Addendum #3  
DEP14839

Question #1:

According to Detail 19 Sheet C-16, the erosion control matting is to be placed on surfaces 3:1 or greater. It would appear that the majority of the site is to have erosion control matting. Is this the intent?

Response:

The majority of the site is slope at 10:1 to 5:1. The 3:1 slopes are located along the perimeter of the site.

Question #2:

In Addendum #2 Question #3 states Does the diversion trench have to be lined? The response states that it is to have HDPE liner installed with a 3' min. run-out length. Can you please provide a typical showing this detail? What is the intent of the design?

Response:

The previous response is adequate to bid. The detail will be revised prior to the package being "Issued for Construction".

The purpose of the trench is collect groundwater before it enters the landfill and becomes leachate that will have to be collected and treated. The uncontaminated water that is collected in the trench can then be discharged to surface water. To that end, the liner system that will be installed is intended to prevent groundwater from coming into contact with the waste and becoming leachate. As far as we are concerned, the trench and liner system must be installed per the design.

Question #3:

On Sheet C-6, Detail #2 doesn't give the finished width of the flat bottom ditch. Can you provide this distance?

Response:

The bottom width is 3 feet.
