Re: CRFQ VNF2700000001 - Direct Care Staffing Services

Dear Ms. Riley:

The Quiah Group, LLC respectfully submits this response to CRFQ VNF2700000001 for Direct Care Staffing Services for the West Virginia Veterans Nursing Facility in Clarksburg, West Virginia.

The Quiah Group understands that the Facility requires a responsive staffing partner capable of supporting its direct-care workforce requirements for Registered Nurses, Licensed Practical Nurses, and Health Service Workers/Certified Nursing Assistants. We further understand that successful performance requires more than identifying qualified healthcare professionals. It requires dependable attendance, rapid response to staffing requirements, disciplined schedule management, timely communication, credential compliance, and an active pipeline capable of supporting weekday, weekend, holiday, call-off, vacation, PRN, and term-contract requirements.

QG brings directly relevant public-sector healthcare staffing experience through its Virginia Department of Corrections (VADOC) Temporary Medical Services contract, DOC-23-012-TQG, together with a proprietary recruiting database of more than 5,000 medical practitioners. These resources provide an established foundation for targeted sourcing, screening, credentialing, scheduling, and deployment under this RFQ.

Our response is designed around those operational requirements. The accompanying Shift Coverage Plan establishes our approach for maintaining dependable coverage, responding to monthly staffing requisitions, mitigating call-offs and no-call/no-shows, and maintaining backup resources. Our Recruiting Plan establishes a continuous sourcing, screening, credentialing, onboarding, and retention process for RN, LPN, and HSW/CNA personnel available to serve the Clarksburg facility.

The Quiah Group will perform the resulting contract directly and will not subcontract the required services.

Our completed pricing schedules, State-required forms, proof of qualifying direct-care staffing experience, designated contact information, and Addendum No. 1 acknowledgement are included as attachments to this response.

The Quiah Group appreciates the opportunity to support the West Virginia Veterans Nursing Facility and is prepared to provide a responsive, accountable, and professionally managed direct-care staffing program.

Sincerely,

Rosetta Quiah

2. EXECUTIVE SUMMARY AND UNDERSTANDING OF THE REQUIREMENT

The Quiah Group understands that the West Virginia Veterans Nursing Facility requires an open-end staffing resource that can respond consistently to changing direct-care staffing needs while maintaining the continuity, reliability, and professional standards required in a long-term-care environment.

The requirement encompasses three disciplines: Registered Nurses, Licensed Practical Nurses, and Health Service Workers who must be Certified Nursing Assistants. The Quiah Group understands that all three disciplines must be supported under the contract and that staffing requirements may include both PRN personnel and longer-term contracted personnel.

The Quiah Group combines demonstrated direct-care staffing experience with an established healthcare recruiting infrastructure and a centralized, technology-enabled recruiting and staffing management platform. QG holds the Commonwealth of Virginia Department of Corrections Temporary Medical Services Contract DOC-23-012-TQG and maintains a proprietary database of more than 5,000 medical practitioners. The operating platform supports requisition intake, candidate pipeline management, credential status, candidate submittals, staff availability, assignment status, call-off and replacement activity, and management reporting so the recruiting, credentialing, staffing, and contract-management teams work from a common operational view.

The Facility's published questions and answers place particular emphasis on workforce reliability. The Facility identified call-offs, no-call/no-shows, and schedule changes that were not communicated to the Facility as existing operational concerns. Our staffing model therefore treats attendance management and communication as core contract-management functions rather than purely recruiting functions.

Operating Principle	How QG Will Apply It
Reliable Coverage	Personnel are recruited against actual availability requirements and schedule commitments, not simply credential availability.
Active Backup Capacity	QG will maintain qualified primary and backup personnel by discipline to reduce dependence on any single worker.
Rapid Communication	Staffing changes, availability issues, call-offs, and replacement activity will be communicated promptly through the Facility's designated nursing contacts.
Credential Readiness	Personnel will not be presented for placement until applicable licensing, certification, screening, credentialing, and Facility requirements have been addressed.
Continuous Recruiting	Recruiting will continue throughout contract performance so the available workforce does not depend solely on the personnel initially placed.
Established Talent Reach	QG maintains a proprietary recruiting database of more than 5,000 medical practitioners, providing a substantial starting pipeline for targeted outreach while candidate availability, licensure, credentials, and assignment fit are verified.

Operating Principle	How QG Will Apply It
Technology-Enabled Visibility	QG will manage requisitions, candidate status, credentials, availability, assignment activity, coverage exceptions, and management reporting through a centralized staffing-management environment supported by configurable recruiting technology and proprietary workflows.

The result is a staffing model designed to give the Facility dependable access to qualified clinical personnel while reducing preventable disruptions to resident care.

3. QUALIFICATIONS AND DIRECT CARE STAFFING EXPERIENCE

The Quiah Group is a staffing and professional-services organization experienced in supporting public-sector and highly regulated operating environments.

Relevant Direct-Care Contract Experience - Virginia Department of Corrections (VADOC). The Quiah Group holds Contract DOC-23-012-TQG with the Commonwealth of Virginia Department of Corrections for Temporary Medical Services. The contract is dated August 8, 2023, and contract documentation identifies The Quiah Group, LLC as the contractor for temporary medical services supporting licensed nursing roles in the correctional healthcare environment. This experience is directly relevant to the West Virginia Veterans Nursing Facility requirement because the State confirmed in Addendum No. 1 that comparable direct-care healthcare staffing experience in correctional facilities satisfies the RFQ's minimum experience requirement.

