Layland Coal Company O-20-85
DEP13717
Addendum No. 1

Q1. Do we have to put any rock or anything back in there (area of washed out haulroad pipe)?

A1. We will just open it up and regrade the slopes back, you need to pull them back more than they are now.

Q2. Do you have a (specified) sized pipe on that (temporary pipe on the haulroad)?

A2. We did not specify, just adequate to carry the flow.

Q3. If you got in here this winter, I saw the specs. You can't topdress after September 15, if we demobilize, do we take the crossing out?

A3. We will wave that topdressing (deadline), if you get in here. I would highly doubt you would get in here this year since this is the 18th of October and this is not a site you would want to work when it is wet.

Q4. The rest of the slopes that don't have the black (material), you don't mess with it?

A4. No, we're not going to mess with it. There are a few areas that are bare that you'll need to do something with, but if it's got vegetation on it we're just going to topdress it. Don't disturb the vegetation, tree, or shrubs anymore than you have to.

Q5. In your topdressing you have black locust, you're not going to put it in there (area or site currently mowed by landowner) are you?

A5. We are going to plant it, it is a permit requirement.

Q6. Does the borrow area go above the road up around the top of that (slope)?

A6. There is really no road up around the top of it. Above the top of it they took some material off previously, there is a flat area up there. The borrow area goes into the timber, it's undisturbed area.

NOTE: Discussed with prospective contractors that there was a typo on the front page of the RFQ now reads Layland Coal Company, permit number O-25-85. The front page of the RFQ should read Layland Coal Company, permit number O-20-85.
