**WEST VIRGINIA
DIVISION OF NATURAL RESOURCES**
Greenbrier River Public Access Site
CEOI 0310 DNR2500000001

Submitted by:
The Thrasher Group, Inc.
November 20, 2024

November 20, 2024

Attn: Mr. Joseph Hager III, Buyer
Department of Administration, Purchasing Division
2019 Washington Street, East
Charleston, WV 25305

RE: West Virginia Division of Natural Resources – Greenbrier River Public Access Sites

Dear Mr. Hager and Members of the Selection Committee:

The Greenbrier River offers West Virginia locals and tourists alike the opportunity to experience the beauty of the state's natural resources and scenery. With multiple access points, the river provides our community the space to kayak, fish, tube, and more. In an effort to continue providing this crucial resource, the West Virginia Division of Natural Resources is seeking to design and upgrade access sites and related facilities on the Greenbrier River in Hinton and Renick. To successfully implement these changes, the WVDNR will need a trusted partner to handle all aspects of the project. The Thrasher Group is the right firm for the job.

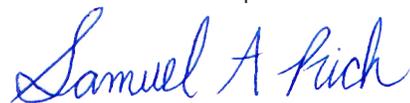

We understand the importance of the project, allowing Hinton and Renick to expand their footprint for recreational tourism and economic growth opportunities for the region. Our comprehensive approach to planning and design will ensure that this becomes a success. From preliminary studies of the site and its existing conditions, to communication with stakeholders and completing the design process, Thrasher will ensure that the goals of the WVDNR are met.

With the complexity of such a project, the WVDNR will need a partner who understands the nuances of planning and designing access sites and related facilities. Thrasher has a suite of in-house experts – from landscape architects and engineers to environmental scientists and communication specialists – to ensure that any needs you may have are fully met.

Further, our team shares the WVDNR's dedication to providing accessible and safe access to recreational opportunities across our state. We also have the advantage of proximity. Being less than an hour away from the project sites, we have a particular passion for this project - our staff live and work in the area and take advantage of the existing outdoor recreation here. It also means we can provide boots-on-the-ground personnel to closely monitor project progress and be on-site in an instant should the need arise.

We appreciate the opportunity to share our qualifications with you and look forward to discussing how The Thrasher Group can support the West Virginia Division of National Resources now and for the long haul.

Sincerely,
The Thrasher Group, Inc.

Samuel Rich, PLA
Principal

PURCHASING AFFIDAVIT

CONSTRUCTION CONTRACTS: Under W. Va. Code § 5-22-1(i), the contracting public entity shall not award a construction contract to any bidder that is known to be in default on any monetary obligation owed to the state or a political subdivision of the state, including, but not limited to, obligations related to payroll taxes, property taxes, sales and use taxes, fire service fees, or other fines or fees.

ALL CONTRACTS: Under W. Va. Code §5A-3-10a, no contract or renewal of any contract may be awarded by the state or any of its political subdivisions to any vendor or prospective vendor when the vendor or prospective vendor or a related party to the vendor or prospective vendor is a debtor and: (1) the debt owed is an amount greater than one thousand dollars in the aggregate; or (2) the debtor is in employer default.

EXCEPTION: The prohibition listed above does not apply where a vendor has contested any tax administered pursuant to chapter eleven of the W. Va. Code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.

DEFINITIONS:

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Employer default" means having an outstanding balance or liability to the old fund or to the uninsured employers' fund or being in policy default, as defined in W. Va. Code § 23-2c-2, failure to maintain mandatory workers' compensation coverage, or failure to fully meet its obligations as a workers' compensation self-insured employer. An employer is not in employer default if it has entered into a repayment agreement with the Insurance Commissioner and remains in compliance with the obligations under the repayment agreement.

"Related party" means a party, whether an individual, corporation, partnership, association, limited liability company or any other form or business association or other entity whatsoever, related to any vendor by blood, marriage, ownership or contract through which the party has a relationship of ownership or other interest with the vendor so that the party will actually or by effect receive or control a portion of the benefit, profit or other consideration from performance of a vendor contract with the party receiving an amount that meets or exceeds five percent of the total contract amount.