Selected Healthcare and Direct-Care Client Experience

In addition to its public-sector healthcare staffing experience with VADOC, The Quiah Group has served healthcare and direct-care organizations operating in residential, home-health, skilled-nursing, and community-based care environments. These client relationships strengthen QG's understanding of the workforce discipline required in settings where continuity of care, credential readiness, dependable attendance, and timely replacement coverage are critical.

Client	Care Environment	Relevance to This RFQ
Virginia Department of Corrections (VADOC)	Temporary Medical Services under Contract DOC-23-012-TQG in a secure, highly regulated correctional healthcare environment.	Directly relevant experience recruiting and supporting licensed nursing personnel in a public-sector setting with strict credential, attendance, compliance, and continuity-of-coverage requirements.
<u>Care Partners of America</u>	Residential group-home environment in Loudoun County, Virginia serving adults with intellectual and developmental disabilities and medically fragile individuals; the organization also identifies skilled nursing services as part of its care model.	Relevant direct-care experience in a residential setting where dependable caregiver availability, resident safety, continuity of care, and responsive staffing support are essential.
<u>Premier Health Services</u>	Washington, DC healthcare organization providing skilled nursing, home-health, ancillary, and residential habilitation services, including services for individuals with developmental disabilities.	Relevant healthcare experience in an environment dependent on qualified nurses and aides, credential control, schedule coverage, patient-centered care, and reliable workforce coordination.

Collectively, these engagements demonstrate QG's experience supporting healthcare and direct-care operations across public-sector, residential, and community-based care settings. For this RFQ, QG will apply that experience through disciplined requisition management, targeted clinician sourcing, credentialing controls, schedule confirmation, backup-roster management, and rapid escalation of coverage risks.

CLIENT-FACING OPERATING EXHIBIT 1

4. Requisition-to-Placement Workflow

A controlled staffing lifecycle that converts each Facility requisition into a qualified, credential-ready, availability-confirmed healthcare professional and maintains accountability through deployment.

Stage	Staffing-Firm Action	Technology / Process Control	Quality Gate	Facility-Facing Output
1. Requisition Intake	Log each requisition by discipline, PRN or term assignment, shift, dates, headcount, response deadline, weekend/holiday requirements, orientation timing, and special instructions.	Central requisition record assigns an owner, due date, priority, and status.	Requirement is complete and within contract scope before recruiting release.	Accurate, controlled requisition response.
2. Requisition Qualification	Translate the requisition into a sourcing profile that identifies licensure/certification, schedule, location, orientation, weekend/holiday, and start-date constraints.	Recruiting strategy and search criteria are linked to the requisition.	Recruiter and Contract Manager agree on must-have versus preferred criteria.	Faster sourcing against the actual need rather than generic resumes.
3. Talent Match & Sourcing	Search QG's 5,000+ medical-practitioner database, active/backup roster, previously screened candidates, referrals, local/regional markets, Compact-state nurse markets, and targeted external channels.	Candidate source, recruiter ownership, discipline, location, shift preference, and pipeline stage are tracked.	Internal and external sourcing run concurrently for hard-to-fill requisitions.	Broader qualified candidate coverage and reduced time lost between sourcing channels.
4. Candidate Qualification	Conduct a structured screen for professional eligibility, relevant direct-care experience, schedule commitment, weekend/holiday availability, orientation availability, commute/travel feasibility, reliability, and assignment interest.	Standardized screening workflow and disposition reasons prevent unqualified or unavailable candidates from moving forward.	Candidate is both clinically eligible and operationally viable for the requisition.	Fewer speculative submittals and candidate withdrawals.
5. Credential Pre-Check	Review license/certification, CPR, WVCARES status/readiness, drug screen, PPD, Hepatitis B documentation/declination, Food Handler Card, references, and other Facility requirements.	Credential status and expiration dates are tracked as Ready, Conditional, or Hold.	Mandatory gaps are visible before the candidate is represented as deployable.	Clear credential-readiness status with each submittal.

Stage	Staffing-Firm Action	Technology / Process Control	Quality Gate	Facility-Facing Output
6. Commitment & Submittal	Reconfirm the actual requisition, rate/assignment understanding, schedule, start timing, orientation commitment, and availability immediately before Facility submittal.	Submittal is tied to the requisition and records candidate status, availability, and next action.	No candidate is submitted solely because the person appears in a database.	Concise, availability-confirmed candidate submittal.
7. Selection & Orientation	Coordinate interview, selection follow-up, onboarding documentation, orientation attendance, and the required post-orientation work commitment.	Selection, orientation, compliance, and start-readiness status remain visible to recruiting and staffing teams.	Candidate is cleared and committed before independent deployment.	Controlled conversion from candidate to active staff member.
8. Deployment & Continuous Fulfillment	Manage schedule confirmation, attendance, PRN eligibility, call-offs, backup coverage, credential expirations, retention, and continuous bench replenishment.	Assignment and exception data feed the staffing-management dashboard and recruiting priorities.	Coverage risk triggers replacement or recruiting escalation before it becomes a recurring failure.	Reliable ongoing staffing and documented corrective action.

