Addendum #1 – RMA900030

Any items not specifically addressed in this addendum remain the same as stated in the original RFQ.

1. Will there be a letter from Allegheny Power stating the contractor can put the cameras on the pole and that the contractor is in no way responsible for the use of the poles?
 - The successful bidder will work with the State Rail Authority to identify the poles that will be used for the camera installation. The State Rail Authority will enter into an agreement with Allegheny Power for the use of these poles. The contractor will receive a copy of the agreement.
2. Is it ok to bid an 8 channel DVR?
 - Yes an 8 channel DVR is acceptable
3. Is there an area to place the DVR at the train station?
 - The contractor is responsible for providing a small cabinet or building that will have no windows and be made of steel. The building is to be lockable. The building size only has to be large enough to accommodate the DVR and it must be climate controlled. The building/cabinet will be placed at the most convenient location for the camera system. It will be located on the property owned by the state. The first parking lot closest to the railroad tracks is owned by CSX Transportation. The other parking lots are owned by the state and this area is where the building/cabinet can be placed.
4. What keys are to be provided?
 - Contractor is to provide keys to the SRA for any lockable item. Such as the steel building and/or a lockbox.
5. Are the wires from the cameras to the DVR going to be run aerial above the parking lot or are the wires to run under the lot?
 - This is at the option of the contractor. However, if wires are run under the lot it will be the contractor's responsibility to cut and replace the asphalt and use proper conduit around the wires.
