*RE: West Virginia Department of Environmental Protection - CEOI 0313 DEP2200000020
AML Contract 2 Project South*

Dear Mr. Hager and Selection Committee Members:

The Thrasher Group, Inc. is pleased to present our qualifications to the West Virginia Department of Environmental Protection for the AML Contract 2 Project South consisting of the following projects:

- | | |
|-------------------------------------|---|
| » MacArthur Subsidence Phase III | » Summerlee Water Treatment |
| » Beckley Soccer Complex Subsidence | » Crown Hill Refuse, Slide and Drainage |
| » Price Hill Complex Pond Cleaning | » Morris Creek Water Treatment |

Thrasher was founded in West Virginia nearly 40 years ago; because of this, Thrasher understands the geographical and geological conditions associated with abandoned mine sites in southern West Virginia. In addition, Thrasher has a longstanding reputation for successfully completing Abandoned Mine Land (AML) projects, from emergency repairs, Abandoned Mine Lands, Economic Revitalization projects, traditional grant projects, and everything in between.

This assembled Thrasher team has been involved in numerous AML projects with successfully completing design, NEPA documentation, survey and mapping, construction inspection, and other services. Our demonstrated experience showcases our ability to efficiently identify project goals, establish accurate budgets, and develop successful outcomes for each of the projects at hand.

Additionally, with our offices in Beckley, Charleston, and Scott Depot, we will have dedicated team members readily available and easily accessible when the need arises to be on-site in an instant. Our proximity to the project sites allows us to perform consistent monitoring of the projects going on in the area.

We appreciate the opportunity to partner with you on these projects and look forward to helping you achieve your project goals.

Sincerely,
The Thrasher Group, Inc.

Zachary Wright, MBA
Senior Project Manager

FIRM HISTORY

With a commitment to building business through “successful projects and repeat clientele”, H. Wood Thrasher, PE and the late Henry A. Thrasher, PE - formed Thrasher Engineering, Incorporated in Clarksburg, West Virginia in 1983. Since that time, the company, now known as The Thrasher Group, Inc. has grown into one of the Mid-Atlantic Region’s largest full-service privately owned architectural and engineering firm.

Publicly funded projects have been the backbone of the company, and continue to be a large part of our engineering division. Thrasher has grown from its original three employees to a current staff of over 300 and continues to prosper. Instilled in each employee is a commitment to maintaining the highest standards of professional service.

The Thrasher Group is a full-service firm providing architecture, engineering, and field services such as environmental, survey, materials testing, and construction management. Our team has the experience, knowledge, versatility, and integrity to get the job done. With a 39-year history of driving infrastructure development for public and private clients, we have a reputation of keeping our word and completing projects on time and on budget. Thrasher is one of the fastest-growing A/E firms in the Mid-Atlantic region with eight offices located in the Appalachian Basin.

Diverse services that grow communities.

THRASHER'S GOT IT.

AML DESIGN

The Thrasher Group has provided design services to a number of Abandoned Mine Lands projects over the years. We are leaders in the industry, having completed projects for emergency repairs, using AML grants, and as part of the AML Pilot Program.

Our team has been a part of all types of AML work, including, but not limited to:

- » Highwalls
- » Portals
- » Slope Stabilization
- » Landslides
- » AMD Treatment
- » Refuse and Dump Improvements
- » Drainage Control
- » Burning Refuse Remediation

Drainage Design: All AML projects completed by Thrasher have required design of drainage structures. These have included vegetated, grouted, and riprap channels, as well as culverts and storm sewers. Drainage calculations are completed to properly size all conveyances.

Permitting: the permitting process can delay projects if they are not submitted correctly or in a timely manner. Thrasher takes pride in our ability to quickly obtain permits for our clients. We are able to utilize our excellent relationship with the WVDEP for NPDES permits as well as our relationship with the West Virginia Division of Highways for entrance and drainage permits. We are also experienced in obtaining Army Corp of Engineers permits from both the Pittsburgh and Huntington District Offices for stream bank restoration, wetland mitigation, and construction, linear transportation, and utility line projects, temporary construction access, and dewatering.

ENVIRONMENTAL SERVICES

In today's ever-changing regulatory landscape, compliance with federal and state environmental laws is critical to the success of projects. Compliance can often seem at odds with the project vision and financial constraints. The Thrasher team partners as a technical and regulatory advocate to overcome obstacles and guide our clients through complicated policies to achieve their goals. From initial investigations to final design, our environmental experts are there to assist in all facets of our clients' projects. Our team has developed relationships with academic consultants from multiple universities that are here to aid in specialized assessments.

Thrasher offers a range of environmental services, from abandoned mine land reclamation to stream and wetland delineations and everything in between. We have extensive experience with site assessments, permitting, and every aspect of environmental work that your project will encompass.

In addition, our team has a host of experience with Abandoned Mine Land (AML) projects and are familiar with the intricacies involved

Environmental Services:

- > All Appropriate Inquiry (AAI)
- > Environmental Site Assessments
- > NEPA Compliance for Publicly Funded Projects
- > Ecological Studies
- > Brownfield Redevelopment
- > Industrial Hygiene and Demolition Planning
- > Underground Storage Tank (UST) Consulting Services
- > Wetland Delineation, Design, and Mitigation
- > Remediation Investigation, Feasibility Studies, and Design
- > Hydrogeologic and Geologic Investigations
- > Groundwater Monitoring
- > Sampling and Laboratory Analysis
- > Solid and Hazardous Waste Management
- > SPCC, GPP, SWPPP, GWPP, SWPPP Environmental Compliance
- > Coal Combustion Residuals Rule Compliance (CCR)
- > Stream Assessments, Design, and Mitigation
- > Erosion and Sediment Control Plans
- > Voluntary Remediation Program
- > Uniform Environmental
- > Covenants Act
- > CERCLA Preliminary Assessment
- > CERCLA Site Investigation

ENVIRONMENTAL PERMITTING

The Environmental Division of the Thrasher Group provides permitting, consulting, and assessment services to a multitude of clients spanning the Mid-Atlantic region. With a combined 40 years of permitting experience, Thrasher's Environmental Scientists, Permitting Leads, and Project Managers are able to take even the most complex and time restrictive projects and provide clients with cost effective and timely solutions.

