# WEST VIRGINIA DEPARTMENT OF ENVIRONMENTAL PROTECTION

Morgantown Airport Subsidence Phase II - CE01 0313 DEP2500000001

Submitted by:  
The Thrasher Group, Inc.  
October 29, 2024

October 29, 2024

Attn: Mr. Josh Hager, Buyer  
Department of Administration, Purchasing Division  
2019 Washington Street East | Charleston, WV 25305-0130

**PRIORITIZE THE MORGANTOWN AIRPORT**

**GET EFFECTIVE RESULTS**

**WORK AS YOUR PARTNER**

*RE: WVDEP-DLR-AML | Morgantown Airport Subsidence Phase II*

Dear Mr. Hager and Selection Committee Members:

The Morgantown Airport is constructed over an Abandoned Mine Lands eligible coal mine, which is susceptible to subsidence that could result in catastrophic impacts to not only the airport facilities, but to the public as well. The West Virginia Department of Environmental Protection is in need of a partner to help resolve the issues at the airport and ensure no future problems will arise. Thrasher is the right firm for the job.

As a West Virginia-based company, with more than 40 years of experience working throughout the mountain state, Thrasher understands the geographical and geological conditions associated with abandoned mine sites. With our headquarters located in Bridgeport, we have particular familiarity with North Central West Virginia, which, when combined with our FAA expertise and vast AML experience, will provide you with a winning team.

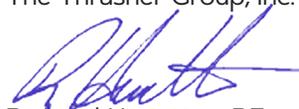

Thrasher's assembled team includes Nicole Jones. Her proficiency in FAA safety plans, restrictions, and regulations is second to none. Our combined staff members have worked on a multitude of AML projects, successfully completing design, NEPA documentation, survey and mapping, construction inspection, and other needed services. This team's demonstrated experience showcases our ability to efficiently identify project goals, establish accurate budgets, and develop successful outcomes for each of our clients.

We understand the as of now, no mine maps have been located for the deep mine, so at a minimum, a geotechnical investigation will be required during the design process to determine coal seam thicknesses, coal pavement elevations, subsurface open and collapsed mine workings, and more. We have teamed with our long time partners and NGE to assist with this portion of the project. John Nottingham has many years of experience in subsurface drilling for grout stabilization projects and will ensure your project is completed to the highest level of success.

Additionally, with our proximity to the project site and dedicated project team members, we will be readily available and easily accessible when the need arises to be on-site quickly, while also performing consistent monitoring of the project's progress.

We appreciate the opportunity to partner with you on this important project and look forward to discussing how The Thrasher Group can be a partner to the WVDEP and Morgantown Airport now and in the future.

Sincerely,  
The Thrasher Group, Inc.

THRASHER'S GOT IT

# COMPANY HISTORY

With a commitment to building business through “successful projects and repeat clientele,” H. Wood Thrasher, PE and the late Henry A. Thrasher, PE, formed Thrasher Engineering, Incorporated in Clarksburg, West Virginia in 1983. Since that time, the company — now known as The Thrasher Group, Inc. — has transformed into one of the Mid-Atlantic region’s largest full-service privately owned architectural and engineering firms.

Thrasher has grown from its original three employees to a current staff of over 300 and continues to prosper. Instilled in each employee is a commitment to maintaining the highest standards of professional service. Our team has the experience, knowledge, versatility, and integrity to get the job done. With a 41-year history of driving infrastructure development for public and private clients, we have a reputation of keeping our word and completing projects on time and on budget.

A critical step in meeting your goals is first ensuring we understand them. Thrasher's team has thoroughly reviewed the Expression of Interest request and is confident in our ability to deliver the highest-quality solutions to your problems. We are capable of meeting each goal/objective you have outlined and feel strongly that you will be satisfied with the outcomes you desire.

**Our team is prepared to complete all of the following services:**

- > Drilling and grouting of mine workings to stabilize specified areas at the airport
- > Temporary batch plant location(s), access routes, etc.
- > Federal and other agencies coordination, permitting, etc.
- > Construction Safety Phasing Plans, permitting, scheduling, restrictions, etc., as required by the Airport and FAA

We understand your goals for the project in this contract and will handle them in the following manner:

## ▶ **GOAL/OBJECTIVE 1**

The Thrasher Group will conduct an environmental assessment (EA) meeting the requirements of WVDEP-AML and OSMRE. This EA, will at a minimum, include correspondence and consideration to the US Fish and Wildlife Agency, the Army Corps of Engineers, Division of Natural Resources, Davis-Bacon, Build America, Buy America (BABA), and other agencies as necessary to meet the NEPA and IIJA environmental requirements. Our team will also coordinate with the FAA on their NEPA requirements in order to streamline the project early on to prevent any surprises.

Thrasher will develop plans and specifications in a manner that will comply with the IIJA requirements. This may include, but is not limited to, American Iron and Steel requirements, disadvantaged business requirements, and other necessary considerations.

Additionally, Thrasher will conduct a thorough record search to determine the legal ownership of any properties associated with the project. This may include tax record searches, deed research, property

corner locations, legal title searches, owner interviews, and other necessary research. Thrasher will assist with any necessary right-of-way or easement preparation, deed verification, or other document preparation necessary to substantiate or acquire legal rights needed to complete the projects.

## ▶ **GOAL/OBJECTIVE 2**

The Thrasher Group will prepare and assist with the acquisition of all permits required to complete these projects. This may include, but is not limited to, the Federal Aviation Administration (FAA), National Pollutant Discharge Elimination System (NPDES), West Virginia Department of Highways (WVDOH), Army Corps of Engineers (USACE), Department of Health Permits, and city and county permits as applicable, including floodplain permits.

We will develop plans and specifications outlining the contractor's requirements during construction and maintenance periods. These specifications will ensure that the permits are well-maintained and meet the requirements for release. Thrasher will assist with the preparation of any documents needed to maintain or release the permits.

## ▶ **GOAL/OBJECTIVE 3**

The Thrasher Group will provide an experienced resident project representative (RPR). The RPR will develop daily field activity reports that can be provided in real-time or at preferred intervals. Project Managers, Professional Engineers, and/or Construction Managers will conduct site visits on a regular basis and at critical construction points to ensure quality construction and adherence to the plans and specifications.

