EXHIBIT A
PRICING PAGE

Quantities listed below are estimates only and shall be used for evaluation purposes only. The Agency will only pay for actual hours worked. The per-hour fee per individual shall be inclusive of all costs, administrative expenses, and travel related expenses per the general terms and conditions, and specifications. Note: Vendors are not permitted to change this Pricing Page.

Year 1 – Individual # 1

2,000 hours (estimate)	x	\$ <u>62.65</u> hourly rate	=	\$ <u>125,300.⁰⁰</u> annual cost (a)
---------------------------	---	-----------------------------	---	--

Year 1 – Individual # 2

2,000 hours (estimate)	x	\$ <u>62.65</u> hourly rate	=	\$ <u>125,300.⁰⁰</u> annual cost (b)
---------------------------	---	-----------------------------	---	--

Year 2 – Optional Renewal Term (Three Month Cycles) – Individual # 1

500 hours (estimate)	x	\$ <u>64.53</u> hourly rate	=	\$ <u>32,265.⁰⁰</u> each 3-month cost
-------------------------	---	-----------------------------	---	---

Year 2 – Optional Renewal Term (Three Month Cycles) – Individual # 2

500 hours (estimate)	x	\$ <u>64.53</u> hourly rate	=	\$ <u>32,265.⁰⁰</u> each 3-month cost
-------------------------	---	-----------------------------	---	---

Award will be based on the total cost of Year 1 for both individuals.

Total Cost for Supplemental Staff (a+b)

\$ 250,600.⁰⁰

ADDENDUM ACKNOWLEDGEMENT FORM

SOLICITATION NO.: CRFQ STO 20-02

Instructions: Please acknowledge receipt of all addenda issued with this solicitation by completing this addendum acknowledgment form. Check the box next to each addendum received and sign below. Failure to acknowledge addenda may result in bid disqualification.

Acknowledgment: I hereby acknowledge receipt of the following addenda and have made the necessary revisions to my proposal, plans and/or specification, etc.

Addendum Numbers Received:

Supplemental Staffing for Microsoft Application Development

CRFQ STO 20-02

10. VENDOR DEFAULT:

10.1. The following shall be considered a vendor default under this Contract.

10.1.1. Failure to perform Contract Services in accordance with the requirements contained herein.

10.1.2. Failure to comply with other specifications and requirements contained herein.

10.1.3. Failure to comply with any laws, rules, and ordinances applicable to the Contract Services provided under this Contract.

10.1.4. Failure to remedy deficient performance upon request.

10.2. The following remedies shall be available to Agency upon default.

10.2.1. Immediate cancellation of the Contract.

10.2.2. Immediate cancellation of one or more release orders issued under this Contract.

10.2.3. Any other remedies available in law or equity.

11. MISCELLANEOUS:

11.1. Contract Manager: During its performance of this Contract, Vendor must designate and maintain a primary contract manager responsible for overseeing Vendor's responsibilities under this Contract. The Contract manager must be available during normal business hours to address any customer service or other issues related to this Contract. Vendor should list its Contract manager and his or her contact information below.

Contract Manager: Eva Kordusky
Telephone Number: 855-807-6278 x229
Fax Number: 888-680-6555
Email Address: eva.kordusky@ssslc.email