Federal Permitting

- > National Historic Preservation Act - Section 106 Consultation
 - > *State Historic Preservation Office or Division of Culture and History*
- > Endangered Species Act - Section 7 and Section 9 Consultations
 - > *United States Fish and Wildlife Service*
- > Clean Water Act - Section 404 Permits
 - > *United States Army Corps of Engineers*

- > National Environmental Policy Act - Categorical Exclusions, Environmental Assessments, and Short Environmental Assessment Forms
 - > *United States Army Corps of Engineers; Federal Aviation Administration; Division of Transportation; and Federal Communications Commission*

State and Local Permitting

- > State Responsible Regulations of the Clean Water Act - Section 401 and 402 Permits
- > State Level Rare, Threatened, or Endangered Species Consultations
- > State Level Aquatic Resource Encroachment and Impact Permits
- > State Level Roadway Encroachment, Crossing, and Occupancy Permits
- > State Level Industrial Waste Discharge Permits
- > Local Level Floodplain or Building Permits

SURVEY AND MAPPING SERVICES

Thrasher employs one of the largest survey departments in the Mid-Atlantic region and offers a wide range of land surveying and related services for federal, state, and private clients. We are committed to evolving our techniques and equipment to best serve our clients and their growing needs.

At Thrasher, we are able to provide both surveying and engineering services which provide a distinct advantage over survey-only companies. The combination of these two services provide our surveyors with a better understanding of what engineers and architects require to develop an appropriate design for different types of projects. Our field and survey personnel offer extensive experience, certified training, and flexibility to meet our clients' unique project schedules.

Route Location Surveys:

- > Transmission Lines
- > Natural Gas Pipelines
- > Wind Turbine
- > Roadway, Railway, and Rec Trails

GPS Surveys:

- > Geodetic Control Networks
- > Ground Control for Aerial Mapping
- > Telecommunications
- > FAA 1A and 2C Letters

General Survey Services:

- > Large-Scale Boundary Work
- > Topographic Survey and Mapping
- > ALTA/ACSM Survey and Mapping
- > Lake and River Soundings
- > Accident Reconstruction Survey & Mapping
- > Drug-free Zone Mapping
- > Expert Witness Testimony
- > Construction Layout
- > Permanent Project GPS Base Stations
- > Building Control and Layout
- > Road/Bridge Alignment and Staking
- > Sewer/Water/Pipeline
- > Site Layout
- > Quality Assurance Surveying
- > Volume/Quantity Surveys
- > As-Built Surveys

Coal and Energy Surveys:

- > Pre and Post Mining Blast Surveys
- > Water Quality Monitoring Plan
- > Construction Layout
- > Emergency Control Survey/Plans

AERIAL MAPPING AND LIDAR

The Thrasher Group has been providing the Mid-Atlantic region with top-of-the-line aerial mapping services for years. Thrasher's staff includes an ASPRS Certified Photogrammetrist who has the capability to offer high detail, low-altitude imagery upon request.

We have strategic locations all across the Mid-Atlantic region, but we can map ANYWHERE. No project is too large, too small, or too far away. If you need it mapped, Thrasher can map it.

Aerial Mapping and LiDAR Services:

- > LiDAR
- > Orthophotography
- > Aerial Mapping
- > Surface Modeling
- > Pipeline and Powerline Monitoring
- > Drone/UAV Services
- > Stockpile Volumes
- > Infrared Imaging
- > Thermal Imaging
- > Remote Aerial Inspection
- > Airborne GPS
- > Aero-Triangulation
- > 3D Fly-throughs
- > Low Altitude Video
- > GIS
- > Teaming and Support

CONSTRUCTION ADMINISTRATION

Effective management of our projects ensures that both clients and contractors work in an efficient and safe manner. From pre-construction activities - such as bid conferences and surveys - to inspections, job progress reviews, and on through final completion, our goal is work that proceeds in accordance with plans and specifications.

At Thrasher, we inspect and manage a wide variety of projects designed by our firm in addition to projects for contractors and other designers. We have certified project representatives responsible for overseeing every element of design integrity. Our methods have earned the respect of not only our clients, but contractors and project owners alike.

Construction Inspection Services:

- > Construction Materials
- > Pipelines
- > Structural Steel & Concrete
- > Paving
- > Drainage
- > Embankments
- > Work Zone Safety & Traffic Control
- > Erosion and Soil Control

Quality Control and Assurance Methods:

- > Regularly Scheduled Planning and Progress Meetings
- > Engineering During Construction
- > Daily Logs and Progress Sheets
- > Cut Sheets
- > Quantity Tracking

SITE DEVELOPMENT

Engineering for site development is far from a “one size fits all” approach. Every project is unique and requires a blend of technical expertise, planning principals, efficient design, market realities, and the flexibility to seize opportunities. With our diverse staff, Thrasher has a winning combination of talent to take projects from design to reality.

At Thrasher, we understand that the design of a successful site development project must factor in economic landscape, political implications, and strategic planning that takes projects beyond engineering. The Thrasher team possesses expertise in every facet of development, including site selection and planning, grading, storm water management, erosion and sediment control, permitting, and infrastructure design.

We pride ourselves on being a partner in projects that improve the quality of life for residents and provide economic sustainability to communities.

Site Development Expertise:

- > Industrial and Business Parks
- > Mixed-Use Developments
- > Athletic Facilities
- > Federal Correctional Facilities
- > Streetscapes and Sidewalk Planning
- > Commercial Developments
- > Single and Multi-Family Residential Development
- > Primary, Secondary, and Higher Education Facilities
- > Recreational Resorts and Guest Lodging
- > Shopping Plazas

MATERIALS TESTING

At Thrasher, we inspect and manage a wide variety of projects designed by our firm in addition to projects for contractors and other designers. We have certified project representatives responsible for overseeing every element of design integrity. From pre-construction activities - such as bid conferences and surveys - to inspections, job progress reviews, and on through final completion, our goal is work that proceeds in accordance with plans and specifications.

Thrasher's Construction Services Division is capable of performing a wide range of field and laboratory tests. Our laboratory is nationally AMRL and CCRL certified to perform in-depth testing for a variety of clientele. All of our labs serve as resources for our engineers and project representatives who perform tests both in the field and in the lab to best serve our clients' needs.

The Thrasher team possesses expertise in every facet of material and laboratory testing and is trained to industry standards in these disciplines. We pride ourselves on being a partner in projects and providing excellent service and testing results.

Materials Testing and Laboratory Expertise:

- > Concrete Testing and Inspection
- > Soil Testing and Inspection
- > Aggregate Testing and Inspection
- > Mortar and Grout
- > Steel, Welds, and Rebar Inspection
- > Asphalt
- > Paint Coatings
- > Sprayed-on Fireproofing
- > Subsidence Testing
- > Caisson and Piling inspection
- > Engineering During Construction
- > Regularly Scheduled Progress Meetings
- > Daily Logs and Progress Sheets
- > Digital Photo Logs
- > Cut Sheets
- > Quantity Tracking
- > Floor Flatness and Levelness Testing

CIVIL ENGINEERING

Water Treatment & Distribution

Thrasher brings experience, practical knowledge and advanced technology to clients ranging from regional to small communities' water systems. Our engineers have designed and managed the construction of hundreds of miles of water distribution lines, millions of gallons of storage, and numerous system rehabilitations that successfully reduced water loss and increased reliability.