Thrasher's in-house Materials Testing Division will provide necessary field representatives to ensure quality assurance and control specifications are being adhered to. Our lab and field personnel can conduct most all necessary material testing practices including but not limited to soil and stone compaction testing and analysis of materials, moisture content testing, concrete and/or grout testing, and many others.

Richard "RJ" Hovatter will be the project manager overseeing the team for this project, with Chad Biller providing quality control and Nicole Jones with FAA and Aviation expertise. They will be supported by a team of qualified staff to perform the necessary tasks such as survey, geotechnical engineering, design, permitting, and bid documents as required for a complete design set and project.

RJ, Chad, and Nicole will communicate with the AML team to determine the preferred communication method and establish the most realistic and efficient schedule for the project.

**The general project approach we will follow for your project is outlined below:**

## Step 1 | Site Visit

Our assembled team of engineers and technicians will conduct a site visit. This group will evaluate the project conditions and identify and document potential problem areas. Thrasher will call the necessary utilities prior to being on-site to help identify any known utility locations. We will coordinate with your team and any identified stakeholders to take all the facts into consideration during this process.

## Step 2 | Land Rights Acquisition

Thrasher will identify property owners within the project area. This will be completed through a deed search. We will also reach out to the property owners to obtain the needed permissions to be on property to design and construct the projects.

## Step 3 | Survey

Thrasher will survey the sites for existing structures, utilities, topography, mine portals, and/or other identified items on-site. Survey will include, but not limited to, drone, flight, and survey team.

## Step 4 | Conceptual Design and Report

Thrasher will prepare a conceptual design for the project at hand. Where applicable, we will also provide design alternatives for consideration. We

will then prepare a written report of the conceptual designs and outline any issues.

## Step 5 | Construction Documents

Our team will provide design solutions and construction documents to the WVDEP-AML for the project. These plans will be carried forward to final design based upon the conceptual design report. In addition, with Thrasher's experience working on various similar projects, a construction safety and phasing plan, as required, will be developed and reviewed with the WVDEP-AML to ensure an efficient and safe project during construction.

We will complete the final design documents based on comments received and conclusions throughout the design review process. Our field evaluations and design approach will specifically address these issues in the construction documents.

## Step 6 | Cost Estimates

Our project team will provide itemized cost estimates at the following stages: conceptual design, preliminary design, and final design.

## Step 7 | Bid Process

We will assist the WVDEP-AML in preparation of the bid documents, attend pre-bid meetings, and assist in issuance of addenda.

## Step 8 | Construction Administration

The project team will review project submittals, attend project meetings, and provide a Resident Project Representative to inspect the construction being completed. The project team will also provide final punch list inspection at project completion.

Thrasher will also develop a program to keep your team abreast of potential construction issues.

## Step 9 | Project Close Out

Upon completion of the project, the Thrasher team will review and comment or approve contractor's as-builts and final quantities. All permits will be closed/terminated at the completion of the warranty period.

## AML DESIGN

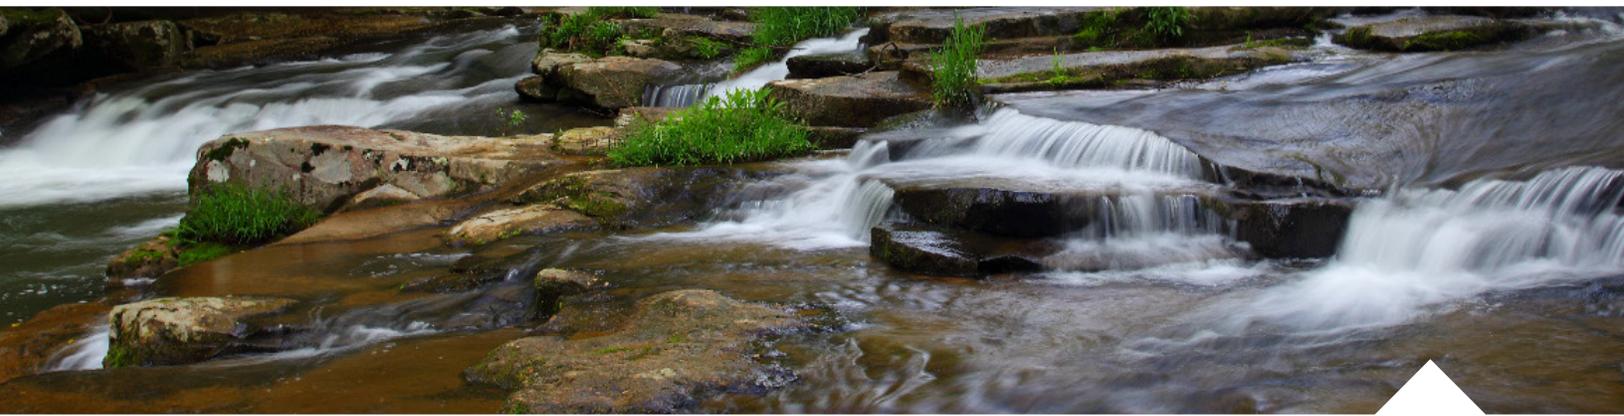

The Thrasher Group has provided design services to a number of Abandoned Mine Lands projects over the years. We are leaders in the industry, having completed projects for emergency repairs, using AML grants, and as part of the Abandoned Mine Lands Economic Revitalization project.

**Our team has been a part of all types of AML work, including, but not limited to:**

- » Highwalls
- » Portals
- » Slope Stabilization
- » Landslides
- » AMD Treatment
- » Refuse and Dump Improvements
- » Drainage Control
- » Burning Refuse Remediation

**Drainage Design:** All AML projects completed by Thrasher have required design of drainage structures. These have included vegetated, grouted, and riprap channels, as well as culverts and storm sewers. Drainage calculations are completed to properly size all conveyances.

**Permitting:** the permitting process can delay projects if they are not submitted correctly or in a timely manner. Thrasher takes pride in our ability to quickly obtain permits for our clients. We are able to utilize our excellent relationship with the WVDEP for NPDES permits as well as our relationship with the West Virginia Division of Highways for entrance and drainage permits. We are also experienced in obtaining Army Corp of Engineers permits from both the Pittsburgh and Huntington District Offices for stream bank restoration, wetland mitigation, and construction, linear transportation, and utility line projects, temporary construction access, and dewatering.

