West Virginia Department of Environmental Protection
Office of AML
c/o Joseph E. Hager III
Department of Administration, Purchasing Division
2019 Washington Street, East
Charleston, WV 25305

Dear Mr. Hager,

E.L. Robinson Engineering (ELR) is pleased to have the opportunity to submit our Statement of Qualifications to provide the West Virginia Department of Environmental Protection AML with design services for the 2021 Design Group B Projects.

ELR has completed plans and specifications for numerous reclamation projects for WVDEP-AML for over 20 years in addition to several projects with ODNR and Maryland AML. We have included descriptions of our project experience later in this proposal.

The ELR staff has combined experience in the design of more than 280 AML projects.

We are able to assemble multiple design teams with our current staff. The Charleston office has:

- A. Fourteen (14) registered professional engineers (civil or mining), one (1) geologist, three (3) landscape architects, six (6) engineers in training as well as several CADD technicians that may be used on these teams.
- B. ELR Corporate experience in designing one hundred thirty-two (132) abandoned mine land remediation projects. Personal experience on approximately two hundred eighty (280) AML projects. This number does not include surveying/mapping/drilling projects.

E.L. Robinson Engineering has grown from 13 employees in 1996 to nearly 200 employees today. Throughout this growth period, we have continued to meet project deadlines while providing a high quality engineering product. Our office location in Charleston is centrally and conveniently located in respect to the WVDEP offices and the referenced project areas.

We at E.L. Robinson Engineering look forward to serving your agency under this contract. If you have any questions or need clarification, please feel free to contact me at (304) 776-7473.

Sincerely,

A handwritten signature in blue ink that reads 'Eric J. Coberly'.

Eric J. Coberly, P.E.
Project Manager
E.L. Robinson Engineering

Proposal for
2021 Design Group B Projects
 West Virginia Department of Environmental
 Protection

For more than 20 years, E.L. Robinson Engineering (ELR) has been a prime and preferred engineering and surveying consultant to the WV Division of Environmental Protection, Office of Abandoned Mine Lands and Reclamation (WVDEP-AML) program. We have provided this Executive Summary to directly respond to the Expression of Interest and provide ease for the evaluators to score this proposal.

Understanding of Project Requirements

E.L. Robinson Engineering fully understands the requirements for the Design Group B Projects and is committed to giving the WVDEP Office of Abandoned Mine Lands and Reclamation the time and attention that is necessary for this project. Professional services may include: civil; structural; geological; surveying and mapping; preparation of all necessary permit applications; construction monitoring and other services that may be required.

Firm's Capacity

E.L. Robinson Engineering approaches all engineering projects with the same attention to detail and fiscal responsibility to ensure the client receives the most cost effective plan, design and operationally functional project possible. Our approach truly makes the WVDEP-AML engineering staff an integral part in the design of the project. We want to make sure that the review staff is comfortable with the design concept before the project is submitted for review. During this process, we evaluate all technical alternatives to determine the most cost effective plan and technically acceptable project for the WVDEP-AML staff.

ELR has nearly 200 professionals on staff including many individuals experienced in mine reclamation. This capacity allows for the development of innovative and alternative methods to address complex issues involved in reclamation projects of this nature. Our QA/QC process also allows for a different perspective to be brought to the project before submission to the client and for review. ELR has the capacity to take this project from conception to completion with a wide variety of experienced professionals with in-house staff for planning, design, permitting, bidding and construction monitoring.

Our company will work diligently to deliver the highest quality, cost effective solution that the WVDEP-AML deserves. We have extensive knowledge in mine reclamation and are currently working with the WVDEP-AML on similar projects. We have an excellent understanding of the requirements for this type of project and a good working relationship with NEPA permitting and regulatory agencies.

WHO WE ARE.

E.L. Robinson provides a full range of quality engineering services, from planning and analysis to design and implementation. Over the past four decades, E.L. Robinson has grown to be a highly respected firm, offering a diverse scope of services.

Founded in 1978 and named after our president, Edward L. Robinson, PE, PS, we come from humble beginnings. The company began as a small surveying firm with only four employees and has grown to a highly-diversified engineering and surveying firm with more than 200 employees.

WHERE WE ARE.

Located in ten offices throughout West Virginia, Kentucky, Ohio, Virginia, North Carolina and South Carolina, ELR is within reach.

WHAT WE'LL DO.

E.L. Robinson is familiar with the various project areas associated with the 2021 Design Group B Projects and the desired design services for which you are seeking. We understand that the individual projects that encompass this broader project include:

