**PART 2 OPERATING ENVIRONMENT**

**2.1 Location:** Agency is located at 1409 Greenbrier Street, Charleston, WV 25311. Denmar Correctional Center is located at HC 64 Box 125 Hillsboro, WV in Pocahontas County.

**2.2 Background:** The West Virginia Division of Corrections is seeking the services of a qualified professional design firm to design a system to replace the existing two (2) water storage tanks. The summary of the existing water storage tanks and system is as follows:

It is believed the first water storage tank was constructed in 1953. The estimated size of the tank is thirty feet (30') in diameter by twenty-eight and a half feet (28.5') tall and will hold an estimated 149,407 gallons. The estimated weight of the first tank is around twelve (12) to thirteen (13) tons. It is believed the second water tank was constructed in 1972. The estimated size of the tank is thirty-four feet (34') in diameter by twenty-four feet (24') tall and will hold an estimated 126,895 gallons. The estimated weight of the second tank is around twelve (12) to thirteen (13) tons. It is unknown when the two (2) foundations were constructed. At this time, we can only assume it was when the water tanks were installed. The elevation of the foundation to the tank that was built in 1953 is about four feet (4') lower than the tank that was built in 1972. The elevation of the top of both tanks is about the same.

The water is pumped from the Greenbrier River and goes through a treatment plant. The water is then pumped up to the two (2) storage tanks. The water then goes to the Facility as needed. The existing pipe is six inch (6") ductile iron with cement inside. There is one (1) pipe from the treatment plant that feeds water to both tanks. The water storage tanks are filled up by gravity and area of least resistance. There is one (1) pipe from the two water storage tanks that

goes to the Facility. The water drains out of the same pipe from the tanks as it enters. The piping system is a cross connected system. Each water storage tank has one (1) drain pipe that extends about fifty feet (50') to sixty feet (60') from the water storage tanks. The DOC is also interested in installing the pipes in the best designed and constructed method.

### **PART 3 PROCUREMENT SPECIFICATIONS**

3.1 **General Requirements:** The chosen firm will proceed with Design and Engineering services for the replacement of the two (2) existing water storage tanks located at Denmar Correctional Center.

3.2 **Project Description:**

3.2.1 **Design and Engineering Services:** Provide a complete, 100%, package that includes all required Drawings and Specifications ready for construction bidding by the West Virginia Purchasing Division. During the design phase, the following must be considered:

3.2.1.1 If the new water storage tanks will be installed in the same place as the existing, the Facility cannot do without both storage tanks at the same time. The first tank removed must be re-constructed and in operation before the second tank is to be removed.

3.2.1.2 Existing concrete foundations must be removed and replaced with new. Because of that, the area will need to be tested by a Geotech Engineer.

3.2.1.3 At edge of each new foundation, a pre-cast concrete box where the shutoff valves for the water line inflow/outflow pipe and drain pipe are easily accessible.

3.2.1.4 All existing piping from the water treatment plant to check valve is to remain. New check valve and gate valve to be replaced and new six inch (6") ductile iron pipe to the new tanks. All existing pipe from the Facility to the thirty feet (30') from the X crossing to remain. New six inch (6") ductile iron pipe to be installed to the X crossing. Existing drain lines to be removed and new six inch (6") ductile iron pipe to be installed.

3.2.1.5 The two (2) existing water storage tanks will need to be replaced with two (2) new, 151,000 gallon or close equivalent amount, water storage tanks to be installed. Both water storage tanks to be the same size. The DOC is interested in the best value for the least amount of maintenance cost for the 30 to 40 years from the new tanks being installed.

The contract for the design and engineering services with the qualified professional design firm will end once the design, engineering, administrative and contract oversight services has been completed through the West Virginia Purchasing Division.
