# PURCHASING AFFIDAVIT

**CONSTRUCTION CONTRACTS:** Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

**ALL CONTRACTS:** Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

**EXCEPTION:** The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

**DEFINITIONS:**

**"Debt"** means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

**"Employer default"** means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

**"Related party"** means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

**AFFIRMATION:** By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (*W. Va. Code §61-5-3*) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

## System Capabilities

- *Secure Online Ordering System*
  - Galls eEquip is only accessible by users defined and approved by customer through unique user names and password assignment
- *Mobile Device Compatibility*
  - Galls eEquip has a custom mobile experience for ease of on-the-go ordering
  - Compatible with all smart phones
  - Can be accessed from any location
- *Configurable based on Customer Uniform Program Requirements*
  - Designed to support a broad range of customer uniform program requirements
  - A uniform program profile is established with each customer to be serviced through the Galls eEquip system
  - This profile defines the operating parameters in which the system will govern the program, to include: employee management, allotment management, product offering, delivery requirements, and invoicing
- *Employee Management*
  - Galls eEquip provides an employee based management and tracking segment.
  - Employee information, required to properly process order and provide management reports, is warehoused in our systems data storage. This information includes: employee code, name, address (if appropriate to the program requirement), anniversary date, department, rank, assigned location, designation, and employee group.
  - Historical & distribution data is also maintained for each employee. This data is the basis for management reports, and is collected as orders are placed and distributed. Historical data includes items distributed (to the size level), along with quantities and order/shipment dates.
- *Product Offering Management*
  - Product offerings for the uniform program are defined, and are assigned to the respective employee groups when a uniform program is established on the system.
  - Employee Groups, or shop-by locations, typically represents a job function or physical location. Such as if a uniform program was for a police department, there may be Shop-By Location for "Patrol", "Swat", "K-9", etc. with each group having a specific uniform products assigned to them. During order placement, only products associated with the

Shop-By Location the employee is assigned to are available for order. This ensures that the employee can only order those products required for his/her job function.

- Galls eEquip supports alterations, such as trouser hemming, application of badges, etc. These elements are defined based on the requirements of the uniform program, and may be limited to specific styles and employee groups.
- *Optional “Shop Full Catalog” Feature for Galls eEquip*
  - Feature allows the customer to add the entire Galls.com product offering to their website at a negotiated percent discount off retail.
  - Reduces the need to call for quotes on items that are needed right away
  - Keep in mind that customized VAS options are not available on these items
- *Optional “Package Ordering” Feature*
  - Feature allows the user to create “Packages” of items that are frequently ordered at the same time (ex. “New Hire Package,” “New Vehicle Package”)
  - “Package” orders are bundled and shipped together by user
  - This feature reduces the number of clicks per order and reduces errors during order entry by ensuring that all needed items are ordered before processing
- *Optional Allotment Management*
  - The system provides employee allotment management based on dollars OR units.
  - If permitted by the uniform program profile, employees may purchase uniforms in excess of their allotment amount via credit card.
  - Allotments may be renewed on the employee’s anniversary date, the calendar year (each January 1), or a specific date.
  - Unused allotments may be rolled over to the new allotment year in its entirety, or a portion of the unused allotment may be rolled over, or no rollover based on the Uniform Program Profile.
  - If Allotment Management is required for the uniform program, the employee’s available allotment is verified during the checkout process.
    - If the amount ordered exceeds the employee’s available allotment and the program allows employee payments for amounts over the allotment via credit card, the checkout process remains active, and the employee will be prompted for credit card information during the checkout process.
    - If there is not sufficient allotment to cover the order amount and the program does not permit payment of the overage by the employee (via credit card), the checkout process will be disallowed until the order is altered to be within the employee’s available allotment amount.
    - If the program has an allotment limit by product category, the payment for the amount over allotment will be forced to a credit card if credit card purchases are allowed (i.e. agency will only pay \$100 toward a footwear purchase).
    - If the program has allotment needs but also wants to allow orders paid for by the agency off of allotment, this can be accommodated along with a reason code for the purchase and purchase comments. Approval can be required for

this scenario and users will chose from a drop list of approvers (up to 3 levels of approval).

- *Optional Payroll Deduction Management*
  - Much like allotment management, the system can deposit, track, and renew payroll deduction funds to users
  - Renewal periods are identical to allotment renewals (anniversary date or calendar date)
  - Detailed month-end reporting available as well as on-demand reporting to track balances
  - Payroll deduction funds may be used in conjunction with other pay methods if allotment is exceeded or the employee does not have available funds on his/her credit card but need to make a purchase
- *Controlled Uniform Order Placement*
  - Galls eEquip controls uniform order placement by tying together the Employee, Product Offering, Shop-By Location and Allotment Management segments of the system, as governed by the uniform program profile.
  - Galls eEquip provides a web-based method for customer uniform administrators or employees to place uniform orders. The product offering and associated optional alteration options are displayed are based on the ordering employee's employee group assignment. Any mandatory alterations, such as standard department patch are garment, are hard code in the back system to ensure no mandatory alteration is missed during order placement on the website.
  - Galls eEquip allows for orders to be placed using a "shop-by individual" feature which provides an administrator the ability to place a large bulk uniform order and segment the order down to the individual employee level, eliminating the necessity to place a separate order for each employee.
- *Optional On-Line Order approval*
  - A customer may require all order or certain orders be approved by an Administrator prior to being processed. Galls eEquip allows for approval gates to be established from shipping to order dollar amount which are defined in the Uniform Program Profile. These orders remain in a "Hold for Approval" status until released by an Administrator. Galls eEquip provides information on these orders to the Administrators through system generated approval emails sent to the Administrator which allows the order to be approved through the links provided in the email, or on the Administrator's user dashboard on the website.
  - Upon order approval, the order is released to the back-office system for fulfillment. Denied orders assume a "denied" status, and are not released to the back-office system.
- *Administrator Site Maintenance and Task Management*
  - Allows customer's website administrator to add/remove product as needed
  - Customers can make changes effective immediately or request a quote from a sales associate