JD Miller RAMP Site Project

Kuhns Run Park Portals Project

Long Run #3 Project

Steadman-Erickson Maintenance

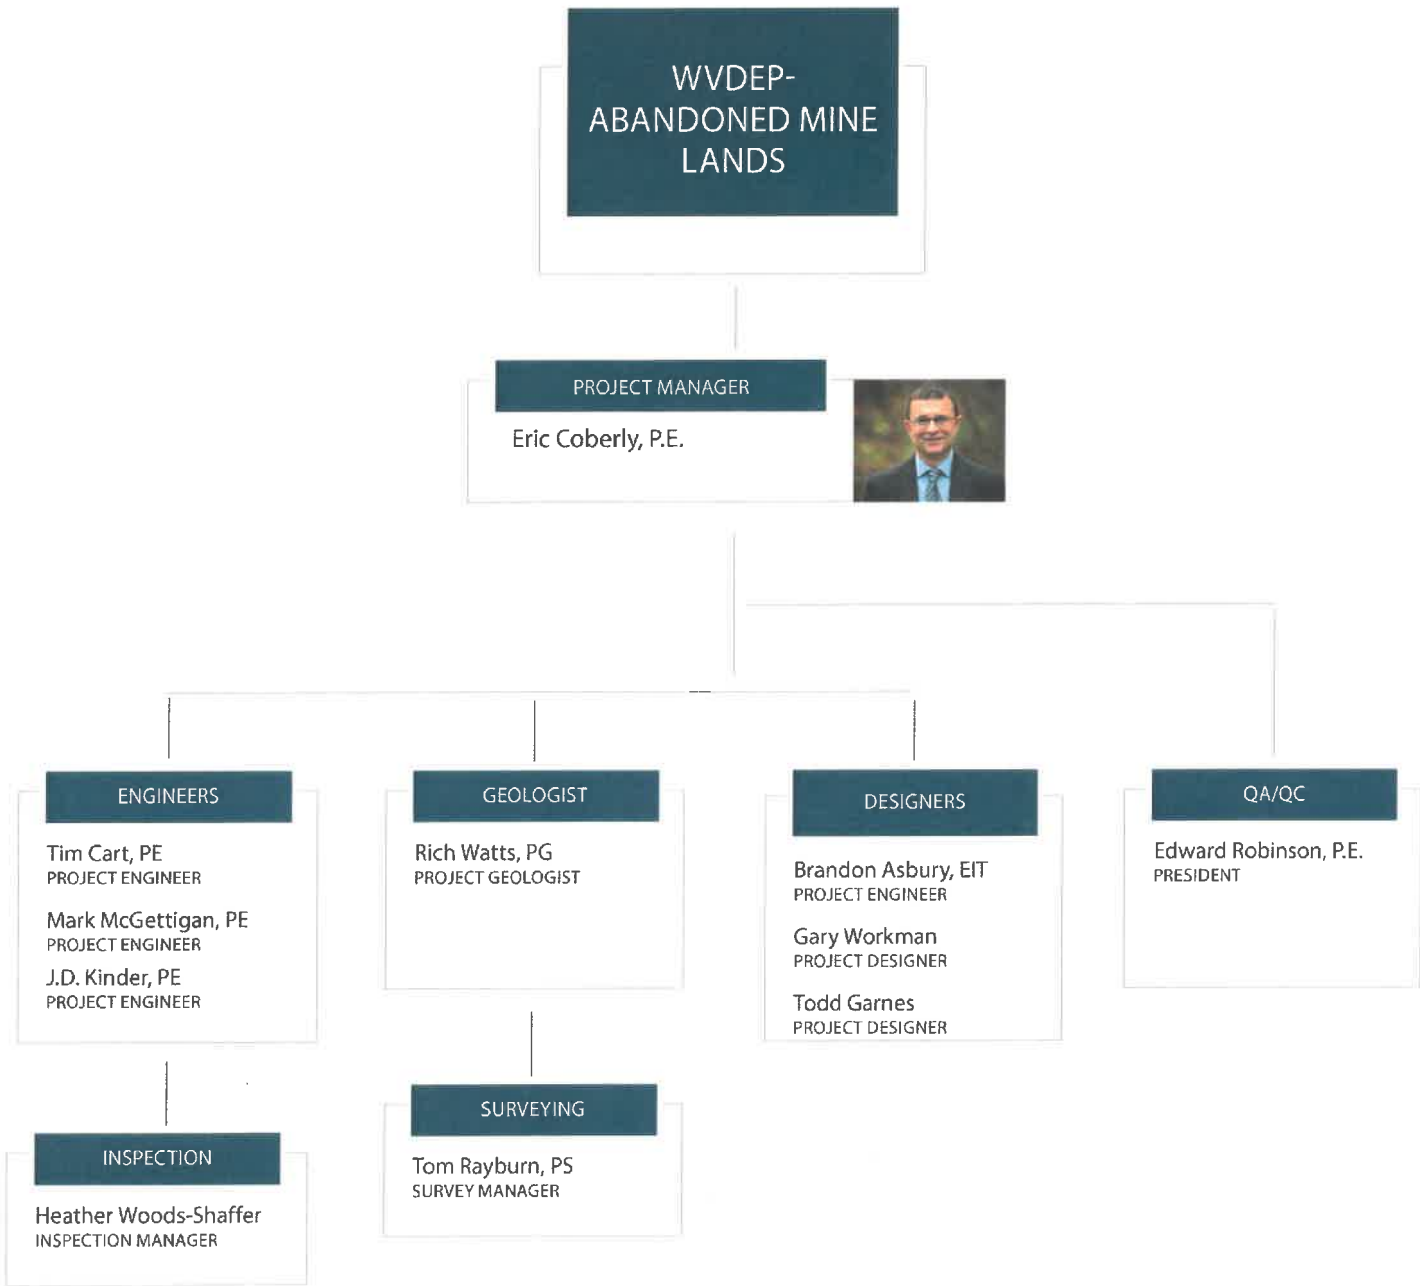

Further, ELR understands the scope of services includes the following tasks:

- Perform site and geotechnical investigations
- Design temporary and permanent access or accesses for construction and future maintenance
- Design to repair drainageway through exposed and heavily scoured refuse to convey runoff
- Design to mitigate exposed refuse
- Locate on-site borrow material to cover exposed refuse
- Design to stabilize landslides
- Design multiple portal seals and regrades
- Design to repair subsidence features
- Design of highwall reclamation
- Design to repair or replace existing drainage structures/systems
- Design to mitigate AMD drainage, including possible horizontal borings
- Design reclamation of exposed mine spoil and refuse
- Design of drainage conveyances, including drainage channels, underdrains, and/or other controls to safely convey water off-site
- Condition and revegetate all disturbed areas

We are anxious to become an extension of your staff by providing prompt planning, design and construction monitoring services as needed. We interact with the various review and permitting agencies. As you will see from our resumes, we are uniquely diversified to provide the quality engineering services for which you seek.

E.L. Robinson will work closely with the WVDEP-AML and all regulatory and permitting agencies to complete this project. We feel that our extensive knowledge and experience in the planning and design of similar projects are significant assets in developing a cost-effective solution to your reclamation project.

ORGANIZATIONAL CHART

Over the past 40 years, E.L. Robinson Engineering has focused its efforts on delivering quality projects to our clients and building strong relationships based on trust and partnership. We believe building lasting relationships with our clients is key to delivering exceptional service for many years to come.

E.L. Robinson provides WVDEP-AML with the capabilities, expertise and resources of one of the top-notch civil engineering firms in the region. Our offices are staffed with professionals experienced in AML reclamation mapping, permitting, design and construction monitoring. Further, we are very familiar with the requirements of the permitting and regulatory agencies which expedites the completion of projects.

As part of our commitment to quality, E.L. Robinson realizes that every project, client and location is very different. As a result, we look at each project independently to determine the most feasible and functional solution. Specifically, we look at ways we can maximize the project benefit and minimize the construction cost while at the same time completing projects on time and within budget. We have demonstrated abilities in developing practical and cost-effective reclamation and improvement projects and are dedicated to meeting project schedules and budgets. Such demonstrations can be seen in our prior work on our most recent reclamation projects including:

- Maryland Shallmar Landslide Emergency
- Maryland Scenic Railroad Landslide
- Red Warrior Gob & Slide
- North Matewan (Akers) Landslide
- Branchland (Blankenship) Landslide
- Coburns Creek Landslide
- Sauls Run Landslide
- Missouri Fork Landslide
- Worthington (Hess) Landslide
- Copen Road Landslide
- Dans Branch (Dillon) Landslide
- Pendleton Creek Highwall
- Maryland Barton Mine Pool
- Glen Alum Complex
- Carson One Special Reclamation Project
- Vickers Branch (Butcher) Drainage
- Sugarcamp Run Burning Refuse Phase II
- Craigmoor (Strader) Landslide Emergency
- Maryland G&S Landslide Study
- Sauls Run (Bennett) Landslide
- West Milford (Chapman) Landslide
- Roderfield (Simpson) Landslide
- Scotch Hill Mine Fire
- Mammoth (Shamblin) Landslide
- Delbarton (Curry) Landslide
- Big Creek (Surgoine) Landslide
- Crooked Run (Davis) Landslide
- Prociuous (Doughty) Landslide
- Rivesville (Parker) Landslide
- Bridgeport (Ridgeway) Landslide
- North Matewan (Ross) Landslide
- Summerlee Refuse Phase II
- Weston (Williams) Landslide
- Smithers Landslide

11. OUTSIDE KEY CONSULTANTS/SUB-CONSULTANTS ANTICIPATED TO BE USED. Attach "AML Consultant Confidential Qualification Questionnaire" for each if copy is not on file with AML.

12. A. Is your firm experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?

YES Description and Number of Projects: One hundred twenty one (132) Projects - See Attached Sheet

NO

B. Is your firm experienced in Soil Analysis?

YES Description and Number of Projects: Ten (10) Projects Listed - See attached Sheet

NO

C. Is your firm experienced in hydrology and hydraulics?

YES Description and Number of Projects: Ten (10) Projects Listed - See attached sheet

NO

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

YES Description and Number of Projects: > 200 - in Firm History - 65 Recent Projects Listed

All ELR WV & OH AML Projects since 2003 have been surveyed with ELR Surveying Staff

NO

E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)

YES Description and Number of Projects: Ninety-seven (97) Total
Twelve (12) Domestic Waterline Experience (AML Related)
Thirty-five (35) Evaluation of Aquifer Degradation
Seventy (70) Non-AML Domestic Water Lines

NO

F. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?

YES Description and Number of Projects: Seven (7) Projects

NO

| Coberly, Eric J., Project Manager | 36 | 36 | 16 |

Brief Explanation of Responsibilities
 Mr. Coberly has performed AML Grant and Emergency project designs since 1984. Projects have included highwall backfill, refuse regarding, portals, mine drainage, subsidence, refuse and mine fire abatement. Mr. Coberly has participated in the design of over 100 such project while working for WVDEP or at ELR. Included in that total is over 30 emergency project designs completed in Ohio and West Virginia. Mr. Coberly has served in various capacities with the WV AML Program including construction and design administrator as well as the Chief of the Office. This involved the review of hundreds of additional projects in the 22 years spent with AML program.

| Cart, Timothy, Project Engineer | 36 | 37 | 24 |

Brief Explanation of Responsibilities
 Mr. Cart has completed numerous mine reclamation projects under the AML program, including regrading of coal refuse materials, re-establishment of vegetation cover, disposal of acid producing materials, and developing methods for extinguishing burning materials and disposal of old mining structures. Designed passive AMD treatment systems. Conducted Phase I and Phase II Studies to determine if groundwater had been affected by pre-law mining. Mr. Cart has extensive experience in the design and construction management of waterline extension projects. Mr. Cart has recently completed water projects in Mingo; Kanawha; Putnam; and Cabell counties. Mr. Cart has performed geotechnical engineering calculations and designs for settlement analysis of dams and other embankments.