QG's workflow is system-supported but process-controlled: technology provides visibility and accountability, while recruiters, credentialing staff, the Staffing Coordinator, and the Contract Manager remain responsible for professional judgment and execution.

5. SHIFT COVERAGE & WORKFORCE DEPLOYMENT PLAN

5.1 Coverage Objective

The Quiah Group's coverage model is designed to translate each Facility staffing requisition into a controlled workforce-deployment process. The model is built around three parallel capabilities: confirmed primary staff, a qualified backup roster, and an actively replenished recruiting pipeline. This structure allows QG to manage planned monthly coverage while retaining the ability to react to call-offs, no-call/no-shows, vacations, weekend obligations, holiday rotations, credential issues, and same-day vacancies without starting the recruiting process from zero.

QG will treat coverage as an operational function, not simply a recruiting activity. The Staffing Coordinator will maintain visibility into the Facility schedule, each worker's confirmed availability, PRN eligibility, weekend and holiday obligations, orientation status, credential readiness, and backup options. The Contract Manager will provide escalation oversight when a requisition, shift, or staffing event presents a material risk to coverage.

5.2 Requisition Intake, Qualification, and Release

Upon receipt of a Facility staffing requisition, QG will immediately create a requisition record and validate the requirement before releasing it to the recruiting and staffing team. The requisition record will capture, at a minimum, the discipline, PRN or term assignment type, shift, dates, anticipated hours, required start date, response deadline, weekend/holiday expectations, reporting location, and any Facility-specific instructions.

The Contract Manager and assigned recruiter will then qualify the requisition by confirming the must-have license or certification, orientation availability, schedule expectations, and any constraints that could affect candidate supply. Existing active and backup staff will be evaluated first, followed immediately by the 5,000+ practitioner database and external sourcing channels if the initial coverage slate is insufficient.

5.3 Coverage Tiers and Bench Management

QG will manage workforce readiness through a tiered coverage structure so that the Facility has more than one potential staffing path for each recurring need.

Coverage Tier	Definition	Primary Use	Readiness Control
Tier 1 - Confirmed Primary Staff	Facility-approved staff assigned to the monthly schedule.	Planned weekday, weekend, holiday, PRN, and term-contract coverage.	Shift acceptance confirmed; credentials current; orientation complete or scheduled.
Tier 2 - Qualified Backup Staff	Facility-approved or deployment-ready staff not assigned to the primary shift.	Vacations, known absences, call-offs, schedule changes, and recurring hard-to-fill shifts.	Availability tracked by discipline and shift; backup priority identified.

Tier 3 - Ready Candidate Pipeline	Screened candidates with known licensure, availability, and credential status.	Rapid replenishment when active roster depth is insufficient.	Candidate commitment reconfirmed before Facility submittal.
Tier 4 - Active Sourcing Pipeline	Candidates being sourced, screened, or credentialed against current and forecasted needs.	Longer-range capacity building and difficult requisitions.	Recruiter-owned pipeline with documented next action and disposition.

5.4 Monthly Schedule Build and Staffing Confirmation

When the Facility issues monthly staffing requirements, QG will perform a discipline-by-discipline and shift-by-shift coverage review. The Staffing Coordinator will reconcile the requisition against the active roster, PRN staff, term-contract personnel, weekend obligations, holiday availability, known vacations, orientation dates, and credential expirations. Candidate availability will be reconfirmed before any individual is presented as available.

Following Facility scheduling, QG will maintain an internal schedule control that identifies each scheduled worker, shift, date, coverage tier, backup option, and any known risk. The purpose is to detect a coverage problem before it becomes an open shift.

5.5 Pre-Shift Attendance Controls

QG will use a structured confirmation process to reduce avoidable attendance failures. Scheduled personnel will receive assignment reminders and will be expected to reconfirm availability in advance of the shift. Any failed confirmation, emerging transportation issue, illness, schedule conflict, or other attendance risk will be treated as an early warning event and will trigger backup review before the shift begins.

- Scheduled shift and reporting instructions communicated clearly to the worker.
- Weekend, holiday, and special schedule obligations reconfirmed during monthly scheduling.
- Upcoming credential expirations reviewed so an otherwise qualified worker is not removed from the schedule at the last minute.
- Known vacations and planned absences entered into the staffing calendar as soon as they are reported.
- Backup personnel identified for recurring high-risk or hard-to-fill shifts where practicable.

5.6 Call-Off Replacement Protocol

Call-offs will be handled as time-sensitive coverage incidents. The employee will be instructed to follow the Facility's call-off procedure and to notify QG immediately. Once QG becomes aware of the absence, the Staffing Coordinator will open a replacement event and begin outreach without waiting for the shift to become uncovered.

Replacement Sequence	QG Action	Decision Point / Escalation
1. Validate the gap	Confirm affected discipline, shift, start time, reason for absence, and whether the Facility has been notified.	If the Facility has not been notified, ensure required communication occurs immediately.
2. Activate backup roster	Contact qualified backup staff who are already cleared or otherwise deployment-ready for the Facility.	Prioritize staff by discipline, shift match, current eligibility, and realistic arrival time.
3. Expand to active PRN / available roster	Contact eligible staff not scheduled for the affected period, while considering overtime and Facility scheduling rules.	Do not create a new compliance or scheduling problem to solve the immediate gap.
4. Activate ready candidate pool	Use only candidates who can lawfully and contractually be deployed and have satisfied required Facility approvals.	If not deployable, continue sourcing but do not represent the candidate as a replacement.
5. Escalate coverage risk	Contract Manager assumes direct oversight if no replacement is immediately available.	Provide the Facility a factual status update, replacement activity, and next action.
6. Close and review	Record filled/unfilled disposition, time to replacement, and employee attendance issue.	Repeated incidents trigger corrective action, roster review, or removal as appropriate.