Wastewater Collection & Treatment

Wastewater collection and treatment systems are vital to the health of rural communities and municipalities. Cost-versus-benefit Environmental and technological issues are all involved.

Stormwater Systems

Thrasher is prepared to take on challenges to make your stormwater management project a success. In the not so distant past, storm water management was not a significant issue. It was "out of sight, out of mind." That is no longer the case. Ever-increasing regulations, the creation of public storm water utilities, and the focus on downstream effects of development are pushing stormwater management issues to the forefront.

Site Development

Engineering for site development is far from a "one size fits all" approach. Every project is unique and requires a blend of technical expertise combined with quality planning principles, efficient design, market realities, and flexibility to seize opportunities. With our diverse staff, Thrasher has the right blend of talent to make your project a success.

Roadways & Bridges

From industries to local families, the nation depends on the strength of highways, bridges, and even pedestrian walkways. No matter what the mode of land transportation, Thrasher gets our clients where they want to be.

QUALITY CONTROL POLICY

Thrasher has an internal Quality Control Policy to ensure our projects move forward efficiently and effectively. The objectives of this policy are to continually improve the quality of the design and technical deliverables Thrasher provides to its internal and external clients.

This policy illustrates the basic requirements for quality control in our projects. It describes the methods for checking and reviewing product elements and client deliverables, and includes rigorous comprehensive written check-lists for each stage of the design process, document production, and construction activities.

The purpose of these QC methodologies is to reduce or eliminate the potential for errors, omissions, ambiguities, and inconsistencies.

The policy outlines three main areas:

- > **General**
Defines the purpose, intent and limitations, definitions, and implementation
- > **Project Management Procedures**
Presents required procedures specific to this practice that allow for the efficient and accurate management of projects
- > **Check and Final Review Procedures**
Presents required procedures specific to this practice that are used to insure technical accuracy of the work product

QUALITY CONTROL POLICY

Budgeting

Construction estimating and budgeting is one of the most important parts of what Thrasher can provide you. Without accurate budgets, there is no tool to guide the design process and issues will be inevitable. By including cost estimating as a part of the project scope from day one, we are able to avoid issues before they arise and keep your project within a reasonable cost.

And our estimates go beyond the typical system - rather than simply providing cost per foot or lump sum price, Thrasher will provide contractor-grade estimates that look at every part of the project. We do detailed take-offs of materials and look at every man hour needed to complete a project and factor this in accordingly. Then, we use our thorough understanding of the local market and material costs to accurately design within your budget.