19. Use this space to provide any additional information or description of resources supporting your firm's qualifications to perform work for the West Virginia Abandoned Mine Lands Program.
E. L. Robinson Engineering Co. is committed to the WVDEP/AML program to provide professional design, surveying and mapping and construction monitoring services in a timely and cost-efficient manner. Our business plan relies heavily on the work offered by the WVDEP/AML program.

20. The foregoing is a statement of facts.

Signature: Eric J. Coberly Title: PROJECT MANAGER
 Printed Name: Eric J. Coberly, P.E.

Date:
September 15, 2021

Maryland Shallmar Landslide Emergency

Project Location: Garrett County, Maryland
Completion Date: September 2018
Client: Maryland Department of the Environment
Project Description: Landslide Abatement Design

Maryland Scenic Railroad Landslide

Project Location: Frostburg, Maryland
Completion Date: August 2016
Client: Maryland Department of the Environment
Project Description: Landslide Abatement Design

Red Warrior Gob & Slide

Project Location: Kanawha County, West Virginia
Completion Date: June 2015
Client: WVDEP-AML, Charleston, WV
Project Description: Performed surveying, drilling and design for a potential blowout area. Designed horizontal bore for dewatering.

North Matewan (Akers) Landslide

Project Location: Mingo County, West Virginia
Completion Date: June 2013
Client: WVDEP-AML, Charleston, WV
Project Description: Performed surveying, drilling and emergency design for stabilizing landslide.

Branchland (Blankenship) Landslide

Project Location: Lincoln County, West Virginia

Completion Date: May 2014

Client: WVDEP-AML, Charleston, WV

Project Description: Performed surveying, drilling and emergency design for stabilizing landslide.

Coburns Creek Landslide

Project Location: Preston County, West Virginia

Completion Date: May 2014

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and emergency design for stabilizing landslide.

Sauls Run Landslide

Project Location: Lewis County, West Virginia

Completion Date: May 2015

Client: WVDEP-AML, Charleston, WV

Project Description: Performed surveying and emergency design for stabilizing landslide.

Missouri Fork Landslide

Project Location: Boone County, West Virginia

Completion Date: May 2015

Client: WVDEP-AML, Charleston, WV

Project Description: Performed surveying and emergency design for stabilizing landslide.

Worthington (Hess) Landslide

Project Location: Marion County, West Virginia

Completion Date: May 2015

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and emergency design for mine blowout and landslide abatement.

Open Road Landslide

Project Location: Braxton County, West Virginia

Completion Date: July 2015

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and emergency design for stabilizing landslide.

Dans Branch (Dillon) Landslide

Project Location: Kanawha County, West Virginia

Completion Date: June 2015

Client: WVDEP-AML, Charleston, WV

Project Description: Performed surveying, drilling and design for a potential blowout area. Designed horizontal bore for dewatering.

Pendleton Creek Highwall

Project Location: Tucker County, West Virginia

Completion Date: September, 2018

Client: WVDEP-AML

Project Description: Highwall Backfill

Maryland Barton Mine Pool

Project Location: Allegany County, Maryland

Completion Date: June 2018

Client: Maryland Department of the Environment

Project Description: Mine Pool Evaluation and Design

Glen Alum Complex

Project Location: Mingo County, West Virginia

Completion Date: September 2014

Client: WVDEP-AML, Charleston, WV

Project Description: Performed surveying and design for large refuse area and upgrading of surface drainage.

Carson One Special Reclamation Project

Project Location: Upshur County, West Virginia

Completion Date: June 2015

Client: WVDEP-Special Reclamation, Philippi, WV

Project Description: Performed surveying, drilling and design for regrading refuse, sealing mine shafts and slopes and upgrading drainage structures.

Vickers Branch (Butcher) Drainage

Project Location: Logan County, West Virginia

Completion Date: 2013

Client: WVDEP-AML, Charleston, WV

Project Description: Performed survey, drilling, design for mine seals and mine drainage control.

Sugarcamp Run Burning Refuse Phase II

Project Location: Nicholas County, West Virginia

Completion Date: 2013

Client: WVDEP-AML, Oak Hill, WV

Project Description: Performed site survey, drilling and prepared burning refuse abatement design.

Craigmoor (Strader) Landslide Emergency

Project Location: Harrison County, West Virginia

Completion Date: 2017

Client: WVDEP-AML

Project Description: Landslide abatement design

Maryland G&S Landslide Study

Project Location: Kitzmiller, Maryland

Completion Date: 2019

Client: Maryland AML

Project Description: Landslide causation study

Sauls Run (Bennett) Landslide

Project Location: Lewis County, West Virginia

Completion Date: 2017

Client: WVDEP-AML

Project Description: Landslide abatement design

West Milford (Chapman) Landslide

Project Location: Harrison County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Landslide abatement design

Roderfield (Simpson) Landslide

Project Location: McDowell County, West Virginia
Completion Date: 2017
Client: WVDEP-AML
Project Description: Landslide abatement design

Scotch Hill Mine Fire

Project Location: Preston County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Mine fire abatement design

Mammoth (Shamblin) Landslide

Project Location: Kanawha County, West Virginia
Completion Date: 2017
Client: WVDEP-AML
Project Description: Landslide abatement design

Delbarton (Curry) Landslide

Project Location: Mingo County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Landslide abatement design

Big Creek (Surgoine) Landslide

Project Location: Logan County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Landslide abatement design

Crooked Run (Davis) Landslide

Project Location: Harrison County, West Virginia
Completion Date: 2017
Client: WVDEP-AML
Project Description: Landslide abatement design

Procious (Doughty) Landslide

Project Location: Clay County, West Virginia
Completion Date: 2017
Client: WVDEP-AML
Project Description: Landslide abatement design

Rivesville (Parker) Landslide

Project Location: Marion County, West Virginia
Completion Date: 2018
Client: WVDEP-AML
Project Description: Landslide abatement design

Bridgeport (Ridgeway) Landslide

Project Location: Harrison County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Landslide abatement design

North Matewan (Ross) Landslide

Project Location: Mingo County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Landslide abatement design

Summerlee Refuse Phase II

Project Location: Fayette County, West Virginia
Completion Date: 2019
Client: WVDEP-AML
Project Description: Refuse and drainage design

Weston (Williams) Landslide

Project Location: Lewis County, West Virginia
Completion Date: Current
Client: WVDEP-AML
Project Description: Landslide abatement design

Smithers Landslide

Project Location: Fayette County, West Virginia
Completion Date: Current
Client: WVDEP-AML
Project Description: Landslide abatement design

Abney Refuse Pile

Project Location: Raleigh County, West Virginia
Completion Date: 2011-2013
Client: WVDEP-AML, Oak Hill, WV
Project Description: Field surveying and mapping, subsurface investigation, design work for refuse regrading, mine seals, and drainage.

Cartright Branch Refuse Pile

Project Location: Logan County, West Virginia
Completion Date: 2011-2012
Client: WVDEP-AML, Charleston, WV
Project Description: Performed survey, drilling, design for refuse regrading and mine drainage control.

Milam Ridge

Project Location: Wyoming County, West Virginia

Completion Date: December 2012

Client: WVDEP-AML, Charleston, WV

Project Description: Performed surveying, drilling and design for numerous mine portals.

Squires Creek (Moats) Portal and Refuse

Project Location: Preston County, West Virginia

Completion Date: December 2014

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and design of refuse area and portals.