## ENVIRONMENTAL SERVICES

In today's ever-changing regulatory landscape, compliance with federal and state environmental laws is critical to the success of projects. Compliance can often seem at odds with the project vision and financial constraints. The Thrasher team partners as a technical and regulatory advocate to overcome obstacles and guide our clients through complicated policies to achieve their goals. From initial investigations to final design, our environmental experts are there to assist in all facets of our clients' projects. Our team has developed relationships with academic consultants from multiple universities that are here to aid in specialized assessments.

Thrasher offers a range of environmental services, from abandoned mine land reclamation to stream and wetland delineations and everything in between. We have extensive experience with site assessments, permitting, and every aspect of environmental work that your project will encompass.

In addition, our team has a host of experience with Abandoned Mine Land (AML) projects and are familiar with the intricacies involved

### Environmental Services:

- > All Appropriate Inquiry (AAI)
- > Environmental Site Assessments
- > NEPA Compliance for Publicly Funded Projects
- > Ecological Studies
- > Brownfield Redevelopment
- > Industrial Hygiene and Demolition Planning
- > Underground Storage Tank (UST) Consulting Services
- > Wetland Delineation, Design, and Mitigation
- > Remediation Investigation, Feasibility Studies, and Design
- > Hydrogeologic and Geologic Investigations
- > Groundwater Monitoring
- > Sampling and Laboratory Analysis
- > Solid and Hazardous Waste Management
- > SPCC, GPP, SWPPP, GWPP, SWPPP Environmental Compliance
- > Coal Combustion Residuals Rule Compliance (CCR)
- > Stream Assessments, Design, and Mitigation
- > Erosion and Sediment Control Plans
- > Voluntary Remediation Program
- > Uniform Environmental
- > Covenants Act
- > CERCLA Preliminary Assessment
- > CERCLA Site Investigation

Thrasher has completed more NEPA evaluations for AMLER projects than anyone in the state.

## ENVIRONMENTAL PERMITTING

The Environmental Division of the Thrasher Group provides permitting, consulting, and assessment services to a multitude of clients spanning the Mid-Atlantic region. With a combined 40 years of permitting experience, Thrasher’s Environmental Scientists, Permitting Leads, and Project Managers are able to take even the most complex and time restrictive projects and provide clients with cost effective and timely solutions.

### Federal Permitting

- > National Historic Preservation Act - Section 106 Consultation
  - > *State Historic Preservation Office or Division of Culture and History*
- > Endangered Species Act – Section 7 and Section 9 Consultations
  - > *United States Fish and Wildlife Service*
- > Clean Water Act – Section 404 Permits
  - > *United States Army Corps of Engineers*

- > National Environmental Policy Act – Categorical Exclusions, Environmental Assessments, and Short Environmental Assessment Forms
  - > *United States Army Corps of Engineers; Federal Aviation Administration; Division of Transportation; and Federal Communications Commission*

### State and Local Permitting

- > State Responsible Regulations of the Clean Water Act – Section 401 and 402 Permits
- > State Level Rare, Threatened, or Endangered Species Consultations
- > State Level Aquatic Resource Encroachment and Impact Permits
- > State Level Roadway Encroachment, Crossing, and Occupancy Permits
- > State Level Industrial Waste Discharge Permits
- > Local Level Floodplain or Building Permits

## CONSTRUCTION ADMINISTRATION

Effective management of our projects ensures that both clients and contractors work in an efficient and safe manner. From pre-construction activities - such as bid conferences and surveys - to inspections, job progress reviews, and on through final completion, our goal is work that proceeds in accordance with plans and specifications.

At Thrasher, we inspect and manage a wide variety of projects designed by our firm in addition to projects for contractors and other designers. We have certified project representatives responsible for overseeing every element of design integrity. Our methods have earned the respect of not only our clients, but contractors and project owners alike.

### Construction Inspection Services:

- > Construction Materials
- > Pipelines
- > Structural Steel & Concrete
- > Paving
- > Drainage
- > Embankments
- > Work Zone Safety & Traffic Control
- > Erosion and Soil Control

### Quality Control and Assurance Methods:

- > Regularly Scheduled Planning and Progress Meetings
- > Engineering During Construction
- > Daily Logs and Progress Sheets
- > Cut Sheets
- > Quantity Tracking

## QA/QC Procedure

Thrasher has an internal Quality Control Policy to ensure our projects move forward efficiently and effectively. The objectives of this manual are to continually improve the quality of the design and technical deliverables Thrasher provides to its internal and external clients.

This manual illustrates the basic requirements for quality control in our projects. It describes the methods for checking and reviewing product elements and client deliverables and includes rigorous comprehensive written check-lists for each stage of the design process, document production, and construction activities.

The purpose of these QC methodologies is to reduce or eliminate the potential for errors, omissions, ambiguities, and inconsistencies.