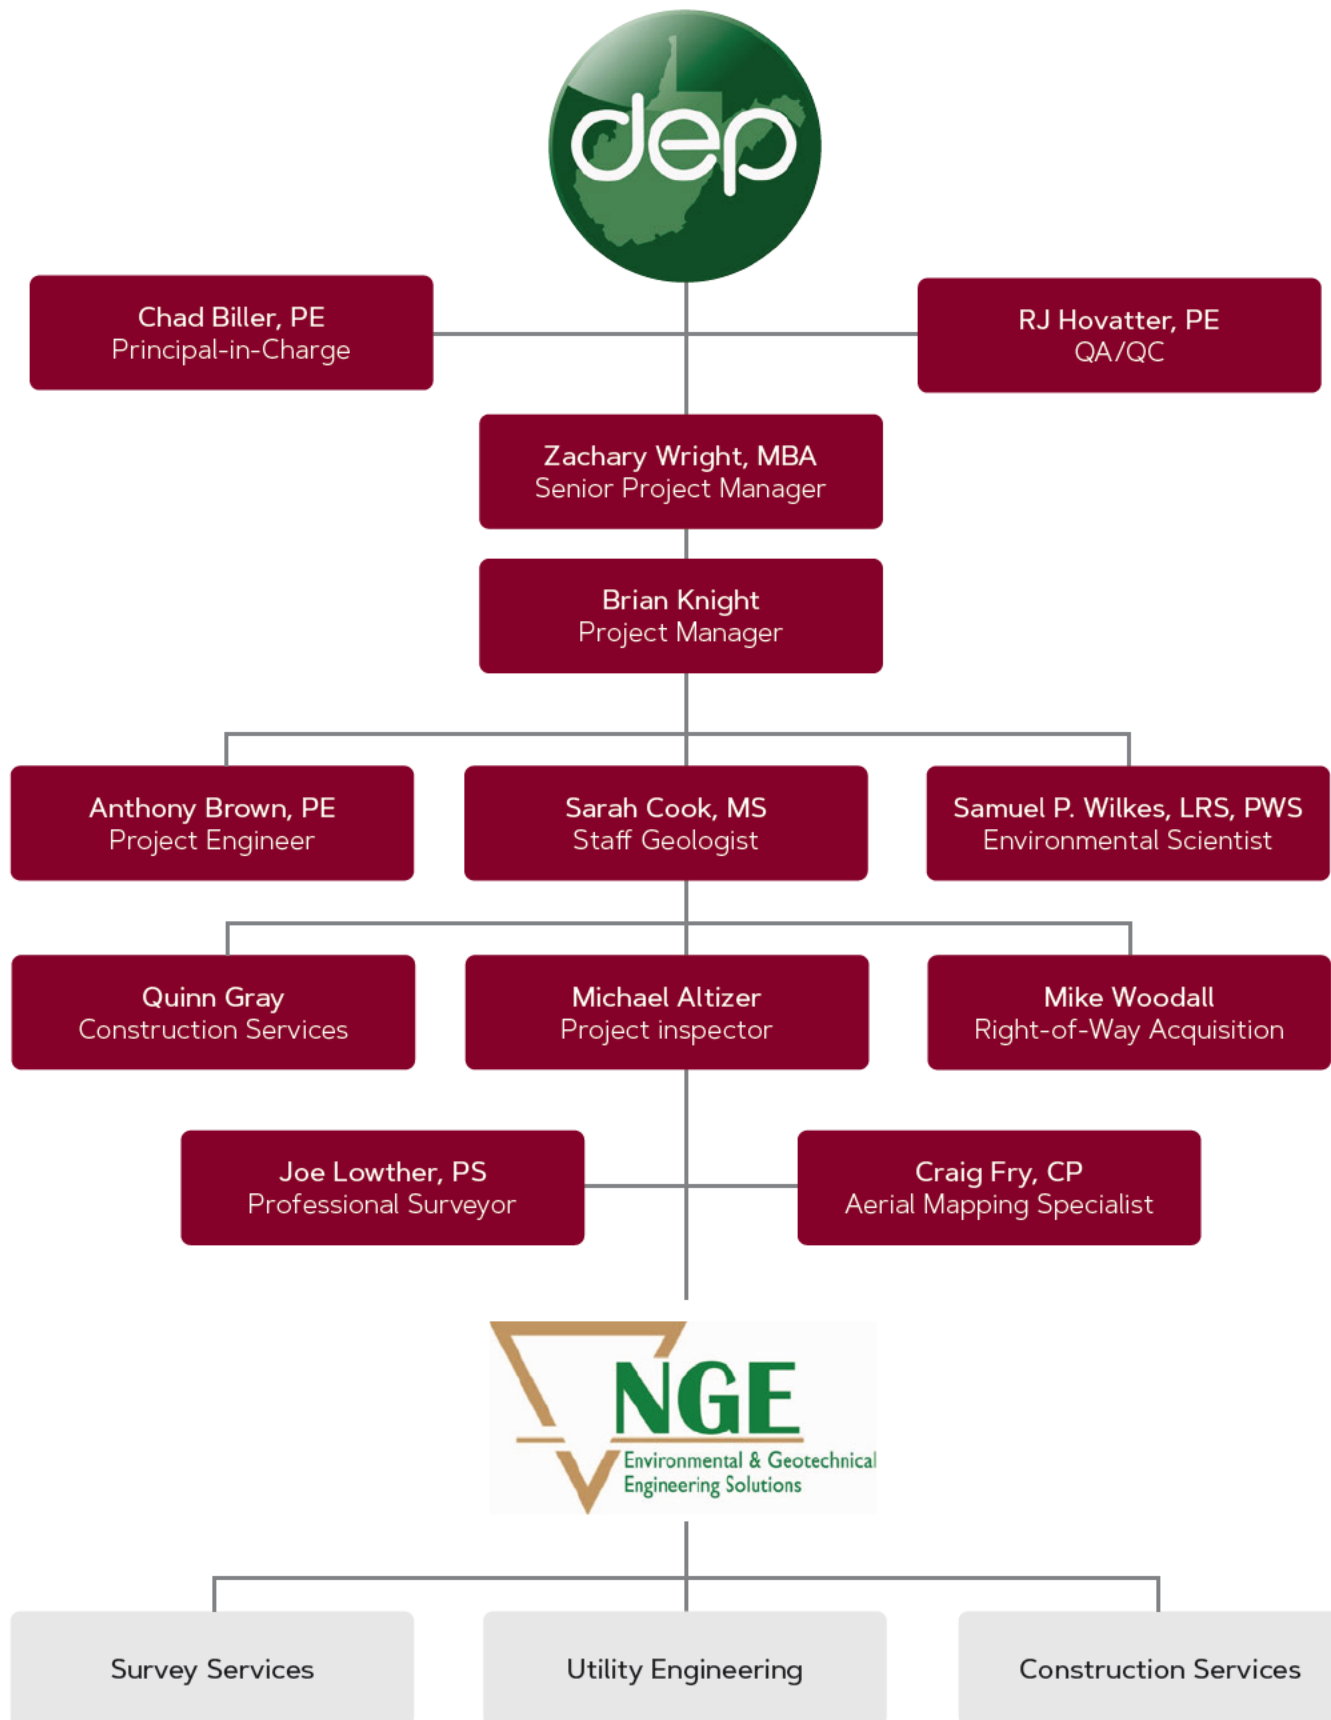

Scheduling

Thrasher realizes the importance of establishing and maintaining project schedules. Time means money and making sure we help you spend your money wisely is our number one goal. Because of this, our team puts an emphasis on ensuring project timetables are met and communication is upheld throughout the process.

To accomplish these goals, Thrasher utilizes scheduling to track every stage of a project - from design and bidding through construction completion. Keeping our owners up to speed with progress is always our priority and ensures occupancy and owner supplied equipment are scheduled accordingly.

STAFFING PLAN

CHAD BILLER, PE

Principal-in-Charge

Education

Bachelor of Science,
Civil Engineering
West Virginia University

Registrations

Professional Engineer:

- > West Virginia
- > Ohio

Affiliations

- > American Society of Highway Engineers
- > American Society of Civil Engineers
- > National Society of Professional Engineers

Chad Biller, PE has extensive experience in all aspects of civil engineering, but his primary emphasis lies in site development, transportation, and airport projects. Chad's expertise has made him a go-to source for the design and site layout of numerous residential and commercial sites all throughout the Mid-Atlantic region. His knowledge of site design in the mountainous terrain of West Virginia and the surrounding Appalachian basin is second to none.

As part of his role assisting our Land Development Market, Chad is responsible for the development of project design, production of project specifications and plans, bidding, quality assurance/quality control, and project monitoring. He brings a deep breadth of knowledge to the table, including creative problem solving skills, and decades of hands-on experience implementing unique project delivery methods individually tailored for his clients.

ZACHARY WRIGHT, MBA

Senior Project Manager

Education

Master of Business
Administration,
Project Management
West Chester University

Master of Science,
Information Management
Marshall University

Bachelor of Science,
Mathematics
Concord University

Zachary Wright, MBA, has 20 years' experience managing construction, design, and environmental compliance projects throughout the Central Appalachian and Mid-Atlantic Regions. Performing oversight on projects ranging from a \$15 thousand to \$40 million, Zac has expertise in cost estimation, cost control, site monitoring, scheduling, bidding, payment processing, regulatory compliance, and contract management.

A large portion of Zachary's experience involves mining and reclamation management projects. Having managed mine reclamation on more than 200 sites across five states, the techniques and requirements of reclamation and emergency response are second nature for Zachary. Additionally, he has managed mine-related emergency responses from start to finish and has the knowledge to quickly and effectively mobilize staff, develop sound engineering plans, and complete projects with the sense of urgency required to mitigate damage and cost.

- > Water Environment Federation (WEF) Water Leadership Institute
- > West Virginia Water Environment Association
- > Pittsburgh Collaboratory for Water
- > Geological Society of America

Sarah Cook serves as a Project Coordinator in Thrasher's Water Resources Market. She brings a background in the public utility sector, having worked on numerous water, sewer, and stormwater projects in her career. She provides environmental and engineering support for clients by assisting with project planning initiatives, including scopes of work, proposals, and cost estimates. Sarah works directly with Thrasher's team of engineers to prepare and review funding applications, permit documents, geological studies, preliminary engineering reports, and other engineering reports. She also has notable experience in data processing, hydrologic modeling, technical writing, and scientific research. Sarah's understanding of hydrology and passion for the water industry empowers her to work on a variety of projects at Thrasher.

Sam Wilkes, LRS, PWS is an Environmental Project Manager within Thrasher's Land Development Market. Sam is a Professional Wetland Scientist and a WVDEP certified Licensed Remediation Specialist. He brings over 23 years of consulting experience as a project manager and senior environmental scientist, providing technical support to watershed management, restoration, natural resource conservation, and hazardous materials programs. Sam is experienced at providing project oversight and managing field teams and contractors collecting wetland, stream quality, environmental media data, and general site condition data for site characterization. He regularly interacts with his clients and manages project budgets and staffing plans, while providing quality control review of project deliverables. Sam understands the importance of delivering projects on time and providing a proactive management style to his clients.