Preston Energy/Rockville/Viking Coal Special Reclamation

Project Location: Preston County, West Virginia

Completion Date: October 2015

Client: WVDEP-Special Reclamation, Philippi, WV

Project Description: Performed surveying and design for design of reclamation of portals and piping system to convey mine water to treatment plant.

McGraws Vertical Opening

Project Location: Wyoming County, West Virginia

Completion Date: July 2013

Client: WVDEP-AML, Charleston, WV

Project Description: Performed emergency design for mine shaft cap.

New Cumberland Mine Blowout

Project Location: Hancock County, West Virginia

Completion Date: June 2013

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and design for mine blowout abatement.

Fairview Mine Shaft

Project Location: Marion County, West Virginia

Completion Date: October 2013

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed emergency design for mine shaft cap.

Whitehall Mine Fire

Project Location: Marion County, West Virginia

Completion Date: October 2013

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and design for extinguishment of mine fire.

Lynch Run Mine Blowout

Project Location: Gilmer County, West Virginia

Completion Date: May 2015

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed surveying, drilling and emergency design for mine blowout and landslide abatement.

Marsh Run Portals

Project Location: Braxton County, West Virginia

Completion Date: 2013

Client: WVDEP-AML, Charleston, WV

Project Description: Performed survey, drilling and design for mine seals and regrading.

Donnie Thorn Highwall

Project Location: Preston County, West Virginia

Completion Date: 2013

Client: WVDEP-AML, Bridgeport, WV

Project Description: Field surveying and mapping, subsurface investigation, design work for refuse regrading, mine seals, and drainage.

Glen Rogers Emergency

Project Location: Wyoming County, West Virginia

Completion Date: 2012

Client: WVDEP-AML, Charleston, WV

Project Description: Performed survey, drilling, and design for shaft seals.

Morgan #46 Highwall

Project Location: Preston County, West Virginia

Completion Date: 2013

Client: WVDEP-AML, Bridgeport, WV

Project Description: Performed survey and design for refuse and spoil regrading and drainage control.

Thorpe Refuse Pile

Project Location: McDowell County, West Virginia

Completion Date: 2011-2012

Client: WVDEP-AML, Oak Hill, WV

Project Description: Performed survey, drilling, design for refuse and spoil regrading and mine drainage control.

Shinnston Lumberport Subsidence

Project Location: Harrison County, West Virginia

Completion Date: 2010-2012

Client: WVDEP-AML, Philippi, WV

Project Description: Performed site survey, drilling and prepared subsidence abatement design.

Newtown (Kinder) Portals Design

Project Location: Mingo County, West Virginia

Completion Date: 2010-2012

Client: WVDEP-AML, Charleston, WV

Project Description: Performed site survey, and prepared design for portals reclamation and drainage abatement design.

Gordon "C" Refuse Pile

Project Location: Boone County, West Virginia

Completion Date: 2010-2012

Client: WVDEP-AML, Oak Hill, WV

Project Description: Field surveying and mapping, subsurface investigation, design work for mine seals, drainage, and refuse reclamation.

Keaton Branch Complex

Project Location: Raleigh County, West Virginia

Completion Date: 2010-2011

Client: WVDEP-AML, Oak Hill, WV

Project Description: Performed survey, drilling, design for refuse, regrading and mine drainage control.

Dunloup Creek Complex

Project Location: Raleigh County, West Virginia

Completion Date: 2009-2011

Client: WVDEP-AML, Oak Hill, WV

Project Description: Performed survey, drilling, design for refuse and spoil regrading and mine drainage control.

Brownton (McCord) Landslide

Project Location: Barbour County, West Virginia

Completion Date: 2009-2011

Client: WVDEP-AML, Philippi, WV

Project Description: Performed site survey, drilling and prepared landslide abatement design.

Keystone (Avery) Landslide Portal

Project Location: McDowell County, West Virginia

Completion Date: 2009-2011

Client: WVDEP-AML, Charleston, WV

Project Description: Performed site survey and prepared landslide abatement design, portals reclamation, and drainage control.

Dan's Branch (Pennington) Landslide Emergency

Project Location: Mingo County, West Virginia

Completion Date: 2011

Client: WVDEP-AML, Charleston, WV

Project Description: Field surveying and mapping, subsurface investigation, design work for landslide reclamation.

East Bank (Willis) Mine Blowout

Project Location: Kanawha County, West Virginia

Completion Date: 2009

Client: WVDEP-AML, Charleston, WV

Project Description: Field surveying and mapping, design work for mine seal and drainage control.

Island Creek #18 Mine Complex

Project Location: Logan County, West Virginia

Completion Date: 2009-2011

Client: WVDEP-AML, Oak Hill, WV

Project Description: Field surveying and mapping, subsurface investigation, design work for mine seals, drainage, and refuse reclamation.

Jacob's Fork Complex

Project Location: Boone County, West Virginia

Completion Date: 2008-2009

Client: WVDEP-AML, Charleston, WV

Project Description: Field surveying and mapping, subsurface investigation, design work for mine seals, drainage, and reclamation.

Gilmer B Site 3.8

Project Location: Gilmer County, West Virginia

Completion Date: 2008

Client: WVDEP-AML, Charleston, WV

Project Description: Performed survey, drilling, design for refuse and spoil regarding and mine drainage control.

Rhodell Refuse & Portals

Project Location: Wyoming County, West Virginia

Completion Date: 2008

Client: WVDEP-AML, Charleston, WV

Project Description: Performed survey, drilling, design for refuse and spoil regarding and mine drainage control.

Gouge Landslide Emergency

Project Location: Scotttown, Ohio

Completion Date: 2007

Client: ODNR-AML, Columbus, OH

Project Description: Performed site survey, drilling and prepared landslide abatement design.

Rodgers Subsidence Emergency

Project Location: Logan County, West Virginia

Completion Date: 2011-2012

Client: WVDEP-AML, Charleston, WV

Project Description: Performed survey, drilling, design for refuse regrading and mine drainage control.

McAdams Subsidence Emergency

Project Location: Stark County, Ohio

Completion Date: 2006

Client: ODNR-AML, Columbus, OH

Project Description: Performed investigation and prepared report of findings.

Athens Rt. 13 Refuse Fire Emergency

Project Location: Athens County, Ohio

Completion Date: 2006

Client: ODNR-AML, Columbus, OH

Project Description: Performed site survey, prepared abatement design and monitored on site construction for fire extinguishment.

Brown Landslide Emergency

Project Location: Rayland, OH

Completion Date: 2007

Client: ODNR-AML, Columbus, OH

Project Description: Performed site survey and prepared landslide abatement design.

Toney Fork Landslide Emergency

Project Location: Boone County, West Virginia

Completion Date: 2006

Client: WVDEP-AML, Charleston, WV

Project Description: Performed site survey, drilling and prepared plans and specifications to stabilize an emergency landslide area.

Lavender Refuse Fire Emergency

Project Location: Meigs County, Ohio
Completion Date: 2005
Client: ODNR-AML, Columbus, OH
Project Description: Performed abatement plan and monitored construction.

Goetz Subsidence Emergency

Project Location: Columbiana County, Ohio
Completion Date: 2005
Client: ODNR-AML, Columbus, OH
Project Description: Performed investigation and prepared report of findings.

Cox Refuse Fire Emergency

Project Location: Gallia County, Ohio
Completion Date: 2005
Client: ODNR-AML, Columbus, OH
Project Description: Performed abatement design for fire extinguishment.

North Matewan (Sipple Drainage)

Project Location: Mingo County, West Virginia
Completion Date: 2005
Client: WVDEP-AML
Project Description: Performed surveying, drilling and design for drainage project abatement.

Phalen Landslide Emergency

Project Location: Martins Ferry, Ohio

Completion Date: 2005

Client: ODNR-AML, Columbus, OH

Project Description: Performed site surveying and landslide abatement design.