5.7 No-Call/No-Show Prevention and Response

Because the Facility identified no-call/no-show events as an existing pain point, QG will specifically monitor attendance reliability. A worker who fails to confirm a scheduled assignment or does not report as expected will be contacted immediately, and replacement outreach will begin while the incident is being validated. The Facility will receive prompt notification of any known no-show and the status of QG's replacement effort.

Repeated or serious attendance failures will result in corrective action up to removal from the Facility roster, subject to the facts of the incident and applicable requirements.

5.8 Weekend, Holiday, and PRN Coverage

Weekend and holiday availability will be screened before candidate submittal and managed during each monthly schedule cycle. QG will not treat weekend obligations as an after-placement issue. Day-shift personnel will be screened for the Facility's Saturday/Sunday weekend requirements and Friday obligation; night-shift personnel will be screened for Friday/Saturday weekends and the Sunday-night requirement. Holiday and Important Date availability will be captured in the worker profile and reconfirmed during schedule planning.

PRN staff will be tracked against the Facility's minimum three-day-per-thirty-day eligibility requirement. QG will maintain visibility into workers approaching the minimum so that the roster can be managed deliberately rather than discovering an eligibility issue after a requisition is received.

5.9 Orientation and Ramp-to-Productivity Controls

QG will only send candidates to Facility orientation after reconfirming attendance, travel/commute feasibility, and post-orientation availability. Candidates will be advised that call-offs during orientation are unacceptable except for the limited circumstances recognized by the Facility and that orientation is an operational commitment, not an exploratory step.

QG will also track the requirement that newly oriented staff work at least 24 hours within the ten days following orientation. The Staffing Coordinator will coordinate candidate availability so that orientation is aligned with realistic post-training deployment and the Facility's schedule.

5.10 Same-Day and Emergency Gaps

For same-day call-offs or emergency openings, QG will immediately search the active eligible roster and qualified backup pool by discipline and shift. The team will provide the Facility a realistic staffing status and will not bypass mandatory licensing, credentialing, or Facility approval requirements simply to present a name. If a gap cannot be filled, the Contract Manager will document the recruiting and replacement effort and use the incident to determine whether additional backup capacity is required for that shift pattern.

5.11 Escalation and Communication Structure

Level	Trigger	Owner	Action
Level 1 - Routine	Normal requisition, schedule confirmation, known vacation, credential follow-up.	Staffing Coordinator / Recruiter	Resolve through standard workflow and record activity.
Level 2 - Coverage Risk	Call-off, failed confirmation, partial requisition coverage, hard-to-fill shift, upcoming unfilled weekend/holiday.	Contract Manager	Direct replacement effort; prioritize sourcing; communicate material status to authorized Facility contact.
Level 3 - Critical	No-call/no-show, repeated attendance issue, material staffing gap, compliance issue affecting active coverage.	Contract Manager + QG Leadership as needed	Immediate operational review, corrective action, replacement strategy, and documented follow-up.

5.12 Coverage Performance Management

QG will review staffing performance using operational measures that reflect both recruiting output and workforce reliability. Measures will include requisition response timeliness, fill status, call-offs, no-call/no-show incidents, replacement outcomes, schedule changes, credential holds, weekend/holiday coverage, PRN eligibility, orientation completion, and pipeline depth by discipline. Where the Facility has stated a requirement but has not published a numerical threshold, QG will not invent or commit to an unsupported percentage; the internal target will be finalized by QG leadership and aligned to the awarded contract.

CLIENT-FACING OPERATING EXHIBIT 2

6. Shift Coverage and Escalation Matrix

A layered coverage protocol designed to address planned staffing, weekend and holiday obligations, call-offs, no-call/no-shows, credential interruptions, and same-day gaps without relying on a single worker or sourcing channel.

