Addendum #1 - Questions During Pre-Bid Meeting

For DEP 15335

Belington Portals & Drainage

The following comments and questions were identified from the Pre-Bid Conference. The answers provided herein take precedence over verbal answers at the PBC should there be any conflict between the two.

Questions:

1. **Q.** Is there a provision for adjusting bid prices during construction due to escalation of fuel costs?
A. No.
2. **Q.** Why can't the 24" HDPE pipe be extended to the creek in place of the grass lined ditch?
A. There is not enough drop in elevation from the outlet of the pipe to the creek to accommodate a 24" pipe.
3. **Q.** Are water quality analyses of the mine drainage available?
A. See attachment.
4. **Q.** Are the rock check dams to be removed and if so, when?
A. Yes. They may be removed once adequate vegetation has been established on whatever disturbed area for which they were installed to control sedimentation. This could require or may not require the contractor to remobilize equipment to the site.
5. **Q.** Is there any riprap protection required on the outlet of Ditch H?
A. No.
6. **Q.** There is a conflict between what is indicated by the drawing details and what is required by the specifications for pipe trench bedding and backfill.
A. In order to resolve any confusion, the following details with associated notes shall apply for the corresponding condition encountered for the specific surface conditions. See attachments.
Vegetated Surface
Aggregate Surface
Paved Surface
7. **Q.** How is the pond on Site A to be eliminated?
A. Dewater the pond and use excess material from the wet/modified mine seal excavation to fill in the area and regrade to the approximate lines and grades shown on the plans.

Addendum #1 – Belington Portals & Refuse
DEP15335
Page Two

8. **Q.** Is the quantity of fill to cover the exposed portion of the 24" HDPE pipe exiting the manhole and outletting to the creek on Site A known?
A. No. There is not sufficient mapping of the area in question to accurately depict the existing conditions.

9. **Q.** Is an A.C.O.E. Permit required for working in the stream?
A. No. the proposed work does not take place in the actual stream. There is no fill to be placed below the normal high water mark of the actual stream.

10. **Q.** How is the contractor paid for the work associated with covering the pipe?
A. Since the fill material is to come from excavation of pipe trenches, that is included in the pipe installation item. A pay item is provided on the Bid Schedule for the riprap that is to be placed for streambank slope protection. Also, a pay item is provided for the 24" HDPE pipe that is to be installed. The contractor is advised to bid the work in accordance with the above referenced bid items. However, some variation to the proposed plan design may be required in order to accomplish the desired result.

The Contractor shall have 150 days from the date of the Notice to Proceed to complete construction activities on the project. The \$250.00 per day liquidated damages clause will be in effect after the 150 days. However, the total performance period will be 365 days from the date of the Notice to Proceed for invoicing purposes.
