HealthPath Professional Monitoring Program

It is our pleasure to submit this response to the WV Restore -Referral, Treatment & Monitoring Management Solicitation CRFQ 0907 RNB2400000007. HealthPath Professional Monitoring Program was developed by a team of nurses committed to the health and well-being of West Virginia. We have designed the program to meet the needs of registered nurses, students, applicants who are licensed, registered, certified, and/or regulated by the West Virginia Board of Nursing under Chapter 30, Article 7, et. seq. of the West Virginia Code. The program is designed to assist Nurses or other health professionals with SUD/AUD/ODD and other mental health conditions that may interfere with their ability to practice safely in the workplace. We are confident that we can provide nurses, students and other health professionals in West Virginia with a program that will meet or exceed the expectations of all vested entities including the Board of Nursing, employers, regulatory agencies, and the health professional who is impacted by SUD/AUD/ODD or other mental health conditions.

HealthPath Professional Monitoring Program

The HealthPath Professional Monitoring Program is a robust program that will provide support and accountability to nurses and other health professionals on their journey to long-term recovery. Through our steadfast commitment and collaborative efforts with key stakeholders, including treatment centers, regulatory and licensing agencies, employers, clinicians and the nursing community in West Virginia, HealthPath will provide the services needed to protect patient safety and assist nurses on a path toward healing and sustained recovery.

The HealthPath Professional Monitoring program is a program developed by HealthPath, LLC. We have partnered with a team of physicians, nurses and therapists who have many years of demonstrated experience in developing and managing alternative to discipline programs for state boards of nursing. Our dedicated team provides the highest quality service and accountability to protect healthcare consumers by seeking early identification and evidence-based treatment opportunities for nurses and other healthcare professionals who struggle with SUD/AUD/ODU or other mental health conditions that could impair their ability to practice safely in the workplace.

Mission Statement

To improve patient safety and workplace well-being through early identification and access to evidence-based treatment for nurses and other healthcare professionals who struggle with SUD/AUD/ODU or other mental health conditions that could impair their ability to practice safely in the workplace.

Vision Statement

To improve health and safety in West Virginia by supporting the well-being of nurses and other health professionals who provide direct or indirect care to the citizens of West Virginia.

Our Promise

We will provide nurses, students and other health professionals with the tools and resources they need to maintain successful long-term recovery.

Components of the HealthPath Professional Monitoring Program

The HealthPath Professional Monitoring Program provides practical and evidence-based means for evaluating, treating, monitoring, and managing nurses with SUD/AUD/ODU or other mental health conditions that may interfere with safe practice. This is accomplished through standardized processes for evaluating and making recommendations that are individualized to the specific needs of each participant. Our program focuses on the four essential Principles that are the foundation of Professional Monitoring and Wellness.

1. Appropriate and effective intake and evaluation process.
2. Unbiased, appropriate, and individualized treatment referral.
3. Participant accountability with advocacy and reporting.
4. Complete and timely transparency between all vested parties.

The Process Defined

1. Intake Process (defined)

Individuals who self-report or are mandated by an employer to report to the monitoring program will immediately connect with case management. They will be scheduled for an initial screening within 72 hours. They will be given instructions on moving forward with the monitoring program and provided evaluator information within 5 calendar days of initial contact, thus being responsible to set up an evaluation with approved evaluators and inform case management of the scheduled evaluation date.

2. Evaluation Process (defined)

Participant will arrange for a comprehensive medical and psychological evaluation by an approved evaluator. This assessment will explore the nature and extent of the impairment, as well as recommended treatment options. To become an approved evaluator, a provider must submit a detailed application verifying they are able to meet the standards required to be able to conduct a comprehensive evaluation of a healthcare professional.

3. Referral to appropriate Treatment

The program will work with the individual to coordinate their referral to a treatment program that meets the criteria mandated by Agency.

Case management will provide 3-4 options of approved treatment centers that provide healthcare specific treatment tracks. Treatment recommendations will be determined in conjunction with collateral information from all vested parties including but not limited to the WV BON and WV OAG.

4. Ongoing Monitoring Accountability (RMA) (Describe this process)

While the individual is in treatment, the Program will continue communication with the provider, receiving updates on their clinical progress. Following discharge, the individual will be responsible for ongoing random toxicology testing, as well as quarterly check-ins with their treatment provider, which will be shared with the monitoring program.

During this time, the individual will be assessed for appropriateness to return to work. Length of monitoring contract will be determined in conjunction with collateral information from all vested parties including but not limited to: WV BON & WV OAG.

Impact & Future Direction

The immediate and long-term impact of the HealthPath Professional Monitoring Program will be noticeable on many levels.

1. Increased partnerships with Treatment Providers who specialize in Professional Recovery programs.

HealthPath is currently working with treatment providers including 7 Summit Pathways LLC, to assure easy access and availability of appropriate treatment for Nurses and other health professionals. We are working with programs that specialize in treatment for health professionals to ensure all nurses have access to affordable and appropriate treatment in West Virginia. 7 Summit Pathways is expanding their current Professional Track IOP into the Charleston area and it will be available to participants statewide by March 2024.

2. Increased collaboration through Expanded partnerships with Clinicians, therapists, nurse health coaches, professional organizations, and the Nursing Community at large.

HealthPath is currently working with Clinicians, therapists, nurse health coaches throughout West Virginia to ensure access to affordable services and to ensure ongoing support with after-care services. HealthPath is also planning nurse wellness events throughout the State to encourage and support wellbeing.

3. Increased accessibility of collection sites for participants.

HealthPath will Partner with third-party organization to provide participants with collection options in their local community throughout the state of West Virginia.