Coverage Scenario	Immediate Staffing Action	Backup / Recruiting Action	Escalation & Ownership	Facility Communication / Control Evidence
Monthly requisition / schedule build	Reconcile the Facility requisition by discipline, shift, dates, PRN/term structure, and headcount; match confirmed active and ready personnel.	Launch targeted recruiting concurrently for uncovered portions; reserve qualified backup personnel for recurring high-risk shifts where practicable.	Staffing Coordinator owns routine fulfillment; Contract Manager reviews partial coverage and material gaps.	Availability-confirmed submittals, internal schedule control, and documented open-gap status.
Known vacancy, vacation, or planned absence	Identify the affected shift as soon as the absence is known and backfill from the qualified backup/PRN roster.	If internal coverage is insufficient, release a shift-specific sourcing campaign rather than a generic posting.	Escalate recurring or difficult gaps to Recruiting Lead and Contract Manager before schedule finalization.	Facility scheduler is advised of material changes or replacement status through the authorized communication path.
Call-off	Verify the affected shift, confirm the employee has followed Facility call-off procedures, and open replacement activity immediately.	Sequentially activate cleared backup staff, eligible PRN staff, ready candidates, and other qualified available resources that can legally and operationally deploy.	On-call Staffing Coordinator manages the event; Contract Manager assumes ownership when coverage risk remains open.	Document incident, outreach, replacement disposition, and material status communicated to the authorized Facility contact.
No-call/no-show or failed shift confirmation	Attempt immediate worker contact, confirm status, and activate the replacement protocol without waiting for the shift to deteriorate further.	Move directly to backup outreach and, if necessary, same-day candidate sourcing within credential and deployment constraints.	Contract Manager reviews worker reliability and corrective action, including potential removal from the Facility roster.	Facility is notified promptly of the known attendance failure and realistic replacement status.
Weekend coverage risk	Use roster controls to identify staff who satisfy day-shift and night-shift weekend obligations before the monthly schedule is finalized.	Maintain weekend-capable backup personnel and target candidates specifically willing to accept the affected weekend pattern.	Repeated weekend gaps trigger a dedicated sourcing strategy by discipline and shift.	Weekend obligations are visible in staffing records and reconciled during monthly scheduling.
Holiday / Important Date coverage	Confirm holiday availability during requisition qualification and again when the schedule is accepted.	Maintain holiday-capable backup staff and run targeted holiday sourcing in advance of known high-risk dates.	Contract Manager reviews unresolved holiday gaps early enough to permit corrective action.	Holiday assignments, availability, and exceptions are documented rather than assumed.
Same-day open shift / emergency gap	Search active eligible staff and the qualified backup pool immediately by discipline, shift, and realistic reporting ability.	Expand outreach to the ready pipeline while preserving all mandatory credential and Facility requirements.	Coverage risk is escalated in real time to the Contract Manager; no unavailable worker is promised to the Facility.	Facility receives a factual status update and confirmed replacement information when available.
Credential expiration / compliance hold	Identify upcoming expirations through advance monitoring and begin renewal collection before the credential affects a scheduled assignment.	If a mandatory credential expires or cannot be verified, place the worker on Hold and activate replacement coverage.	Credentialing Coordinator owns compliance resolution; Staffing Coordinator owns schedule impact; Contract Manager handles material risk.	Credential status, hold action, replacement need, and schedule impact are traceable.
Orientation failure or post-orientation availability risk	Reconfirm attendance before orientation and monitor the required post-orientation work commitment.	Reschedule where permitted or move to the next qualified candidate if the worker cannot satisfy the requirement.	Staffing Coordinator escalates repeated orientation losses to Recruiting Lead for conversion analysis.	Orientation attendance and deployment readiness are documented before the worker is counted as available.

This matrix operationalizes the Facility's stated concerns regarding call-offs, no-call/no-shows, and uncommunicated schedule changes by defining ownership, backup actions, escalation, and documentary controls for each coverage event.

7. RECRUITING & TALENT ACQUISITION PLAN

7.1 Recruiting Objective and Staffing-Firm Operating Model

The Quiah Group will operate this engagement through a requisition-driven recruiting model designed for contingent healthcare staffing. Recruiting activity begins with requisition qualification, not with generic job

posting. Each requisition will be translated into a sourcing profile that defines the clinical discipline, license or certification, shift, assignment type, location, weekend and holiday obligations, orientation schedule, start-date urgency, and other factors that materially affect candidate conversion and retention.

This approach allows QG to measure recruiting activity against actual Facility demand and to maintain separate pipelines for RN, LPN, and HSW/CNA requirements rather than relying on a single undifferentiated candidate pool.

7.2 Established Healthcare Talent Base and VADOC Experience

QG begins this engagement with two important staffing assets. First, The Quiah Group maintains a proprietary database of more than 5,000 medical practitioners. The database provides an established source population for targeted outreach by discipline, licensure, geography, availability, and assignment interest. QG will use the database as a starting point for requisition fulfillment, not as a claim that every individual is currently credentialed or immediately available for Clarksburg.

Second, QG brings directly relevant public-sector healthcare staffing experience through Commonwealth of Virginia Department of Corrections Contract DOC-23-012-TQG for Temporary Medical Services. The contract documentation identifies The Quiah Group, LLC as the contractor and specifically addresses temporary Registered Nurse positions in a secure correctional healthcare environment. That experience informs QG's approach to clinician recruiting, compliance, attendance management, credential readiness, workforce communication, and continuity of coverage for the West Virginia Veterans Nursing Facility.

Recruiting Asset	How QG Will Use It for This RFQ
5,000+ medical-practitioner database	Targeted re-engagement and direct outreach by discipline, licensure, geography, shift preference, and assignment interest.
VADOC Temporary Medical Services experience	Applies public-sector healthcare staffing discipline, compliance controls, clinician communication, attendance management, and workforce continuity experience.
Local and regional sourcing	Builds Clarksburg/Harrison County and surrounding West Virginia supply where commuting is practical.
Compact-state nurse sourcing	Expands RN/LPN supply to nurses holding valid multistate privileges who may practice in West Virginia.
Travel-ready candidate sourcing	Provides an additional channel for term assignments and difficult shift patterns when economically and operationally feasible.

7.3 Requisition Kickoff and Recruiting Strategy

Every new requisition will be assigned an owner and a sourcing strategy. The recruiter will review the requisition with the Contract Manager or Staffing Coordinator and identify whether the requirement can be filled from the active roster, backup roster, ready pipeline, or requires a new sourcing campaign. The recruiting strategy will also account for the Facility's shift structure, weekend obligations, orientation timing, PRN versus term assignment, candidate commute/travel feasibility, and the likelihood of retaining the candidate after orientation.