CRFQ STO 20-02

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

Vikram Aditya Sakki
Sr .Net Developer**Summary:**

- Around 7 years of experience in web applications development using Microsoft .NET framework.
- Experienced and fully engaged in Software Development Life Cycle (SDLC), which includes gathering and analyzing business requirements, functional/technical specifications, designing, developing, testing, documentation, deploying the applications, and providing production support.
- Expertise in developing applications using **.NET 4.5/4.0/3.5/3.0/2.0, C#.Net, VB.Net, ASP.Net, Asp.Net MVC 3.0 & 4.0, VB6, ADO.Net, XML, HTML, AJAX, JavaScript, Telerik-Kendo UI, WPF, Windows Service, XHTML, DHTML & CSS.**
- Experience working with databases such as **SQL Server 2000/2005/2008/2012**, Oracle 10g, and 11g and MS Access 97/2000/2003.
- Experience in working with Java Script, JQuery, Angular JS, KnockOut.js and Bootstrap 2.0/3.0.
- Extensive experience in ASP.Net, C#, VB.Net, ADO.Net, Web Services, LINQ, AJAX, Windows Services, WCF Services, OOPS, Classic ASP,XML, XSLT, HTML, Text Editor, MS IIS server 5.0/6.0/7.0, DHTML, VBScript,VSS,JavaScript,AngularJS,SQLServer2000/2005/2008/2012,VisualStudio2005/2008/2010/2012.
- Expertise in creating applications using **C ASP.NET VB.NET ADO.NET XML and XSLT.**
- Working knowledge in Internet languages like HTML CSS XML DHTML VBScript Angular JS JavaScript XAML and AJAX.
- **Developed, debugged, enhanced, and converted VB6 financial, Merged and migrated VB6 UI/UX forms & code to VBA, C#**
- **Increasing the efficiency and security of application by migrating it from VB6 to C#.**
- Expertize in developing applications using XAML in WPF.
- Experienced in software development methodologies such as SCRUM and Classical Waterfall.
- Good knowledge of concepts in Relational Database Management Systems like ORACLE and SQL Server.
- Excellent knowledge in working with Data Modeling, SQL Server, T-SQL, Stored Procedures, Packages and Triggers.
- Experience with TTD, used N unit and Mb Unit and Visual Studio Test Tools for Unit Testing.
- Expertize in writing Services, Directives and Controllers in Angular JS.
- Experience in working with single page applications using Angular JS.
- Excellent experience in using Angular Bootstrap.
- Expertise in working with Crystal Reports, SSRS and SSIS
- Strong experience in working with Ajax and JSON.
- Expertize in Test Driven Development (TDD).
- **Expertise in rewriting Classic ASP applications to VB.Net applications.**
- Expertize in giving production support to Classic ASP applications.
- Experience in creating RESTful services with Web Services, WCF/Web API, and JSON.
- **Expertise in working with source control TFS and VSS.**
- Experience in design and development of User Interfaces, User Controls and Custom.
- Experience in web applications with .NET framework 1.1/2.0/3.0/3.5/4.0 using ASP.NET, C#, ADO.NET, SOAP, Web Services, XML and XSL.
- Extensively worked on WCF and Web Services to provide SOA architecture and Configuration based activation applications on SOAP and REST protocols.
- Expertize in code re-factorization commands and updating code as per internal standards.
- Experience in design and development of applications using N-Tier Architecture.
- Experience in implementing .NET Security features Authentication and Authorization using Forms-based Authorizing Users, Roles and User Account Impersonation.
- Worked on designing the architecture of the project in Model View Controller (MVC).
- Hands-on experience in Object Oriented Programming (OOP).
- **Experience with Agile Scrum and Waterfall development methodology.**
- Experience in working with Object Oriented Analysis and Design (OOAD) and basic .Net libraries.
- **Experience in working with code version maintenance/tracking using Microsoft Team Foundation Server (TFS) and deploying committed source code to QA and production environment using TFS.**
- Experienced in providing day-to-day Production support for .NET applications.

- Created Complex ETL Packages using SSIS to extract data from staging tables to partitioned tables with incremental load.
- Created SSIS Reusable Packages to extract data from Multi formatted Flat files, Excel, XML files into UL Database Systems.
- Created SSIS Packages using SSDT for export heterogeneous data from OLE DB Source (Oracle), Excel Spreadsheet to SQL Server 2008/2012.
- Performed operations like Data reconciliation, validation and error handling after Extracting data into SQL Server.
- Worked on SSIS Package, DTS Import/Export for transferring data from Database (Oracle and Text format data) to SQL Server.
- Worked on deploying and maintaining windows phone applications on Azure cloud technologies.
- Worked on Microsoft Azure Services like IaaS and PaaS.
- Creating a database on SQL AZURE database, which integrates with Hadoop and Active directory
- Experience with web application to Microsoft Azure Service Fabric and maintained existing cloud environment using Microsoft Azure.
- Worked on uploading documents to Azure blob storage, downloading and deleting, updating the document names using two different approaches of Web API and MVC controller methods.
- **Migrated existing Classic ASP applications to VB.Net applications.**
- Given Production support for existing classic ASP applications.
- Implemented the SOA architecture by using Web API.
- Extensively used JavaScript, jQuery for client side validations in the views.
- Involved in implementing the logic using C# and oops concept.
- Consumed Web API from ASP.Net MVC application using Http client
- The task included writing the C# classes, developing user controls, writing JavaScript functions.
- Used MVC5 razor view pages and iframes as per the business requirement.
- Participated in complete SDLC.
- Experience with dependency injection and creating custom directives in Angular JS as per business requirements.
- Used lambda expression with LINQ, SQL Query with Entity Framework 6 to perform CRUD operation on database from middle-tier.
- Involved in developing effective User Interface and Animation for WPF applications using XAML.
- Migrated existing windows applications to WPF application
- Built RESTful Web Services using WCF.
- Resolved bugs and added features for existing applications built on Kendo UI and MVVM pattern.
- Worked on Agile\Scrum atmosphere to work on .netcore\Fullstack utilizing Entity Framework.