### The policy outlines three main areas:

#### » **General**

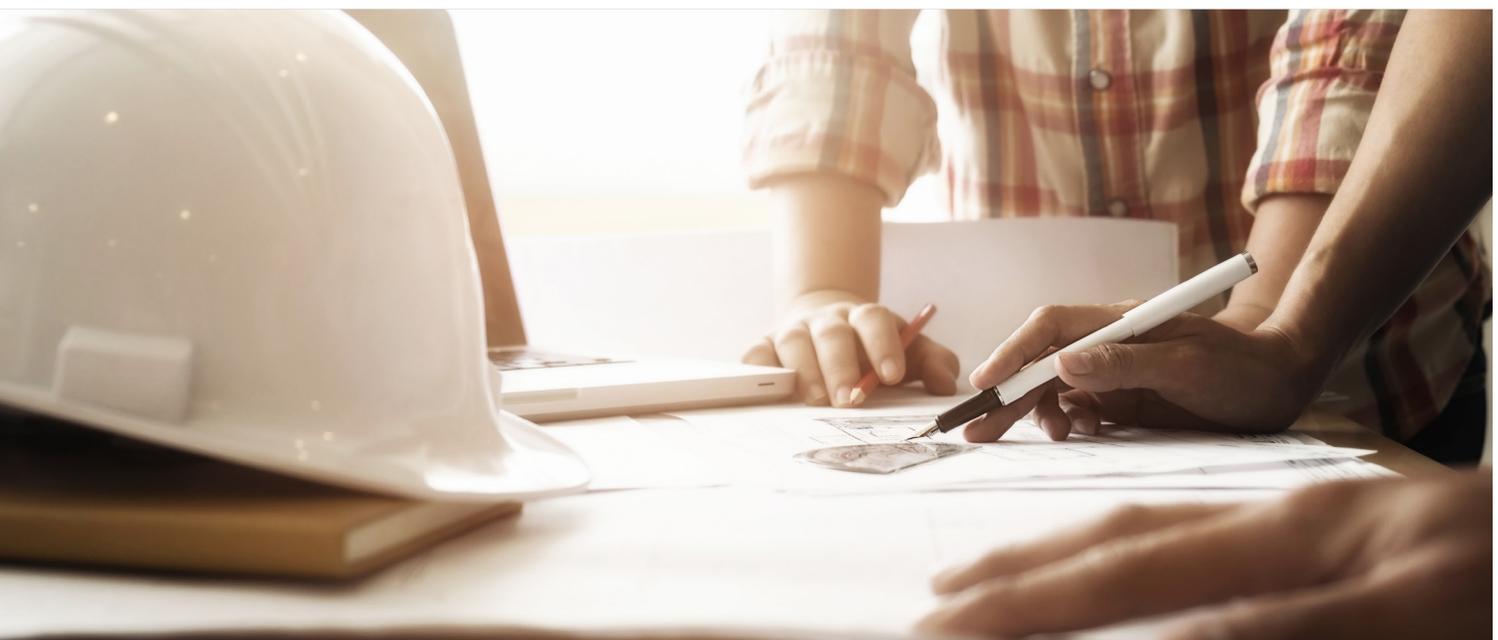

Defines the purpose, intent and limitations, definitions, and implementation

#### » **Project Management Procedures**

Presents required procedures specific to this practice that allow for the efficient and accurate management of projects

#### » **Check and Final Review Procedures**

Presents required procedures specific to this practice that are used to insure technical accuracy of the work product

## Budgeting

Construction estimating and budgeting is one of the most important parts of what Thrasher can provide you. Without accurate budgets, there is no tool to guide the design process and issues will be inevitable. By including cost estimating as a part of the project scope from day one, we are able to avoid issues before they arise and keep your project within a reasonable cost.

Our estimates go beyond the typical system — rather than simply providing cost per foot or lump sum price, Thrasher will provide contractor-grade estimates that look at every part of the project. We do detailed take-offs of materials and look at every man hour needed to complete a project and factor this in accordingly. Then, we use our thorough understanding of the local market and material costs to accurately design within your budget.

