Mr. Hager:

Thank you for the opportunity to review the recent expression of interest to provide architectural/engineering services pursuant to HB 3429 for the West Virginia Department of Environmental Protection, Division of Land Restoration, Office of Abandoned Mine Lands and Reclamation (WVDEP-DLR-AML). Pursuant to your request, Navigator Environmental & Technical Services, Inc. ("Navigator") is pleased to affirmatively express interest in providing architectural/engineering services in support of future WVDEP-DLR-AML projects.

The attached document, transmitted herewith, is responsive to *Centralized Expression of Interest: AML-EOI Pre-Qualification for Consultants (CEOI 0313 DEP2600000001)* dated August 1, 2025.

Sincerely,

James W. Fisher  
Project Manager

## INTRODUCTION

---

Navigator Environmental & Technical Services, Inc. (Navigator), is a full-service environmental, mining and civil engineering consulting company that is owned and staffed by industry professionals and subject matter experts with unique scientific and engineering perspectives. Our professionals have extensive experience in the civil, mining, biological and environmental disciplines. We are recognized experts in the US mining industry with breadth of experience from the mine site to the courtroom or boardroom. Navigator's staff have extensive experience managing and completing complex mining-related projects.

Navigator is pleased to affirmatively respond with its Expression of Interest (EOI) to provide architectural/engineering services for the West Virginia Department of Environmental Protection, Division of Land Restoration, Office of Abandoned Mine Lands and Reclamation (WVDEP-DLR-AML). Navigator has an extensive history of providing engineering/environmental services for its clients for work on West Virginia Department of Environmental Protection, Division of Mining (WVDEP-DMR) permit applications. Navigator's staff works closely with multiple client-companies to provide unique environmental consulting services at a high level while working seamlessly with company staff and management. This is based on years of experience at operating and management levels within large publicly traded coal companies. Simply put, Navigator brings experience and expertise to plan, direct and execute complicated environmental permitting projects from a company perspective with focus on timeliness and results.

## SUMMARY OF SERVICES REQUESTED

---

It is understood that the WVDEP-DLR-AML is soliciting pre-qualifications for the purpose of making available a list of pre-qualified firms to provide architectural/engineering services pursuant to HB 3429.

Navigator understands the projects goals and objectives to include but are not limited to those listed below:

All Work shall comply with the Infrastructure Investment Jobs Act (IIJA), including compliance with the Davis-Bacon and Build America, Buy America (BABA), as applicable and all Federal, State, and Local laws.

Planning Work encompasses all related consultations, investigations, report generation, applications, etc. required to perform the Work, which may include, but may not be limited to: National Environmental Policy Act (NEPA) consultations, West Virginia Division of Natural Resources (WVDNR) consultation, West Virginia Historic Preservation Office (SHPO) consultation, WV Regional Planning consultation, US Forest Service consultations, US Fish and Wildlife Service (USFWS) consultations, and any other consultation(s) or permit(s) needed to perform the Work. The above includes but is not limited to bat studies, threatened and endangered species investigation / analysis / report generation, water quality sampling, and data collection / analysis.

Realty Work encompasses all necessary research and subsequent right of entry agreements being set into place for the sites to be sufficiently and legally investigated, designed, and for a final design to be constructed. This may include, but may not be limited to: performing courthouse research to determine legal property ownership and dutifully documenting the findings, obtaining Exploratory Rights of Entry (EROE) from affected landowners, obtaining Construction Rights of Entry (CROE) from landowners, keeping logs of all conversations with landowners, data collection, reporting, and possessing the capability of having boundary surveys performed on an as-needed basis. The successful A/E firm must obtain the rights of entry prior to performing any fieldwork on-site, and these rights of entry must include the successful A/E firm, the WVDEP-DLR-AML, and Office of Surface Mining Reclamation & Enforcement (OSMRE).