Environment: .NET Framework 4.5, C#, MVC 5, Entity Framework 6.x, Web API, WCF, WPF, Web Services, Telerik Kendo UI, MVVM, Angular JS, JavaScript, OOAD, JSON, TFS, HTML5, CSS3, POS, Bootstrap, SQL Server 2014, AppDynamics Performance Testing, ALM, Team Foundation Server, Windows Forms, Microsoft Visual Studio 2015, Code re-factorization, Windows 8, IIS 8

Anthem, Indianapolis, IN

Oct 2017 – Jun 2018

Role: Senior .NET Developer

Responsibilities:

- Developed Quick Links module and participated in migrating existing code behind to Angular JS.
- Involved in all phases (SDLC) of application.
- Participated in creating tasks from user stories and delivered task on time.
- Participated in daily Scrum and Product Backlog meetings with client and employed Agile methodology for development, testing and enhancements.
- **Worked on converting the VB6/ASP/ADO/COM application to .NET 2015. Analyzed and developed conversion plan for VB6 application to .NET 2015.**
- **Developed onboarding documentation for developers to work on VB6 application.**
- **Efficiently migrated/repaired code from VB6 to C#.**
- **Worked on converting the VB6/ASP/ADO/COM application to .NET 2015. Analyzed and developed conversion plan for VB6 application to .NET 2015.**
- **Developed onboarding documentation for developers to work on VB6 application.**
- **Migrated VB6/VBA/MS Excel/Word/Access apps, and Provided unit testing, bug fixes, VB6/VBA code**
- Worked on the web pages using ASPX, HTML, C#, Angular JS, JavaScript, JQuery, CSS, and Bootstrap.
- Worked with N-Tier Architecture involving Services Layer, Data Access Layer, and Business Layer

- Used ToastrJS library to notify users with their actions, which served to train the users.
- Played a major role in coming up with the business requirements for the project, the project plan and workflow.
- Created windows service to keep track logged in user time as part of application.
- Implemented security technologies in ecommerce development.
- Consumed the WCF services using jQuery Ajax calls to enable effective communication
- Extensively used Visual Studio 2010 development tool for building Web Application.
- Extensively used CSS and Java Script to create visually appealing User Interfaces.
- Developed the procedural code using ASP.NET, VB.NET, HTML, Ajax and JavaScript using Visual Studio.
- Designed and developed web services.
- Given production support for WPF applications.
- Worked on minor releases for existing WPF business applications.
- Upgraded existing windows applications to XAML WPF applications.
- Extensively used JavaScript for client-side validations in the views.
- Extensively worked on most of the data and validation controls in Visual Studio and also creating a variety of Dynamic Controls in the application supported by dynamic style sheets since there were quite some pages which were database driven.
- Members/employees where they can assist monitor and support their individual children.
- Developed and implemented custom Tracking and Error Logging mechanisms.
- Developed and implemented a custom calendar control to add, update, delete and edit recurring and non-recurring events.
- Designed and developed windows forms applications.
- Given production support for internal windows forms applications.
- Assisted in developing Tables, Triggers, Views, stored procedures and updating the SQL Server database and Optimized SQL Server Stored Procedures using joins & indexes.
- Supported the database for daily, weekly and scheduled jobs along with bug fixing and production issues.
- Worked with ODATA services.
- Created Entity classes and used LINQ (Language Integrated Query) to SQL to manage relational data as objects with Entity Framework Code first model.
- Used AJAX for asynchronous data loading and UI blocking and unblocking for managing User interaction with UI/UX.

Environment: .Net Framework 3.5, ASP.Net MVC 2, Classic ASP, VB.NET, ADO.Net, AJAX, WPF, JSON, HTML, JavaScript, CSS, MS Visual Studio 2010, Waterfall, SQL Server 2008 R2, Web Services, Windows Service, SQL Server Integrating Services (SSIS), SQL Server Reporting Services (SSRS), T-SQL, PL/SQL, WCF Services, Windows 7, VB6

Innovative Solutions, Hyderabad, India.

Aug 2012 – Mar 2015

Role: .NET Developer

Responsibilities:

- **Extensively used ASP.NET for UI design, with VB.NET acting as the source of code.**
- Participated in full software development lifecycle (SDLC). Project plan is done in Microsoft Project and .NET Framework 3.5.
- Involved in collecting and analyzing the business requirements from the business analysts.
- Designed and developed win forms using C#, ASP.Net 3.5, XML, XLST, HTML, Java Script, Cascading Style Sheets (CSS), User Interface (UI) and Oracle.
- Worked on C#, ASP.NET state Management, ASP.NET caching features, configuring ASP.NET optimizations, securing ASP.NET 3.5 and custom controls.
- Developed project based on the agile methodology and conducted and involved in daily SCRUM.
- Extensively used Master Pages in ASP.NET 3.5 to achieve consistent look and feel of the web site.
- Written JavaScript, for client-side code to implement different functionalities in events, validation and listener, and multi-thread web applications using C#.
- Used data controls including Data Grid, Telerik AJAX, Data List, Data caching, Data Binding and Repeater controls throughout the application to display data in a customized format in the ASP.NET 3.5 web pages.
- Created Web.Config files for setting up of the application by writing database connections.
- Designed, modeled and architected multi-threaded, enterprise multi-tier software agent using web service hosted in a Windows service and web security, message queuing.
- Extensively used XSLT language to transform from XML document into HTML web page.
- Involved in creating various SQL queries, stored procedures and triggers with Oracle.
- Used AJAX driven development for all controls and client-side callbacks extensively.