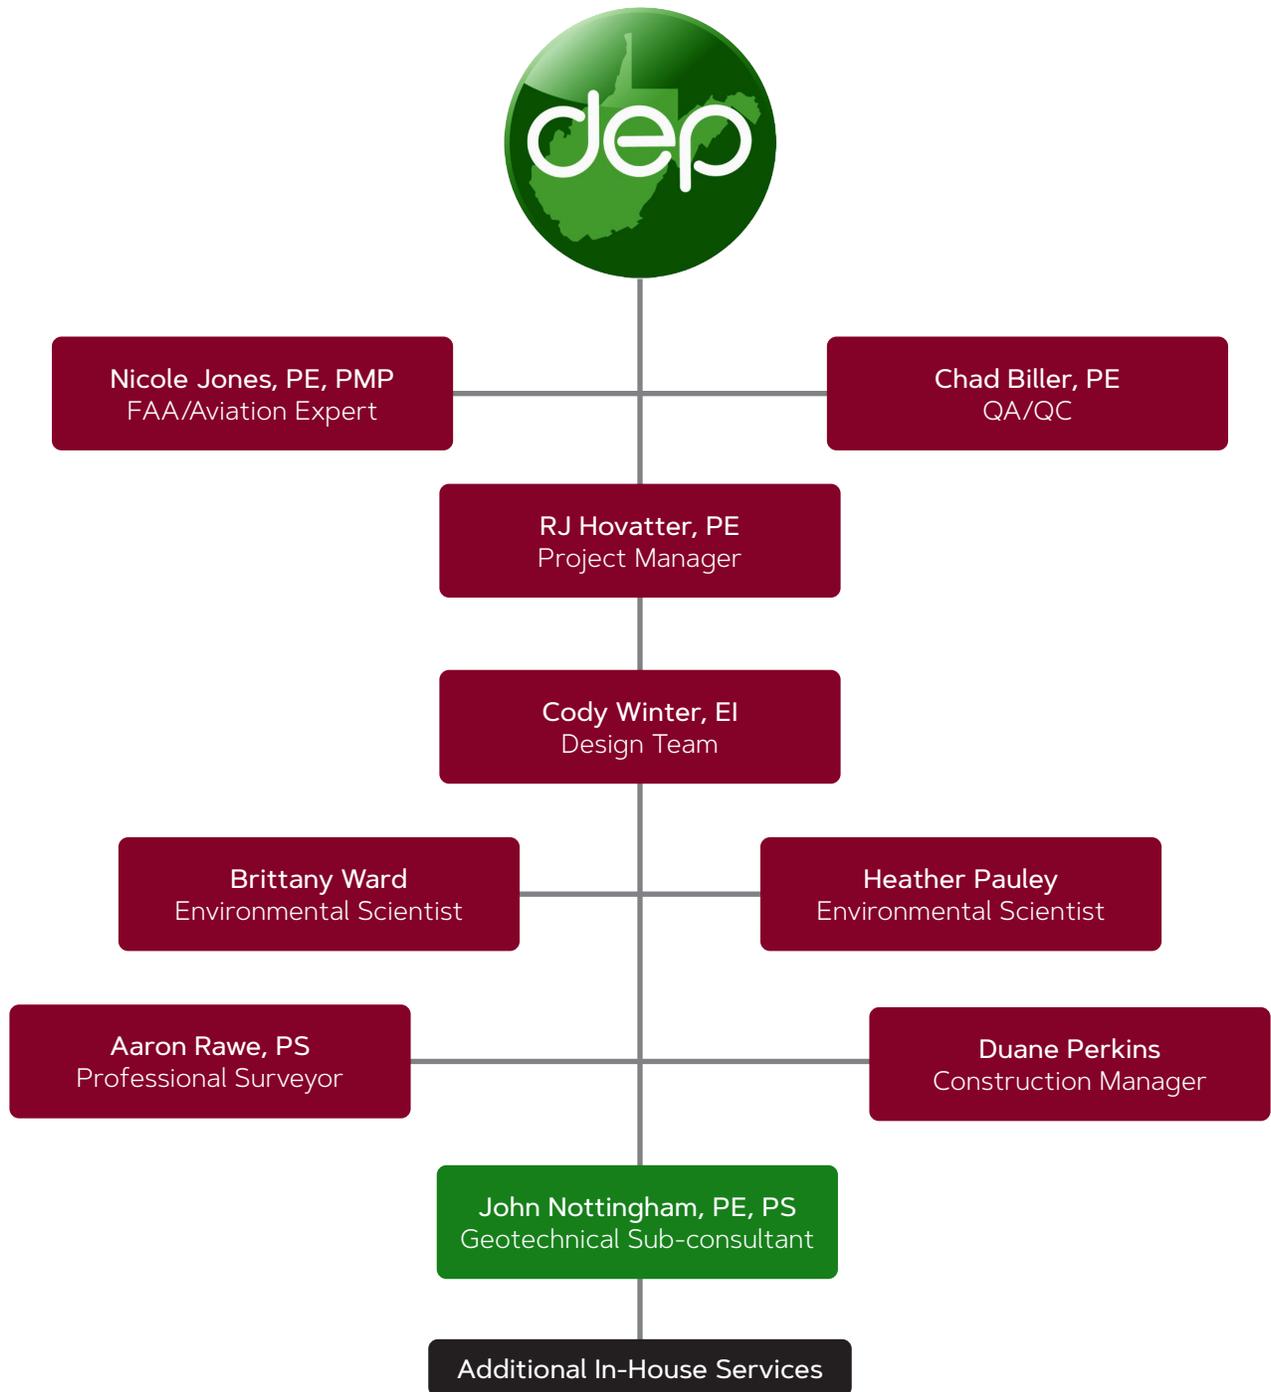

## Scheduling

Thrasher realizes the importance of establishing and maintaining project schedules. Time means money and making sure we help you spend your money wisely is our number one goal. Because of this, our team puts an emphasis on ensuring project timetables are met and communication is upheld throughout the process.

To accomplish these goals, Thrasher utilizes scheduling to track every stage of a project - from design and bidding through construction completion. We also require contractors working on our projects to regularly update their project schedules and give a detailed progress report at each job meeting, again focusing on the communication component of scheduling. This helps to ensure all parties are informed and aware of potential delays. Keeping our owners up to speed with progress is always our priority and ensures occupancy and owner supplied equipment are scheduled accordingly.

## PROFESSIONAL OVERVIEW

Richard “RJ” Hovatter, PE, is an experienced Project Manager in Thrasher’s Land Development Market. RJ brings expertise in a range of civil engineering work, including site design, slip repair, well pad design, pipeline routing, stormwater management, utility extensions, and Abandoned Mine Land reclamation. He has spent a large portion of his career evaluating and solving problems for both public and private clients, developing feasible, sustainable, and economically friendly solutions.

A large portion of RJ’s career has revolved around the design and management of Abandoned Mine Land projects. With an understanding of both the traditional AML projects and the emerging AMLR grants, RJ has handled dozens of these projects in West Virginia, with several spanning into Maryland and Ohio as well. His has a deep respect for the importance these projects play in providing safe environments for residents and strives to provides his clients with an experience that revitalizes their property and renews its possibilities.

## PROFESSIONAL OVERVIEW

Chad Biller, PE, has held a wide variety of positions for Thrasher throughout his 25-year career at the firm. A talented civil engineer, Chad has a deep understanding of the infrastructure world. His portfolio includes work in land development, abandoned mine lands, roadways, bridges, airports, industrial parks, stormwater, sidewalks, trails, and more. This wide breadth of experience means He brings a diverse perspective to his projects and a depth of technical knowledge.

As a manager, Chad provides detailed updates to clients and strong relationships with state agencies. He recognizes the importance of working as an extension of his clients' team, providing guidance in their best interest throughout the course of each project. Chad's long history with West Virginia regulatory and funding agencies is a key piece of this – this background allows him to navigate projects through these complicated steps seamlessly, collaborating with each entity for the most successful outcome possible. The same rings true during construction, where he provides a hands-on approach to keep projects on track for positive outcomes.

## PROFESSIONAL OVERVIEW

Nicole Jones, PE, PMP, oversees Thrasher's aviation team, serving as Division Lead and Project Manager for various airport improvements across the state of West Virginia and beyond. Nicole has managed a vast array of infrastructure enhancements related to the aviation industry, and helped her clients to secure millions of dollars in grants to complete their upgrades.

For her largest client, the North Central West Virginia Airport, Nicole has designed a variety of upgrades, including a runway safety study, lighting and security upgrades, ramp rehabilitation, terminal improvements, and a runway extension and widening. Her understanding of the permitting and regulatory hurdles that accompany this type of work has enabled Nicole to guide her clients through the design of safe and sustainable projects. Her meticulous design style also draws the attention of Contractors, and results in highly competitive bidding.

## PROFESSIONAL OVERVIEW

Cody Winter, EI, currently serves as a Project Engineer in The Thrasher Group's Land Development Market. Cody has an impressive background in the site design of industrial parks with airport access, runway rehabilitations, taxiway lighting upgrades, tree clearing and earth work for approach and departure surfaces, site permitting, and commercial site layouts. Cody has a familiarity with FAA standards, and is working directly under Thrasher's aeronautical experts to learn permitting and regulatory standards. He effectively communicates with clients, project's contractors, and the project team regarding site designs generated in the AutoDesk Suite.