Design Work which may include, but may not be limited to: Civil, Geological, Hydrological, Survey (mapping), Process, Structural, Electrical, etc., as applicable. This encompasses all required engineering and survey (including current mapping and other related services) necessary to successfully design an engineered, permanent solution that fully addresses the issues and problems

that each project presents. This also includes site and geotechnical investigations. Each design must fully remove and mitigate dangers to private individuals or the public that are currently present, not introduce new dangers, and be stamped by a Registered Professional Engineer in the State of West Virginia for design and Registered Professional Surveyor in the State of West Virginia for survey for deliverables. Design Work includes but is not limited to: National Pollutant Discharge Elimination System (NPDES) construction stormwater General Permit registration, West Virginia Department of Highways (WVDOH) MM-109 encroachment permits, Army Corps of Engineers (USACE) consultations, Department of Health Permits (for water lines, if applicable), and county permits as applicable, including floodplain permits. Design Work could also include but is not limited to: developing construction plans and technical specifications for all aspects to reclaim mine portals, drainage controls and systems, slope stabilization, coal refuse and mine spoil reclamation, stream and / or channel restoration, subsidence repair, temporary and permanent access or accesses for construction and future maintenance, stormwater and erosion and sediment control, regrading and revegetation, any required water treatment systems, and any remediation for all other conditions encountered on the project sites. The successful A/E firm must obtain, maintain, and release all required permits.

Construction Oversight Work including but may not be limited to: Daily Inspection with documentation for the duration of the Construction and through the warranty period until final release, Engineering Oversight and Support, review and approval of contractor-provided as-builts, and Final Engineer's Certification Report of the project.

## SCOPE OF SERVICES

---

Navigator understands that the professional services sought include full-service assessment, design, bid development, and monitoring for a variety of mining related projects. These can involve reclamation activities, mine and refuse fire situations, mine subsidence, closure of mine openings, a variety of water treatment and AMD projects, as well as potable water line projects. All projects shall comply with the Infrastructure Investment Jobs Act (IIJA), including compliance with the Davis-Bacon and Build America, Buy America (BABA), as applicable and all Federal, State, and Local laws.

Abandoned mines create unique issues in many areas of the United States. The staff of Navigator have extensive experience in all facets of the stated problem associated with abandoned mine lands. Abandoned mine land issues are often associated with environmental impacts as well as public safety impacts. These can include a wide variety of concerns from public safety (such as properly sealing mine openings and assessing damage potential from subsidence) to environmental (such as water

treatment, mine barrier assessment, and reclamation). Many issues have both environmental and public safety concerns such as mine and refuse fires, public water line projects, ground water assessments, biological assessments, and stream restoration.

Through our extensive coal industry experience, we have dealt with abandoned mine issues that impacted active operations.

- Reclamation of abandoned surface and deep mines
- Closure and reclamation of abandoned portals
- Assessing and mining through burning underground mine fires
- Assessing and mitigating burning coal refuse piles
- Acid mine drainage treatment both active and passive
- Mine barrier analysis and mine pool assessment
- Extensive pumping and treatment experience
- Interaction between abandoned mine pools and active mine pools
- Resolution of property issues to facilitate projects

Most importantly, Navigator understands the need to adhere to established schedules for project initiation, deliverables, and completion. Be responsive to funding and compliance timelines under the Infrastructure Investment and Jobs Act (IIJA) and the Surface Mining Control and Reclamation Act (SMCRA). Coordinate effectively with agency staff, subcontractors, and permitting authorities to avoid delays. Proactively identify risks and propose mitigation strategies to stay on track.

---

#### MANAGEMENT SUMMARY

---

Navigator offers complete project management services. Projects will be initiated through James (Will) Fisher, Project Manager. Mr. Fisher will delegate tasks to senior managers or subcontractors of Navigator on an as needed basis. It is expected that Navigator employees will conduct most of the anticipated work. These will likely include initial site assessments, engineering, permitting, water testing and system design, coordination of work with subcontractors, development of bid package materials, and construction monitoring. Subcontractors are anticipated to be utilized for surveying, geotechnical services, shallow ground water investigations, appraisal services and other specialty services. Mr. Fisher will work closely with the senior management to track progress and promptly convey any issues with agency staff for a quick resolution to keep the project on track.

