## REQUEST FOR QUOTATION

The West Virginia Purchasing Division for the agency, the West Virginia State Rail Authority, is soliciting bids for the construction of trackage including turnouts at an industrial site in Petersburg, West Virginia on the agency's South Branch Valley Railroad.

### Description of Work

Contractor will construct 3,000 track feet of track and four No. 8 turnouts as shown in the attached diagram (Attachment A).

Layout: Contractor will mark the location of all trackage in the field according to the track diagram.

Subgrade shall be 24 feet wide (12 feet on each side of the centerline).

Subballast shall be four inches deep over the 24 foot width of the roadbed.

Turnouts will follow AREMA design specifications. Switch stands will be placed eight feet from the centerline of the track. Each switch stand will be equipped with a bow handle and have a target properly positioned to indicate the position of the switch. Filter fabric will be placed under the ballast at all turnouts.

Crossties will not be spaced in excess of 24" centers. Ties will be handled carefully to avoid damage in accordance with AREMA specifications.

Crossties will be spiked to a gage of 56 ½ inches, plus or minus ¼ inch. Spikes shall be started and driven vertically and square with the rail. They shall have full bearing against the side of the rail base. Spikes shall not be overdriven. Spiking pattern shall be as shown in Attachment B.

Rail anchors will be properly fitted against the ties and will not be moved by driving them along the rail. Anchors shall be applied as shown in Attachment C. Turnouts will have all ties box anchored.

There will be six inches of ballast beneath the ties and between the ends of the ties and the slope of the ballast shoulder. Cribs will be filled but no ballast will be left on top of the ties.

All trackage will be lined and surfaced. Two insertions will be made per tie. Ballast will be regulated for proper shoulders.

Equipment and materials can be stored on-site. On-track equipment can be kept in certain side tracks in Petersburg near the work site. Contractor must not foul the main or runaround tracks without permission from SBVR.

Contractor will be responsible for any damage to track, right-of-way or adjoining property caused as a result of its work.

Contractor will be responsible for clean up of the work site. All debris and refuse will be removed from the site and disposed of properly.

Contractor will use the Heavy and Highway Construction Rates as established for Grant County. These rates are pursuant to WV Code 21-5A, et., seq. and are available at [www.wvsos.com/adlaw/wagerates/heavyhighway07.htm](http://www.wvsos.com/adlaw/wagerates/heavyhighway07.htm). The contractor shall be responsible for submitting certified payrolls to the State Rail Authority.

### Materials

SBVR will provide the following:

All 100RB rail, joint bars and tie plates required for the turnouts and track.

Contractor will provide:

Four reconditioned 100RB #8 RBM turnouts per AREMA design specifications. Switch stands will be New Century adjustable type with bow handles and targets.

Switch ties for four #8 turnouts per AREMA specifications. These ties are to be oak and mixed hardwoods, 100% end-plated and creosote pressure-treated to 7# retention or refusal.

Filter fabric for all turnouts that is sixteen-ounce needle punch, non woven.

Ties will be new 7"x 9"x 8'6" industrial grade. Specifications in AREMA Chapter 3 will govern. Ties will be mixed hardwoods and oak, 100% end-plated and creosote pressure treated to 7# retention or refusal.

Spikes – new, 5/8 inch by 6 inch conforming to AREMA specifications.

Track Bolts – new, standard heat-treated carbon steel track bolts and nuts shall conform to the type and weight of track material being used. Spring washers of the appropriate size shall be used on each bolt.

Rail Anchors – shall be the proper size for the rail to which they are applied. Anchors will be new or reformed and be compatible with industry rail anchor machines.

Subballast shall be crusher run granite or limestone.

Ballast shall be crushed stone or crushed slag and shall conform to the current AREMA "Specifications of Prepared Stone, Slag and Gravel Ballast." Size of ballast shall be AREMA #3 as indicated below:

Size of Opening	Percent Passing by Weight
2 1/2"	100
2"	90-100
1 1/2"	35-70
1"	0-15
1/2"	0

#### Completion Date

All work must be completed by June 30, 2008. The cost to the SBVR for the administration of the contract as well as for train delays that will be incurred after that date make it necessary for the agency to assess liquidated damages against the contractor for each calendar day any work remains uncompleted after that date. The charge will be \$500.00 per day.

#### Bid Requirements

Contractor MUST have previous experience railroad track construction.

A mandatory pre-bid meeting will be held on Tuesday, March 25, 2008 at 10:00 am. Everyone will meet at the Sparking lot of the South Side Depot located at the crossing of the SBVR and South Main Street in Petersburg. Contractors wishing to attend should inform Chuck Bowman at 304-558-2157 by March 20, 2008. Questions prior to the prebid meeting should be submitted in writing and will be addressed at the meeting.

The quantities in the RFQ are for estimating purposes only.
