**PART 2 OPERATING ENVIRONMENT**

2.1 **Location:**

**Directions to Pringle Run #2**

**Site 1**

From Philippi travel to Kingwood. At the intersection of Routes 7 and 26, travel east on Route 7 for 1.5 miles then turn right on Route 72. Travel south on Route 72 for 4.3 miles then turn right onto a stone base road, immediately after crossing the Pringle Run Bridge. Proceed through the gate, up the hill, for 0.5 mile to the site.

**Site 2:**

From Site #1 continue an additional 0.4 mile, bear right, continue straight ahead, then bear right again. Travel 0.1 mile, bear right again and travel 0.1 mile, then continue straight. Travel 0.4 mile, then turn right, and proceed through a metal gate. Travel 0.4 mile. After crossing the stream, park and walk the old haul road on the right for about 600 feet to the site, which is located just above the stream.

**Site 3:**

From the bridge at Site #2, continue an additional 0.2 mile, bear right, then travel 0.7 mile up the hill, to the site along both sides of the road.

**2.2 Background:**

Firms are to be licensed Architectural/Engineering Firms (A/E) and should be familiar with, and have a successful track record of design of similar projects. The anticipated contract will be for "full-service" A/E design. Aspects of the design are to include, but not be limited to, Civil, Structural, Geological and Hydrological.

*The successful A/E will be responsible for **Design** of the following:*

**Site 1** consists of a hazardous structure, deep mine portals, highwall and acid mine drainage. A large steel tippie, measuring approximately 45' high x 15' wide x 15' long, sets beside the roadway and can be easily accessed by any of the numerous military and/or recreationalists that regularly visit the area. Attached to the top of the tippie is a 30' long steel framed conveyor belt leading back to a steel hopper, located near the top of the spoil outslope. On the highwall bench, above and behind the tippie, were three deep mine portals. One portal was open (2' high x 6' wide) while the other two were completely collapsed. All of the portals had discharges with flows ranging from an estimated 2-3 gpm to upwards of 50-75 gpm. Field water tests showed a pH of 3.4 with the iron content of 8 mg/L. The highwall was about 20 feet in height and approximately 400 feet long. Old tires and pieces of rusted metal were scattered on the bench near the hopper. Site visitation is evident due to the close proximity of the tippie to the Camp Dawson access and training area road and scattered debris behind the tippie.

**Site 2** consists of three or possibly four mine portals, coal refuse, a metal conveyor, highwall, impounded water, scattered piles of metal and tires, and two small block/stone buildings. Two deep mine portals were completely collapsed and had discharges ranging from an estimated 1 to 30 gpm that flowed directly into Pringle Run. In front of one portal was a small, partially collapsed block building, about 6 feet wide x 10 feet long, which may have been an old powder

magazine. A third portal to the north had a 12' wide opening but was flooded to the roof and discharging an estimated 25 to 50 gpm. Located in front of the two southern portals was an unvegetated coal refuse pile covering about 1 acre and measured approximately 125 feet wide x 150 feet long x 15 to 20 feet in height with its toe extending down into the creek channel. At its base were numerous AMD seeps flowing directly into the stream. A second refuse area further to the north consisted of small scattered, partially vegetated piles located on the bench and covered a total of about 1 acre. Located near the county road is a small block and cut stone, partially collapsed, foundation measuring about 12' x 15' x 6' in height along with a small concrete box measuring 18" x 24" x 12" high, with no cover. Located on the northern refuse area was a rusted metal conveyor belt frame about 75' long x 15' high along with a smaller metal conveyor section nearby. Below the northern most portal was a ¼ acre surface impoundment filled with AMD that adversely impacts a 1 acre area below, next the stream. A partially sloughed-in highwall is also on site and measured 300' in length x 25 to 35 feet in height.

**Site 3** includes portals, coal refuse, impounded water, acid mine drainage and a mine building. Near the northern edge of the site, above the road, were two partially open but flooded deep mine portals. Located in front of the portals was a 1/4 acre pond measuring about 50 feet x 75 feet, filled with AMD, and estimated to be 3 to 4 feet in depth. Flow from the pond was estimated to be about 50 gpm. Field water tests showed a pH of 3.9 with the iron content of 4 mg/L. About 300 feet east of the pond was the collapsed remains of a small, wooden shed measuring about 6' wide x 8' long. South of the pond, on the opposite side of the roadway, was a mostly unvegetated coal refuse pile covering an estimated 1 to 2 acres that extended down slope towards the stream. Site visitation was evident throughout the problem area with ATV trails, household garbage, and the close proximity of the country road to the site.

Location Map is attached (Attachment A1).

Preliminary design documents will be due 60 days from the issuance of the Purchase Order.

"In the procurement of architectural and engineering services for projects estimated to cost two hundred and fifty thousand dollars or more the director of purchasing shall encourage such firms engaged in the lawful practice of the profession to submit an expression of interest, which shall include a statement of qualifications, and performance data and may include anticipated concepts and proposed methods of approach to the project. All such jobs shall be announced by public notice published as a Class II legal advertisement in compliance with the provisions of article three [§59-3-1et seq.] A committee comprised of three to five representatives of the agency initiating the request shall evaluate the

statements of qualifications and performance data and other material submitted by the interested firms and select three firms which in their opinion are the best qualified to perform the desired service. Interviews with each firm selected shall be conducted and the committee shall conduct discussions regarding anticipated concepts and the proposed methods of approach to the assignment. The committee shall then rank in order of preference no less than three professional firms deemed to be the most highly qualified to provide the services required, and shall commence scope of service and price negotiations with the highest qualified professional firm for architectural or engineering services or both. Should the agency be unable to negotiate a satisfactory contract with the professional firm considered to be the most qualified, at a fee determined to be fair and reasonable, price negotiations with the firm of second choice shall commence. Failing accord with the second most qualified professional firm, the committee shall undertake price negotiations with the third most qualified professional firm. Should the agency be unable to negotiate a satisfactory contract with any of the selected professional firms, it shall select additional professional firms in order of their competence and qualifications and it shall continue negotiations in accordance with this section until an agreement is reached."

**DEFINITIONS:**

"Debt" means any assessment, premium, penalty, fine, tax or other amount of money owed to the state or any of its political subdivisions because of a judgment, fine, permit violation, license assessment, defaulted workers' compensation premium, penalty or other assessment presently delinquent or due and required to be paid to the state or any of its political subdivisions, including any interest or additional penalties accrued thereon.

"Debtor" means any individual, corporation, partnership, association, limited liability company or any other form or business association owing a debt to the state or any of its political subdivisions. **EXCEPTION:** The prohibition of this section does not apply where a vendor has contested any tax administered pursuant to chapter eleven of this code, workers' compensation premium, permit fee or environmental fee or assessment and the matter has not become final or where the vendor has entered into a payment plan or agreement and the vendor is not in default of any of the provisions of such plan or agreement.