For high-priority or hard-to-fill requisitions, QG will launch internal database search and external sourcing concurrently rather than sequentially. This reduces avoidable time lost waiting for one sourcing channel to fail before another is activated.

7.4 Sourcing Channels and Market Coverage

QG will use a diversified sourcing model so contract performance is not dependent on a single job board or recruiter. Sourcing channels will be selected based on discipline, shift difficulty, start date, and geographic feasibility.

- QG proprietary database of 5,000+ medical practitioners and previously screened healthcare candidates.
- Direct recruiter outreach to licensed nurses and certified nursing assistants matching the requisition profile.
- Local and regional healthcare recruiting in Clarksburg, Harrison County, and surrounding West Virginia labor markets.

- Multistate Nurse Licensure Compact sourcing for qualified RN and LPN candidates holding valid practice privileges in West Virginia.
- Healthcare job boards and professional networking channels selected for the specific discipline and shift.
- Employee and professional referrals, including re-engagement of proven or previously screened healthcare personnel.
- Targeted outreach to clinicians with correctional, long-term-care, skilled-nursing, institutional, or other direct-care experience.
- Travel-ready sourcing for term-contract or difficult-to-fill assignments when the assignment economics and candidate availability support it.
- Potential voluntary transition of qualified incumbent personnel where permitted and appropriate.

7.5 Candidate Engagement and Qualification Screen

A recruiter will conduct a structured qualification screen before the candidate is moved to a Facility-ready stage. The screen will confirm both clinical eligibility and assignment commitment. This is critical because a technically qualified candidate who cannot meet the schedule, orientation, weekend, or location requirements is not a viable submittal.

Screening Area	Minimum Recruiting Check
Professional eligibility	RN/LPN license or HSW/CNA certification; Compact privilege when applicable; current status and known expiration.
Direct-care fit	Relevant clinical/direct-care background, patient/resident care exposure, and ability to work within institutional policies and supervision.
Assignment availability	Day/night shift, specific dates, PRN or term interest, start date, minimum availability, and schedule conflicts.
Weekend/holiday commitment	Ability and willingness to satisfy the Facility's weekend and holiday scheduling expectations.
Orientation commitment	Ability to attend required in-person orientation and remain available for the required post-orientation work period.
Location feasibility	Reliable commute, relocation/travel plan if applicable, and realistic ability to report to Clarksburg for scheduled shifts.
Reliability indicators	Prior attendance pattern where available, responsiveness during recruiting, clarity of commitment, and references as applicable.
Compensation alignment	Candidate expectations understood and aligned before the candidate is advanced, reducing late-stage withdrawal risk.

7.6 Candidate Disposition and Pipeline Discipline

Each candidate will have a defined pipeline stage and next action. QG will distinguish between New Lead, Contacted, Screening, Qualified, Credentialing, Ready for Facility Submission, Submitted, Interview, Selected, Orientation, Active, Hold, Not Selected, and Withdrawn. Candidates will not be counted as available simply because they appear in the database or have expressed general interest.

The recruiter will record the reason for disposition so QG can identify recurring barriers such as shift mismatch, location, compensation, credential issues, weekend limitations, or orientation conflicts and adjust the sourcing strategy accordingly.

7.7 Credential Pre-Check and Compliance Handoff

Once a candidate passes the recruiting screen, the candidate will move into credential pre-check. Recruiting and credentialing responsibilities will be separated so that candidate enthusiasm does not substitute for compliance readiness. QG will identify the status of professional licensure/certification, CPR, WVCARES, drug screening, PPD, Hepatitis B documentation or accepted declination, Food Handler Card, references, immunization documentation, and other Facility onboarding items.

Candidates will be classified as Ready, Conditional, or Hold based on the status of mandatory items. A candidate in Hold status will not be represented as deployable. Expiration dates will be tracked so active personnel do not become unavailable because a mandatory credential lapses unnoticed.

7.8 Candidate Commitment and Facility Submittal

Before Facility submittal, the recruiter will reconfirm the candidate's interest and availability against the actual requisition. The submittal will be based on confirmed facts and will summarize the candidate's discipline, licensure/certification status, relevant experience, shift availability, weekend/holiday availability, orientation readiness, and credential status. QG will avoid speculative or duplicate submittals that create administrative work for the Facility without improving coverage.

7.9 Interview, Selection, and Orientation Conversion

Upon Facility interest, QG will coordinate candidate communication, interview scheduling, selection follow-up, and orientation readiness. The recruiter and Staffing Coordinator will maintain contact through the transition from candidate to active worker. This reduces the common staffing-firm failure point in which a candidate is recruited successfully but disengages between selection and first shift.

Candidates who are not selected will be dispositioned appropriately and may remain in the QG pipeline for future requisitions if their qualifications and interest remain valid.

7.10 Hard-to-Fill Requisition Strategy

When a requisition is not producing adequate candidate flow, QG will not simply repost the same advertisement. The Recruiting Lead will review the conversion funnel to determine where candidates are being lost and adjust the strategy accordingly. Actions may include broadening geography, increasing direct sourcing, prioritizing Compact-state nurses, activating referrals, re-engaging prior qualified candidates, focusing on candidates specifically available for the affected weekend or night shift, or positioning term assignments where schedule stability improves candidate conversion.

