SPECIFICATIONS

The West Virginia State Rail Authority is soliciting bids for minor track realignment, installation of a concrete crossing surface and a new crossing signal system at the 11th Street crossing in Elkins, West Virginia on its West Virginia Central Railroad (WVCR).

DESCRIPTION

The crossing at 11th Street includes the turnout at the apex of the wye track which connects the main line with the depot. (See diagram). The crossing was completely renewed in 2001 however problems have developed that need to be addressed. Rail traffic over the crossing will increase dramatically when the bridge and tracks leading to the depot are completed.

SCOPE OF WORK

A. Track Alignment and Grade Crossing Surface

1. Prior to the commencement of work, contractor will contact Durbin & Greenbrier Valley Railroad, operator of the West Virginia Central Railroad, with regard to rail traffic and track time. Contractor will also contact the City of Elkins to coordinate the handling of vehicular traffic over that portion of 11th Street affected by this work. The crossing may be kept closed during the renewal work. Since this is a heavily traveled city street, it is expected that the contractor will minimize the duration of each closure.
2. No materials or equipment may be placed on property adjacent to the right of way without the property owner's permission.
3. Contractor will remove the existing crossing surface and enough pavement to permit the required track and signal work.
4. Rails will be respiked as necessary in the turnout and north leg of wye track realigned for proper curvature and surface. Guard rails must be proper height for running rails.
5. New crossing surface shall be reinforced concrete panels that extend two feet beyond the edge of the roadway. They will be custom fitted to this specific crossing.

B. Grade Crossing Signal System

Contractor will replace the existing motion sensor system with a new motion sensor system. This includes all components in the signal house, in-track components and cabling.

MATERIALS

The contractor will provide all materials for this project.

No materials or equipment may be placed on property adjacent to the right of way without the property owner's permission.

The rubber flangeway material and all of the components of the existing signal system shall remain the property of the WVCR.

All debris, refuse and other materials shall be removed from the site and disposed of properly.

PERFORMANCE OF WORK

All work must be completed by June 30, 2007. The cost to the SRA for the administration of the contract as well as for train delays that will be incurred after that date make it necessary for the agency to assess liquidated damages against the contractor for each calendar day any work remains uncompleted after that date. The charge will be \$500.00 per day.