Siddartha Konne
Microsoft Application Developer

Summary:

- High level of Proficiency with 5+ years in Microsoft .Net technologies and all phases of Software Development Experience Life Cycle (SDLC) Methodologies AGILE SCRUM/TDD & Waterfall including Analysis, Design, Development, Implementation, Documentation and Testing of n-tier architecture enterprise applications including Domain Driven Design (DDD) to solve problems.
- Worked in Software development as well as carrying out Testing of the web application in a SDET role.
- Implemented Design patterns including Factory, Dependency Injection, Singleton and Repository and extensively used Object Oriented Programming principles like Encapsulation, Abstraction, Inheritance and Polymorphism Multi-threading/SOLID concepts.
- Experienced in Microsoft technologies like Microsoft .net framework ASP.Net MVC 5, ADO.Net, WPF, WCF, XML, SOAP, VB.net, Web Services, Web Forms, Win Forms.
- Experience in implementing WCF SOAP/REST services and consuming using different communication protocols and well versed with implementing custom WCF debugging and performance modules.
- Experience in version control with Git & TFS 2015/2013/2012.
- Experience in Custom Scripts to monitor Git user accounts, written python scripts to remove suspended users from GitHub teams based on organization policy and auditing every team.
- Setup and configured GitHub Enterprise in conjunction with Jenkins as Continuous Integration platform
- Experience with SQL Server Reporting Services (SSRS), SQL Server Integrating System (SSIS) using SQL 2008/2005
- Experience in Reacts for creating interactive UI's using One-way data flow, Virtual DOM, JSX, React Native Concepts.
- Good knowledge in Dot Net Core.
- Good knowledge in Entity framework Core.
- Excellent knowledge and experience in working with open source tools like automation testing tool Selenium (Selenium IDE, Selenium RC, Selenium Web Driver and Selenium Grid), Web Services tools like SoapUI, Ready API, Unit testing Frameworks such as JUnit and TestNG, BDD Framework such as Cucumber and Bug tracking tool JIRA, Rally.
- Strong knowledge in Software QA standards flows and methodologies like functional, performance, integration, regression, and black-box testing, Proficient in Unit testing, Functional testing, User Acceptance Testing, Integration testing, System testing, Performance & Load testing, Sanity testing, Exception testing, Compatibility testing & Security testing, White/Gray/Black-box testing.
- Expert in preparing Test scenarios, Test cases, Test procedure, Test scripts for automated testing (using Selenium), highly scalable Page Object model and manual testing as per user requirements and functional specifications of the system.
- Performed Integration testing, system testing and performance testing and carried out Unit testing using tools MS-Unit, N-Unit.
- Experience in using React JS components, Forms, Events, Keys, Router, plus Redux, Animations and Flux concept.
- Experience in working on Waterfall, Agile (SCRUM) and iterative methodology
- Experience using consumed Web Services, WCF (Http, SOAP, and XML) and web API (RESTFUL services)
- Experience in design and development of Graphical User Interface using Win Forms and Web Forms & WPF.
- Proficient in Web services testing using SOAP UI.
- Expert in analyzing test results and preparing test/defect summary report for Sr. Management.

Education:

- Master's in computer science from New England University.
- Bachelor of Engineering in Computer Science, JNT University, Hyderabad, India

Skills:

Languages	C#, C++, PL/SQL, VB 6.0, VB.NET
Web Technologies	ASP.NET, VB.NET, XML, XSLT, JavaScript, AngularJS, JSON, jQuery, HTML5, CSS, AJAX, BOOTSTRAP, RAZOR, APIGEE
Xml Technologies	XML, XDOCUMENT, XSLT
Test Management tools:	Selenium IDE/RC/Web Driver/GRID, Appium, HP Quality center, HP Application Life Cycle Management Tool (ALM), QTP, Test Link, Test Manager, SOAPUI, JMeter, Load Runner, Cucumber.
IDE Tools	Visual Studio 2015/2010/2008, SQL Server Management Studio, SQL Server BI studio.
.Net Frameworks	.Net Core, .Net Framework 4.5/4.0/3.5/3.0/2.0
Databases	MS SQL SERVER 2014/2008/2005/2000
Reporting Tools	SQL Server Reporting Services (SSRS 2008/2005)
Deployment Tools	Jenkins

Experience:

Verizon, Columbus, OH

June 2019 -

Till date

Software Developer

Verizon is one of the leading companies in providing the wireless, internet and Cable services to its customers. The project was to build and maintain the Customer Portal to manage the customers, profiles, orders, billing, invoicing and discounts.