7.11 Continuous Recruiting and Bench Replenishment

Recruiting will continue after initial staffing is achieved. QG will maintain an evergreen pipeline for RN, LPN, and HSW/CNA classifications because healthcare contingent staffing is affected by attrition, schedule changes, credential expirations, competing assignments, and worker availability. Continuous sourcing allows QG to replace capacity before a vacancy becomes urgent and supports the Facility's progressive-award structure, where the lowest-priced vendor receives first opportunity for staffing needs.

7.12 Retention and Redeployment

Retention begins during recruiting by providing candidates an accurate representation of the assignment. QG will reinforce schedule expectations, orientation obligations, weekend/holiday requirements, reporting procedures, and Facility rules before placement. During the assignment, the Staffing Coordinator will maintain contact with active workers, address administrative questions, monitor attendance, identify early signs of disengagement, and determine whether qualified staff can be redeployed to future requisitions when an assignment ends.

7.13 Recruiting Metrics and Management Review

QG will manage recruiting through measurable pipeline activity rather than anecdotal status updates. Internal reporting will include open requisitions by discipline, candidates sourced, candidates screened, qualified candidates, credentialing status, Facility submittals, selections, orientation completions, active staff, withdrawals, time-to-submittal, fill status, source effectiveness, and primary disposition reasons. These measures will allow QG to identify whether a staffing problem is caused by candidate supply, screening conversion, credentialing, schedule mismatch, or worker retention and to take targeted corrective action. These measures will be consolidated through QG's centralized staffing-management environment so the Contract Manager can review requisition, recruiting, credentialing, coverage, and workforce exceptions from a common operating view and direct corrective action to the point of constraint.

CLIENT-FACING OPERATING EXHIBIT 3

8. Recruiting Technology and Workforce Management Framework

QG uses a centralized, technology-enabled staffing-management environment to give recruiting, credentialing, scheduling, and contract-management personnel a common operational view from requisition intake through active assignment management.

Operating Layer	Technology-Enabled Control	Managed Information / Workflow	Management Use	Benefit to the Facility
Requisition Management	Centralized requisition record with owner, priority, due date, status, discipline, shift, assignment type, and fulfillment activity.	Open requisitions, response deadlines, required headcount, submitted/selected/active counts, unresolved gaps, and next actions.	Contract Manager can see which needs are open, at risk, partially filled, or complete without relying on email memory.	Faster, more disciplined response and fewer missed staffing requirements.
Talent CRM & Candidate Pipeline	Searchable candidate records and pipeline stages tied to recruiter ownership and requisition activity.	QG's 5,000+ medical-practitioner database, sources, discipline, license/certification, geography, shift preference, availability, disposition, and submittal history.	Recruiters can segment and re-engage talent rather than restarting sourcing for every requisition.	Broader reach, faster candidate identification, and better continuity of recruiting effort.
Credentialing & Compliance	Structured credential status, expiration tracking, readiness classifications, and hold controls.	License/certification, CPR, WV CARES, drug screen, PPD, Hepatitis B documentation/declination, Food Handler Card, references, orientation, and other required items.	Credentialing staff can identify expiring or incomplete requirements before they disrupt a shift.	Reduced compliance risk and fewer last-minute staffing losses.
Scheduling & Availability	Central view of active, backup, PRN, and term staff availability with shift and weekend/holiday preferences.	Scheduled assignments, worker confirmations, planned absences, weekend/holiday availability, PRN participation, and backup status.	Staffing Coordinator can see where coverage is thin and activate backups or recruiting before an open shift becomes urgent.	Improved schedule reliability and proactive coverage management.
Call-Off / Exception Management	Incident and replacement workflow records the event, outreach, ownership, Facility communication, and disposition.	Call-offs, no-call/no-shows, schedule changes, same-day gaps, replacement attempts, corrective actions, and recurring worker patterns.	Contract Manager can distinguish isolated events from recurring attendance or coverage risks and intervene accordingly.	Documented replacement effort, faster escalation, and stronger accountability.
Management Reporting & Continuous Improvement	Operational dashboards and pipeline reporting convert recruiting and staffing activity into actionable management information.	Open requisitions, time-to-submittal, pipeline conversion, fill status, source effectiveness, selections, orientation completion, active staff, attendance exceptions, credential holds, and primary disposition reasons.	Leadership can focus recruiting resources on the actual point of constraint and adjust sourcing, backup depth, or worker-management actions.	Transparent performance management and a staffing program that improves over time.

The operating environment is supported by configurable recruiting/CRM capabilities and proprietary QG workflows. Specific software tools may evolve over the contract term; the controlled staffing process, data visibility, compliance gates, and management accountability described above remain the governing operating model.

9. CONTRACT MANAGEMENT AND COMMUNICATION

The Quiah Group will designate a primary Contract Manager responsible for overall performance and communication with the Facility. The management approach will draw on QG's experience administering public-sector healthcare staffing requirements under its VADOC Temporary Medical Services contract.

Function	QG Contact
Contract Manager	Rosetta Quiah
Primary Telephone	202-427-5998
Primary Email	rquiah@quiahgroup.com
Staffing/Scheduling Contact	Pierrette Neh Ntsang, Scrum Master

After-Hours Contact	Pierrette Neh Ntsang, Scrum Master

The Contract Manager will oversee requisition intake, qualification, and response, recruiting pipeline status, employee availability, compliance and credential status, call-off and replacement management, Facility communication, performance issues, timekeeping coordination, invoicing support, and escalation of issues requiring management attention.

