The unique features stipulated here are specific to the configuration associated with **CRFQ GEO26*02 for a Benchtop Powder X-Ray Diffraction (XRD) Instrument** for the West Virginia Geological and Economic Survey. Bruker solely manufactures the D6 Phaser Benchtop Diffractometer; no other company can produce these features.

The D6 PHASER – X-ray Powder Diffraction and Materials Science Benchtop Analyzer Diffractometer, as configured, **meets and or exceeds the requirements** as shown on **SPECIFICATIONS**, detailed as follows:

Technical Justification for the D6 Phaser

Angular accuracy: $\pm 0.01^\circ 2\theta$ or better.

Bruker Response: The D6 Phaser is the only benchtop in the market that guarantees these requirements over the entire range of the goniometer.

ANGULAR ACCURACY GUARANTEE

Unique to Bruker D6 PHASER

Guaranteed angular accuracy of better than $\pm 0.01^\circ 2\theta$ traceable by included corundum reference material over the entire accessible range of the standard. No other vendor offers this accuracy over the entire angular range for all instrument geometries and wavelengths.

Unique benefit

A higher degree of angular accuracy results in less ambiguity between the comparison of raw data and reference patterns (Phase ID) and allows the calculation of d-spacings and lattice parameters with more accuracy.

Peak resolution: $\leq 0.03^\circ 2\theta$ FWHM.

Bruker Response:

BEST PEAK RESOLUTION

Unique to Bruker D6 PHASER

The best achievable peak width is equal to or better than $0.03^\circ 2\theta$ (FWHM). This value is smaller than any other specification on the market for this class of diffractometer.

Unique benefit

A smaller instrumental contribution to peak width allows for closely spaced peaks to be better resolved and for sample micro-structural effects such as crystallite size and non-uniform lattice strain, which produce sample-generated peak broadening to be better calculated and characterized.

Automated multi-position sample changer (≥ 12 samples) with integrated sample rotation.

Bruker Response: The D6 Phaser is the only benchtop with a 12-sample changer.

12-POSITION ROTATING SAMPLE CHANGER STAGE

Unique to Bruker D6 PHASER

The **only benchtop diffractometer that supports 12 positions** on an automated powder sample-changer, which also includes sample spinning during data collection, giving it at least 4 more sample positions than any other benchtop XRD on the market.

Unique benefits

- $\geq 50\%$ higher throughput when running in sample changer mode.
- **Includes sample spinning** during data collection for each sample, ensuring optimum particle statistics.

Detector with a high signal-to-noise ratio and suppression of background fluorescence effects of Fe, Co, Mn, or Ni.

Bruker Response: The D6 Phaser is the only system in the market that meets this requirement.

LYNXEYE XE-T 0D/1D/2D-MODE DETECTOR

Patents: EP 1 647 840 A2, EP 1 510 811 B1

The LYNXEYE XE-T is the only fluorescence-eliminating (≤ 380 eV at 25°C, equivalent to $\leq 5\%$ at 8keV with copper radiation) compound silicon strip detector for benchtop diffractometers. This energy resolution results in Cu K β filtering down to a level of less than 0.1% relative to Cu K α and allows operation without the need for K β -filters or secondary monochromators.

Unique benefit

Only the LYNXEYE XE-T detector can be operated at full speed while also discriminating unwanted wavelengths from the X-ray tube and sample fluorescence. This leads to diffraction patterns with the highest signal/noise and the best peak/background ratio, enabling a superior lower limit of detection and quantification of crystalline phases.

Must support advanced scan modes

Bruker Response: The D6 Phaser is the only system in the market that meets this requirement.

ADVANCED SCAN MODES (VDO, BRAGG2D, and Phi1D)

Patent: US11275039B2

Unique advanced scan modes include:

- **Variable Detector Opening (VDO)**, which allows computer-controlled switching on/off detection strips as a function of 2Theta to reduce air scatter at low angles and maximize sensitivity at high angles.
- **Bragg2D** and **Phi1D** – Scan modes to detect and visualize sample preparation issues such as particle size, inhomogeneity, and preferred orientation.

41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.
- c. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
 1. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
 2. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

43. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$1 million, the Vendor must submit to the Agency a disclosure of interested parties prior to beginning work under this Contract. Additionally, the Vendor must submit a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-work interested party disclosure, within 30 days following the completion or termination of the contract. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.