Quinn Gray has been with Thrasher for seven years and currently serves as Project Manager and lab manager. Primarily, Quinn oversees projects in the southern region of WV. He has background knowledge in material control measures as well as laboratory production. Additionally, he oversees report documentation, personnel, and project financing.

Quinn's background in physics and mathematics has made him an excellent addition to the Thrasher laboratory team. His primary responsibilities are to run gradations, break cylinders, and report on laboratory findings. Quinn's knowledge of the laboratory procedures and the proper reporting skills makes him an excellent manager.

Quinn also possesses impeccable technical skills such as software and computer course training. While in college, Quinn spent time working in the chemistry and physics lab which has prepared him for his current position.

MICHAEL ALTIZER

Project Inspector

Michael Altizer recently joined The Thrasher Group, Inc. as an ESC Inspection Coordinator. Having worked as an Environmental Compliance Coordinator in the mining industry for nearly a decade prior, Michael brings a wealth of knowledge to the Thrasher Team. His love the outdoors, and the want to keep ponds, streams, and people safe has made this career a perfect fit. Michael has a long history of ensuring waterways and wetlands are complaint with DEP/EPA Standards from his past experience working in the mining industry.

MIKE WOODALL

Right-of-Way Acquisition

Mike Woodall is one of the most seasoned construction services professionals at Thrasher. He has been a part of our team for 20 years and has developed an expert level skill set. Mike is extensively trained and experienced with all aspects of construction management, project inspection, and materials testing. He brings a civil focus to construction projects, an important perspective to any building site. Mike has spent a large portion of his career working in Thrasher's laboratories on soil, concrete and aggregate testing. Mike will serve as the Field Services Manager, acting as the primary technical resource for our field testing technicians and inspectors. Mike currently is an active member of a materials testing team in Morgantown.

Joseph Lowther, PS serves as Senior Survey Manager for the firm, and works on projects for a vast array of clients. Joe has worked with some of Thrasher's largest clientele, and understands the demands and pressures that go along with expansive surveys with many moving parts. His work has included numerous large-scale projects that span all up and down the eastern seaboard. He has primarily worked in communities all across West Virginia and understands the terrain and obstacles that lie in the Mountain State. Additionally, Joe has developed impressive communication and technical skills that allow him to manage large, complex projects without compromising quality or sacrificing important deadlines.

Company Overview

NGE was founded in the fall of 2002 by Amy Veltri and John Nottingham, a management team with a combined forty years of industry experience. The family-based entrepreneurial spirit that defined NGE's beginnings remains evident in the innovative solutions we deliver to our loyal clients each and every day. Advances in engineering, science and technology, coupled with regulatory, legal, and compliance pressures create increasingly complex challenges for businesses. NGE strives to keep pace with these changes, with an eye to supporting our clients' changing needs.

NGE has grown into a dependable and flexible environmental and geotechnical consulting firm providing a wide range of professional services, including Environmental Consulting, Geotechnical Engineering and Environmental Construction / Remediation. With clients across the nation, NGE added a second office location in West Virginia in 2003, and seeks to grow in the future by providing consistent, quality service in a family-oriented atmosphere.

Since its inception, NGE has hired and retained the best and brightest talent in the industry. Our staff have relevant experience and qualifications to complete complex environmental and geotechnical projects. NGE's future is bright as we pursue a course of planned, measured growth to meet the challenge of expansion without diluting leadership or weakening the company's ability to perform. After establishing a solid foundation and longstanding reputation in the region and across the nation as an innovative, sophisticated, forward-thinking environmental and geotechnical consulting firm, we are proud of our roots and the progressive environment we have created for our dedicated employees.

NGE is an organization that is small enough to focus time on each client but with a depth in talent and resources to successfully complete large and complex projects. NGE provides superior environmental and geotechnical services at a manageable price. A family oriented work atmosphere has fostered the growth of NGE's staff with the best and brightest talent in the industry.

NGE has garnered a variety of certifications and awards over the years in the environmental and geotechnical consulting industry. These accomplishments and accolades bear testament to the impeccable standards that we strive to achieve at NGE. They help differentiate our company from our competitors and serve to distinguish our employees as the "best of the best."

WORKLOAD AND AVAILABILITY

The Thrasher Group's current workload will allow for immediate response to your needs. You will have specifically appointed team members whose schedules will allow flexibility to enable them to fulfill all deliverables. In addition to these dedicated staff members, Thrasher has the ability to provide additional assistance as needed. The company boasts a staff of more than 300 people in four states, allowing us – if necessary – to pull more personnel to provide a timely response to your needs. This amount of available staff enables us to adjust workloads to ensure the resources needed to meet all project requirements and deadlines are made available, as well as to provide the depth of expertise needed to address any planning, engineering or other challenges which arise. Using a combination of technology and business acumen, Thrasher is better able to support all aspects of a project to the extent requested by our clients. By integrating the mapping, engineering, architectural, planning, surveying, environmental, construction monitoring and materials testing staff, we are able to provide a wealth of experienced talent, bringing the best minds and proven methods to every job.

PROJECT EXPERIENCE

WVDEP AML Bloomingrose (Tincher) Burning Refuse

Location: Boone County, WV

Type of Project: Burning Refuse Reclamation

Thrasher Project Manager: Zachary Wright and Brian Knight

Client Contact:

Mr. Patrick Murphy,

Southern Emergency Engineer

1159 Nick Rahall Greenway

Fayetteville, WV 25840

304-574-4465

Bloomingrose was a surface refuse fire that was affecting air quality in the community. Thrasher produced the design plans and specifications to mitigate the burning refuse pile, temporary stream crossings, erosion control, surveying, and utility coordination. Thrasher also conducted the pre-bid meeting for this project.

PROJECT EXPERIENCE

Squires Creek, located in Newburg, had two refuse piles covering two to three acres of land. The site had remains of a mine building, unvegetated coal refuse, deep mine portals, and acid mine drainage. Nearly all of the land was unvegetated with signs of severe erosion. Additionally, there were several public safety hazards: steep outcrops with well-used ATV trails up and down the face and deep mine portals, one of which was open enough to easily allow entrance.

Some of the major steps of the project included the following: site preparation (clearing and grubbing, removing debris), construction and installation of support areas, maintenance of access roads, construction and installation of drainage control items, re-vegetation of disturbed areas, and regrading of portal sites and refuse sites.

WVDEP AML Squires Creek Refuse

Location: Preston County, WV

Type of Project: Refuse and Portals

Thrasher Project Manager: Chad Biller

Client Contact:

Mr. Gregory Smith, PE

101 Cambridge Place | Bridgeport, WV 26330

304-842-1900

PROJECT EXPERIENCE

This project located in Clarksburg, WV involved 3 wet-seal portals that drain into a 0.7 acre impoundment. The three portals discharge approximately 500 to 3,000 gallons per minute of iron laden water into the main stem of Lambert Run. This project is another in a series of projects aimed at removing Lambert Run (WV MW-16) from the state's 303(d) list of impaired watersheds. This is a project which will combat acid mine drainage emanating from three portals in the central region of the Lambert Run watershed.

