A request form to help facilitate the request can be found at: <http://www.state.wv.us/admin/purchase/vrc/Venpref.pdf>.

**18. ELECTRONIC FILE ACCESS RESTRICTIONS:** Vendor must ensure that its submission in wvOASIS can be accessed and viewed by the Purchasing Division staff immediately upon bid opening. The Purchasing Division will consider any file that cannot be immediately accessed and viewed at the time of the bid opening (such as, encrypted files, password protected files, or incompatible files) to be blank or incomplete as context requires, and are therefore unacceptable. A vendor will not be permitted to unencrypt files, remove password protections, or resubmit documents after bid opening to make a file viewable if those documents are required with the bid. **DO NOT SUBMIT MATERIAL YOU CONSIDER TO BE CONFIDENTIAL, A TRADE SECRET, OR OTHERWISE NOT SUBJECT TO PUBLIC DISCLOSURE.**

Submission of any bid, proposal, or other document to the Purchasing Division constitutes your explicit consent to the subsequent public disclosure of the bid, proposal, or document. The Purchasing Division will disclose any document labeled “confidential,” “proprietary,” “trade secret,” “private,” or labeled with any other claim against public disclosure of the documents, to include any “trade secrets” as defined by West Virginia Code § 47-22-1 et seq. All submissions are subject to public disclosure without notice.

**22. INTERESTED PARTY DISCLOSURE:** West Virginia Code § 6D-1-2 requires that the vendor submit to the Purchasing Division a disclosure of interested parties to the contract for all contracts with an actual or estimated value of at least \$1 million. That disclosure must occur on the form prescribed and approved by the WV Ethics Commission prior to contract award.

A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

**23. WITH THE BID REQUIREMENTS:** In instances where these specifications require documentation or other information with the bid, and a vendor fails to provide it with the bid, the Director of the Purchasing Division reserves the right to request those items after bid opening and prior to contract award pursuant to the authority to waive minor irregularities in bids or specifications under W. **41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS:** Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.
- c. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:

1. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
2. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

**42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL:** In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a "substantial labor surplus area", as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

**43. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE:** W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$1 million, the vendor must submit to the Agency a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-award interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

**EXHIBIT B – PROJECT PLANS**

**12. GENERAL REQUIREMENTS:**

**12.1. Mandatory Contract Item Requirements:** Contract Item must meet or exceed the mandatory requirements listed below.

**12.1.1. Execution: Surface Preparation**

**Clean Existing Surface:** Clean pavement surface immediately prior to placing the prime coat or seal coat by sweeping so that the area is free of dust, dirt, grease, vegetation, oil, or any type of objectionable surface film.

**12.1.2. Oil Spot Priming:** Remove oil or grease that has not penetrated the asphalt pavement by scraping or by scrubbing with a detergent, then wash thoroughly with clean water. After cleaning, treat these areas with the oil spot primer.

**12.1.3. Pavement Priming:** highly oxidized pavements sometimes have trouble allowing pavement sealer to adhere. To ensure adhesion to sound but oxidized pavements, mix and apply a prime coat of a type and at a rate recommended by the coal tar emulsion manufacturer, after all loose aggregate is removed.

**12.2.1. Mixing and Application of Refined Coal Tar Emulsion Slurry**

Blend the coal tar emulsion mixture in the equipment described herein. The mixing must produce a smooth homogeneous mixture of uniform consistency. (Consult coal tar emulsion supplier for its recommended order of addition of the ingredients.) During the entire mixing and application process, no breaking, segregating, or hardening of the emulsion, nor balling or lumping of the sand is to be permitted. Continue to agitate the seal coating mixture in the mixing tank at all times prior to and during application so that a consistent mix is available for application.

**REQUEST FOR QUOTATION

Small additional increments of water may be needed to provide a workable consistency, but in no case is the water content to exceed the specified amount.

**12.2.2 Sealant Application Equipment**

Use application equipment that can apply the required coating rates evenly over the entire width of the application mechanism to provide a uniformly coated surface. To insure this, equip all spray units with a pumping distribution system using positive displacement pumps. Equip all squeegee/brush units with squeegees/brushes that are properly adjusted and, in a condition, so that the application of oil-based seal coat materials is without streaks.

The mixing part of the application equipment must be tank type with a mechanically powered, full sweep mixer capable of homogeneously mixing the entire contents of the tank.

Use of hand squeegee or brush application is to be restricted to places not accessible to the mechanized equipment or to accommodate neat trim work at curbs, etc. Material that is applied by hand is to meet the same standards as that applied by machine.

**12.2.3 Precautions**

Sealer will not be applied unless pavement temperature is at least 50°F (10°C) and the air temperature is 50°F (10°C) and rising.

Sealer will not be applied during rainy or wet weather, or when rain is anticipated within eight hours after application is completed.

Sealer will not be applied to hot surfaces under the summer sun (over 90°F, ambient without first cooling the surface with clean water. Water will dampen the surface without leaving puddles.

Since an emulsion may be damaged by freezing, it will be always protected when the temperature drops below 40°F (4°C).

**12.2.4 Application Rate**

Application rates are not to exceed 0.17 gal/yd.2/coat, and at no time are total coats to exceed 0.51 gal/yd.2 for the asphalt sealant.

**12.2.5 Drying and Initial Cure**

The final coat must be allowed to dry a minimum of eight hours of good daylight drying conditions before opening to traffic, and initially cure enough to drive over without damage to the seal coat.

If marginal weather conditions exist during this eight-hour drying time, additional time will be required. In some cases, this could exceed 24 hours. Vendor and Miner's Health and Safety Training will check the surface after this for suitability before opening it to vehicle traffic.

**12.2.6 Striping**

Use compatible traffic striping paint recommended by the coal tar emulsion manufacturer and concrete sealant manufacturer. Apply marking paint in dry weather when pavement and atmospheric temperatures are 50°F or above (or manufacturer's specification).

The color of the striping patterns will be selected by the West Virginia Conference and Training Center prior to award of the bid. Paint colors will be determined for parking and handicap spaces.

**12.2.7 Striping Equipment**

A Commercial compressed air spray striping machine capable of applying an even coating at the manufacturer's recommended thickness in an even width across stripe. Commercial airless spray striping machine capable of applying an even coating at the manufacturer's recommended thickness in an even width across the stripe.

**12.2.7.1** Provide qualified technician to supervise equipment and application of marking. Layout markings using guidelines, templates and forms. Stencils and templates shall be professionally made to industry standards. "Free hand" painting of arrows, symbols, or wording shall not be allowed.

**12.2.7.2** Thoroughly clean surfaces free of dirt, sand, gravel, oil and other foreign matter.

**12.2.7.3** Protect adjacent curbs, walks, fences, and other items from receiving paint.

**12.2.7.4** Vendor will verify that any new pavement coating has been accepted by the West Virginia Conference and Training Center and has cured a minimum of twenty-four (24) hours under good drying conditions.

**12.2.8 Application**

- a. Apply marking paint at a rate of one (1) gallon per three to four hundred (300 – 400) lineal feet of four (4) inch wide stripes, or to manufacturer's specification.
- b. Apply stripes straight and even in accordance with existing stripes.
- c. Apply stripes and other markings in widths and colors requested by the Miner's Health and Safety Training.

**12.2.9 Protection**

Barricade marked areas during installation and until the marking paint is dried and ready for traffic.