Adkins Landslide Emergency

Project Location: Gallia County, Ohio

Completion Date: 2005

Client: ODNR-AML, Columbus, OH

Project Description: Performed surveying, drilling, landslide abatement and construction monitoring.

Baisden Subsidence Emergency

Project Location: Jackson County, Ohio

Completion Date: 2005

Client: ODNR-AML, Columbus, OH

Project Description: Performed drilling to develop subsidence abatement solutions.

Treadway Landslide Emergency

Project Location: Rayland, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Performed site surveying, drilling and landslide abatement design.

Big Creek "C" Refuse

Project Location: Logan County, West Virginia

Completion Date: 2004

Client: WVDEP-AML

Project Description: Performed surveying and drilling for design.

Imboden Landslide Emergency

Project Location: Rutland, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Performed drilling and surveying to develop landslide abatement solutions and cost estimates.

Parsons Landslide Emergency

Project Location: New Philadelphia, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Performed site review and report concerning landslides relation to mining and potential solutions.

Jefferson County Road 26 Landslide Emergency

Project Location: Weinterville, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Performed surveying, drilling and prepared plans and specifications to stabilize and emergency landslide area.

Charleston Romeo Landslide

Project Location: Kanawha County, West Virginia

Completion Date: 2004

Client: WVDEP-AML

Project Description: Performed surveying, drilling and design of landslide abatement.

Titus Road Landslide Emergency

Project Location: Rutland, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Performed surveying, drilling and prepared plans and specifications to stabilize and emergency landslide area.

Lewis Landslide Emergency

Project Location: Pomeroy, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Performed surveying, drilling, prepared plans and specifications to stabilize an emergency landslide area, and provided construction monitoring.

Roush Landslide Emergency

Project Location: Pomeroy, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Prepared plans and specifications to stabilize an emergency landslide area.

Moran Subsidence

Project Location: Clinton, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Prepared plans and specifications to stabilize an emergency subsidence area.

Ron Bobar Subsidence

Project Location: Flushing, Ohio

Completion Date: 2004

Client: ODNR-AML, Columbus, OH

Project Description: Investigation and report of an emergency subsidence area.

Gooney Otter Refuse

Project Location: Wyoming County, West Virginia

Completion Date: 2004

Client: WVDEP-AML

Project Description: Performed surveying, drilling and site design for refuse regarding project.

Chapmanville (Gorby) Mine Blowout

Project Location: Logan County, West Virginia

Completion Date: 2003

Client: WVDEP-AML

Project Description: Performed surveying, drilling and design of landslide regrading and retaining wall design.

Tuppers Creek (Layne) Landslide

Project Location: Kanawha County, West Virginia

Completion Date: 2003

Client: WVDEP-AML

Project Description: Performed surveying, drilling and design of landslide abatement.

Maidsville (Tennant) Landslide

Project Location: Monongalia County, West Virginia

Completion Date: 2003

Client: WVDEP-AML

Project Description: Performed surveying, drilling and design of landslide abatement.

Whittington Hill (Walker Landslide)

Project Location: Kanawha County, West Virginia

Completion Date: 2002

Client: WVDEP-AML

Project Description: Performed surveying, drilling and design for an emergency landslide.

Minden Refuse Pile Reclamation Project

Project Location: Fayette County, West Virginia

Completion Date: 2001

Client: WVDEP-AML

Project Description: Performed surveying and design for emergency project to upgrade drainage control.

Jeffrey Mine Complex Reclamation Project

Project Location: Boone County, West Virginia

Completion Date: 2001

Client: WVDEP-AML

Project Description: Performed surveying and design regrading refuse.

Hot Coal Reclamation Project

Project Location: Raleigh County, West Virginia

Completion Date: 2000

Client: WVDEP-AML

Project Description: Performed surveying and design for regrading refuse.

Bull Run #27

Project Location: Preston County, West Virginia

Completion Date: 2000

Client: WVDEP-AML

Project Description: Performed surveying and design for regrading refuse.

Rich Fork (Thaxton) Landslide

Project Location: Kanawha County, West Virginia

Completion Date: 2003

Client: WVDEP-AML

Project Description: Performed surveying, drilling and design of landslide abatement.

Riffe Branch Impoundment

Project Location: Fayette County, West Virginia

Completion Date: 2000

Client: WVDEP-AML

Project Description: Performed surveying and design for regrading refuse and drainage control.

Ven's Run Landslide

Project Location: Harrison County, West Virginia

Completion Date: 1999

Client: WVDEP-AML

Project Description: Performed surveying and design for regraded landslide area.

Bull Run #35

Project Location: Preston County, West Virginia

Completion Date: 1999

Client: WVDEP-AML

Project Description: Performed surveying and design for refuse and spoil regrading.

Securro Mine Drainage Site 1 & 2

Project Location: Fairmont, West Virginia

Completion Date: 1998

Client: WVDEP-AML

Project Description: Performed surveying and design for mine drainage system.

Geotechnical/Soil Analysis

Performed geotechnical analysis on 135 projects over the past 20 years. These project involved slope stability, mine pool locations and mine subsidence.

US 35 Design Build: Utilized provided core boring data, coordinated drilling of over 100 additional core borings to design 7.5 miles of 4 lane highway in Putnam County, West Virginia. This included the foundation designs of bridge piers and abutments for 2 bridges carrying the 4 lane roadway over a major stream and an existing roadway.

WVDOT-District 2 Mingo County: Solicited core borings, provided field personnel to log core samples, designed 4 pile retaining walls for landslides effecting existing roadways. Including analyzing piling, lagging and other aspects of each wall. Developed plans with profile, traffic control, estimated quantities, drainage controls, etc. in a bid package suitable for WVDOT to solicit bids.

WVDOT-District 2 Logan County: Solicited core borings, provided field personnel to log core samples, designed 5 pile retaining walls for landslides effecting existing roadways. Including analyzing piling, lagging and other aspects of each wall. Developed plans with profile, traffic control, estimated quantities, drainage controls, etc. in a bid package suitable for WVDOT to solicit bids.

WVDOT-District 2 Lincoln County: Solicited core borings, provided field personnel to log core samples, designed 14 pile retaining walls for landslides effecting existing roadways. Including analyzing piling, lagging and other aspects of each wall. Developed plans with profile, traffic control, estimated quantities, drainage controls, etc. in a bid package suitable for WVDOT to solicit bids.

WVDOT Cottageville Bridge: Solicited bids from drilling contractors, coordinated drilling for a bridge replacement in Jackson and Mason County, West Virginia. The geotechnical testing performed consisted of five hydrometer analysis and rock core compression testing. The design included pile foundations for the piers and abutments, sonar analysis of the creek channel as it relates to the soil materials and slope stability analysis for each abutment.

WVDEP-AML Dans Branch: Performed geotechnical investigation of an AML emergency landslide. Performed core borings and geotechnical testing of soil samples obtained from the borings. Designed pile retaining wall to support embankment and existing home below pre-law mining.

Dempsey Bottom Beam Spam: The subsurface investigation consisted of 6 test borings, all of which encountered bedrock. Four of the core borings were located at the site of the two proposed abutments, while the other two were drilled at the site of the proposed retaining wall. Hollow stem augers were utilized to drill the holes through the overburden. The Standard Penetration Test method utilizing split-spoon sampler was also used to sample the overburden soils.

Guyandotte River Bridge: ELR performed geotechnical design including future mine subsidence remediation for this bridge. During the design process a check of the mining records determined the presence of a coal seam in the vicinity of the bridge. After review of the mine maps and additional drilling, presence of mine voids was confirmed. Using the depths from the ground surface to the mine level a limit of grout protection was developed. The grouting program developed included some down hole camera work and confirmation borings to confirm the grout effectiveness. Grouting of the mine void eliminated the possibility of future mine subsidence in the vicinity of the substructure and allowed the bridge to be supported on conventional caissons.

Hydraulics/Hydrology

E.L. Robinson has worked with various clients, both private firms and public entities, in developing hydrology and hydraulics studies to determine effects that developments would have on floodplains and how they might adversely affect the surrounding communities.