Thrasher's plan for the project included, constructing, aeration channels and approximately 4 acres of aerobic wetlands to provide passive treatment of AMD. The proposed treatments have been designed to remove approximately 80% of the acid load.

WVDEP AML Lambert's Run Site #7

Location: Harrison County, WV

Type of Project: Portals

Thrasher Project Manager: Chad Biller

Client Contact:

Guardians of the West Fork

Mr. John Eleyette

830 Benoni Avenue | Fairmont, WV 26554

304-627-1019

PROJECT EXPERIENCE

This project, located in Alton, WV, involved a large ferric iron “mushroom” that takes up approximately 0.87 acres. This was caused by acid mine drainage (AMD) emanating from an entombed refuse fill above an unnamed tributary of Swamp Run. The Swamp Run #1 passive AMD treatment system utilized open limestone channels channeling the toxic water to a forebay, which controls larger storm event flow and separates that flow between primary and secondary limestone leech beds. These beds are self-flushing with an automated inline water level control structure. The treated water from the leech beds will then discharge into flushing ponds for solids removal before being conveyed into a wetland finishing pool prior to being released back into the unnamed tributary.

The proposed treatments have been designed to remove approximately 80% of the acid load and should have a lifespan of 20 years.

WVDEP AML Swamp Run Refuse #1

Location: Preston County, WV

Type of Project: Passive AMD Treatment

Thrasher Project Manager: Chad Biller

Client Contact:

Guardians of the West Fork

Mr. John Eleyette

830 Benoni Avenue | Fairmont, WV 26554

304-627-1019

PROJECT EXPERIENCE

This Morgantown, WV project involved three main sites which includes dangerous highwalls with heights between 20 and 70 feet, AMD water impoundments on highwall benches, exposed refuse on Booths Creek stream bank, open and collapsed portals, and existing non-functioning wet mine seal.

The scope of work included regrading the highwall bench and adjoining spoil piles to reclaim the highwalls, installing new or replacing the existing wet/modified mine seals for the portals producing AMD, and installing bate gates in the open portals. Additionally, Thrasher installed underdrains or seep collectors to eliminate ponding areas and construct conveyances to safely transport stormwater and mine water in and around the site. An Army Core of Engineers permit was applied for stream bank restoration/repair of Booths Creek and a temporary construction access across the stream. The project site covered a total area of 24.5 acres and reclamation included \pm 113,000 cubic yards of earthwork.

WVDEP AML Owl Creek Highwall #2

Location: Monongalia County, WV

Type of Project: Highwall

Thrasher Project Manager: RJ Hovatter

Client Contact:

Mr. Troy Schell, Northern Design Administrator
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

PROJECT EXPERIENCE

WVDEP AML Dans Branch Landslide

Location: Mingo County, WV

Type of Project: AML Emergency Landslide

Thrasher Project Manager: Chad Biller

Client Contact:

Jason Foster, Emergency Program Administrator
601 57th Street, SE, Box 20 | Charleston, WV 25304
304-926-0499

Dansbranch was the site of an AML emergency landslide that Thrasher worked to remediate. Some of the major steps of the project included the following: site preparation (clearing and grubbing, removing existing structures and debris), construction and installation of support areas, maintenance of access roads, construction and installation of drainage control items to convey stormwater off-site, ensure sediment control compliance with the NPDES permit, and re-vegetation of disturbed areas. Thrasher also had to protect existing structures during grading operations and the installation of permanent rock fall protection above structures. Construction on this project cost approximately \$352,370.

This project included '6,500 cubic yards of earthwork and stabilizing the slope behind the residence.

PROJECT EXPERIENCE

WVDEP AML Ridgeway Landslide

Location: Harrison County, WV

Type of Project: AML Emergency Landslide

Thrasher Project Manager: RJ Hovatter

Client Contact:

Eric Simpson, Northern Emergency Engineer
101 Cambridge Place | Bridgeport, WV 26330
304-842-1900

Ridgeway, in Bridgeport, was the site of an AML emergency landslide that The Thrasher Group repaired. Our team engineered the design of the slip remediation and was responsible for bidding out both the soil nail wall and earthwork construction for the project. The project consisted of a soil nail wall that is approximately 36 feet tall and 6,300 cubic yards of earthwork.

PROJECT EXPERIENCE

West Ridge Multi-Use Development

Location: Monongalia County, WV

Type of Project: Full Service Project

Thrasher Project Manager: RJ Hovatter

Client Contact:

Mr. Aaron Humberson, Director of Engineering

310 Lawless Road, Suite 130

Morgantown, WV 26501

304-212-3355

The WestRidge Development is a 1,000-acre site that has been designed for a variety of land uses, including retail space, office buildings, industrial space, and trails. The Thrasher Group has worked side-by-side with the owner through each step of the project thus far, from planning and permitting to materials testing and inspection.

An important component of this process has been addressing the remains of an old strip and deep mine throughout the site. Thrasher's team made the judgement calls on the remediation of these materials. These methods consisted of total overexcavation of the seams to mine grout

stabilization. Thrasher helped assist the client in cost-benefit analyses addressing the coal issues with the most cost-effective way for remediation on a site-to-site basis. Thrasher has also worked with NGE Consultants to determine how to handle pyritic material in the building foundation zones.

Since 2015, Thrasher has also provided QA/QC on materials testing and construction inspection for WestRidge Development. Thrasher has been responsible for asphalt testing, concrete testing, soil testing, aggregate testing, rebar inspection, welding and steel inspection and more. This has been a massive undertaking for the Thrasher team, with more than 10 million cubic yards of earthwork moved to date with over 8 miles of roadways, half of which are 4 lane divided roadway, and 13 miles of sidewalk for pedestrians.

Thrasher's Testing/Inspection Included:

- » Aggregate Testing
- » Asphalt Testing
- » Compaction Testing
- » Concrete Testing
- » Rebar Inspection
- » Soil Testing
- » Welding and Steel Inspection

PROJECT EXPERIENCE

White Oaks Business Park Turnkey Master Plan

Location: Harrison County, WV

Type of Project: Full Service Project

Thrasher Project Manager: Chad Riley

Client Contact:

Mr. Woody Thrasher

P.O. Box 940 | Bridgeport, WV 26330

304-669-8664

At the Thrasher Group, our team is determined to provide the utmost quality of services for each project. We provided a number of these services for the White Oaks Business Park, including master planning, utility engineering, environmental mitigation, materials testing, and construction management.