Responsibilities:

- Involved in preparing Functional Design and Technical Design Documents.
- Designed and implemented different modules based on the requirement.
- Implemented REST API to call backed web services.
- Designed various web pages using Angular Material.
- Developed the complete website using HTML5, JavaScript, Angular 6.
- Involved in developing applications from scratch using MVC 5, HTML5, JavaScript, CSS 3, jQuery 2.1.3 and Bootstrap.
- Developing the code for Enhancement Angular 6, HTML5, Bootstrap.
- Updated and re-designed several internal tools from VB.NET 2008 to VB.NET 2015 bringing current software standards which facilitated automation of mundane tasks for accounting department.
- Created and utilized Web API methods for database operations (CURD) through Entity Framework.
- Designed, developed and maintained application using C#.NET 4.5, REST Web API, LINQ.
- Configured WEB API service to use Protocol buffers and JSON serialization based on the incoming request.
- Responsible in developing Stored Procedures, Views, Indexes, Scripts for database transactions on SQL Server 2012. Involved in Troubleshooting and Debugging of the application within stipulated time.
- Writing Stored Procedures and User Defined Scalar Functions (UDFs) to be used in the SSIS packages SQL Scripts.
- Worked on unit testing and wrote unit test cases (Jasmine karma).
- Imported data from flat files to SQL Server database using SSIS Also used Azure for Scaling and checking the reliability of the applications which were developed during the project
- Use Window Azure to deploy the application on cloud and managing the session
- Enabled Server-side processing to the Data Tables to handle the millions of records. Experience in using Agile software methodology (scrum)
- Used Log Analytics service in Azure OMS to monitor cloud environment to maintain their availability and performance.
- Working on Azure for highly available customer facing B2B and B2C applications
- Worked on Git to maintaining source control and version control through the project.
- Implemented & maintained the branching and build/release strategies utilizing GIT
- Creating new Git user accounts based on employment type, and giving them read and write access on approval of concern project or team manager.
- Strong knowledge on sql databases like MySQL and Oracle.

- Worked in Agile/Scrum Environment to develop the application by meeting the timelines and interacting with team.

Environment: Visual Studio 2015/13, MSSQL server 2012, IIS 7.0, ASP.NET MVC, NET Framework 4.5, .net core ASP.NET MVVM, C# 5.0, Bootstrap, VB.NET, Web API 1.1, WCF 4.0, AWS, WSDL, SOAP, APIGEE, SSIS, SSRS, Web Forms, NUnit 2.6, Entity Framework 6.0, IIS 8.0, XML 2.0, JSON 3.0, HTML 5.0, CSS, Angular JS 1.6/2.0, JavaScript, LINQ, IIS 8.0, TFS 2015.

CapitalOne, Richmond, VA
Software Developer

Dec 2018 – May 2019

Capital One Financial Corporation is an American bank holding company specializing in credit cards, auto loans, banking, and savings accounts, headquartered in McLean, Virginia.

Responsibilities:

- Responsible and mentored the team in complete software development lifecycle (SDLC) tasks like designing, coding, testing, and documentation using Rational Unified Process (RUP) for analysis and design of application.
- Involved in developing applications in C# and .Net Framework 4.5/4.0 to meet the business requirements using Visual Studio 2015/2017.
- Developed solutions for diverse programming scenarios in C#, employing Object Oriented Programming (OOP) concepts such as: encapsulation, inheritance, polymorphism, and abstraction.
- Designed new interface screens and implemented application logic under ASP.NET MVC 5 and effectively created custom routes and added them to ASP.NET MVC routes collection.
- Worked on VB.Net, ASP.NET technologies to implement this project.
- Responsible for designing and developing the UI using Bootstrap, HTML5, CSS3, AngularJS 1.6/2.0.
- Used Entity Framework's Code First approach to create database and tables as objects along with LINQ to handle the communication with the database and to perform CRUD operations.
- Created custom directives to reuse them across the application, to create own HTML tags and induce functional behavior to those tags using Angular 2.
- Used Dependency injection for injecting various Angular services to Angular Controllers to enable AJAX calls. Also Implemented Angular 2 Services to bind the data and provide access to the data on the server.
- Implemented WEB API services for CRUD operations with HTTP verbs GET, POST, PUT and DELETE.
- Created and consumed WCF Services to expose the application functionality for different transport protocols running inside the company.
- Created Database Tables and have written SQL Queries, Stored Procedures for all the Transactions in and out of the Database using SQL server 2016.
- Implemented Unit Testing through NUnit and created test cases for all functions used in the application.
- Utilized the TFS source control software to keep track of new and past versions of code written in my application.