Aerial Photography/Mapping

E.L. Robinson Engineering has worked with various clients to develop contour mapping of sites and areas that otherwise could not be determined. With the use of aerial photography and state of the art technology, ELR has developed maps from photographs for numerous projects including but not limited to:

- City of Beckley
- City of Charleston
- Corridor D
- Corridor H
- Cross Lanes Connector
- Eldora
- Frazier's Bottom
- Glenwood
- Hatfield Cemetery
- I-70 Washington Avenue (Wheeling, WV)
- I-64 Glade Creek
- Jackson Mill
- King Coal
- KY 40 Connector
- Logan Run
- New River Parkway
- Ohio River Crossing
- Pinegrove
- Parkersburg
- Powell Creek
- Prince
- PSI-Baker/Ft. Henry Bridges
- Racetrack
- White Sulphur Springs

Aerial Photography/Mapping

E.L. Robinson Engineering has completed the preliminary mapping for the WVDEP for all of the AML projects located in Northern West Virginia since 2012. In addition, ELR has completed either preliminary or final mapping for the following:

2003-Present

ERIC COBERLY, P.E.

Project Manager

Education

M.S. Engineering of Mines,
West Virginia University,
1990

B.S. Engineering of Mines,
West Virginia University,
1983

Registrations

Registered Professional
Engineer in West Virginia,
Ohio, and Maryland

Professional Experience

Mr. Coberly has more than 37 years of experience as an infrastructure and mining engineer. He has extensive experience in project planning, funding coordination and design. Mr. Coberly has managed projects with ELR which have involved site development, infrastructure planning, water, sewer, geotechnical analysis, abandoned mine reclamation projects, building construction, active surface mining projects, insurance investigations, providing expert witness services and various post mining land use projects.

Additionally, Mr. Coberly served as the Chief for the West Virginia Department of Environmental Protection Abandoned Mine Lands Division for more than 4 years. In this position he was responsible for managing and directing all operations. He has spent his career working to better the State of West Virginia in both the private and public sectors.

Representative Projects

Mr. Coberly has served as Project Manager on hundreds of infrastructure, geotechnical, site development and mining projects. The following is a sample listing of Mr. Coberly's AML projects:

- Squires Creek (Moats) Portal and Refuse
- Red Warrior Gob & Slide
- Glen Alum Complex
- West Columbia B
- Milam Ridge Refuse Pile
- Carson One Special Reclamation Project
- Preston Energy/Rockville/Viking Coal Rec
- North Matewan (Akers) Landslide
- Branchland (Blankenship) Landslide
- Coburns Creek Landslide
- McGraws Vertical Opening
- New Cumberland Mine Blowout
- Fairview Mine Shaft
- Whitehall Mine Fire
- Sauls Run Landslide
- Missouri Fork Landslide
- Worthington (Hess) Landslide
- Copen Road Landslide
- Lynch Run Mine Blowout
- Dans Branch (Dillon) Landslide
- Marsh Run Portals
- Donnie Thorn Highwall
- Vickers Branch (Butcher) Drainage

EDWARD ROBINSON, P.E., P.S.

President

Education

M.S. Civil Engineering,
University of West Virginia
Graduate Studies, 1981

B.S. Civil Engineering,
West Virginia Institute of
Technology, 1969

Registrations

Registered Professional
Engineer in West Virginia,
Ohio, Kentucky, Virginia and
North Carolina

Registered Professional
Surveyor in West Virginia

Professional Experience

In 1978, Mr. Robinson founded E.L. Robinson Engineering with only four employees. Under his leadership, ELR has grown exponentially to what it is today – a highly diversified engineering and surveying firm with 170 full time, experienced professionals and support personnel. ELR, which was a small surveying firm at its inception, now offers a complete range of services, including construction management, transportation engineering, utilities engineering, geotechnical engineering, surveying and technology, land planning and landscape architecture, bridge and structural engineering, and site development.

Mr. Robinson is committed to quality engineering services and complete customer service. He recognizes the importance of every client he has interacted with and every staff member he has invested in. From holding sole ownership, Mr. Robinson converted ELR to an employee owned company through the Employee Stock Ownership Plan (ESOP).

Professional Memberships

National Society of Professional Engineers

American Society of Civil Engineers

Offices Held

Current Chairman of WVUIT Advisory Board

President of West Virginia Council of Consulting Engineers

Chairman Transportation Committee - WV Association of Consulting Engineers

State Director of West Virginia Society of Professional Engineers

President of West Virginia Society of Professional Engineers

Assistant Treasurer of the American Society of Civil Engineers

National Director of the ASCE representing WV, NC, SC and VA

President of West Virginia Section of ASCE

Honors Awarded

Alumnus of the Year – West Virginia University Institute of Technology, 1992

Engineer of the Year – West Virginia Society of Professional Engineers, 1997

Engineer of the Year – American Society of Civil Engineers, 1998

National Entrepreneur of the Year Finalist – Ernst & Young, 2001

Engineering Entrepreneur of the Year – Ernst & Young, 2001

Honorary PhD, Doctor of Science – West Virginia Institute of Technology 2002

West Virginia Section - ASHE - Man of the Year - 2010

TIM CART, P.E.

Project Engineer

Education

B.S. Civil Engineering, West Virginia University, 1981

Registrations

Registered Professional Engineer in West Virginia

Registered Professional Surveyor in West Virginia

Professional Experience

Mr. Cart has more than 39 years of experience in providing consulting engineering services. Clients served have included industrial, public and private institutions along with state and federal agencies. He has served as Project Engineer on numerous geotechnical investigations including highways, bridges, industrial sites, buildings and site development projects.

Mr. Cart has served as project manager, project engineer and lead geotechnical investigator on numerous geotechnical projects including highways, bridges, industrial sites, buildings and various developments.

Mr. Cart has designed numerous retaining structures and grading plans to reduce the likelihood of future landslide movement. He has also designed retaining walls including reinforced concrete cantilever walls, mechanically stabilized earth (MSE) walls, sheet pile walls, H-pile and lagging walls. Several of these designs included the use of rock anchors and tiebacks.

Geotechnical reports for highway projects included recommendations for rock cut slopes and fill slopes, as well as types of foundation systems for structures and recommended bearing capacities for deep and shallow foundations. Mr. Cart has made design recommendation for fill construction which focused on fill settlement and recommended methods to accelerate consolidation settlements so that the settlement would occur during the construction activities.

Mr. Cart has served as project engineer on several hundred AML projects for the WVDEP and USOSMRE. These projects include regrading major refuse piles into stable configurations, draining mine portals, stabilization of areas affected by mine subsidence, evaluation of areas for possible effects on structures due to mine subsidence, and the developing of plans and specifications to address landslides which have resulted from mining related activities.

Mr. Cart has also designed numerous bank stabilization projects for river banks throughout the state. These projects incorporated re-grading, rip-rap materials, cantilever and tieback wall designs. He has also performed numerous damage investigations for landslide and blast damage claims for insurance and law firms and has provided testimony in depositions and law suits.

MARK MCGETTIGAN, P.E.

Project Engineer

Education

M.S. Engineering
Management/Environmental
Engineering, Marshall
University, 2007

B.S. Civil Engineering
Technology, Fairmont State
College, 1999

Registrations

Registered Professional
Engineer in West Virginia

Professional Experience

Mr. McGettigan has more than 23 years of experience in providing consulting engineering services. He has worked on numerous land development and commercial building construction projects where his duties included procuring all necessary permits to designing potable water, sanitary sewer and storm sewer connections to development lots and commercial properties.

Mr. McGettigan has also served as project manager for numerous water and wastewater projects throughout West Virginia. He has secured funding, designed, obtained permitting and managed the construction for numerous water and sanitary sewer projects totaling well over \$60,000,000. Further, he has successfully worked on or managed numerous Phase I and Phase II ground water quality investigations and feasibility studies and reclamation projects for the West Virginia Department of Environmental Protection Abandoned Mine Lands program.