AFFIRMATION: By signing this form, the vendor's authorized signer affirms and acknowledges under penalty of law for false swearing (W. Va. Code §61-5-3) that: (1) for construction contracts, the vendor is not in default on any monetary obligation owed to the state or a political subdivision of the state, and (2) for all other contracts, that neither vendor nor any related party owe a debt as defined above and that neither vendor nor any related party are in employer default as defined above, unless the debt or employer default is permitted under the exception above.

THRASHER'S GOT IT

A critical step in meeting your goals is first ensuring we understand your vision for the project. Thrasher's team has thoroughly reviewed the expression of interest request and is confident in our ability to deliver the highest-quality solutions for your needs. We are capable of meeting each goal/objective you have outlined and feel strongly that you will be satisfied with the outcomes you receive.

We understand your goals for new boat launch facilities for the Greenbrier River in Renick and Hinton and will handle them in the following manner:

▶ GOAL/OBJECTIVE 1

The Thrasher Group can provide the West Virginia Division of Natural Resources with all required services. Our approach will begin with a review of the program for facilities, along with a review of existing site conditions. Communication with all stakeholders will be key to align project expectations with the budgetary, timeline, and physical constraints of the project.

▶ GOAL/OBJECTIVE 2

As a full-service architecture and engineering firm, Thrasher can provide all necessary services for this project. Our team can handle everything from site design and engineering to survey and environmental issues that may arise. We will perform all work in accordance with the WVDNR's needs and objectives, maintain all current laws and codes, and also adhere to your budget constraints. Details on Thrasher's approach to budget management can be found later in this proposal.

▶ GOAL/OBJECTIVE 3

Construction administration always plays a major role in Thrasher's full-service approach. This is a piece that we feel is important to offer for every project. Our philosophy has proven time and time again to be incredibly successful as the team at Thrasher consistently puts more projects out to bid any other A/E firm in the state. Thrasher has the competent professionals your team needs to ensure your project is constructed correctly and functions as designed.

Thrasher will keep your project goals in mind throughout the process. We will address each in turn, working directly with the WVDNR to meet your needs with the project approach outlined below. Thrasher will conduct design review meetings with your team at each phase of the process, making sure we are keeping with the overall intention of the project.

Our general steps for project management are as follows:

Step 1 - PROJECT SCOPING

Our project manager, Marcus Carnegie, will meet with you to review the goals and objectives for the project to establish a clearly defined scope of work. At this time, we understand that, at a high level, the project will involve planning, design, permitting, and construction administration. The details of our involvement in each of these categories will be flushed out in this meeting to set clear expectations on our role throughout the project.

Step 2 - FIELD WORK

Thrasher's engineering team will perform a site visit to review existing conditions and identify opportunities and constraints associated with the design of this project. This assessment will involve documenting existing conditions and allowing our team to lay eyes on the project first hand. Our surveyors and mapping group will establish base mapping for the design of this project by locating existing features, utilities, ordinary high water mark levels, and water levels at the time of survey. Our survey team will also clearly identify the flood elevations in the area.

Step 3 - CONCEPTUAL DESIGN

Thrasher will prepare conceptual designs for the project that meet the identified goals and objectives for the project. These designs will illustrate different alternatives that are possible to meet the project goals and objectives. Each conceptual design will be presented to the client and a preliminary opinion

of construction cost will also be presented at this time to assist with the evaluation of each option. During the conceptual design phase Thrasher will also identify any specialized studies or permits that would be associated with the construction of this project.

Step 4 - CONSTRUCTION DOCUMENTS & PERMITTING

Thrasher will coordinate with the WVDNR to identify and submit the necessary permits based upon the selected design. We will run permitting process in parallel with the final design as much as possible in an effort to save time throughout this phase.

Step 5 - BID PROCESS

Thrasher will assist the WVDNR and stakeholders in preparation of the bid documents and will attend pre-bid meetings and assist in issuance of addenda.

Step 6 - CONSTRUCTION ADMINISTRATION

Thrasher will manage the construction process by assisting the WVDNR in submittal reviews, pay applications reviews, change order reviews. Additionally our project manager will coordinate progress meetings where issues are brought up and resolved and progress is tracked through scheduling submitted by the contractor. The project team will also provide periodic inspections of the project to confirm the construction meets the expectations set forth in the contract documents.

