos inspections, and air clearance monitoring, anti-degradation reviews, and evaluating permits and compliance issues.

Aside from her work in the field, Ms. Parks has experience with conducting and mediating town hall meetings and site-specific client meetings. She also has experience lecturing and speaking at seminars about her thesis, "Grazing Impacts on Sediment Production and Runoff from Single and Mixed Species Grazing."

City of Morgantown Public Safety Building

Roof Renovations

Mr. Damien Davis, City Engineer
389 Spruce Street | Morgantown, WV 26505
304-284-7412

The City of Morgantown hired The Thrasher Group to demonstrate their proficiency in architecture and design to renovate the Morgantown Public Safety Building. The issues that needed addressed were water causing the roof to leak, thermal comfort throughout the building, and to design a fiscally viable facility.

Thrasher's Architecture team worked alongside the client and sub-consultants to estimate the cost of construction and renovations. Following the cost analysis, it was determined the project needed to be divided into two phases until a second round of funding transpired. Our team began to prioritize aspects of the project to fully utilize their services throughout phase one.

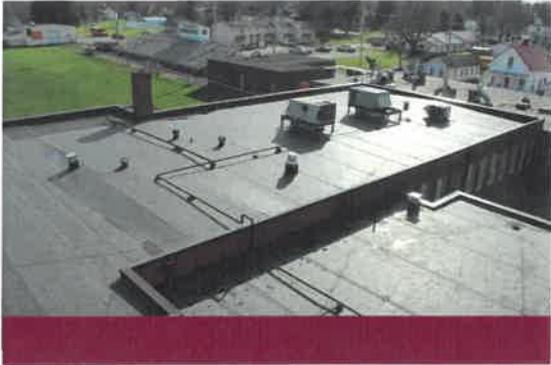

Our team addressed the leaks in the roof and replaced the old rooftop HVAC units during the initial phase of the project. The replacements were immediately tested, adjusted, and balanced. To strategize the second phase of the project, our team used infrared scanning to identify areas of heat loss in the building. Thrasher plans to replace additional components of the HVAC system to maximize thermal comfort in the Public Safety Building.

**Wirt County Board of Education
Re-roof of Wirt County High School and
Primary/Middle School**

Ms. Maryjane Pope-Albin, Superintendent
389 Mulberry Street | Elizabeth, WV 26143
304-275-4279

Thrasher was hired by the Wirt County Board of Education to re-roof both the Wirt County High School and Middle/Primary School. This project includes the replacement of all roofs at these schools with new 20-year membrane and adding new insulation to increase the amount of thermal performance in the buildings. Also included as part of this project is the replacement of rooftop HVAC equipment, controls, and a fire alarm system.

This project is the combination of two SBA funded projects, a 2014 MIP Grant, and a 2015 Needs Grant.

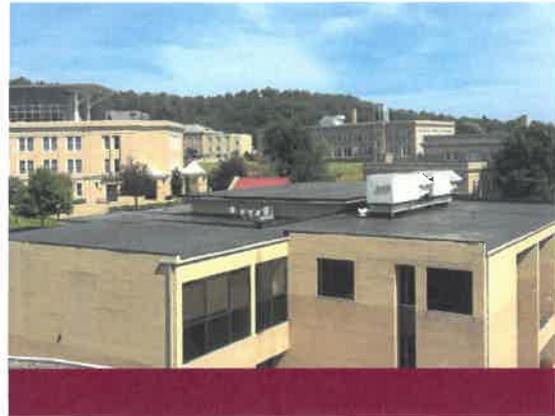

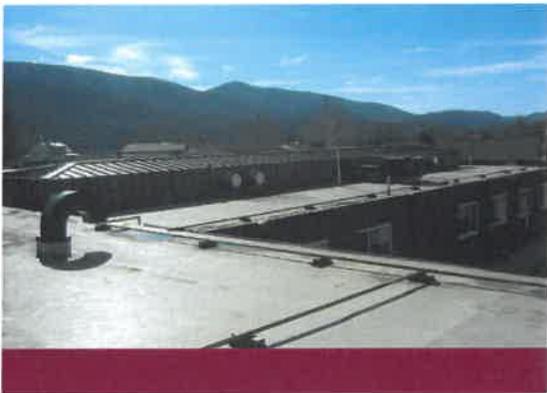

Fairmont State University Re-roof of Wallman and Turley Center Buildings

Mr. Tom Tucker, Physical Plant Director
1201 Locust Avenue | Fairmont, WV 26554
304-367-4139

Thrasher was hired by Fairmont State University to complete a re-roof on two buildings located on their main campus. The buildings had been out of roof warranty for quite some time and the existing roofs had been on the building for their potential life spans. They were starting to have issues with leaking, wear, and tear, which was a potential problem for the building. To address these issues, FSU needed to have the roofs replaced and new warranties provided.

To complete this project, Thrasher utilized a new type of self-adhering EPDM roofing that is not commonly used in this area of the state. They used self adhering EPDM vs. that tradition glued down EPDM membrane system. This was used for two reasons: efficiency and safety. Using the self-adhering EPDM makes for a quicker process as compared to the traditional glued-down membrane system. Additionally, staff and students were continually occupying the buildings, so their safety and comfort was a priority. By using this method of roofing, there was less potential to put off fumes that would interfere with the buildings' use.

Pendleton County Nursing Home Roof Replacement & HVAC

Ms. Anna Mae Harman
141 Maple Avenue | Franklin, WV 26807
304-358-2322

This project includes design and construction of a new rooftop heating, ventilation and air conditioning system, and metal enclosure for the ductwork for approximately 28,000 square feet of the existing Pendleton Nursing Home.