RICHARD WATTS, P.G.

Project Geologist

Education

M.S. Geography, Marshall University, 1994

B.S. Geology, Marshall University, 1977

Registrations

Registered Professional Geologist in Virginia and Kentucky

Professional Experience

Mr. Watts has 42 years of experience in providing consulting services as a senior geologist. He has also served as project manager on numerous projects.

Mr. Watts is primarily an engineering geologist whose range of project experience has encompassed numerous projects concerning geologic investigation, rock and soils engineering, landslides, abandoned mine land reclamation, forensic damage investigations, hydrogeology and the coal industry.

Mr. Watts' AML experience includes over 100 projects spanning more than 33 years. He has served as both Project Manager and Designer for these projects. Further, he is proficient in field reconnaissance and drilling.

He has performed hundreds of slope stability analyses for landslides and other projects involving the design of stable slopes. In addition, he has performed several studies involving landslide prediction to aid clients in land use and safety planning. Projects involving rock slope stability have included high rock cuts for surface mining operations and highways.

His geotechnical experience has included numerous projects involving soils, foundations, landfills and damage studies. These projects have encompassed such areas as pile driving, caisson installation, earth fill placement, subsurface exploration, site reconnaissance, grout and concrete placement and quality control.

Representative Projects

BRANDON ASBURY, E.I.

Project Designer

Education
B.S. Civil Engineering,
West Virginia Institute of
Technology, 2017

Professional Experience

Brandon is a Project Engineer with 3 years of experience in design and permitting for several site development projects in West Virginia. Mr. Asbury has manufactured information pertaining to design and calculated information used for hydrology, site grading and permitting (including NPDES). He has experience in sizing drainage structures such as drainage ditches, ponds, sediment basins, sediment traps, standpipes and outlet pipes. Mr. Asbury has implemented these calculations and information into the permitting phase of the project. He has also assisted in calculating quantities, and construction cost estimates in several projects ranging between 2-200 acre sites.

Representative Projects

- Raleigh County Memorial Airport Industrial Park Site Preparation Project

GARY WORKMAN

Project Designer

Education

Drafting CADD Certificate
Carver Career and Technical
Center, 1986

Professional Experience

Mr. Workman has more than 31 years of experience as an Auto CAD designer with an emphasis on infrastructure and mine reclamation projects. He has experience specifically in the design of several abandoned mine land reclamation projects. These projects include large refuse pile grading, design of drainage structures, retaining wall design, permitting (including NPDES, USACOE, Highway Department), and construction cost estimates. Additionally, Mr. Workman has assisted in the completion of waterline feasibility studies in various areas. Mr. Workman has worked on waterline extensions and sewer collection systems that have provided service to many residential and industrial customers.

TOM RAYBURN, P.S.

Manager of Surveying

Education

A.S. Mechanical Engineering,
West Virginia Institute of
Technology, 1970

Registrations

Registered Professional
Surveyor in West Virginia,
Kentucky, North Carolina

Professional Experience

Mr. Rayburn currently serves as Manager of Surveying for E.L. Robinson Engineering and has more than 30 years of design surveying and construction surveying experience. His responsibilities include management of surveying and control for various design projects, including highways, buildings, and bridges. In addition, Mr. Rayburn manages and performs work consisting of courthouse research for property ownership resolution for the above mentioned project types. This includes preparation of property resolution maps, deed descriptions for property acquisitions required for project plan preparation. Mr. Rayburn has experience in Geodetic Control Surveys, 3D Laser Scanning, Photogrammetric Control, Topographic Surveys, Cemetery Surveys, Boundary Surveys, Construction Stakeout, Subdivision Surveys, along with Hydrographic surveys of river and lake bottoms. A few of the more notable surveying projects performed by ELR under the supervision of Mr. Rayburn, have been the Blennerhassett Bridge Project, 11 continuous miles of Corridor H design surveys, GPS Control for the West Virginia Statewide Mapping and Addressing PSD Project, 3D Laser Scan and mapping of the CAMC Parking Garage partial collapse, and 3D Laser Scanning of I64/I77 Retaining Wall for Monitoring.

Representative Projects

HEATHER WOODS-SHAFFER

Construction Inspection Manager

Certifications

West Virginia Division of Highways Portland Cement Concrete Technician

West Virginia Division of Highways Portland Cement Concrete Inspector

West Virginia Division of Highways Aggregate Sampling Inspector

West Virginia Division of Highways Compaction Inspector

WV Transportation Engineering Technician Certification Level III

OSHA 10-hour Occupational Safety & Health Training Course

OSHA 30-hour Occupational Safety & Health Training Course in Construction

First Aid/CPR - Adult/AED/ Blood Borne Pathogens Training

Safe Gulf/Safe Land USA

Professional Experience

Mrs. Woods-Shaffer has 27 years experience in all phases of construction projects. Mrs. Woods-Shaffer has managed numerous WV highway and bridge projects throughout the state and has extensive knowledge in all aspects of the construction process. For nearly 15 years, she has worked as E.L. Robinson's Construction Inspection Manager/Safety Officer. As the Construction Inspection Manager her duties include the management of all construction inspection operations; estimation, preparation and securing of construction inspection and material testing projects throughout the State of West Virginia; assignment of personnel, preparation of invoices for reimbursement, coordination and communication between field inspectors, designers, contractors and clients; approval of sub contractor and vendor invoices, material and cost tracking; and ensuring that ELR has a core group of inspectors capable of handling all future assignments.

Further, Mrs. Woods-Shaffer serves as ELR's Safety Officer. Her duties include the evaluation and monitoring of safety protocols and guidelines associated with ELR's day to day construction/oil and gas operations; orientation and education of new construction hires regarding ELR's safety policies along with planning and facilitating required annual occupational health and safety training programs for all employees; selecting, ordering and training employees on the appropriate PPE use and care; and conducting accident and incident investigations, along with reporting accident statistics, running OSHA audits and providing corrective action recommendations.

All offers subject to all terms and conditions contained in this solicitation

ADDITIONAL INFORMATION

The Acquisitions and Contract Administration Section of the Purchasing Division ("Purchasing Division") is soliciting Expression(s) of Interest ("EOI" or "Bids") for the West Virginia Department of Environmental Protection, Division of Land Restoration, Office of Abandoned Mine Lands and Reclamation (WVDEP-DLR-AML) ("Agency"), from qualified firms to provide architectural/engineering services ("Vendors") as defined herein.

The mission or purpose of the Group of Projects (as listed below 1 through 4) for which bids are being solicited is to provide the subsequent design services for each; including but not limited to (as may be applicable to each project):

- 1)JD Miller RAMP Site project
- 2)Kuhns Run Park Portals project
- 3)Long Run #3 project
- 4)Steadman-Erickson Maintenance

- .Perform Site and Geotechnical Investigations
- .Design temporary and permanent access or accesses for construction and future maintenance.
- .Design to repair drainageway through exposed and heavily scoured refuse to convey runoff.
- .Design to mitigate exposed refuse.
- .Locate onsite borrow material to cover exposed refuse.
- .Design to stabilize landslides.
- .Design multiple portal seals and regrades.
- .Design to repair subsidence features.
- .Design of highwall reclamation.
- .Design to repair or replace existing drainage structures/systems.
- .Design to mitigate AMD drainage, including possible horizontal borings.
- .Design reclamation of exposed mine spoil and refuse.
- .Design

ABANDONED MINE LANDS (AML) CONTRACTOR INFORMATION FORM

You must complete this form for your AML contracting officer to request an eligibility evaluation from the Office of Surface Mining Reclamation and Enforcement (OSMRE) to determine if you are eligible to receive an AML contract. This requirement applies to contractors and their sub-contractors and can be found under OSMRE's regulations at 30 CFR 874.16. **NOTE:** This form must be signed and **dated within 30 days** of submission to be considered for a current bid.