Step 7 - PROJECT CLOSE OUT

Upon completion of the project, the Thrasher team will work with the General Contractor to assure that all closeout documents are provided and that the facility is fully complete and functional at turn over.

Communication throughout any project is a primary key to success. To that end, Thrasher will begin communication with the WVDNR immediately upon notification of award and will maintain consistent lines of communication for the duration of the project. This will ensure all parties involved — owner, contractor, and engineer — will always be apprised of the project happenings.

The two main components of the project approach will be design and construction. Each will have its own plan for communication.

Communication During Design

Prior to the initiation of design services, Thrasher's Project Manager, Marcus Carnegie, will discuss preferred methods of communication with the WVDNR's point of contact. Updates during the design phase can occur in numerous ways:

- » Weekly status updates via email
- » Weekly conference calls
- » Monthly progress meetings.

No matter the methods preferred, our project teams are well versed in keeping our clients abreast of project status. We can customize your project's communication plans to best fit your teams' wants and needs.

Communication During Construction

Before construction begins, Marcus will again meet with the WVDNR team to determine preferred communication tools for this phase of the project. Open, consistent communication will be paramount to keep the project on-time and within budget.

Additionally, Thrasher will conduct monthly progress meetings with the contractor, the WVDNR, and key project stakeholders throughout the duration of the project. Meeting minutes will be distributed to all attendees and any other agents identified by the WVDNR. Action items will be documented within the meeting minutes.

Throughout construction, Thrasher will have people on-site for project representation as well as material testing. Anytime a Thrasher employee is on site during construction, a field report will be prepared. Field reports will be reviewed by the engineering team and distributed to the WVDNR's construction representative on a weekly basis.

Budgeting

Construction estimating and budgeting is one of the most important parts of what Thrasher can provide you. Without accurate budgets, there is no tool to guide the design process and issues will be inevitable. By including cost estimating as a part of the project scope from day one, we are able to avoid issues before they arise and keep your project within a reasonable cost.

Our estimates go beyond the typical system - rather than simply providing cost per foot or lump sum price, Thrasher will provide contractor-grade estimates that look at every part of the project. We do detailed take-offs of materials and look at every man hour needed to complete a project and factor this in accordingly. Then, we use our thorough understanding of the local market and material costs to accurately design within your budget.