- Customer administrators may also submit work requests through eEquip Task Management software so that requests are visible through a workflow and accompanied by automatic email updates
- *Integrated with Galls ERP system*
  - The system is integrated with Gall's order fulfillment system, to include functionality in the areas of distribution, inventory control, production planning and stock replenishment, as well as accounting support.
  - When an order is placed in the system, it is passed directly to the distribution system for fulfillment of the order. As the order makes its way through the fulfillment process, the system is updated: 1) to confirm that the order was successfully received into the distribution system, 2) when the order is in process, and 3) when shipment is made. Shipment quantities and shipment dates are included in the data passed to the system from the distribution system.
  - As a result of the system order being passed to our back-office systems, our perpetual inventory is allocated/depleted. Our production-planning module recognizes the inventory depletion, and if warranted, triggers the stock replenishment process.
- *Flexible, On-Demand Management Reporting*
  - Galls eEquip provides flexible, on-demand reporting with output into Excel .xls or Excel .xlsx, which allows for easy review and manipulation of the data output by the Administrators. The reporting can be sent directly to the requestors email or reviewed from the reports dashboard.
  - Available reports include:
    - Allotment Report
    - Order History Sales report
    - Itemized Sales report
    - Allotment Activity Report
    - Unit Allotment Activity Report
    - Backorder Report
    - Dropship Report
  - Within the various report offerings, the user may specify parameters such as date ranges, open or closed orders, or limit report data to a specific location or department, as applicable to the report.
- *Customer management of employees*
  - Galls eEquip system allows for department Administrators to have the ability to assign new users to the website, update user profiles, Shop-By Location, etc. should the customer chose the manager their own employee access to the website.
- *Customer management of inventory*
  - Galls eEquip provides a tool to track the customer's on-site inventory purchased by Galls as well as outside vendors.
  - The inventory management tool also allows Administrators to issue items to individuals, track those issues, and track return status of items. This gives administrators a

convenient place to create a history for all users and what items they may have in their possession.

- 4 Major Components:
  - Inventory Management—
    - Build custom inventory assortment, tree structure with branch/leaf design like UP assortment
    - Load SKUs from Uniform Program or load items received in via Non-Galls Receiving
    - Manually load inventory or push inventory in via Galls/Non-Galls Receiving
  - Serial Number/Expiration Tracking
    - Allows administrators to input the number of serial numbers to capture on an item and expiration in months
    - Users and administrators receive automatic notifications in advance of expiration dates
    - System is adaptable with standard UPC scanners and signature pads for quicker serial number entry and item issuing
  - Galls Receiving
    - Receive orders in to inventory that have been closed in GQ and designate assortment to load in to—inventory auto-loads
    - Receive orders in and “set-aside” for individuals so that they are not shown in “active” inventory under the Inv. Mgmt. tool
  - Non-Galls Receiving
    - Manually receive in non-Galls order, can designate a receive date, vendor, vendor code, item number, description, qty, and assortment—inventory auto-loads to designated assortment to Inv. Mgmt tool
  - Agency Issues
    - Issue items to individuals, capture signature upon receipt by individual
    - Can return items from individuals and designate if “damaged” or “reusable” with “reusable” returns auto-loading back in to the Inv. Mgmt. tool
    - Reporting available on this feature

## **System Availability, Security and Technical Information**

- System is available 24x7
- Compatible with mobile devices via custom mobile experience
- Minimal service outages for maintenance/upgrades – scheduled to 4x per year, with emergency outages being communicated as soon as possible.
- System is based on IBM iSeries POWER 8 Technology
  - <http://www-03.ibm.com/systems/i/index.html>
  - Data Center includes multiple LPARs
  - Utilize Replication as a Service with a managed service partner who provides us with a similarly configured iSeries within their data center
- System utilized IBM DB2 for idata base
  - <http://www-03.ibm.com/systems/i/software/db2/index.html>
- System Security – Our Data Center is kept protected and secure
  - iSeries is housed in an internal Data Center that is protected via card entry scanning and video surveillance equipment
  - Our partner utilizes a similar configuration but also uses biometric scanning as an additional layer of protection
- Data Security and Protection
  - Utilize a layered approach that includes Next Gen firewalls along with DDoS protection, web application firewall, and SSL certificates
  - All secure web traffic is done using Verisign (Symantec) 2048 bit public key and SSL certificate 256 bit
  - Network is segmented and we are deploying Rate Limiting technology
- The system is designed to allow for a minimum doubling in size/volume of the business without requiring any upgrades