Environment: C#, ASP.NET MVC5, VB.NET, Visual Studio 2015/2017, SQL Server 2016, LINQ, WCF, AngularJS, Angular2, TML5, CSS3, Bootstrap, Web API, JSON, AJAX, XML, SSIS, SSRS, PowerShell, TFS

Walgreens, Chicago, Illinois
2018
.Net Developer

May 2017 - Nov

Employee Health Care System: Walgreens is one of the nation's leading healthcare organizations who created innovative systems of care that helps people in achieving and maintaining their best possible state of health. It's a web-based application mainly used by the Administrative Department of Walgreens. The application is developed to assign health care programs to employers, add new employees, view employee departments, and all other related information. Each employer is assigned to a health-care program and the User interface gives more flexibility to add new employers and assign programs.

Responsibilities:

- Developed the application Asp.Net 4.0, C#, ADO.Net, SQL Server2008, HTML5, CSS3, Visual Studio 2012, Ajax, XML, VSS, jQuery, JavaScript.

- Worked on Design, Develop and Implementation applications that support day-to-day operations.
- Interface with clients and gather business requirements and objectives.
- Designed Graphical User Interface (GUI) using Layout Pages, HTML5, jQuery, CSS classes.
- Implemented AJAX Library, CSS, and various web controls to present interface to users in a much comfortable environment.
- Defined an object-oriented business model employing UML for business process analysis using Enterprise Architect.
- Worked on Agile Methodology to meet timelines.
- Rendered dynamic content using partial views and jQuery asynchronous programming.
- Implemented AngularJS Services to bind the data and provide access to the data on the server.
- Used Team Foundation Server (TFS) for source control.
- Developed WPF screens for the portal as well as designed them.
- Designed the forms and code for the different layers using C# and ASP.NET in n-tier architecture.
- Data accessing, and modification Worked on WPF and built several controls using XAML programming, using stored procedures in SQL Server.
- Worked with REST Web API to provide services to HTTP requests
- Design security for WCF service endpoints. Designing of WCF based Service, Data, Fault and Message Contracts. Hosting the WCF based service on IIS.
- Designed the forms and code for the different layers using C# and ASP.NET in n-tier architecture.
- Created and deployed SSIS package to import data source from XML, flat files to SQL destination
- Developed Web Services and invoking them by using XML SOAP and WSDL for creating proxy classes.
- Served SSRS reports Developer and SQL Server Developer in support of Service Management System.
- Worked with SSIS packages in Data Transformation.
- Used Web Services (SOAP, WSDL) for communicating with other application and components.
- Developed a landing page and user interface using the Windows Presentation Foundation (WPF), XAML and WinForms.
- Provided production support and developed enhancements and simultaneously fixed defects.
- Involved in Generating Reports and charts & dashboards using .Net charting controls.

Environment: Asp.Net 4.0, C#, VB.NET, ADO.Net, SQL Server 2008, Visual Studio 2012, AJAX, XML, HTML5, CSS3, Angular JS, jQuery, JavaScript, WinForms, WPF, SOAP, SSRS, SSIS, WCF, TFS, Dot net charting.

Sumedha IT, Hyderabad, India
2015

June 2013 - Dec

.Net Developer

Responsibilities:

- Involved in all the stages of the Software Development Life Cycle (SDLC)
- Used VB.Net, ASP.NET technologies to implement this project.
- Created ADO.Net entity models, custom entity models, mapping the stored procedures, writing the LINQ to entity queries and written extension methods.
- Worked with UML and Rational XDE
- Extensively used JavaScript for masking, collapsing and expanding the panels etc.
- Implemented changes in coding and designs using C#.
- Worked with SSIS packages in Data Transformation.
- Wrote Stored Procedures, Views in Oracle Databases using SQL and PL/SQL
- Created User Controls for common UI components. Created Master Page for the common content area on a Web page using ASP.NET.
- Created and deployed SSIS packages to production, scheduled them to run on a routine basis and monitor mistake log for errors.
- Involved in developing SQL packages, procedures, triggers, functions and indexes to implement business logic
- Involved in development and debugging of complex SQL procedures and functions
- Developed and Implemented HTML, jQuery, and JavaScript Functions.
- Used Team Foundation Server (TFS) for source control.
- Designed dynamic SSIS Packages to transfer data crossing different platforms.
- Created and deployed SSIS packages to production, scheduled them to run on a routine basis and monitor mistake log for errors.

#

#

- Populated the interfaces with appropriate data based on the data calls, used Telerik grid controls to display the data.
- Experience in report writing using SQL Server Reporting Services (SSRS) and creating various types of reports like Tabular, Matrix, Drill Down, Drill Through and web reporting by customizing URL Access.
- Developed numerous business data flow logic in SQL Server Integration Services (SSIS)
- Created reports using RDLC (Report Definition Language Client Side).
- Used Visual Source Safe (VSS) as Source control and document management.
- Involved in writing the technical documents.