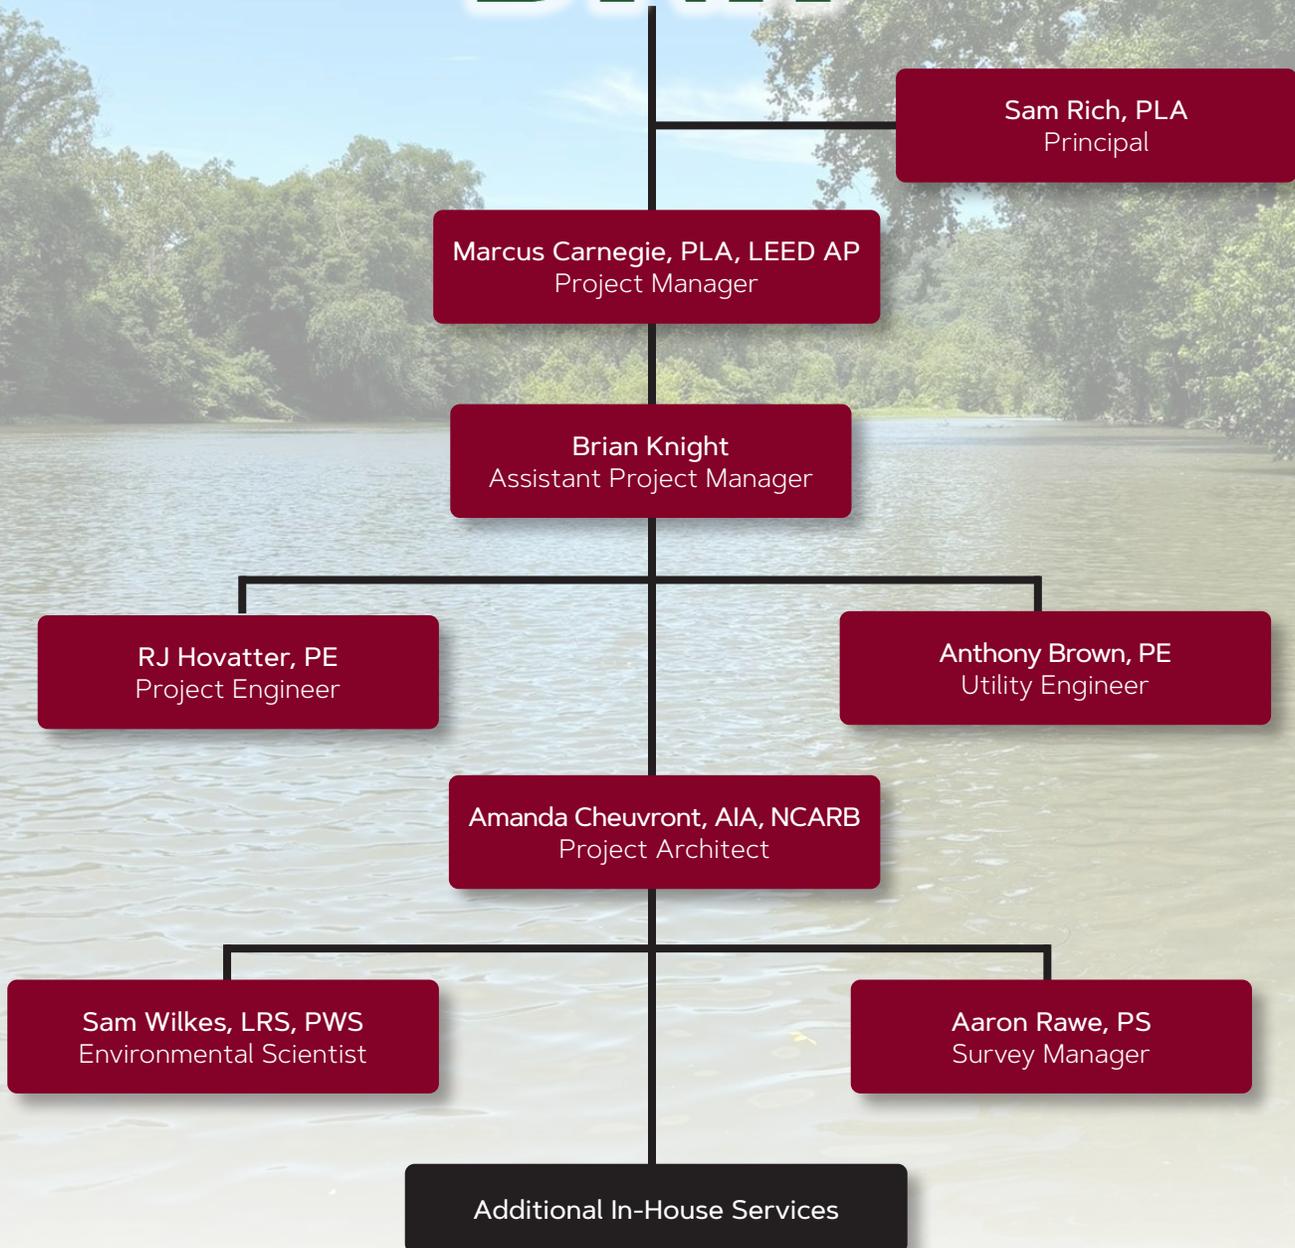

Scheduling

Thrasher realizes the importance of establishing and maintaining project schedules. Time means money and making sure we help you spend your money wisely is our number one goal. Because of this, our team puts an emphasis on ensuring project timetables are met and communication is upheld throughout the process.

To accomplish these goals, Thrasher utilizes scheduling to track every stage of a project - from design and bidding through construction completion. We also require contractors working on our projects to regularly update their project schedules and give a detailed progress report at each job meeting, again focusing on the communication component of scheduling. This helps to ensure all parties are informed and aware of potential delays. Keeping our owners up to speed with progress is always our priority and ensures occupancy and owner supplied equipment are scheduled accordingly.

PROFESSIONAL OVERVIEW

Samuel Rich, PLA, is a Project Manager at The Thrasher Group working in the Land Development Market. His role includes overseeing the design process for a variety of land development and planning projects in the commercial, residential, municipal, and industrial sectors. His team works with clients to take projects from the development stages all the way through construction, providing site evaluation, master planning, estimating, project marketing, and final design services.