The new roof enclosure work consisted of constructing 5,900 square feet of metal framed cupola type structures with metal studs, batt insulation, non-combustible sheathing for floor, and walls and removal of the existing roof within the enclosed area.

The roof outside of the enclosure was also replaced. This project consisted of removing the existing EPDM roofing, patching existing insulation, adding tapered insulation, and re-roofing.

City of Clarksburg Water Board Roof Replacements

Mr. Paul Howe, President
1001 S Chestnut St, Clarksburg, WV 26301
304-623-3711

Thrasher was hired by the City of Clarksburg Water Board to design and bid a complete ballasted roof replacement for four buildings located on the Water Board's property. As part of this project, Thrasher also replaced all of the aluminum building coping and re-used the existing rock ballast which reduced construction costs. The total area of the roof replacements came to 32,000 SF of ballasted EPDM rubber roofing.

The first building completed was a multi-level administration building and chemical lab. This particular building had multiple levels, HVAC curbs, and rooftop equipment that made for quite a challenge. The second building completed was the Water Board's maintenance garage that had a single slope EPDM roof.

Grafton Housing Authority **Roof Replacement of the Elizabeth Cather Towers**

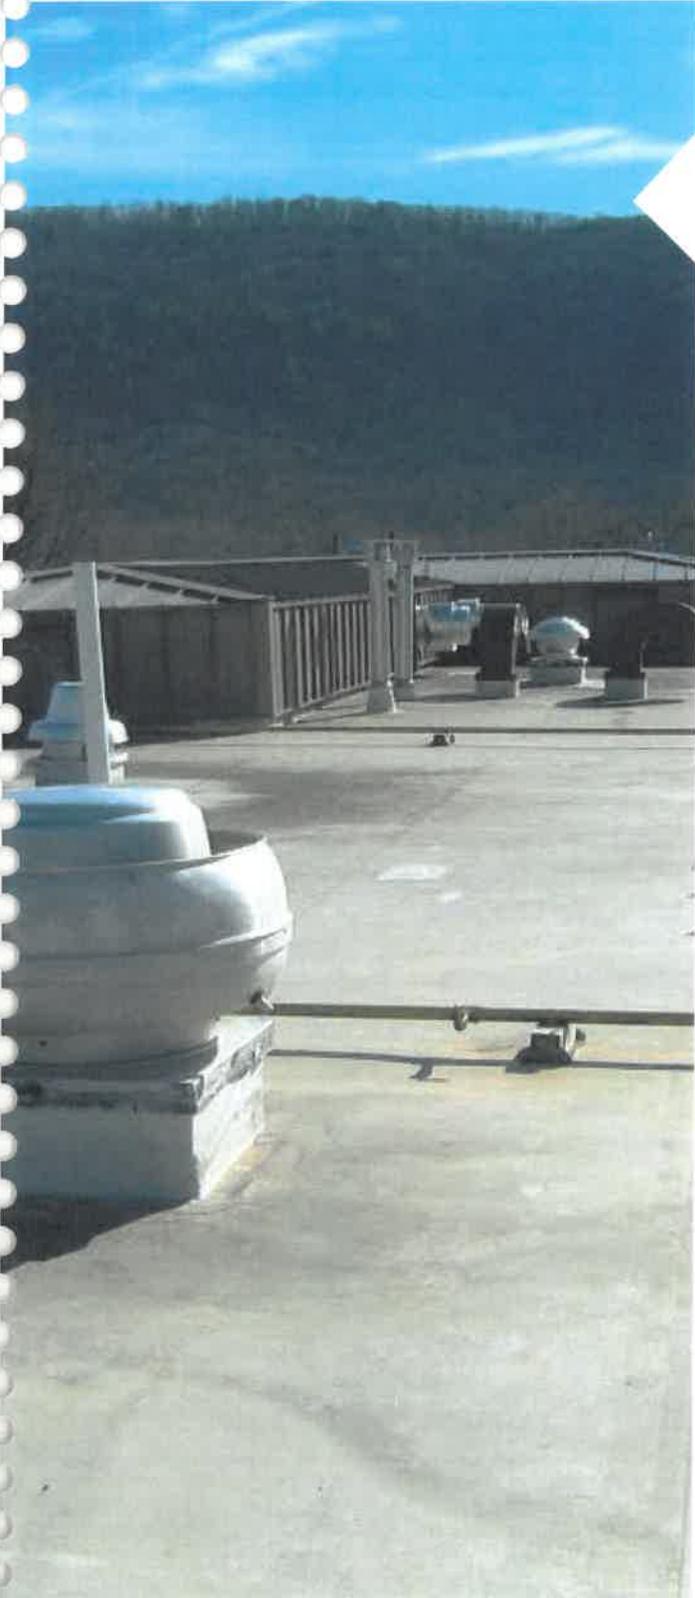

Mr. Frank Mayle, Executive Director
131 East Main Street | Grafton, WV 26354
304-265-1045

In 2015, Thrasher was hired by the Grafton Housing Authority to complete a roof replacement on the Elizabeth Cather Towers. Initially, Thrasher did a complete site investigation of the existing roof to take core samples in different locations to determine the makeup of the roof. At that time, Thrasher also did field dimensions of the existing roof to begin developing drawings. The team then prepared both demolition and construction drawings and project specifications.

Ultimately, Thrasher completed the design and bidding and helped the Grafton Housing Authority hire a contractor that removed the entire 12,000 SF roof down to the existing concrete deck and replaced it with a fully adhered EPDM roof over tapered insulation.
