**Req # DEP 14242  
Meador (Kiser) Portals Prebid Addendum #1**

The following additions/questions/answers will not cause any increase in the lump sum bid for the project.

Bid opening date was announced at the prebid meeting as 2/28/08. Bid opening date is actually 2/26/08.

Add to Construction Specification 10.1 – “The existing driveway affected by construction activities shall be maintained in a better than or equal to condition during construction activities. The driveway to receive crushed stone shall have the 4” minimum layer of crushed stone placed at the completion of the construction activities”.

**Questions asked at the prebid meeting and answers.**

**Site 1**

Q: Are there any batgates to be installed?

A: No.

Q: Is this the ditch to be cut in solid rock?

A: Yes.

Q: Is the Contractor required to hook up the resident to the concrete cistern?

A: No, the Contractor is required to install the cistern as outlined in the Construction Specifications but is not required to hook up to the residence.

Q: Is this the resident's main water supply?

A: No.

Q: Is this another opening that way? (pointed to the right).

A: This is part of the same opening and is to be backfilled with stone and soil covered to blend with the main opening beside it but will not receive a pipe.

Q: Is the path we walked in on the access?

A: The path is within the construction limits and is substantial enough to walk on but there is no guarantee that the path will hold equipment without failing. The Contractor will be responsible for cleaning up any slides created.

Q: Does the grouted channel go to the pipe?

A: Yes, the grouted channel goes to the pipe and is to be formed into a headwall at the pipe as is shown on the drawings.

Q: Is the existing pipe at the road crossing to be removed and the new pipe installed at the existing pipe location?

A: No. The existing pipe and existing channel is to remain in place. The new pipe and road crossing is to be constructed at the location shown on the drawings.

## Site 2

Q: If we do not cut the roots to the Buckeye Tree, can we leave the tree?

A: No. The tree is directly in front of the portal and the local residents expressed interest in having the tree removed so it does not fall across the road. The tree is to be removed offsite.

Q: Can we leave the stump?

A: No, the stump is to be removed offsite, however, the proposed rock riprap ditch from the mine seal can be adjusted to go through the area where the stump is to be excavated.

Q: Does the Contractor need to get a permit to cross the small stream to get to the portal?

A: Yes, a PLC permit will always be required when crossing a stream or doing work within a stream bank.