Prior to becoming a Project Engineer, Cody spent time working on various project sites as a Project Representative. His time in this role gave him invaluable experience and familiarity with the construction process – giving him the ability to recognize potential issues before they have the opportunity to manifest into construction sets backs.

# BRITTANY WARD

ENVIRONMENTAL SCIENTIST

## Education

Bachelor of Science,  
Environmental Science  
University of Charleston

## Trainings

- > Certificate of Completion 48 Hour Army Corps of Engineers
- > Wetland Delineation Training Program
- > United States Environmental Protection Agency, Office of Wastewater Management
- > NPDES Permit Writers' Online Training Course Certification

## PROFESSIONAL OVERVIEW

Brittany Ward serves as an Environmental Project Manager at The Thrasher Group, providing technical support to water resources, land development, Abandoned Mine Lands, and transportation programs. She brings 17 years of experience in environmental permitting processes, project management, business management, and field survey analysis with a special interest in wetlands.

Brittany specializes in project oversight, with proven experience managing field teams and contractors, collecting wetland, stream quality, environmental media data, and general site condition data for site characterization to be utilized during the permitting process. She provides expertise in the management and development of federal, state, and local permitting processes, geographical information systems, Autodesk computer aided design, biological surveys, water resource management, mitigation determinations, and NEPA development to assist clients in finding the best solutions for their projects. She understands the importance of managing project budgets, staff scheduling, quality control of deliverables, and project timelines for concise, consistent, and professional results every client.

## PROFESSIONAL OVERVIEW

Duane Perkins joined Thrasher in 1992 and currently serves as a Construction Manager for the firm. He is one of the longest employed managers at the firm. He has extensive field experience on numerous land development projects, public utility pipelines, natural gas projects, wetland and grassland easement surveys, and highway work. He possesses a wide range of construction and field survey experience as well as as-built experience as a Crew Chief, but most of his time has been in a management role.

Duane's responsibilities as Construction Manager include assigning duties to the crews, interaction and coordination with the client and/or their representatives, checking the crews' field work, and assisting the crews as needed. He is a dedicated manager who strives for excellence on every project, with communication skills that make him a highly regarded supervisor. Duane is not afraid to do the work himself, and he treats everyone with respect. He enables his crews, through information, supplies, and support, to ensure they are working efficiently and in the best interest of the clients and their projects.

## EXPERIENCE

## PROFESSIONAL OVERVIEW

Aaron Rawe, PS, serves as a Survey Project Manager for Thrasher working out of the Bridgeport office. His experience covers various aspects of surveying, including routing, as-builts, preliminary, construction stakeout and boundary of construction management. He is experienced both in the field and orchestrating projects behind the scenes. He brings over a decade of experience to the team.

As part of his management role, Aaron also meets with project stakeholders, area residents, local utility companies, and the project engineers to ensure that schedules are being met and to regularly update all parties on construction status. Additionally, he is progressively responsible for the coordination of field crews, data collection, site layouts, ALTA surveys, subsidence and topographic surveys.

Aaron also assists in the management of the Mapping Department here at Thrasher. He is responsible for the coordination between photogrammetrist and field crews in helping determine the placement of photo targets and items to be located for photo control. He helps process and QA/QC all data coming in from the field before delivering it to the photogrammetrist to use for the air trig of the projects.

## Company Overview

NGE was founded in the fall of 2002 by Amy Veltri and John Nottingham, a management team with a combined forty years of industry experience. The family-based entrepreneurial spirit that defined NGE's beginnings remains evident in the innovative solutions they deliver to their loyal clients each and every day. Advances in engineering, science and technology, coupled with regulatory, legal, and compliance pressures create increasingly complex challenges for businesses. NGE strives to keep pace with these changes, with an eye to supporting their clients' changing needs.

NGE has grown into a dependable and flexible environmental and geotechnical consulting firm providing a wide range of professional services, including Environmental Consulting, Geotechnical Engineering and Environmental Construction / Remediation. With clients across the nation, NGE added a second office location in West Virginia in 2003, and seeks to grow in the future by providing consistent, quality service in a family-oriented atmosphere.

Since its inception, NGE has hired and retained the best and brightest talent in the industry. Their staff have relevant experience and qualifications to complete complex environmental and geotechnical projects. NGE's future is bright as they pursue a course of planned, measured growth to meet the challenge of expansion without diluting leadership or weakening the company's ability to perform. After establishing a solid foundation and longstanding reputation in the region and across the nation as an innovative, sophisticated, forward-thinking environmental and geotechnical consulting firm, they are proud of their roots and the progressive environment they have created for their dedicated employees.

NGE is an organization that is small enough to focus time on each client, but with a depth in talent and resources to successfully complete large and complex projects. NGE provides superior environmental and geotechnical services at a manageable price. A family oriented work atmosphere has fostered the growth of NGE's staff with the best and brightest talent in the industry.

NGE has garnered a variety of certifications and awards over the years in the environmental and geotechnical consulting industry. These accomplishments and accolades bear testament to the impeccable standards that they strive to achieve. These standards help differentiate their company from the competitors and serve to distinguish their employees as the "best of the best."

Our team's current workload will allow for immediate response to your needs, with availability to attend any meetings regarding your project.

We understand our role to be an extension of your staff, working closely to provide quality work in a timely manner. We also understand that turnaround time on a task may be short and that timely service is critical. Thrasher routinely meets aggressive deadlines. We have assembled a team of responsive professionals who possess the qualifications and experience necessary to handle all aspects of this project.

Thrasher is fully staffed with architectural, engineering, survey, construction management, and materials testing personnel to meet your needs. The employees identified as key personnel on your projects bring specific areas of expertise to the team.

**Why Thrasher?** Our team has technical qualifications, skills, experience, and resources that are integrated with a proven management infrastructure. We want to perform projects for the WVDEP and will provide high-quality engineering services in a timely and cost effective manner.

Emergency Swiger Subsidence

**Client Contact:**

Mr. Jeremy Ayers, Norther Emergency Engineer  
1000 Technology Drive | Fairmont, WV 26554  
304-203-4058

The Thrasher Group prepared construction plans and bid documents to both gravity and pressure grout

beneath a residential structure to stabilize the mine. The plans called for micropiles under the existing structure's addition for support and three micropiles along each end of the residence.

