It is the agency's interpretation that probationary security guards (officers) must have successfully completed not less than the 12.5 hours of classroom training and the prescribed on-the-job training specified in section 3.1 to be considered qualified to fill the least-skilled category. Differential requirements of each skill level must be validated before an officer (guard) is assigned to work at that skill level. It is the requirement of the contractor to insure the validation is complete and accurate. At anytime, the Agency may request documentation of the validation process and sample for any individual assigned to the contract.

Skill Level 1: Probationary Security Guard (Officer)

This skill level involves the delivery of services on a specific fixed post. The procedures for accountability, observation and inspection, courteous and efficient deportment, and documentation of activities are the essential skills that must be tailored to the post requirement. The posts are not a location or time where continual contact with the public will occur.

Skill Level 2: Security Guard (Officer) II

This skill level involves a combination of fixed and mobile posts where the opportunity for normal business contact and confrontation experience will be more frequent. On an ascending level of capability, appearance, bearing and demeanor assume more significance because of the increased employee and public contact. A higher degree of technical knowledge is required in reference to the limitations in authority and the enforcement of site regulations and the scope of activities and areas with which the security officer must maintain a working knowledge. This skill level includes basic technical competence to operate technological systems utilizing keyboarding skills, mouse clicks, joy sticks or other technology tools. This skill level includes the ability to document events in written form, the ability to maintain a journal and to complete basic incident reports.

Skill Level 3: Security Guard (Officer) III

The technical skill required is representative of the peak of skill capability both in emergency response requirements, the handling of confrontations, and the successful interface of the protective force with agency employees, visitors, and contractors.

Skill Level 4: Security Guard (Officer) IV

This skill level represents the requirement for a complete operational knowledge of the life/safety and security system and the responsibilities and response capabilities of each post in an active status. Beyond the high degree of technical and procedural knowledge is the requirement to exercise disciplined response decisions in directing security guards (officers) to meet the various normal and emergency service requirements that will occur.

Skill Level 5: Sergeant

This skill level requires a complete and thorough knowledge of the life/safety, security, and administrative system appropriate to the secure maintenance of the agency's site. A capability must exist to make disciplined response decisions in directing security guards (officers) to meet the necessities of developing emergency situations. The individual must be capable of executing command decisions that promote and maintain the best interests of the agency and administer the demands and necessities of the protective requirements on a given shift, while exercising due regard for individual skill levels and

cost-effective staffing assignment at all times.

Skill Level 6: Lieutenant/Captain

This skill level requires tested and proven supervisory capabilities. This person is required to have a working knowledge of all posts for all shifts. They will be required to participate with training, developing, and disciplining subordinates on an assigned shift. This skill level will require a capability to maintain control over performance and costs. This skill level includes the ability to review and if necessary edit documentation of events in written form and the ability to complete more complex reports such as monthly incident matrixes.