Senior level staff will directly manage all projects and attend any required client meetings. Navigator staff have a proven record of managing complex environmental and engineering issues related to development of mining and reclamation plans, water treatment designs, bid package development, construction management, and system startup and commissioning. Navigator staff have experience with development of numerous water treatment facilities and systems across West Virginia, Pennsylvania, Kentucky, Virginia and Indiana valued in hundreds of millions of dollars with a stellar success rate for cost reduction and project completion.

## WORK PLAN

---

Navigator is comprised of a group of industry veterans with a wealth of hands-on project management experience and design. We have directly managed and implemented projects for publicly traded companies. We have also worked with specialty consultants for development of innovative new processes. From this variety of experiences, we can tailor our work plan to fit the appropriate project. Each project is unique and may require different management methods depending on the type of project delivery method desired.

Navigator utilizes a variety of project management models depending upon the needs of the client. These methods could include models such as the Project Evaluation and Review Technique (PERT) method for longer duration and more complex projects or the Critical Path Method (CPM) for the various projects. The method used will depend on client preference and project complexity. While different tools are available for tracking projects, the following basic project development plan will be used:

- Participate in a project scoping meeting with relevant stakeholders
- Undertake a multi-disciplinary review and site visit
- Identify task dependencies and predecessors
- Establish project milestones to reach desired outcome
- Develop estimates of time required for each task and milestone
- Identify necessary resources (personnel, equipment, subcontractors, etc.) required to complete each task and milestone
- Develop project budget based on the time and resources identified
- Schedule regular project meetings to review project progress, budgets and variances

The typical project work flow would likely include the following:

- Field work and surveying to establish control and document existing site conditions
- Identification of property owners and utilities in the project area
- Identification of problem and review of available solutions to address the project requirements
- Design of project features
- CAD detailing of designed features
- Development of technical specifications to implement proposed design

Navigator will implement an appropriate management model and apply necessary resources to complete the project in a timely and efficient manner. Through our project experience, we have found that stakeholder and client engagement throughout the process is critical to achieving the desired goals.

---

#### QUALIFICATIONS, EXPERIENCE, AND PAST PERFORMANCES

---

Navigator has held a Certificate of Authorization (COA) with the West Virginia Board of Professional Engineers (WV PE Board) since its inception in 2015. Navigator currently has two (2) registered Professional Engineers with the WV PE Board who will oversee the work and sign and seal all design documents, plans, etc.

Navigator has extensive experience in all facets of coal mining related permitting, engineering, water treatment, and project management. Navigator has successfully conducted projects in West Virginia, Pennsylvania, Kentucky, Virginia, Wyoming, and Alberta & British Columbia, Canada. Navigators experiences include:

Produced an expert report in mining and hydrology in Ohio Valley Environmental Coalition, et al. v. Pocahontas Land Corporation in Civil Action No. 2:15-cv-15515, in the United States District Court for the Southern District of West Virginia	Jackson Kelly, PLLC West Virginia

Navigator is comprised of industry veterans who have dealt with the design and implementation of numerous relevant reclamation and remediation projects. This includes staff with senior management and senior engineering roles with Alpha Natural Resources, Massey Energy, and Peabody Energy. Navigator staff have dealt with complex environmental, engineering, and regulatory issues. We have direct experience with hundreds of mine drainage treatments systems for a variety of treatment parameters. We have been involved with management and engineering of over 100 coal refuse disposal areas, we have managed and designed numerous water management systems (surface and underground), and have worked effectively with state and federal regulators to find pragmatic, reliable and effective solutions.

## KEY PERSONNEL

Navigator has staff and offices in Hurricane, Beaver, and Summersville, West Virginia. The current staff is 2 Executive/Professional, 4 Professional, 4 Technical, and 2 Administrative. Navigator has 2 Professional Engineers registered with the WV PE Board and other various state boards and 1 is registered Professional Engineer in British Columbia, Canada.

## CONCLUSION

---

The management and staff of Navigator appreciate the opportunity to submit this EOI and look forward to further discussions. Navigator management and staff are eager to assist the WVDEP-DLR-AML on upcoming projects.

12. A. Is your firm's personnel experienced in Abandoned Mine Lands Remediation/Mine Reclamation Engineering?

YES Description and Number of Projects: \_\_\_\_\_

NO **Navigator has not worked on previous AML project but has employees who have been in the mining industry for over 20 years.**

B. Is your firm experienced in Soil Analysis?

YES Description and Number of Projects: \_\_\_\_\_

NO **X**

C. Is your firm experienced in hydrology and hydraulics?

YES **X** Description and Number of Projects: **Navigator's staff are experienced in hydrology and hydraulics as it relates to AML Projects in WV. Navigator's staff has worked on WVDEP Surface Mine applications sizing channels, sediment structures, culverts, waterline, etc.**

NO

D. Does your firm produce its own Aerial Photography and Develop Contour Mapping?

YES **X** Description and Number of Projects: **Navigator's staff utilizes publicly available data to produce contour mapping on areas that have not been recently disturbed. More recently disturbed areas would be contracted out for contour mapping. Navigator uses its in house drone for aerial photography.**

NO

E. Is your firm experienced in domestic waterline design? (Include any experience your firm has in evaluation of aquifer degradation as a result of mining.)

YES Description and Number of Projects: \_\_\_\_\_

NO **X**

F. Is your firm experienced in Acid Mine Drainage  
Evaluation and Abatement Design?

YES ☒ Description and Number of Projects: \_\_\_\_\_

---

NO

G. Is your firm experienced in construction oversight?

YES ☒ Description and Number of Projects: **Navigator was the onsite construction engineer's and managers for biochemical reactor systems being constructed in WV and British Columbia Canada. Navigator was also the onsite construction engineer and project manager for a design/build on a small dam in Wyoming to construct a reservoir used to irrigate over 500 acres. Recently Navigator provided construction oversight on crane pads for wind turbine maintenance.**

NO

13. PERSONAL HISTORY STATEMENT OF PRINCIPALS AND ASSOCIATES **RESPONSIBLE FOR AML PROJECT DESIGN** (Furnish complete data but keep to essentials)

NAME & TITLE (Last, First, Middle Int.)	YEARS OF EXPERIENCE		
	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF AML RELATED DESIGN EXPERIENCE:	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE:
<b>Cook, Thomas, P Special Consultant</b>		<b>30</b>	

Brief Explanation of Responsibilities

**As Special Consultant to Navigator Mr. Cook will be relied upon to assist as a technical advisor for projects. Mr. Cook has 30 years experience ranging from a Coal Geologist with WVGES to Vice President - Environmental with public traded coal companies and founder of Navigator. He routinely manages and participates in high profile mining related projects for clients and conducts reclamation liability assessments, mining and reclamation planning, geologic / hydrologic investigations, oversee coal reserve analysis, and manage coal mine permitting projects in the US and Canada. He has extensive experience in specialty environmental and operational management services for large and complex projects associated with new mine development, reclamation, stream and wetland creation, advanced and non-traditional water treatment, design-build selenium treatment systems, innovative permitting solutions, compliance with new and increasingly stringent environmental regulation.**

EDUCATION (Degree, Year, Specialization)

**BS, 1995, MS, 1998, Geology  
MBA, 2002, Business Administration**

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

REGISTRATION (Type, Year, State)

NAME & TITLE (Last, First, Middle Int.)	YEARS OF EXPERIENCE		
	YEARS OF AML DESIGN EXPERIENCE:	YEARS OF AML RELATED DESIGN EXPERIENCE:	YEARS OF DOMESTIC WATERLINE DESIGN EXPERIENCE:
<b>Wilson, David A. President</b>		<b>21</b>	

Brief Explanation of Responsibilities

**Mr. Wilson provides technical expertise and support related to mitigation site assessments, environmental permitting, and consent decree compliance. Experienced with benthic macroinvertebrate monitoring, mitigation obligations and reporting, stream and wetland restoration and design, aquatic biology monitoring and reporting, and other environmental related tasks. Over the past 8 years he has conducted over 150 fish tissue selenium-related monitoring annually. Extensive experience with stream delineations, HGM, WVWRAM, and SWVM as well as specializing in non-jurisdictional WOTUS. He has completed numerous accredited river, stream, and wetland design, monitoring, and restoration classes.**

EDUCATION (Degree, Year, Specialization)

**MS, 2004, Biological Sciences  
BS, 2001, Chemistry (ACS Accredited)**

MEMBERSHIP IN PROFESSIONAL ORGANIZATIONS

**Navigator Environmental & Technical Services, Inc. (Navigator), is a full-service environmental, mining and civil engineering consulting company that is owned and staffed by industry professionals and subject matter experts with unique scientific and engineering perspectives. Our professionals have extensive experience in the civil, mining, biological and environmental disciplines. We are recognized experts in the US mining industry with breadth of experience from the mine site to the courtroom or boardroom. Navigator's staff have extensive experience managing and completing complex mining-related projects.**

**Navigator has a staff with a unique multi discipline technical emphasis including civil engineering, geology, biology, mine land reclamation, water quality and aquatic life.**

**Navigator's employees have a long and positive relationship with WV DEP DMR and would like to develop the same relationship with WV AML.**

I understand that failure to confirm the receipt of addenda may be cause for rejection of this bid. I further understand that any verbal representation made or assumed to be made during any oral discussion held between Vendor's representatives and any state personnel is not binding. Only the information issued in writing and added to the specifications by an official addendum is binding.

NOTE: This addendum acknowledgment should be submitted with the bid to expedite document processing.

# Office of Surface Mining Reclamation and Enforcement

## Instructions for Completing the AML Contractor Form OMB #1029-0119

**Purpose:** The Office of Surface Mining Reclamation and Enforcement Applicant/Violator System (AVS) office is required to conduct eligibility checks for businesses performing abandoned mine land (AML) reclamation work to ensure those businesses are not associated with any coal mining violations in accordance with the Surface Mining Control and Reclamation Act (SMCRA). This form is used to update the AVS database which maintains relationship information between individuals and their associated businesses. If you have any questions, please contact the AVS Office at 800-643-9748.

**Part A: General Information:** Part A should be completed by the AML Contractor. You can find an electronic fillable form on our website (<https://www.osmre.gov/programs/regulating-coal-mines/avs>).

**Part B: Obtain an Organizational Family Tree (OFT):** Part B should be completed by the AML Contractor. An Organizational Family Tree (OFT) indicates the relationships between individuals and their associated business.

**You can obtain an OFT two ways:**

1. Call the AVS Office at 800-643-9748 to request your company's OFT.
2. Go to the AVS website (<https://avss.osmre.gov>). Click "Access AVS", and then "Login as Guest". Place your cursor on the "Entity" Module and click. Type your business name (or entity number) in search box and press enter. Select your company and then click on the "Relationship" tab to display your Entity OFT information. Print the Entity OFT from AVS. Review the OFT, if you need to make updates complete Part D. Attach the OFT to your AML Contractor Form.

*If you are a new company or this is your first AML bid:* Your business is most likely **not** in the AVS. If your company does not appear in the AVS database, move on to Part C, check Box 3, and complete Part D of this form.

*If your company has worked on previous AML projects or in the coal mining industry:* Your business is most likely in the AVS, but may need to be updated. Obtain and review your OFT and then complete Part C.

