WHITES RUN HIGHWALL & PORTALS

2006 JUL 10 PM 2:55 ADDENDUM #1

HEADQUARTERS DEP14365

The following questions and associated responses are from the Pre-Bid Conference for the above referenced project.

Question: The cut and fill sections do not totally balance. Can the final grades be adjusted as necessary?

Answer: The sections were not revised when the passive treatment systems were deleted from the plans. So, yes, the final grade can be adjusted to account for this small discrepancy.

Question: Can on-site rock from the excavation of the highwall be utilized in channel construction?

Answer: The only such rock that can be utilized is the placement of random boulders for the natural stream channel construction. Otherwise, as per Specification 7.2.1, an acid/base account shall be required on sandstone to ensure that it is not acid producing, but commercially purchased limestone is preferred.

Question: Are the component structures for natural stream channel construction supposed to be installed on only one side of the channel as per the detail?

Answer: The component structures are to be installed on both sides of the channel, but not directly across from each other.

Question: Does the geomembrane apply to both of the natural stream channels?

Answer: No, it applies to Channel No. 7 and not Channel No. 6.

Question: Does the installation of the geomembrane require it to be seamed or can it be overlapped?

Answer: It is required to be seamed.

Question: Is it required to submit a written drug policy with the bid?

Answer: No. The purchasing affidavit was revised on July 1, 2008. The contractor is only required to sign an up to date purchasing affidavit prior to award of the contract. The Purchasing Division will provide the revised form to the contractor.

Question: The plans show something like 20 marks per property line?
Answer: The property lines are to be re-established by providing markers at 50 foot intervals.

Question: For what area was blasting proposed?
Answer: To achieve the final grade where cut is shown in rock through the upper part of the highwall.
