CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a

“substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

**4. CONTRACT AWARD, PERCENTAGE DISCOUNT, CATALOG:**

- 4.1 Contract Award:** This Contract is intended to provide the Agency with a discounted price on all Eligible Items. The Contract shall be awarded to the Vendor that meets the Solicitation specifications and provides the lowest Total Bid Cost for the Eligible Items listed on the Pricing Pages. Notwithstanding the foregoing, the Purchasing Division reserves the right to award this Contract to multiple Vendors if it deems such action necessary.
- 4.2 Discount Percentage:** Vendor shall quote a single Discount Percentage that will reduce the lowest price shown in the Catalog for every Eligible Item. The resulting Discounted Price shall be the price Agencies pay for purchases of that Eligible Item under this Contract.

Vendor shall not incorporate Discount Percentages into its Catalog unless the Vendor clearly shows the Catalog Price and then separately lists the applicable Discount Percentage and the Discounted Price for each Eligible Item.

The Discount Percentage and subsequent Discounted Price derived from that discount must take into account any and all fees, charges, or other miscellaneous costs that Vendor may require, including delivery charges as indicated below, because those fees, charges, or other miscellaneous costs will not be paid separately. The Agency shall only pay the appropriate Discounted Unit Price for items purchased under this Contract.

- 4.3 Pricing Pages:** Vendor should complete the Pricing Pages by filling in any blank spaces with the information requested. The information requested on the Pricing Pages for each frequently purchased Eligible Item includes the Vendor's Eligible Item manufacturer, the manufacturer's number for each Eligible Item, Catalog Prices, Units Provided for Catalog Price, Unit Prices, Discount Percentage, Discounted Unit Prices, and item total costs. The Vendor should also include the Total Bid Cost. Vendor should complete all columns as failure to complete the Pricing Pages in their entirety may result in Vendor's bid being disqualified.

The Pricing Pages contains a list of frequently purchased items and estimated unit quantity that will be purchased. The estimated unit quantity for each item represents the approximate volume of anticipated purchases only. No future use of the Contract or any individual item is guaranteed or implied.

Vendors are **strongly encouraged** to complete the Pricing Pages through wvOASIS or electronically in Microsoft Excel. Doing so will reduce the

number of, and the possibility for, calculation errors. The Pricing Pages were created as a Microsoft Excel document and Vendor can request an electronic copy for bid purposes by sending an email request to the following address: [joseph.e.hageriii@wv.gov](mailto:joseph.e.hageriii@wv.gov)

The Purchasing Division reserves the right to take Vendor's Pricing Pages and insert the appropriate numbers into the Microsoft Excel spreadsheet if Vendor chooses to complete the Pricing Pages in any other way.

4.3.1 The eligible items listed on the pricing page are for bidding example purposes only and is not intended to limit the items available for purchase. This contract will include all items related to lab and testing supplies and equipment.

**5. Catalog:**

**5.1 Submission.** Vendor must submit its Catalog prior to award of this Contract for evaluation purposes. Vendor shall also mail the Catalog free of charge to any Agency desiring to use this Contract if the Catalog is not electronically entered into wvOASIS. Vendor may be required to input its Catalog data into wvOASIS utilizing the format required by wvOASIS. Copies of the Catalog may also be requested in an electronic format. Vendor's Catalog, or data from the Catalog entered into wvOASIS will be used by Agencies to order Eligible Items under this Contract.

Vendor should identify all items listed on the Pricing Pages by circling or highlighting those items in its Catalog and earmarking, tabbing, or listing the pages for those items, to assist in the evaluation and verification of the bids and pricing. If any discrepancies exist between the Pricing Pages and the actual price listed in the Catalog, the actual price shall prevail, and the Pricing Pages may be corrected by the Purchasing Division buyer for evaluation purposes.