Environment: ASP.NET 4.0, VB.NET, SQL Server 2008, RDLC, LINQ, IIS, TFS, JavaScript, HTML, XML, Web Services.

#

Asiya Fatima

Sr. Full Stack Dot net Developer

Professional Summary:

- 7+ years of experience working as a Full Stack Dot net Developer using Microsoft Stack technologies like **VB.net, Asp.net, MVC, C#, SQL server**, Entity Framework, WCF, WEB API and developing interactive User interfaces using Html5, CSS3 , JavaScript , jQuery , Angular 1.6 ,Angular 2/4/5, Bootstrap , Kendo UI.
- **Strong Experience in End-to-End Software Development Life Cycle using Water fall(SDLC), Application Development Methodology (ADM) and Agile Methodologies (Scrum &Extreme Programming (XP)) as well ER Diagram, UML Modeling and Data Flow Diagram.**
- **Creating VBA (Visual Basic Application) programs** to automatically update Excel workbooks, program modules and external data queries.
- **Ensure projects are completed on time and within budget, achieving 98% success rate.**
- Generating the dashboards and reports.
- Applying various statements and functions for reshaping data.
- Preparation of sales reports (Modality wise, warehouse wise & region wise..) and compare them monthly basis.
- Experience in various domains like Health Care, **Financial/Banking**, Insurance, ecommerce and telecom hence strong domain knowledge.
- Experience writing server-less web-tasks using Node.JS for defining background workflows.
- Expert Debugging skills using chrome developer tools and Jasmine.
- Expertise using MVC 5 design pattern created Models, Views, Controllers, View Models, Partial Views, Action Filters, Validations, Data Annotation, Custom model Binder and Routing using Razor view with HTML helpers and AJAX helpers.
- Proficient in implementing concepts in C# like Delegates, Generics, Collections, Multithreading and Exception Handling.
- Expertise Object Oriented Programming (OOPS) concepts in C# Abstraction, Encapsulation, Inheritance and Polymorphism.
- Experience in using ASP.NET AJAX framework for quickly creating efficient and interactive Web applications that work across all popular browsers.
- Developed single page applications using Angular 5, web pack and grunt.
- Proficient in developing responsive mobile friendly websites quickly and effectively using HTML5, CSS3, JavaScript, Typescript and jQuery and experience in making them cross browser compatible.
- Experience writing unit test cases using Karma, Mocha and using Protractor to perform end-to-end testing on Angular JS applications.
- Used Repository Design Pattern to centralize the data logic or Web service access logic and simplify unit testing.

Technical Skills:

Microsoft Technologies	ASP.NET, ADO.NET, AJAX, LINQ, MVC, Entity Framework, NHibernate, Web Services, WCF , Web API.
Languages	C#, VB.NET, VB, ASP
Development IDE	Visual Studio 2017/2015 and earlier, Visual studio Code.
Operating System	Windows 2000/ XP/7/8.
Reporting Tools	SQL Server Reporting System (SSRS), Crystal Reports
Databases	Microsoft SQL SERVER, MS Access, Oracle 11g/10g,MONGO DB.
Scripting Language	Java Script, JQuery, Type Script.
UI	HTML5, CSS3, JavaScript, jQuery, AngularJS, Angular2/4, NodeJS, ReactJS, knock.js.
Web Application Servers	IIS 4.0/5.0/6.0/7.0
Version Control	Visual Source Safe 6.0, IBM Rational Clear Case, Team Foundation Server, Tortoise SVN, GIT .
Miscellaneous Tools	Bit bucket, Source Tree, Team City, Octopus , Jenkins , Jira , ReSharper , Rational Rose , LINQ Pad, JIRA, Confluence , Bamboo.

Professional Experience:

Client: Ryder

Location: Florida, Miami

Role: Sr. Full Stack.Net Developer

July 2019 to Current

Description: Being **Full Stack Developer utilizing SCRUM methodology (Discovery, Design, Development, Documentation and Deployment)** and a skilled computer programmer comfortable around both front-end and back-end coding languages, development frameworks and third-party libraries, work experience in Retail, Logistics or Supply Chain domain, **responsible for enhancing or rewriting existing web-applications and developing new applications.** Has been a team player with a knack for visual design and utility. As a Developer seen out a project from conception to final product. With good organization skills and attention to detail.

Responsibilities

- Design and Developed MVC layout as a part of CWDS application, Razor views with strongly typed view models, helpers and partial views using ASP.NET MVC5, CSS3 and VB.NET.
- **Creating applications using VB.NET and enhancing projects for .NET applications.**
- **Developed and tested user-friendly navigator by utilizing JavaScript and VB.NET.**
- Developed ASP.Net Web API controllers that involved in implementation of service layer

detection. It is also take care of Medicare, Medicaid, CPT code (a set of code to describe medical, surgical and diagnostic services) in accordance with HIPAA standard to provide services.