The Facility has indicated that communications regarding staffing will generally involve the DON, ADON, and/or scheduler. QG will align its communication process accordingly.

41. PREFERENCE FOR USE OF DOMESTIC STEEL PRODUCTS: Except when authorized by the Director of the Purchasing Division pursuant to W. Va. Code § 5A-3-56, no contractor may use or supply steel products for a State Contract Project other than those steel products made in the United States. A contractor who uses steel products in violation of this section may be subject to civil penalties pursuant to W. Va. Code § 5A-3-56. As used in this section:

- a. "State Contract Project" means any erection or construction of, or any addition to, alteration of or other improvement to any building or structure, including, but not limited to, roads or highways, or the installation of any heating or cooling or ventilating plants or other equipment, or the supply of and materials for such projects, pursuant to a contract with the State of West Virginia for which bids were solicited on or after June 6, 2001.
- b. "Steel Products" means products rolled, formed, shaped, drawn, extruded, forged, cast, fabricated or otherwise similarly processed, or processed by a combination of two or more or such operations, from steel made by the open heath, basic oxygen, electric furnace, Bessemer or other steel making process.
- c. The Purchasing Division Director may, in writing, authorize the use of foreign steel products if:
 1. The cost for each contract item used does not exceed one tenth of one percent (.1%) of the total contract cost or two thousand five hundred dollars (\$2,500.00), whichever is greater. For the purposes of this section, the cost is the value of the steel product as delivered to the project; or
 2. The Director of the Purchasing Division determines that specified steel materials are not produced in the United States in sufficient quantity or otherwise are not reasonably available to meet contract requirements.

42. PREFERENCE FOR USE OF DOMESTIC ALUMINUM, GLASS, AND STEEL: In Accordance with W. Va. Code § 5-19-1 et seq., and W. Va. CSR § 148-10-1 et seq., for every contract or subcontract, subject to the limitations contained herein, for the construction, reconstruction, alteration, repair, improvement or maintenance of public works or for the purchase of any item of machinery or equipment to be used at sites of public works, only domestic aluminum, glass or steel products shall be supplied unless the spending officer determines, in writing, after the receipt of offers or bids, (1) that the cost of domestic aluminum, glass or steel products is unreasonable or inconsistent with the public interest of the State of West Virginia, (2) that domestic aluminum, glass or steel products are not produced in sufficient quantities to meet the contract requirements, or (3) the available domestic aluminum, glass, or steel do not meet the contract specifications. This provision only applies to public works contracts awarded in an amount more than fifty thousand dollars (\$50,000) or public works contracts that require more than ten thousand pounds of steel products.

The cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than twenty percent (20%) of the bid or offered price for foreign made aluminum, glass, or steel products. If the domestic aluminum, glass or steel products to be supplied or produced in a “substantial labor surplus area”, as defined by the United States Department of Labor, the cost of domestic aluminum, glass, or steel products may be unreasonable if the cost is more than thirty percent (30%) of the bid or offered price for foreign made aluminum, glass, or steel products. This preference shall be applied to an item of machinery or equipment, as indicated above, when the item is a single unit of equipment or machinery manufactured primarily of aluminum, glass or steel, is part of a public works contract and has the sole purpose or of being a permanent part of a single public works project. This provision does not apply to equipment or machinery purchased by a spending unit for use by that spending unit and not as part of a single public works project.

All bids and offers including domestic aluminum, glass or steel products that exceed bid or offer prices including foreign aluminum, glass or steel products after application of the preferences provided in this provision may be reduced to a price equal to or lower than the lowest bid or offer price for foreign aluminum, glass or steel products plus the applicable preference. If the reduced bid or offer prices are made in writing and supersede the prior bid or offer prices, all bids or offers, including the reduced bid or offer prices, will be reevaluated in accordance with this rule.

43. INTERESTED PARTY SUPPLEMENTAL DISCLOSURE: W. Va. Code § 6D-1-2 requires that for contracts with an actual or estimated value of at least \$1 million, the Vendor must submit to the Agency a disclosure of interested parties prior to beginning work under this Contract. Additionally, the Vendor must submit a supplemental disclosure of interested parties reflecting any new or differing interested parties to the contract, which were not included in the original pre-work interested party disclosure, within 30 days following the completion or termination of the contract. A copy of that form is included with this solicitation or can be obtained from the WV Ethics Commission. This requirement does not apply to publicly traded companies listed on a national or international stock exchange. A more detailed definition of interested parties can be obtained from the form referenced above.

44. PROHIBITION AGAINST USED OR REFURBISHED: Unless expressly permitted in the solicitation published by the State, Vendor must provide new, unused commodities, and is prohibited from supplying used or refurbished commodities, in fulfilling its responsibilities under this Contract.

45. VOID CONTRACT CLAUSES: This Contract is subject to the provisions of West Virginia Code § 5A-3-62, which automatically voids certain contract clauses that violate State law.

46. ISRAEL BOYCOTT: Bidder understands and agrees that, pursuant to W. Va. Code, § 5A-3-63, it is prohibited from engaging in a boycott of Israel during the term of this contract.