Part A: General Information

Business Name: E.L. Robinson Engineering
Tax ID #: 55-0594633
Address: 5088 Washington Street, West
City, State, & Zip: Charleston, WV 25313
Phone Number: 304-776-7473
Email Address: ecoberly@elrobinson.com

Part B: Obtain an Organizational Family Tree (OFT) from the Applicant Violator System (AVS)

If you plan to certify the existing AVS information or submit updates under Part C, you must include an OFT. To obtain an OFT, you may contact the AVS Office at 800-643-9748 or from the AVS website at: <https://avss.osmre.gov/>. Instructions for how to download an OFT from the AVS can be found at: <https://www.osmre.gov/programs/AVS/aml-instructions.pdf>.

Part C: Certifying and updating information in the AVS

Select only one of the following options, follow the instructions for that option, and sign and date below.

I, Eric J. Coberly, have express authority to certify that:
(Print Name)

1. Our business is in the AVS and is accurate, complete, and up-to-date. If you select this option, you must attach an Entity OFT from the AVS to this form. Do not complete Part D.
2. Our business is in the AVS but needs to be updated. If you select this option you must attach an Entity OFT from the AVS to this form. Use Part D to provide the missing or corrected information.
3. Our business is not in the AVS and needs to be added. Complete Part D.

Part D: OFT Information

Contractor's Business Name: _____

If the current Entity OFT information for your business is incomplete in the AVS, or if there is no information in the AVS for your business, you must provide all of the following information as it applies to your business. Please include additional copies of this page if the space below is not sufficient to capture all information.

- Every officer (President, Vice President, Secretary, Treasurer, etc.);
- All Directors, Partners, and Members;
- All persons performing a function similar to a Director;
- Every person or business that owns 10% or more of the voting stock in your business;
- Any other person(s) who has the ability to determine the manner in which the AML reclamation project is being conducted.
- **Please list an end date for any person no longer with your business.**

PAPERWORK REDUCTION STATEMENT

The Paperwork Reduction Act of 1995 (44 U.S.C 3501) requires us to inform you that: Federal Agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. This information is necessary for all successful bidders prior to the distribution of AML funds, and is required to obtain a benefit.

Public reporting burden for this form is estimated to range from 15 minutes to one hour, with an average of 30 minutes per response, including time for reviewing instructions, gather and maintaining data, and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement, 1849 C Street, NW, Room 4559, Washington, DC 20240.

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

Disclosure of Interested Parties to Contracts

Pursuant to *W. Va. Code* § 6D-1-2, a state agency may not enter into a contract, or a series of related contracts, that has/have an actual or estimated value of \$1 million or more until the business entity submits to the contracting state agency a Disclosure of Interested Parties to the applicable contract. In addition, the business entity awarded a contract is obligated to submit a supplemental Disclosure of Interested Parties reflecting any new or differing interested parties to the contract within 30 days following the completion or termination of the applicable contract.

For purposes of complying with these requirements, the following definitions apply:

"Business entity" means any entity recognized by law through which business is conducted, including a sole proprietorship, partnership or corporation, but does not include publicly traded companies listed on a national or international stock exchange.

"Interested party" or "Interested parties" means:

- (1) A business entity performing work or service pursuant to, or in furtherance of, the applicable contract, including specifically sub-contractors;
- (2) the person(s) who have an ownership interest equal to or greater than 25% in the business entity performing work or service pursuant to, or in furtherance of, the applicable contract. (This subdivision does not apply to a publicly traded company); and
- (3) the person or business entity, if any, that served as a compensated broker or intermediary to actively facilitate the applicable contract or negotiated the terms of the applicable contract with the state agency. (This subdivision does not apply to persons or business entities performing legal services related to the negotiation or drafting of the applicable contract.)

"State agency" means a board, commission, office, department or other agency in the executive, judicial or legislative branch of state government, including publicly funded institutions of higher education: Provided, that for purposes of *W. Va. Code* § 6D-1-2, the West Virginia Investment Management Board shall not be deemed a state agency nor subject to the requirements of that provision.

The contracting business entity must complete this form and submit it to the contracting state agency prior to contract award and to complete another form within 30 days of contract completion or termination.

This form was created by the State of West Virginia Ethics Commission, 210 Brooks Street, Suite 300, Charleston, WV 25301-1804. Telephone: (304)558-0664; fax: (304)558-2169; e-mail: ethics@wv.gov; website: www.ethics.wv.gov.

NOTE: This addendum acknowledgment should be submitted with the bid to expedite document processing.

Revised 6/8/2012

SOLICITATION NUMBER: CEOI 0313 DEP2200000003

Addendum Number: No.01

The purpose of this addendum is to modify the solicitation identified as (“Solicitation”) to reflect the change(s) identified and described below.

Applicable Addendum Category:

- | Modify bid opening date and time
- | Modify specifications of product or service being sought
- | Attachment of vendor questions and responses
- | Attachment of pre-bid sign-in sheet
- | Correction of error
- | Other

Description of Modification to Solicitation:

Addendum issued to publish and distribute the attached documentation to the vendor community.

1. Addendum #1 issued to correct bid receiving location. Bid Receiving location for the submission of paper bid is:

Bid Clerk
Department of Administration Purchasing Division
2019 Washington Street E
Charleston, WV 25305

Additional Documentation: Documentation related to this Addendum (if any) has been included herewith as Attachment A and is specifically incorporated herein by reference.

Terms and Conditions:

1. All provisions of the Solicitation and other addenda not modified herein shall remain in full force and effect.
2. Vendor should acknowledge receipt of all addenda issued for this Solicitation by completing an Addendum Acknowledgment, a copy of which is included herewith. Failure to acknowledge addenda may result in bid disqualification. The addendum acknowledgement should be submitted with the bid to expedite document processing.

Questions from Vendors for CEOI DEP22*03 2021 Design Group B

Q.1 Will mapping be provided, or will it need to be generated?

A. Mapping will be provided for all projects, but some additional check and spot location surveying will be required.

Q.2. Will the WVDEP handle the Right of Access and Construction Access for these projects?

A. WVDEP will be responsible for obtaining Exploratory and Construction Rights of Entry Agreements (EROE and CROE) from property owners, although coordination with public right-of-way (such as WVDOH or City R/W's) will need handled.

Q.3. For the projects that require collection and routing of AMD drainage is treatment of that drainage needed also?

A. The only treatment that will be required for these projects will be when dewatering mine portals during construction of wet mine seal installations. The collection and routing of AMD drainage is referring to the common AML underdrains, wet mine seals, manhole and piping systems, channels, culverts, etc. No active or passive AMD treatment systems or facilities will be required.

Q.4. Where the replacement of existing AMD drainage systems are requested, are there any descriptions of the existing drainage/treatment systems?

A. There are no active or passive treatment systems planned for these projects. Replacement of existing AMD drainage systems are referring the common AML systems as stated and listed in the response to Question 3 above.

Q.5. Will there be any additional water quality monitoring required?

A. No.

Q.6. Are there any discharge limit requirements?

A. Not as far as for the existing to final AMD discharges water chemistry if concerned, as typically those in general are minimal change from existing to final reclaimed conditions. The only limitations will be for construction stormwater NPDES, Corps of Engineers or other

regulatory standards (such as active treatment with soda ash briquettes, or other similar method, during dewatering of mine portals during construction until reaching base flows).

Q.7. For the google earth maps is there a legend to help better understand the marked features?

A. The google maps provided are for general information only and use standard AML acronyms for AML features, although they may not include everything that will need addressed for the projects. The provided scope of work listed, and other information provided generally describes the types of design work for the remediations necessary, although that may not be all inclusive. Detailed scopes of work will be established for each project during the Negotiations phase as defined in the solicitation.

Although not explicitly necessary, the following is a list of some of the acronyms AML uses, that may be shown on the maps:

- a) CS - clogged stream
- b) H or HW - highwall
- c) VO - vertical opening
- d) DI - dangerous impoundment
- e) DS - dangerous slide
- f) WA - water problem (including AMD, etc.)