The addition was founded onto the micropiles and three steel beams were installed under the structure to prevent any future subsidence.

Thrasher provided limited construction administration during the process.

 **INDIANA DEPARTMENT OF  
NATURAL RESOURCES**  
Terre Haute Regional Airport  
Mine Grout Stabilization

Project manager RJ Hovatter worked with the Indiana DNR to prepare construction documents for a mine grout stabilization project at the Terre Haute Regional Airport. The project stabilized the runway, terminal, building, radar tower, and educational building.

During plan production, coordination with the FAA was crucial to assure that the project could be accomplished safely with the least disturbance to the airport as possible. The FAA also provided details for the reclamation of the grout holes to ensure the runway integrity was not compromised.

 **FALCON CONSULTING & MANAGEMENT**  
West Ridge Mine Grouting

**Client Contact:**

Mr. Brett Coker, Project Manager  
PO Box 4034 | Morgantown, WV 26504  
304-692-9842

The Thrasher Group was hired by Falcon Consulting and Management to prepare grout mine stabilization plans and specifications for various areas within the West Ridge development in Morgantown, WV. These plans included grouting in multiple deep mined seams within the development. The plans stabilized the main access road and parts of Phase 1, Phase 3, and Phase 4 of the development.

Thrasher also provided construction monitoring and inspection during the grouting process. Once grouting was complete, we provided as-built plans and documents to the client to represent the locations of the drilled grout holes and the grout takes documented for each hole.

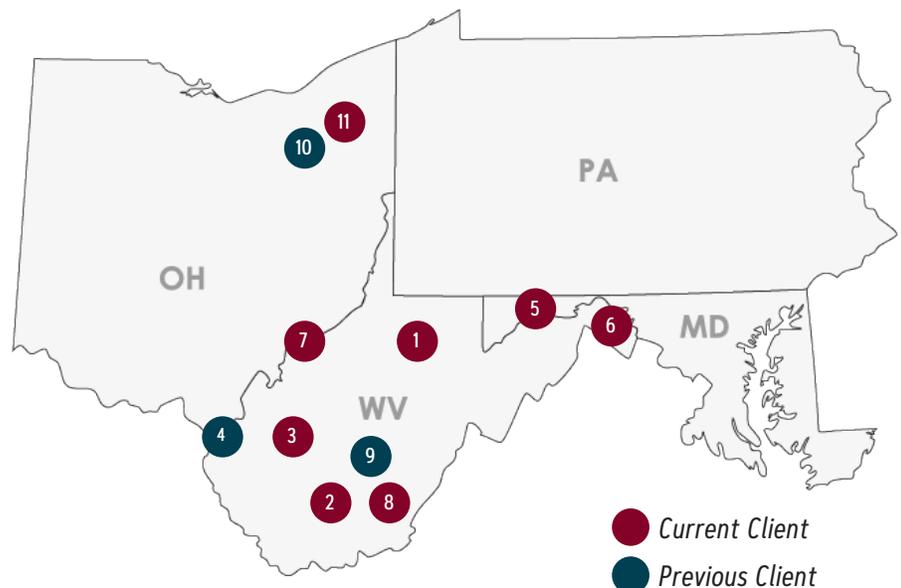

The Thrasher Group has performed a plethora of work at airports across the region. Our firm has experience with architecture, engineering, planning, and surveying for these clients, from small sized projects to long-term contracts. Some of the projects we've been a part of over the last few years at various airports include:

- » Construction of two Hangars for MHIRJ
- » Construction of 10,000SF Hangar
- » Terminal Renovations
- » Fuel Farm Modifications
- » Airfield Taxiway Lighting and Signage Upgrades
- » Installed Emergency Backup Generator
- » Perimeter Fence Relocations and Improvements
- » Logistics Park (7 Acres and 18,000SF Building)
- » Aerotech Park (47 Acres)
- » Expanded Concrete Parking Pad at Commercial Apron
- » Mill and Overlay at T-Hangars
- » Commercial/GA Ramp Rehabilitation
- » Construction of Taxiway H
- » Extension of Taxiway A
- » Reconstruction of Taxiway to FSU Hangar and Parking Pad
- » Runway 1-19 Rehabilitation
- » Taxiway A Reconstruction
- » Runway 10-28 Seal Coat and Taxiway E Crack Seal
- » Runway 10-28 Striping
- » Construction of New Taxilane
- » Terminal Lighting Upgrades
- » Access Road Overlay
- » Raleigh Industrial Park
- » Construct Parallel Taxiway F
- » Runway 1-19 Restriping and Airfield Sign Replacement
- » Environmental Clearance on General Aviation Improvement Projects
- » Terminal Security Upgrades
- » Terminal Roof Renovations Phase 1
- » Rental Car — Car Wash Upgrades
- » Rental Car Generator
- » Acquired Jet Bridge
- » Stormwater Assessment
- » Parking Garage Access Control System
- » Perimeter Fence Upgrades
- » Shooter Detection System
- » Rehabilitate Runway 5-23 Phase 6
- » Elevator Tower
- » Industrial Park
- » Survey
- » Environmental Document for release of land for sale/development
- » Industrial Park
- » Renovations to Pilot Lounge
- » Hangar Renovations
- » Perimeter Airport Fence Upgrades.