**5.2 Catalog Modification.** The Purchasing Division may permit Vendor to update its Catalog at each renewal date. Determination of whether or not to allow a Catalog update is at the sole discretion of the Purchasing Division. Any request by Vendor to update its Catalog must include a detailed listing of the following: (1) any Eligible Items being removed, Discounted Unit Prices for those items, Agencies quantity usage of those items, and total spent by Agencies on those items; (2) any Eligible Items being added to the Catalog and the Discounted Unit Price of those items; (3) all changes in the Discounted Unit Price to Eligible Items, estimated usage relating to items that

have changed in price, and the total impact of the price change on the State; and (4) justification for updating its Catalog. The Purchasing Division may waive the detailed listing requirement if it finds that doing so is in the best interest of the State. Unless an updated catalog is approved, the Eligible Items available under this Contract and prices for those items shall remain unchanged during the term of this Contract.

In the event that multiple vendors are awarded a contract under the Solicitation, the first priority vendor shall not be permitted to include in its updated Catalog, items being sold by a vendor that is lower in ordering priority without the consent of that lower priority vendor.

- 7.2 Late Delivery:** The Agency placing the order under this Contract must be notified in writing if orders will be delayed for any reason. Any delay in delivery that could cause harm to an Agency will be grounds for cancellation of the delayed order, and/or obtaining the items ordered from a third party.

Any Agency seeking to obtain items from a third party under this provision must first obtain approval of the Purchasing Division.

- 7.3 Delivery Payment/Risk of Loss:** Standard order delivery shall be F.O.B. destination to the Agency's location. Vendor shall include the cost of standard order delivery charges in its bid pricing/discount and is not permitted to charge the Agency separately for such delivery. The Agency will pay delivery charges on all emergency orders provided that the Vendor invoices those delivery costs as a separate charge with the original freight bill attached to the invoice.

- 7.4 Return of Unacceptable Items:** Items that Agency deems unacceptable shall be returned to Vendor at Vendor's expense and with no restocking charge. Vendor shall either make arrangements for the return within five (5) days of being notified that items are unacceptable; or permit the Agency to arrange for the return and reimburse Agency for delivery expenses. **CONSTRUCTION CONTRACTS:** Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

**ALL CONTRACTS:** Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

**EXCEPTION:** The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

[Request A Web Profile](#)

### DESCRIPTION SPECIFICATIONS

labForce High Density Polyethylene (HDPE) Wide Mouth Laboratory Bottles meet the requirements and expectations of the most exacting users. Made from virgin HDPE resin, labForce bottles are durable and break resistant eliminating the shatter risk of glass bottles. The wide mouth opening is perfect for sample collection and allows easy filling and emptying of solids, powders, and viscous liquids. Linerless Polypropylene (PP) caps provide leakproof closure for secure storage and transport of contents while reducing contamination risk associated with cap liners.

- Manufactured from USP Class VI resin that is FDA -21CFR compliant for food contact
- Free of heavy metals and RoHS compliant
- BPA and Phthalate free
- Precision molded for consistent wall thickness and smooth interior and exterior surfaces
- Leakproof closure with integrated seal ring
- Safe, break resistant alternative to glass bottles
- Linerless caps reduce contamination risks associated with liners: wrinkles, tears, wear, corrode, react, leak
- HDPE is safe for freezer storage down to -100°C
- Manufacturing Facility is ISO 13485 and ISO 9001 Certified
- Laboratory Bottle quality and performance with savings associated with "economy" bottles
- Cap and bottle designed with semi-buttress threads for better performance than round threads
- HDPE and PP are resistant to most corrosives and suitable for a wide variety of laboratory uses
- Plastic laboratory bottles are lighter than glass for improved handling and reduced shipping costs

labForce Plastic Laboratory Bottles meet the requirements of the most demanding applications. Rugged and durable, the bottles are the safe, shatterproof alternatives to glass bottles for collection, storage, or shipping of samples, media, and reagents. labForce Bottles are available in a wide range of shapes, sizes, and materials to accommodate most application needs. Small or large, wide mouth or narrow, natural or amber, or even large format with handles, the labForce line includes the most frequently used and less common bottles.