Responsibilities:

- Applying various statements and functions for reshaping data.
- Created responsive web pages using HTML5, CSS3, Bootstrap, Typescript and Angular 2.
- Implemented Responsive web design techniques into the CSS so that the page could be read well on both mobile and desktop browsers.
- Used various TPs to bypass HIPAA edits during the submission of EDI claims.
- Performed logical mapping changes for 834 and 835 transaction sets to-and-from claims and billing applications.
- Implemented Angular Router to enable navigation from one view to the next as customer completes application form steps.
- Used Typescript and its features such as static typing, classes and interfaces.
- Created Typescript reusable components and services to consume REST API's using modular based architecture provided by Angular 2.
- Developed Single Page Application (SPA) using Angular and injected generic services.
- Used Angular 2's HTTP Client to Interact with Servers/backend and modularized the Application with NgModule.
- Assisted Backend Developers in creating RESTFUL Web Services using Node JS, Express JS & Mongo DB.
- Called the Restful web service calls for POST, PUT, DELETE and GET methods.
- Used Angular as framework to create a Single Page Application (SPA) which can bind data to specific views and synchronize data with server.
- Consumed RESTful resources using AJAX call, receiving, analyzing and processing JSON responses to get the required proper-formatted data for asynchronous data transfer between the browser and the server.
- Used REST client - POSTMAN to check the response of various API calls.
- Developed CSS3 to style page layouts, navigation and icons.
- Involved in requirement analysis, preparing software Design document, development and code review.

Environment: Angular 2/4, C# ,Typescript, JavaScript, HTML5, CSS3, Bootstrap 3, JSON, AJAX, REST Web Services/APIs, Web api 2.0, Node JS, NPM, RXJS, SASS, MVVM, NoSQL, Mongo DB, Mongoose, Git, TFS, Visual Studio Code editor/ WebStorm, **Agile Scrum** , ReSharper , **GIT** ,Team City , Octopus Deploy , Bitbucket , Source Tree, VS Code, Dotnet Core , Docker , Microservices , Asp dotnet Core.

Client: SEI Investments

Location: Oaks , PA

Role: Sr Full Stack.Net Developer

May 2017-Feb 2018

Description: the business is **primarily investment management**, the application is called investor insight it is an application that manages the on boarding of new client, maintain their information, link clients and investors, manages transactions for the investors and clients, various types of

- Worked with WCF Service Contracts, Data Contracts, Operation Contracts, Instance Modes and Security of the services.
- Used Entity Framework to perform CRUD operations on the SQL Server 2012 through 2015 database.
- Involved in Shipping full stack application in Microsoft Azure and migrated parts of database to SQL Azure.

Environment: Entity framework 6, AngularJS, ASP.NET, C#, .NET Framework 4.5, HTML5, Css3, Javascript, Jquery, Web API, Microsoft Visual Studio 2015, SQL SERVER 2016 , SSIS, SSRS, NUnit , GIT , SVN, Jenkins.

Client: Google

Location: Hyderabad, India

Role: .Net Developer

Jan 2014-Nov 2016

Description: Consolidated Online Productivity tool is an Ecommerce small business portal for the company, that takes care of suppliers , manufacturers and customers data and helps to perform credit and return material authorization .CRMA requests are sent by the customers based on the location tracking the requests are processed by a special internal logic.

- **Developed new modules to an existing system using C#, VB.NET, ADO.NET, SQL SERVER 2008.**
- **Ensure projects are completed on time and within budget, achieving 98% success rate.**
- Extensively worked with Web Forms and Server (Web/HTML), Data Binding.
- Created WCF Services responsible for communicating and providing real time data from integrated server to Client Application.
- Implemented Windows Authentication in WCF to consume the Service as application is used in intranet
- Designed few WPF Forms, Custom Controls and User Controls for UI and Dynamic Web Parts for personalized content which allows Change, Edit, Move the content on pages as per users' own choice.
- Worked on Multithreading techniques for creating high performance applications.
- Used web forms using Infragistics web grid and data binding.
- Created classes in C# for implementing business layer.
- Worked extensively with data bound controls like Data Grid and Data List.
- Java Scripts are developed as a client-side scripting language.
- Used XML for data interaction and developed XSLT templates.
- Extensively used SQL Data provider to perform database operations in C#.
- Developed and deployed Web components on IIS Server.
- Strong skills in Debugging Techniques and Object-Oriented Programming Concepts.
- Developed Client Requested Reports using SSRS.
- Worked on SQL by creating database Stored Procedures.
- Modified the existing Queries, Triggers, Views and User defined functions.
- Used Subversion to version and store the source code. MVVM navigation architecture.
- MVVM child window architecture.

STATE OF WEST VIRGINIA
Purchasing Division

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

WITNESS THE FOLLOWING SIGNATURE:
