ICPE-OES

211-92900-58	ICPE-9820 Dual View Simultaneous Emission Spectrometer
---------------------	---

ICPE-9820 is a dual view (axial & radial) high throughput simultaneous inductively coupled plasma emission spectrometer. The ICP utilizes an Echelle grating system under vacuum conditions with a large 1" x 1" CCD detector. Vacuum conditions of the optical bench allows determinations in the vacuum UV region for elements like Phosphorous and Sulfur. The 1 mega pixel CCD enables better sensitivity as more light can be focused onto the detector. The ICPE-9810 uses a vertical mini torch with an axial view. The mini torch reduces Argon consumption up to 40% with no sacrifice of sensitivity. Additional gas saving features includes Eco mode which reduces power and gas flows at idle. Vertically mounted torches are not susceptible to clogging or buildup as conventional horizontally mounted torches. ICPEsolution software (purchased separately) features easy to use software which includes a method development assistant, automatic correction for overlapping wavelengths, and a wavelength database with 110,000 emission lines.