labForce bottles are precision molded from virgin resins for consistent wall thickness and smooth interior and exterior surfaces. Bottles include leakproof polypropylene caps that are engineered with an integrated seal ring for leakproof closure. Caps are linerless to reduce the contamination risk associated with liners. labForce bottles and caps employ top quality, semi-buttressed threads with straight shoulders that outperform alternative bottles with round threads. Leakproof bottles are designed and tested to withstand the highest-pressure thresholds in the industry.

Resins used in the manufacture of labForce bottles are USP Class VI certified and FDA-21CFR compliant for food contact. They are free of heavy metals, BPA, and Phthalates as well as RoHS compliant.

#### Technical Information

Standard leak testing of labForce bottles is performed with water.

NOTE: testing with other liquids may yield different results.

Leak testing and "Leak proof" designation for bottles **up to 1000mL**:

- Bottles are filled to 80% of nominal capacity, closed per minimum torque requirement
- Inverted bottles are inspected for leakage
- Inverted bottles are subjected to pressure test of 85kPa and inspected for leakage

NOTE: This test protocol applies more than 5x the pressure used by competitors to claim "Leak proof" closures.

Leak testing and "Leak proof" designation for bottles **above 1000mL**:

- Bottles are filled to 80% of nominal capacity, closed per minimum torque requirements
- Bottles are inverted and inspected for leakage
- Bottles are partially inverted with water in contact with closure for 24 hours
- Bottles are inspected for leakage

Email This Page Print Page

### DESCRIPTION SPECIFICATIONS

- 3mm, 13mm, 25mm, 50mm
- 0.10µm to 1.20µm
- Minimal sample hold-up
- High purity, non-pigmented housing and no adhesives used

Advantec MFS offers a broad selection of filter media in convenient sterile disposable syringe filters and 50mm in-line filter units. The Acrylic(AC) and Polypropylene(PP) housing materials are high purity and pigment-free. Adhesives are not used so you can be assured filtrates will not be adulterated. Each unit is marked with identifying codes denoting pore size, membrane, and housing polymer. Units are sterilized by EtO gas, except PES and Nylon are Gamma irradiated. Dismic models have female luer-lock inlet and male luer slip outlet. These units are individually blister packed. Labodisc-50 models are in-line units with 7-13.5 mm hose barb inlet and outlet connections and an inlet vent. These units are supplied individually bagged.

**Cellulose Acetate (CA)** - Very Low protein binding suitable for protein and enzyme solutions. Low aqueous extractables(0.1wt%). Nitrate-free for ground-water samples. Clarify and filter sterilize biological fluids, including buffers and tissue culture solutions.

**Mixed Cellulose Esters (MCE)** - General purpose filtration of aqueous solutions, including clarifying and filter sterilizing biological fluids, buffers, and pharma applications. Offers protein binding. Provides high flow rates.

**Nylon (NY)** - Low extractables, no wetting agents. Nylon offers broad chemical compatibility making it a good choice for HPLC sample prep. Clarify and sterilize aqueous and organic solvent solutions, including buffers and tissue culture solutions.

**Polyethersulfone (PES)** - Low protein binding, low extractables, and high throughput. Maximize recovery of proteins and critical drugs. Ideal for pharmaceutical and biological applications where sample recovery and low extractables are essential. Clarify and filter sterilize biological fluids, tissue culture media, proteinaceous and enzyme solutions.

**Polytetrafluoroethylene (PTFE)** - PTFE is inherently hydrophobic making this media ideal for air filtration and venting applications. Traps aqueous aerosols. Filter organic HPLC samples.

**Please Note:** ALL Advantec items have a maximum 48 hour cancellation window. Any cancellations AFTER the 48 hour window will incur a restocking fee equal to the cost of the product.
