AML Southern Drilling Open-End Contract

1 – What are the diameter sizes required for the piezometers, both aluminum and PVC?

Response: Both are 2" diameter.

2 – Is there a specification for the aluminum piezometers?

Response: Schedule 40

3 – Specifications state that hazardous samples are to be returned to the vendor for proper disposal. How is the vendor to be reimbursed for the disposal cost?

Response: Add to Specifications : I – D – Hazardous Material Testing – Contractor will take samples and have samples analyzed per state and federal regulations. Response: Video Monitoring consists of inserting a down hole camera and light into core holes to video conditions underground.

5 - What is the casing size for the camera used for video monitoring? It is normally 4", is that sufficient?

Response: The camera needs to be capable of going down a 2" borehole.

6 – Can DEP recommend or suggest some area laboratories that can perform all or most of the tests required by this contract. Vendor is being told by all the laboratories contacted that they can only perform one or two of the tests required under this contract.

Response: No. The vendor is responsible for finding adequate laboratories. There are several in West Virginia and elsewhere.

7 – Line item 15j calls for a "temperature probe reading", is this a lab or field test.

Response: This is a field test.