4. Implementation of a Special Needs fund

HealthPath is partnering with organizations throughout the state, creating programs that focus on physical and mental wellbeing, gaining sponsorship and developing a special needs fund for nurses. HealthPath Outreach Inc. is a 501C3 established solely for this purpose.

6. Increased accountability of Participants

Healthpath aims to improve accountability through programs like SoberLink, as well as regular communication with nurse support group facilitators and peer mentors.

7. Increased Support through Development of a Peer Mentorship program

Healthpath aims to improve accountability and long-term recovery outcomes through development of a peer mentor program. We will provide aftercare services to all participants enrolled in monitoring and we will immediately work toward development of a nurse mentoring program that will encourage nurses who complete the program to use their experience, strength and hope to help other nurses.

Our peer mentor program will improve accountability by providing guidance, support, and a sense of community. It will encourage individuals to take responsibility for their actions and foster an environment of professional growth.

8. Quality Improvement

Healthpath will ensure best outcomes through a quality improvement program that will focus on continuously monitoring, analyzing, and making improvements to the program based on data that will be collected and feedback obtained.

RE: Letter of Support for HealthPath Professional Monitoring RFQ Submission

December 12, 2023

I am writing to express our strong support for HealthPath Professional Monitoring Program in response to the WV Restore-Referral, Treatment & Monitoring Management Solicitation.

Established in 1933, the [West Virginia Nurses Association](#) is a constituent member of the [American Nurses Association](#) and is the only full-service professional association that represents the state's entire nursing population. The WVNA works closely with nursing organizations in West Virginia and many are [Organizational Affiliates of the WVNA](#). The mission of the WVNA is "Leading quality healthcare in West Virginia", and the Vision is, "Empowering all nurses in West Virginia to leverage the transformation of healthcare by advocacy, quality and collaboration".

As the CEO of the West Virginia Nurses Association, I have had numerous conversations with nurses, nurse attorneys, employers as well as experts in SUD treatment, regarding the help that nurses need, and the stigma and barriers that our West Virginia nurses and healthcare workers still experience. We need a program that is invested in West Virginia nurses, and will *exceed* expectations. I have had additional conversations board members and peer-support nurse-coaches that have submitted complaints on the current program, and they never received a response. West Virginia nurses and healthcare workers deserve a peer-support program that understands and comprehends that SUD is a medical disease and is not a moral choice.

The WVNA would like to see this program come back to a West Virginia organization that is committed to nurses. HealthPath is already invested in West Virginia nurses - they held their first Wellness Retreat for nurses in October 2023, (it was sold out, had a waiting list and the speakers were leaders in SUD, self-care and inspiring trailblazers). It was a fantastic retreat!

The WVNA will assist HealthPath Professional Monitoring Program however needed.

- We commit to promote articles and stories in the West Virginia Nurse quarterly publication
- We commit to promote articles and stories in our monthly E-News
- We commit to provide opportunities to HealthPath to conduct surveys, outreach and educational activities for West Virginia nurses
- We commit to continue to work with stakeholders on solutions for healthcare professionals with SUD /AUD /OUD and with other mental health conditions.

We look forward to continuing our relationship with this team of professionals to truly help support nurses and healthcare workers in West Virginia. My contact information is 866 WVNURSE or 866 989-8773 and my email is Julie@wvnurses.org.

Sincerely,

Julie A. Huron

The equality of any alternate being bid shall be determined by the State at its sole discretion. Any Vendor bidding an alternate model or brand should clearly identify the alternate items in its bid and should include manufacturer's specifications, industry literature, and/or any other relevant documentation demonstrating the equality of the alternate items. Vendor shall clearly mark any exceptions, clarifications, or other proposed modifications in its bid. Exceptions to, clarifications of, or modifications of a requirement or term and condition of the Solicitation may result in bid disqualification.

15. PREFERENCE: Vendor Preference may be requested in purchases of motor vehicles or construction and maintenance equipment and machinery used in highway and other infrastructure projects. Any request for preference must be submitted in writing with the bid, must specifically identify the preference requested with reference to the applicable subsection of West Virginia Code § 5A-3-37, and must include with the bid any information necessary to evaluate and confirm the applicability of the requested preference. 15A. RECIPROCAL PREFERENCE: The State of West Virginia applies a reciprocal preference to all solicitations for commodities and printing in accordance with W. Va. Code § 5A-3-37(b). In effect, non-resident vendors receiving a preference in their home states, will see that same preference granted to West Virginia resident vendors bidding against them in West Virginia. Any request for reciprocal preference must include with the bid any information necessary to evaluate and confirm the applicability of the preference. A request form to help facilitate the request can be found at: www.state.wv.us/admin/purchase/vrc/Venpref.pdf.

18. ELECTRONIC FILE ACCESS RESTRICTIONS: Vendor must ensure that its submission in wvOASIS can be accessed and viewed by the Purchasing Division staff immediately upon bid opening. The Purchasing Division will consider any file that cannot be immediately accessed and viewed at the time of the bid opening (such as, encrypted files, password protected files, or incompatible files) to be blank or incomplete as context requires and are therefore unacceptable. A vendor will not be permitted to unencrypt files, remove password protections, or resubmit documents after bid opening to make a file viewable if those documents are required with the bid. A Vendor may be required to provide document passwords or remove access restrictions to allow the Purchasing Division to print or electronically save documents provided that those documents are viewable by the Purchasing Division prior to obtaining the password or removing the access restriction.

41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open hearth, basic oxygen, electric furnace, Bessemer or other steel making process.
- c. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
 1. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
 2. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.
