SOLICITATION #CRFQ 0305 FOR2400000010

Quotation

Specifications for our L-Type Standard 75 gallon UTV Fire Suppression Skid Unit "L" Shaped Low Profile Tank

A – Tank

75 Gallon capacity polypropylene water tank skid unit. The Tank shall be constructed of ½" black, textured, UV resistant polypropylene material with a ¾" thick tank floor and pump platform. It shall be baffled with minimum 3/8" transverse and longitudinal baffles to meet NFPA standards Made in the USA. The tank shall be approximately 34" Long x 47" Wide x 21" High. The entire skid unit, including the hose reel, shall be approximately 34" Long x 47" Wide x 41" High. The tank, at a minimum shall include the following:

- 1) White plastic sight gauge located on the driver side rear.
- 2) Lo-profile 5" minimum diameter tank fill/vent.
- 3) The driver's side tank top shall have an additional ¾" thick polypropylene mounting plate.
- 4) 1" diameter FNPT fill port
- 5) 1 ½" diameter FNPT Tank Suction shall be internally plumbed to the dead center of the tank and then elbowed down to provide for maximum water usage at any slope off road.
- 6) 2" Diameter FNPT drain
- 7) Front and rear mounting tabs

This 'L' shaped tank design provides for the best of both worlds. It keeps the center of gravity down low, such an important issue on an UTV that operates off-road yet allows the pump cavity to be naturally flooded with water so priming is not required.

B – Pump Mounting

The Wick water pump shall be mounted on the passenger-side rear tank platform in such a way that it deflects the engine noise away from the operator of the UTV and is quickly removable using only a spanner wrench, for optimal use as a portable pump in remote draft sites.

C – Pump

Wick 100-4HM: Single stage pressure pump powered by a 2 Hp Honda.

Max Weight: **17 lbs.**

- 1) Engine: **2 HP, 4 Stroke**, Air-cooled.
Recoil start. Honda
Integral Fuel tank
- 2) Pump: Single Stage, High-Pressure driven via a **centrifugal clutch** (so powerhead may be left at idle without pumping water, or losing draft)
1 ½” NPSH Suction, 1 ½” NPSH Discharge
Max PSI: **92**, Max GPM: **70**
- 3) Primer – A hand primer shall be supplied and mounted

D – Hose Reel

A manual rewind, lightweight, rust-free, stainless steel/nylon with a 4-sided roller assembly hose reel shall be supplied and mounted on top of the tank, directly behind the driver so as not to impede visibility. It shall have the capacity to hold a minimum of 100ft of ¾ in. reel hose with a ¾ in. GHT male riser.

E –Hose/Nozzle

100 Ft. of ¾ in. diameter lightweight (only 18lbs per 100 ft.) Reel Hose in yellow with a 400psi minimum working pressure, shall be supplied and installed. The couplings shall be **field repairable couplings** for quick repair in ¾ in. GHT, 1 in. NH or 1 in. NPSH thread complete with a nozzle.

(Please circle preference – ¾ in. GHT recommended.)

F – Plumbing

All valves to be full port ¼ turn brass ball valves, made in the **USA**, rated at 600 PSI. All plumbing to be **stainless steel** and rated at 150 PSI minimum (overbuilt by a minimum of a 50% safety factor).

The pump shall be pre-plumbed as follows on the **suction** side:

- 1) 1 ½” ¼ turn brass ball valved leg into the tank draft port
- 2) 1 ½” Diameter T
- 3) A clear (to allow visibility of water) pvc suction hose with swivel coupling shall connect the pump to eliminate vibration and allow operator to view water flow.
- 4) 1 ½” leg extended to the rear of the body to draft with, which shall have and adaptor and a cap w/ chain in 1 ½” NPSH.
- 5) 1- **1 ½” female NPSH x 1 ½” female NH swivel adapter** shall be provided on mounting plate for direct fills or pumping from a hydrant, engine, etc.

On the **discharge** side, the pump shall be plumbed, via high pressure hose to eliminate vibration, to only 100% stainless steel piping.. Includes the following valved discharges:

- 1) 1” Tank fill/circulate (standard)
- 2) ¾” Hose Reel (standard)
- 3) 1 x 1” Discharge in NH or NPSH w/ cap and chain (please circle preference)
- 4) 1 x 1 ½” Discharge in NH w/ cap and chain (standard)
- 5) Preset **pressure relief valve**
- 6) A 160 psi stainless steel **pressure gauge.**

All valves shall be labeled.

G – Accessories

Two (2) Spanner Wrenches, supplied and mounted.

1 - 1 ½” NPSH x 8’ lightweight Suction Hose

1 - 1 ½” NPSH plastic Foot Valve/Strainer

H – Hardware

All hardware not limited to bolts, screws, u-bolts, L-brackets, springs, hinges, etc. shall only be **stainless steel**.

I – Weight

The maximum weight of the entire unit, loaded with water, ready to fight fire shall not exceed the maximum cargo box payload capacity of: 75 gallon units = 1,000lbs