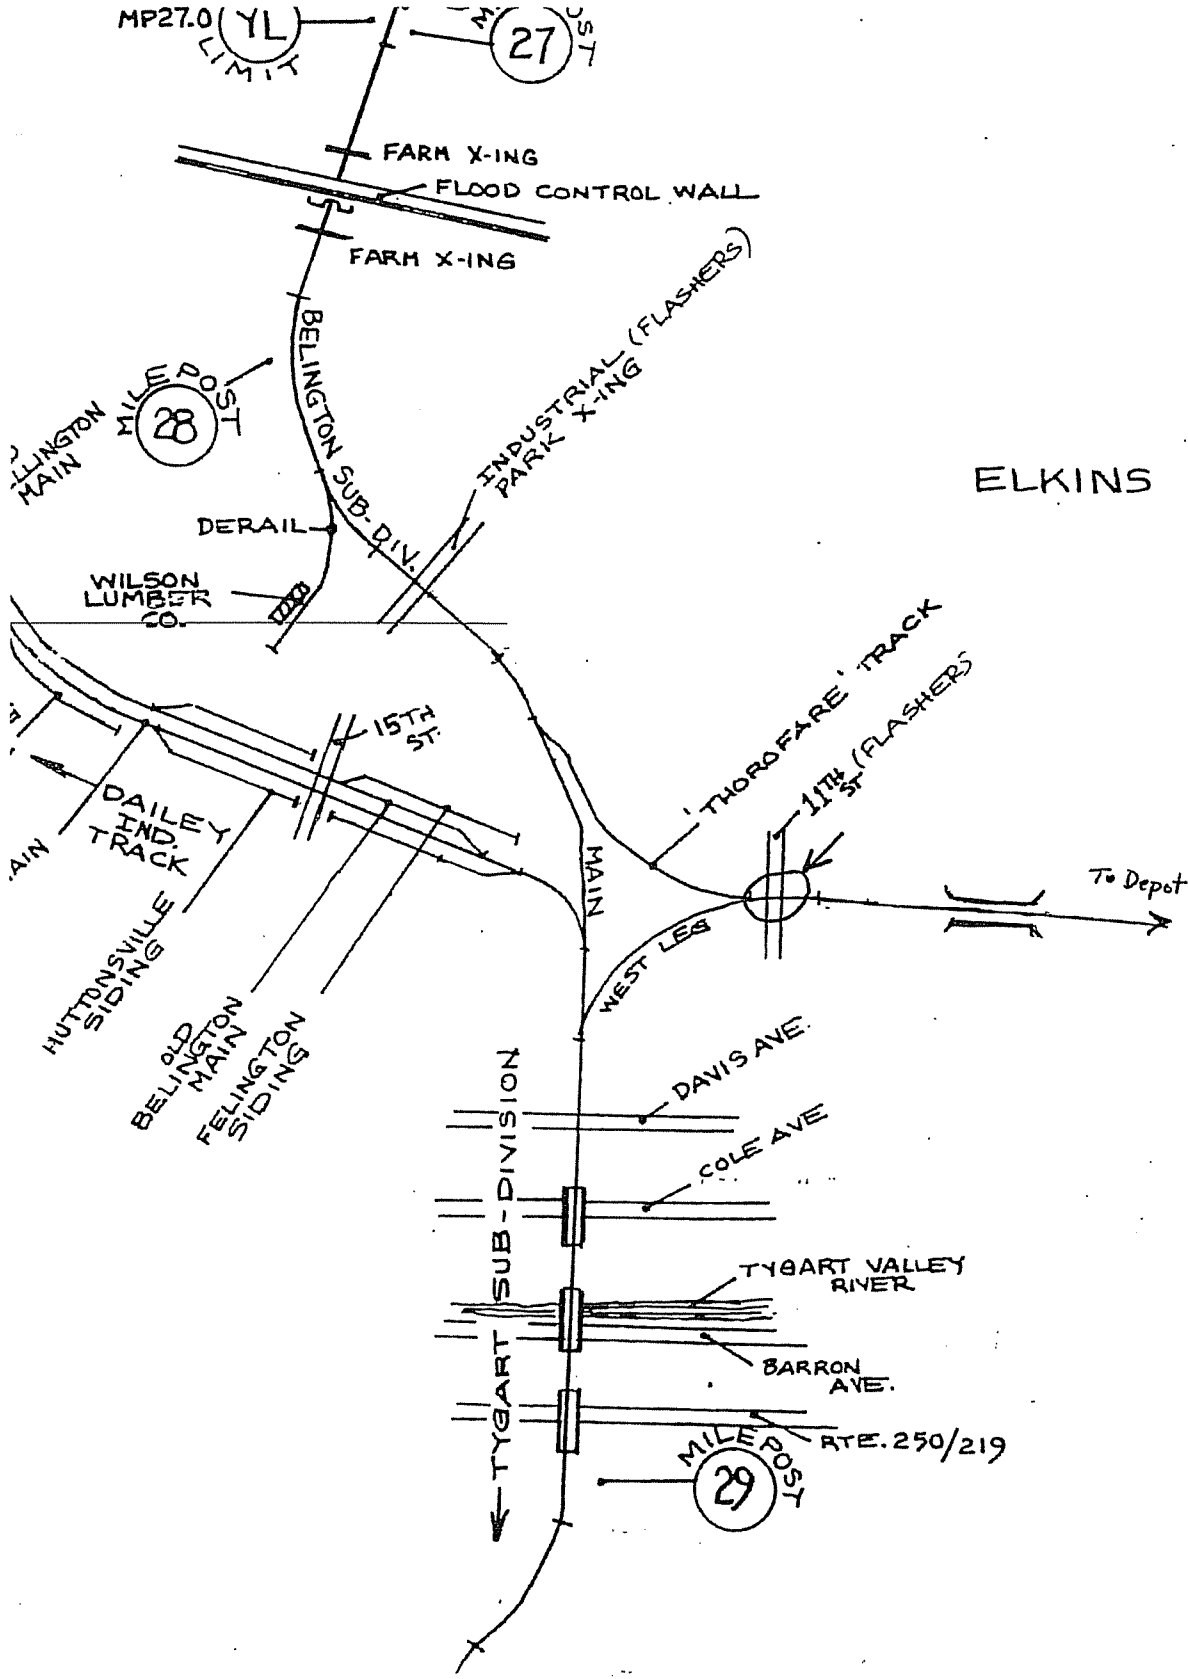

A pre-construction meeting will be held with the successful bidder, SRA, WVDOH, City of Elkins and Durbin and Greenbrier Valley Railroad (operator of the WVCR) to ensure proper coordination between all parties.

BID REQUIREMENTS

Contractor **MUST** have previous experience with track work and crossing signal systems.

A mandatory prebid meeting will be held on February 13, 2007 at 1:00 pm at the 11th Street grade crossing in Elkins. Contractors wishing to attend must inform Michael Austin via e-mail at maustin@wvadmin.gov or by fax at 304-558-4115 by February 9, 2007. Questions prior to the prebid inspection must be submitted in writing to Michael Austin at the above e-mail/fax and will be addressed at the meeting.

Bid must be one lump sum including all associated costs for the project. The project will be awarded to the lowest qualified bidder.