12. A.	<p>Is your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher performs engineering design services to the WV DEP for drainage, portal seals, highwall and other remediation projects, as well as water line and water treatment plant projects related to AML. Numerous projects involving land remediation, storm water drainage, slip repair, mass grading in relations to site development and highway projects are engineered by the firm on a regular basis.</p>
	NO
B.	<p>Is your firm experienced in Soil Analysis?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher maintains an AASHTO Certified materials testing lab at both the Bridgeport and Beckley offices. Soil analysis experience is specifically in gradation and classification.</p>
	NO
C.	<p>Is your firm experienced in hydrology and hydraulics?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Throughout the state, Thrasher has done planning and design of bridges for the West Virginia department of highways and the design of multiple private and municipal development projects located within floodplains. Thus, Thrasher has extensive experience in hydrology. We also have a vast amount of experience in hydraulic modeling for water and wastewater projects throughout West Virginia</p>
	NO
D.	<p>Does your firm produce its own Aerial Photography and Develop Contour Mapping?</p> <p><input checked="" type="checkbox"/> Description and Number of Projects: Thrasher acquires aerial imagery using in-house resources on smaller area projects. We own and operate three UAS (unmanned aerial systems) for a variety of imagery missions for projects up to approximately 500 acres. For large mapping projects, we use commercial flying service. Thrasher has three FAA Certified pilots. Thrasher has expertise and software in-house and routinely performs aero triangulation, planimetric compilation, surface modeling, contour mapping and digitally rectified imagery. Thrasher has mapped and flown hundreds of projects within the last year.</p>
	NO
E.	<p>Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher has designed more water line systems than any other West Virginia firm. Projects include new systems, extensions, and replacements of water line distribution systems, many of which have been affected by AML. Design of the projects includes lines, booster stations, water treatment plants, and storage facilities. Thrasher's analysis and design also includes improvements and alternatives for water sources deemed ground water under the direct effect of surface water.</p>
	NO
F.	<p>Is your firm experienced in Acid Mine Drainage Evaluation and Abatement Design?</p> <p><input checked="" type="checkbox"/> YES Description and Number of Projects: Thrasher has been awarded and has successfully completed numerous reclamation projects for the WV DEP related specifically to acid mine drainage and abatement, as well as multiple passive treatment systems designed to watershed protection groups. The Charleston, WV branch of our company designed and award-winning water treatment plant for Martinka mines in Marion County, West Virginia to treat mine drainage.</p>
	NO

14. PROVIDE A LIST OF SOFTWARE AND EQUIPMENT AVAILABLE IN THE PRIMARY OFFICE WHICH WILL BE USED TO COMPLETE AML DESIGN SERVICES

The Thrasher Group, Inc. will design work for AML utilizing one of the largest networks of computer aided design (CAD) equipment, software and trained personnel in the state of West Virginia.

Connected through a virtual private network, our cad staff has the ability to share necessary plans among our locations. This will allow work designed for AML to be prepared and updated at the office location that best meets the needs of the scope of services.

Civil 3D, Carlson and Microstation V8 Software is utilized at 35 CAD stations throughout our locations. Additionally, equipment includes 10 large format (Size E) plotters and 5 large format plotter / scanners. CAD plans are prepared by both dedicated cad employees and by staff engineers and engineering technicians in each of the firm's offices.

Thrasher also utilizes top-of-the line survey equipment. Our survey work is accomplished with global positioning systems (GPS) and electronic distance measuring (EDM) survey stations with data gathering capabilities. The survey crews and office support staff generate mapping deliverables in virtually any digital format referenced to specified projection systems.

Additional survey services include: high accuracy monumentation, astronomic observations / orientation, NGS blue booking, hydrographic, terrestrial scanning, 3D asbuilts, 3d monitoring, sub-surface utility location / designation. The field crews are all equipped with late model four-wheel drive vehicles stocked with the most modern equipment available to perform professional land surveying services.

- 111 TRIMBLE GNSS UNITS
- 68 TRIMBLE ROBOTS
- 2 PRECISE DIGITAL FIRST ORDER LEVELS WITH INVAR RODS
- 39 LEICA, NIKON OR TOPCON TOTAL STATIONS ALL MANAGED BY
- TRIMBLE TSC3 FIELD COMPUTERS
- 2 REMOTE CONTROLLED/UNMANNED MAPPING AERIAL PLATFORM
- HYDROGRAPHIC SURVEY VESSEL
- CIVIL 3D
- CARLSON AND MICROSTATION V8 SOFTWARE
- 35 CAD STATIONS
- 10 LARGE FORMAT (SIZE E) PLOTTERS AND
- 5 LARGE FORMAT PLOTTER / SCANNERS
- 7 3D SUB-SURFACE UTILITY LOCATORS

ABANDONED MINE LANDS (AML) CONTRACTOR INFORMATION FORM

You must complete this form for your AML contracting officer to request an eligibility evaluation from the Office of Surface Mining Reclamation and Enforcement (OSMRE) to determine if you are eligible to receive an AML contract. This requirement can be found under OSMRE's regulations at 30 CFR 874.16. **NOTE:** This form must be signed and **dated within 30 days** of submission to be considered for a current bid.

**Part A: General Information**

Business Name: The Thrasher Group, Inc.  
Tax ID #: 55-0633596  
Address: 600 White oaks Blvd.  
City, State, & Zip: Bridgeport, WV 26330  
Phone Number: 304-205-8809  
Email Address: rhovatter@thethrashergroup.com

**Part B: Obtain an Organizational Family Tree (OFT) from the Applicant Violator System (AVS)**

If you plan to certify the existing AVS information or submit updates under Part C, you must include an OFT. Instructions for downloading an OFT from the AVS can be found at: <https://www.osmre.gov/sites/default/files/2022-02/OMB%201029-0119%20instructions.pdf>. If you require assistance you may contact the AVS Office by phone at: 800-643-9748, or by email at: [avshelp@osmre.gov](mailto:avshelp@osmre.gov).

**Part C: Certifying and updating information in the AVS**

Select one of the options, follow the instructions for the selected option, sign, and date below.

I, Richard G. Hovatter, Jr, have express authority to certify that:  
(Print Name)

1. Our business is listed in the AVS. The information is accurate, complete, and up to date. (If you select this option, you must attach an Entity OFT from the AVS to this form). Do not complete Part D.
2. Our business is in the AVS. The information needs to be updated. (If you select this option, you must attach an Entity OFT from the AVS to this form). Complete Part D to provide the missing or corrected information.
3. Our business is not listed in the AVS. The information needs to be added. Complete Part D to provide the information.

**PAPERWORK REDUCTION STATEMENT**

The Paperwork Reduction Act of 1995 (44 U.S.C 3501) requires us to inform you that: Federal Agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. This information is necessary for all successful bidders prior to the distribution of AML funds, and is required to obtain a benefit.

Public reporting burden for this form is estimated to range from 15 minutes to one hour, with an average of 30 minutes per response, including time for reviewing instructions, gather and maintaining data, and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement, 1849 C Street, NW, Room 4559, Washington, DC 20240.