**Part C: Certifying and updating information in the Applicant/Violator System (AVS).** Part C should be completed by the AML Contractor. Please check the box that best describes your situation, sign and date.

**Note: Signature date must be recent (within 30 days) to be considered.**

**Part D: OFT Information.** Part D should be completed by the AML Contractor **only** if you want to make updates to what information is in the AVS, or if your company **does not** have any information in the AVS. Include **all** fields, including the relevant begin and/or end dates for individuals, including middle name or initial for individuals if possible.

### **Answers to Part D FAQs:**

*Which employees should be included in Part D?*

Any current or separated employee of significance should be listed. Refer to the list provided at the top of Part D. For those owning less than 10% reporting the ownership is optional. Include those employees who direct, manage, or control the project. If, for example, a Professional Engineer has the power to determine how the project is conducted you should include him/her on Part D.

*What address and phone number should I use?*

Use the address and phone number where the person receives business correspondence.

*What are the begin and end dates for?*

**Begin dates** indicate when a person started in that position in your company. If an individual still works at the company you can simply fill in the begin date and leave the end date blank or write "N/A". **End dates** are used for indicating that someone no longer works in that capacity or is no longer employed at the company. **If an employee has held more than one position** or title, note the begin dates/end dates for each position.

ABANDONED MINE LANDS (AML) CONTRACTOR INFORMATION FORM

You must complete this form for your AML contracting officer to request an eligibility evaluation from the Office of Surface Mining Reclamation and Enforcement (OSMRE) to determine if you are eligible to receive an AML contract. This requirement can be found under OSMRE's regulations at 30 CFR 874.16. **NOTE:** This form must be signed and **dated within 30 days** of submission to be considered for a current bid.

**Part A: General Information**Business Name: Navigator Environmental & Technical Services, IncTax ID #: 47-3837244Address: 3908 Teays Valley RoadCity, State, & Zip: Hurricane, WV 25526Phone Number: 304-586-6280Email Address: wfisher@navigatortechnical.com**Part B: Obtain an Organizational Family Tree (OFT) from the Applicant Violator System (AVS)**

If you plan to certify the existing AVS information or submit updates under Part C, you must include an OFT. Instructions for downloading an OFT from the AVS can be found at: <https://www.osmre.gov/sites/default/files/2022-02/OMB%201029-0119%20instructions.pdf>. If you require assistance you may contact the AVS Office by phone at: 800-643-9748, or by email at: [avshelp@osmre.gov](mailto:avshelp@osmre.gov).

**Part C: Certifying and updating information in the AVS**

Select one of the options, follow the instructions for the selected option, sign, and date below.

I, **James W. Fisher**, have express authority to certify that:  
(Print Name)

- ☐ 1. Our business is listed in the AVS. The information is accurate, complete, and up to date. (If you select this option, you must attach an Entity OFT from the AVS to this form). Do not complete Part D.
- ☐ 2. Our business is in the AVS. The information needs to be updated. (If you select this option, you must attach an Entity OFT from the AVS to this form). Complete Part D to provide the missing or corrected information.
- ☒ 3. Our business is not listed in the AVS. The information needs to be added. Complete Part D to provide the information.

**PAPERWORK REDUCTION STATEMENT**

The Paperwork Reduction Act of 1995 (44 U.S.C 3501) requires us to inform you that: Federal Agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a current valid OMB control number. This information is necessary for all successful bidders prior to the distribution of AML funds, and is required to obtain a benefit.

Public reporting burden for this form is estimated to range from 15 minutes to one hour, with an average of 30 minutes per response, including time for reviewing instructions, gather and maintaining data, and completing and reviewing the form. You may direct comments regarding the burden estimate or any other aspect of this form to the Information Collection Clearance Officer, Office of Surface Mining Reclamation and Enforcement, 1849 C Street, NW, Room 4559, Washington, DC 20240.