Before his time at Thrasher, Sam spent three years in the landscape design/build industry working on a variety of projects involving the beautification of the outdoor environment for both residential and commercial spaces. He also held an internship position with the District of Columbia Office of Planning where he oversaw the historic restoration design of 10 Downtown D.C. pocket parks under National Park Service jurisdiction.

PROFESSIONAL OVERVIEW

Marcus Carnegie, PLA, LEED AP, is a Landscape Architect within The Thrasher Group's Land Development Market. Marcus is an innovative professional with a wide array of occupational diversity. His role at Thrasher includes project management for parks and recreation facilities, corporate and retail centers, residential developments, streetscape enhancements, and rail trail upgrades. He has also worked on downtown redevelopment master plans, park designs, native plant restorations, and highway beautification projects.

His planning experience includes project sites ranging in size from one-third of an acre to hundreds of acres. By working on projects with such a wide range of scales, Marcus can develop final design solutions that meet budgetary constraints and satisfy the interests of multiple stakeholder groups. He fits the Thrasher model of providing turn-key services by overseeing projects from their early design development phases through the survey, permitting, bidding, and construction phases.

PROFESSIONAL OVERVIEW

Richard 'RJ' Hovatter, PE, is an experienced Project Manager in Thrasher's Land Development Market. He brings expertise in a range of civil engineering work, including site design, slip repair, well pad design, pipeline routing, stormwater management, utility extensions, and Abandoned Mine Land reclamation. He has spent a large portion of his career evaluating and solving problems for both public and private clients, developing feasible, sustainable, and economically friendly solutions.

During his time at Thrasher, RJ has solidified his expertise in site development. His hands-on experience and diverse portfolio of work have given him insight into the challenges that come with these projects. He looks at a project site with a thorough understanding of the terrain, can identify potential issues with proposed designs, and develop unique solutions for his clients.

PROFESSIONAL OVERVIEW

Sam Wilkes, LRS, PWS, is an Environmental Project Manager within Thrasher's Land Development Market. He is a Professional Wetland Scientist and a WVDEP certified Licensed Remediation Specialist. He brings over 23 years of consulting experience as a project manager and senior environmental scientist, providing technical support to watershed management, restoration, natural resource conservation, and hazardous materials programs. Sam is experienced at providing project oversight and managing field teams and contractors collecting wetland, stream quality, environmental media data, and general site condition data for site characterization. He regularly interacts with his clients and manages project budgets and staffing plans, while providing quality control review of project deliverables. He understands the importance of delivering projects on time and providing a proactive management style to his clients.

PROFESSIONAL OVERVIEW

Aaron Rawe, PS, serves as a Survey Project Manager for Thrasher working out of the Bridgeport office. His experience covers various aspects of surveying, including routing, as-builts, preliminary, construction stakeout and boundary of construction management. He is experienced both in the field and orchestrating projects behind the scenes. He brings over six years of pipeline and asset management experience to the team.

As part of his management role, Aaron also meets with project stakeholders, area residents, local utility companies, and the project engineers to ensure that schedules are being met and to regularly update all parties on construction status. Additionally, he is progressively responsible for the coordination of field crews, data collection, site layouts, ALTA surveys, subsidence and topographic surveys.

Aaron also assists in the management of the Mapping Department here at Thrasher. He is responsible for the coordination between photogrammetrist and field crews in helping determine the placement of photo targets and items to be located for photo control. He helps process and QA, QC all data coming in from the field before delivering it to the photogrammetrist to use for the air trig of the projects.

 **MARION COUNTY ECONOMIC DEVELOPMENT AUTHORITY & WVDNR**
Palatine Park Master Plan & Improvements

Client Contact:
Mr. Kris Cinalli, Marion County Administrator
200 Jackson Street | Fairmont, WV 26554
304-367-5425

The Thrasher Group has had the pleasure of working with both the Marion County Economic Development Authority and the West Virginia Division of Natural Resources on rehabilitation of an existing boat ramp and the addition of a new three-lane boat ramp at Palatine Park in Fairmont, WV. For the EDA, the first phase of this project involved Thrasher developing a comprehensive master plan to help guide the County Commission to understand their long-term goals for the park.

