- 2.3 A mandatory vendor prebid conference is scheduled for 7/27/2009 at 10:30 AM the Hopemont Hospital conference room. Failure to attend the mandatory prebid conference will result in bid rejection.

3. SCOPE OF WORK:

- 3.1 To provide all labor, material, equipment and anything incidental to modernize one elevator in the Administration building of Hopemont Hospital so that the elevator is in full compliance with ASME 17.1-2004. The following specifications are required in the scope of work but the absence or presence of any requirement does not relieve the contractor from complying with the requirement to be in full compliance with ASME 17.1-2004. The contractor shall remedy any possible cites the elevator inspector determines are not in compliance with ASME 17.1-2004. Final payment will not be made until after the elevator inspector approves the modernization.

- 3.1.1 The existing elevator in need of modernization is an Otis traction elevator identified with the serial number of 103135. It services four landings and was installed in 1926.
- 3.2 Controller - The existing controller will be replaced with a new state of the art microprocessor. The new, advanced system shall operate from buttons located at each floor and in each car, and will utilize the latest in technology to optimize the elevator system, slow down and automatically stop cars at landings corresponding to registered calls.
- 3.3 System shall use easily reprogrammable intelligent software. Design basic algorithms will optimize service based on equalizing system's response to registered hall calls at shortest possible level and equalizing trip time at shortest possible time.
- 3.4 Door operation shall automatically open door when car arrives at a floor to permit transfer of passenger and automatically close the door after a timed interval.
- 3.5 System shall stop car within 1/8" above or below the landing sill. Avoid over travel as well as under travel, and maintain stopping accuracy regardless of load in car, direction of travel rope slippage or stretch.
- 3.6 The system shall include standard elevator features such as: Fire Service I & II, Independent Service, Attendant Service, Load Weighing and Emergency Power Service. The system shall use designs, components and assemblies that conform to or exceed the codes and standards applicable in the jurisdiction in which they are installed.
- 3.7 A new solid state, computerized AC vector drive will be installed and be suitable for operation specified and capable of providing smooth, comfortable acceleration, retardation and dynamic braking. Limit difference in speed between full load and no load to not more than +/-5 % of the contract speed.
- 3.8 Automatic Load-Weighting Bypass - Automatic bypass of hall calls shall be provided and be effective when the cars are operating on bank service. Load-weighing switches, which are actuated by the load in the car, establish bypass operation when the car becomes loaded. Once bypass operation is established, the car shall continue to bypass hall calls as long as it is loaded fully.
- 3.9 False Car Call Cancel - The False Car Call Cancel Feature shall be applied on all cars to operate in conjunction with the door protection system to discourage the registering of false calls. All car calls shall be canceled if the car makes two consecutive stops for car calls and the beam of the door protection system is not interrupted or the Load Measurement Device detects no load in the cab.

- 3.10 Firefighters Emergency Recall - An emergency return system shall be provided in full compliance with the latest state, local and ASME Code requirements. Heat, smoke and products of combustion sensing device (sensors) and sensor wiring to the elevator controller are included in the scope of this contract.

- 3.12 Firefighters Service Phase II - Contractor will provide Firefighters Service Phase II operation for use by trained emergency service personnel.

A key-operated switch as required by local regulations, will be provided in the car-operating panel of each car. The Firefighters Service Phase II operation will become effective when the Landing Fire Service switch is in the "ON" position or a smoke detector has been activated and the car has returned to the main or alternate Fire Service floor.

- 3.13 Independent Service - Independent Service shall be available to remove a car from the bank. When the switch is closed, the car is removed from the bank operations and all its existing car calls are canceled. Registering a car call shall initiate door closing and travel to the chosen floor. On arrival, the doors shall open and remain open until another car call is registered. The car shall respond to only one call at a time, and all other car calls shall be cancelled after the car makes its first stop.
- 3.14 Electrical – Contractor shall:

Furnish and install shunt trip breakers.
Furnish and install 110 volt disconnect switches for car lighting.
Furnish and install GFCI receptacles.
Furnish and install fluorescent lighting in the machine room.
