Addendum No. 1

Question:

Describe the existing Harris control network fabric for the existing routers at WNPB-TV. Is it Ethernet (Cat 5) or Serial Control based? Which model number controllers are being used?

Response:

At this time we are running one Leitch Integrator SD SDI video and one Leitch Integrator AES audio tub, both 64 input by 32 output. We use the Harris/Leitch X-Y Control Bus running on coaxial cable for remote panels and inter tub connection. We currently program our system with a serial connection to one of our tubs. At this time we have an assortment of controllers: Leitch ABA2 XYp & 64x1p and Harris RCP-64x1p remote panels, but are not limiting our system to only these units. All programming and configuring of the system is done with Harris/Leitch Router Mapper software.

Question:

Should toll free phone support be during normal working hours, or 24/7?

Response:

Normal hours are acceptable.