Our Construction Project Managers (CPM) are responsible for overseeing a project from the initial planning stages to its successful completion. Throughout the duration of the project, CPMs have a responsibility to meet the client's requirements to achieve an efficient and fiscally viable project. CPMs at Thrasher

are experienced in Design, Planning, Budget Analysis, Quality Control Management, Permitting and Building Codes. Most importantly, our CPMs coordinate/communicate effectively with employees, contractors, and clients.

The Environmental Division was also involved in this project. We performed wetland mitigation for three different areas in the park. Each site was a little bit different based on the specifics of each one. Some of the work involved replanting of different vegetation, shrubs, and trees in the area. Another dealt with the re-grading of stream banks.

Coal Strip

The White Oaks Business Park is constructed on the remains of a previous coal strip bench. Therefore, a large portion of the development encountered coal during excavation of the pads. Thrasher has been able to work with local coal buyers during the different phases of construction to sale the coal being removed as part of the development. The revenue from these coal sales was then able to be used to offset a portion of the development cost

Projects and Goals

GOALS AND OBJECTIVES

A critical step in meeting your goals is first ensuring we understand them. Thrasher's team has thoroughly reviewed the Expression of Interest request and is confident in our ability to deliver the highest-quality solutions to your problems. We are capable of meeting each goal/objective you have outlined and feel strongly that you will be satisfied with the outcomes you receive.

Our team is prepared to complete all of the following services:

- > National Environmental Policy Act (NEPA) consultations and documentation
- > Public Participation
- > Infrastructure Investment Jobs Act (IIJA) compliance
- > Determine legal ownership of properties
- > Obtain exploratory and construction rights of entry
- > Provide legal documentation to substantiate legal ownership findings
- > Provide current mapping, perform survey and other related services
- > Perform Site and Geotechnical Investigations
- > Design temporary and permanent access or accesses for construction and future maintenance
- > Slope stabilization
- > Design multiple portal seals and regrades
- > Design to mitigate AMD drainage
- > Design reclamation of exposed coal refuse and mine spoil
- > Design of drainage conveyances, including drainage channels, underdrains, and/or other controls to safely convey water off-site
- > Mine subsidence stabilization
- > Construction quality assurance and quality control (QA/QC)
- > Provide resident project representative/inspector
- > Prepare daily construction activity logs summarizing activities

- > Provide engineering support and services throughout construction
- > Provide Engineers certification report
- > Verify and approve as-builts and final quantities

We understand your goals for the six projects in this contract and will handle them in the following manner:

► GOAL/OBJECTIVE 2.1

The Thrasher Group will conduct an environmental assessment (EA) meeting the requirement of WVDEP-AML and OSMRE. This EA, will at a minimum, include correspondence and consideration to the US Fish and Wildlife Agency, the Army Corps of Engineers, Division of Natural Resources, State Historic Preservation Office, and other agencies necessary to meet the NEPA and IIJA environmental requirements.

Thrasher will also develop plans and specifications in a manner that will comply with the IIJA requirements. This may include, but is not limited to, American Iron and Steel requirements, Davis Bacon Act wage requirements, disadvantaged business requirements and other necessary considerations.

► GOAL/OBJECTIVE 2.2

The Thrasher Group will conduct a thorough record search to determine the legal ownership of any properties associated with the project. This may include tax record searches, deed research, property corner locations, legal title searches, owner interviews, and other necessary research. Thrasher will assist with any necessary right-of-way or easement preparation, deed verification, or other document preparation necessary to substantiate or acquire legal rights needed to complete the projects.

GOALS AND OBJECTIVES

► GOAL/OBJECTIVE 2.3

The Thrasher Group will work with WVDEP-AML to develop a cost-effective approach to solve the issues related to these sites. Thrasher will develop plans and specifications for each project that will allow a contractor to efficiently complete the work. We will provide detailed plans to reclaim mine portals, drainage controls and systems, slope stabilization, coal refuse reclamation, stream restoration, subsidence repair, storm water and erosion and sediment control, regrade and revegetation, and all other conditions encountered on the project sites. Finally, we will provide specifications that will require contractors to meet the standard of WVDEP-AML. Standard WVDEP-AML specifications and other materials will be incorporated into the documents.

► GOAL/OBJECTIVE 2.4

The Thrasher Group will prepare and assist with the acquisition of all permits required to complete these projects. This may include, but is not limited to, NPDES stormwater construction permits, Army Corps of Engineers Nationwide or Individual Permits, and/or other necessary permits.

We will develop plans and specifications outlining the contractor requirements during construction and maintenance periods. These specifications will ensure that the permits are well maintained and meet the requirements for release. Thrasher will assist with the preparation of any documents needed to maintain or release the permits.

► GOAL/OBJECTIVE 2.5

The Thrasher Group will provide an experience resident project representative (RPR). The RPR will develop daily field activity reports that can be provided in real time or at preferred intervals. Project Managers and/or Professional Engineers will conduct site visits on a regular basis and at critical construction points to ensure quality construction and adherence to the plans and specifications.

Thrasher's in-house Materials Testing Division will provide necessary field representatives to ensure quality assurance and control specifications are being adhered to. Our lab and field personnel can conduct most all necessary material testing practices including but not limited to soil and stone compaction testing and analysis of materials, moisture content testing, concrete and/or grout testing, and many others.

PROJECT MANAGEMENT PLAN

Brian Knight will be the Project Manager for these projects with Zachary Wright providing oversight. They will be supported by a team of qualified staff to perform the necessary tasks such as survey, geotechnical engineering, design, permitting, and bid documents as required for a complete design set and project.

Both Zachary and Brian will communicate with the AML team to determine the preferred timing for each project and will work with you to establish the most realistic and efficient schedule for all projects.

The general project approach we will follow for your project is outlined below:

Step 1 | Site Visit

Our assembled team of engineers and technicians will conduct a site visit. This group will evaluate the project conditions and identify and document potential problem areas. Thrasher will call the necessary utilities prior to being on-site to help identify any known utility locations. We will coordinate with your team and any identified stakeholders to take all the facts into consideration during this process.

Step 2 | Land Rights Acquisition

Thrasher will identify property owners within the project area. This will be completed through deed search. We will also reach out to property owners to obtain the needed permissions to be on property to design and construct the projects.

Step 3 | Conceptual Design and Report

Thrasher will prepare a conceptual design for the project at hand. Where applicable, we will also provide design alternatives for consideration. We will then prepare a written report of the conceptual designs and outline any issues.

Step 4 | Construction Documents

Our team will provide design solutions and construction documents to the WVDEP-AML for the project. These plans will be carried forward to final design based upon the conceptual design report. In addition, with Thrasher's experience working on various similar projects, a construction safety and phasing plan, as required, will be developed and reviewed with the WVDEP-AML to ensure an efficient and safe project during construction.

We will complete the final design documents based upon comments received and conclusions throughout the design review process. Our field evaluations and design approach will specifically address these issues in the construction documents.