After the master plan was complete, the Thrasher team began the design of a new splash park. The splash park opened in the Spring of 2014 and has quickly become a huge attraction for the community.

Thrasher worked with the Marion County EDA and the West Virginia Division of Natural Resources on existing and new boat ramp projects, respectively, at Palatine Park. The revitalization of the existing single lane boat ramp, parking area, and access at the western end of Palatine Park was designed and constructed in Spring 2016. This was completed as part of Phase III of the Palatine Park extension with the Marion County EDA. The new boat ramp facility project with the WVDNR began construction in early fall 2016 and was completed in the summer of 2017. This project features a new three-lane boat ramp, parking and is fully ADA-accessible.

 **CITY OF RAVENSWOOD**
Sand Creek Marina

Client Contact:

Mr. Josh Miller, Mayor
1 Wall Street | Ravenswood, WV 26164
304-273-2621

The City of Ravenswood has a vision to renovate the Washington Riverfront Park along the Ohio River into a tourism attraction and major community asset. Thrasher has been working with the City for several years to develop plans, budgets, and outline phases

of construction to help make this project a reality. The overall project will involve several features, including gathering venues, boating facilities, shelters, trails, a pedestrian bridge across Sand Creek, and the removal of the existing sewer lagoons to create space for a sports recreation complex.

The first phase of construction started in the fall of 2022 with the construction of a 12-slip boat dock and access gangway, a 60-space parking lots, and 13 recreational vehicle camping spaces with full water, sewer, and electric hookups. Thrasher assisted the City of Ravenswood with the design, bidding, construction administration, and inspection of the project construction.

CITY OF MORGANTOWN
Hazel Ruby McQuain Riverfront
Park Improvements

Client Contact:

Ms. Emily Muzzarelli, Assistant City Manager
 185 Garrett Street | Morgantown, WV 26505
 304-284-7406

The Hazel Ruby McQuain Park and Amphitheater is one of Morgantown’s premier outdoor recreation facilities. The park is home to annual local festivals, community movie and concert events, and several organized run and walk events during all seasons.

The improvements project consists of: a new amphitheater canopy, new restroom building, adaptive reuse of the historic depot, renovation of the existing restroom building to a new green room and police

department storage facility, renovations to the amphitheater seating area, redesign and renovation of the park pedestrian areas and landscape, bike/walking path improvements, new ADA kayak launch, and renovations to the Walnut Street Landing parking and pedestrian area.

The project upgrades the quality and capacity of the amphitheater facility as a performance venue. The new canopy provides covered seating and sun shading. The new restroom building provides modern facilities capable of serving the park during large events and during daily operations. Renovations to the historic depot adapt the building for use as a multi-purpose facility consisting of: a community space with kitchen, operations and will call office, and a police sub-station. The overall site, including the Walnut Street Landing area have been redesigned and upgraded to better support the recreational and performance activities. The site and landscape upgrades improve ADA accessibility and overall user friendliness.

 **HATFIELD MCCOY REGIONAL RECREATION AUTHORITY**
Ivy Branch Phase 2 Boat Launch
AML Pilot Project

Client Contact:

Mr. Jeffrey Lusk, Executive Director
179 Rita Mall Road | Man, WV 25635
304-752-3255

The Thrasher Group has had the pleasure of working with both the Hatfield McCoy Regional Recreation Authority and the West Virginia Department of Environmental Protection office of Abandoned Mine Lands on design development and construction of a new small craft boat launch and accompanying parking areas on the Little Coal River near Julian, WV.

After the master plan was complete, the Thrasher team began the design of the new boat launch and parking areas. Based upon the preliminary design Thrasher was able to complete the necessary Environmental Assessment documents required by the AMLER program. Thrasher then worked with Hatfield McCoy personnel to produce the final design documents for the project.

The final design documents were then used to acquire all necessary environmental permits including NPDES, ACOE NWP-12, Flood Plain Management, and WVDNR-OLS permits. Thrasher then complied bid documents for the project and worked hand in hand with Hatfield McCoy through the bidding process and selected a contractor for the construction of the project. Thrasher also provided Engineering during construction, construction management, and construction administration services during the construction of the project.