Step 5 | Cost Estimates

Our project team will provide itemized cost estimates at the following stages: conceptual design, preliminary design, and final design.

Step 6 | Bid Process

We will assist the WVDEP-AML in preparation of the bid documents, attend pre-bid meetings, and assist in issuance of addenda.

Step 7 | Construction Administration

The project team will review project submittals, attend project meetings, and provide a Resident Project Representative to inspect the construction being completed. The project team will also provide final punch list inspection at project completion.

Thrasher will also develop a program to keep your team abreast of potential construction issues.

Step 8 | Project Close Out

Upon completion of the project, the Thrasher team will review and comment or approve contractor's as-builts and final quantities. All permits will be closed/terminated at the completion of the warranty period.

Required Forms

DESIGNATED CONTACT: Vendor appoints the individual identified in this Section as the Contract Administrator and the initial point of contact for matters relating to this Contract.

(Name, Title)  _____

10. HAS THIS JOINT-VENTURE WORKED TOGETHER BEFORE? <input type="checkbox"/> YES <input checked="" type="checkbox"/> NO - Not Applicable									

11. OUTSIDE KEY CONSULTANTS/SUB-CONSULTANTS ANTICIPATED TO BE USED. Attach "AML Consultant Qualification Questionnaire".

[illegible]

12.	<p>A. Is your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher performs engineering design services to the WV DEP for drainage, portal seals, highwall and other remediation projects, as well as water line and water treatment plant projects related to AML. Numerous projects involving land remediation, storm water drainage, slip repair, mass grading in relations to site development and highway projects are engineered by the firm on a regular basis.</p> <p>NO</p>
	<p>B. Is your firm experienced in Soil Analysis?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher maintains an AASHTO Certified materials testing lab at both the Bridgeport and Beckley offices. Soil analysis experience is specifically in gradation and classification.</p> <p>NO</p>
	<p>C. Is your firm experienced in hydrology and hydraulics?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Throughout the state, Thrasher has done planning and design of bridges for the West Virginia department of highways and the design of multiple private and municipal development projects located within floodplains. Thus, Thrasher has extensive experience in hydrology. We also have a vast amount of experience in hydraulic modeling for water and wastewater projects throughout West Virginia</p> <p>NO</p>
	<p>D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?</p> <p><input checked="" type="checkbox"/> Description and Number of Projects: Thrasher acquires aerial imagery using in-house resources on smaller area projects. We own and operate three UAS (unmanned aerial systems) for a variety of imagery missions for projects up to approximately 500 acres. For large mapping projects, we use commercial flying service. Thrasher has three FAA Certified pilots. Thrasher has expertise and software in-house and routinely performs aero triangulation, planimetric compilation, surface modeling, contour mapping and digitally rectified imagery. Thrasher has mapped and flown hundreds of projects within the last year.</p> <p>NO</p>
	<p>E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher has designed more water line systems than any other West Virginia firm. Projects include new systems, extensions, and replacements of water line distribution systems, many of which have been affected by AML. Design of the projects includes lines, booster stations, water treatment plants, and storage facilities. Thrasher's analysis and design also includes improvements and alternatives for water sources deemed ground water under the direct effect of surface water.</p> <p>NO</p>
	<p>F. Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher has been awarded and has successfully completed numerous reclamation projects for the WV DEP related specifically to acid mine drainage and abatement, as well as multiple passive treatment systems designed to watershed protection groups. The Charleston, WV branch of our company designed and award-winning water treatment plant for Martinka mines in Marion County, West Virginia to treat mine drainage.</p> <p>NO</p>

14. PROVIDE A LIST OF SOFTWARE AND EQUIPMENT AVAILABLE IN THE PRIMARY OFFICE WHICH WILL BE USED TO COMPLETE AML DESIGN SERVICES

The Thrasher Group, Inc. will design work for AML utilizing one of the largest networks of computer aided design (CAD) equipment, software and trained personnel in the state of West Virginia.

Connected through a virtual private network, our cad staff has the ability to share necessary plans among our locations. This will allow work designed for AML to be prepared and updated at the office location that best meets the needs of the scope of services.

Civil 3D, Carlson and Microstation V8 Software is utilized at 35 CAD stations throughout our locations. Additionally, equipment includes 10 large format (Size E) plotters and 5 large format plotter / scanners. CAD plans are prepared by both dedicated cad employees and by staff engineers and engineering technicians in each of the firm's offices.

Thrasher also utilizes top-of-the line survey equipment. Our survey work is accomplished with global positioning systems (GPS) and electronic distance measuring (EDM) survey stations with data gathering capabilities. The survey crews and office support staff generate mapping deliverables in virtually any digital format referenced to specified projection systems.

Additional survey services include: high accuracy monumentation, astronomic observations / orientation, NGS blue booking, hydrographic, terrestrial scanning, 3D asbuilts, 3d monitoring, sub-surface utility location / designation. The field crews are all equipped with late model four-wheel drive vehicles stocked with the most modern equipment available to perform professional land surveying services.

ABANDONED MINE LANDS (AML) CONTRACTOR INFORMATION FORM

You must complete this form for your AML contracting officer to request an eligibility evaluation from the Office of Surface Mining Reclamation and Enforcement (OSMRE) to determine if you are eligible to receive an AML contract. This requirement can be found under OSMRE's regulations at 30 CFR 874.16. **NOTE:** This form must be signed and **dated within 30 days** of submission to be considered for a current bid.

Part A: General Information

Business Name: The Thrasher Group, Inc.

Tax ID #: 55-0633596

Address: 600 White Oaks Blvd.

City, State, & Zip: Bridgeport, WV 26330

Phone Number: 304-624-4108

Email Address: criley@thethrashergroup.com

Part B: Obtain an Organizational Family Tree (OFT) from the Applicant Violator System (AVS)

If you plan to certify the existing AVS information or submit updates under Part C, you must include an OFT. Instructions for downloading an OFT from the AVS can be found at:

<https://www.osmre.gov/resources/forms/OMB1029-0119instructions.pdf>

If you require assistance you may contact the AVS Office by phone at: 800-643-9748, or by email at:

avshelp@osmre.gov.

Part C: Certifying and updating information in the AVS

Select one of the options, follow the instructions for the selected option, sign, and date below.

I, Chad Riley, have express authority to certify that:
(Print Name)

- ☒ 1. Our business is listed in the AVS. The information is accurate, complete, and up to date. (If you select this option, you must attach an Entity OFT from the AVS to this form). Do not complete Part D.
- ☐ 2. Our business is in the AVS. The information needs to be updated. (If you select this option, you must attach an Entity OFT from the AVS to this form). Complete Part D to provide the missing or corrected information.
- ☐ 3. Our business is not listed in the AVS. The information needs to be added. Complete Part D to provide the information.
